Commission de Surveillance du Secteur Financier

Important Information

Prospective investors are advised to review this Prospectus (including the Relevant Supplement(s)) and the KIID(s) carefully and in their entirety and, before making any investment decision with respect to an investment in a Fund, should consult a stockbroker, bank manager, lawyer, accountant or other financial adviser for independent advice in relation to: (a) the legal requirements within their own countries for the purchase, holding, exchanging, redeeming or disposing of Shares; (b) any foreign exchange restrictions to which they are subject in their own countries in relation to the purchase, holding, exchanging, redeeming or disposing of Shares; (c) the legal, tax, financial or other consequences of subscribing for, purchasing, holding, exchanging, redeeming or disposing of Shares; and (d) the provisions of this Prospectus.

The Board has taken all reasonable care to ensure that the information contained in this Prospectus is, to the best of its knowledge and belief, in accordance with the facts and does not omit anything material to such information. The Board accepts responsibility accordingly.

No person is authorised to give any information or to make any representation other than those contained in this Prospectus, and any subscription and/or purchase made by any person on the basis of statements or representations not contained in or inconsistent with the information contained in this Prospectus shall be solely at the risk of the subscriber/purchaser. Furthermore, the delivery of this Prospectus or any issue of Shares shall not, under any circumstances, create any implication that the affairs of the Company have not changed since the date of this Prospectus.

Subscriptions are not valid unless they are based on this Prospectus or the KIID in conjunction with the most recent annual report and the most recent semi-annual report where this is published after the annual report.

Investors should be aware that the price of Shares may fall as well as rise, and investors may not get back any of the amount invested. Risk factors for investors to consider are set out in the "Risk Information" section. Risks of particular relevance to the Funds are described in the Relevant Supplement.

In cases where an investor invests in the Company through an intermediary which invests into the Company in the intermediary's own name but on behalf of the investor, it may not always be possible for the investor to exercise certain Shareholder rights directly against the Company. Investors are advised to take advice on their rights.

The distribution of this Prospectus and the offering or purchase of Shares may be restricted or prohibited by law in certain jurisdictions. This Prospectus does not constitute and may not be treated as an offer or solicitation by or to anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make such offer or solicitation. It is the responsibility of any persons in possession of this Prospectus and any persons wishing to apply for Shares pursuant to this Prospectus to inform themselves of and to observe all applicable laws and regulations of any relevant jurisdiction.

As Shares in the Company are not registered in the United States in accordance with the U.S. Securities Act, or the securities laws of any of the states or possessions of the United States, and the Company is not registered under the U.S. Investment Company Act, they may neither be offered nor sold nor delivered directly or indirectly in the U.S., or to or for the account or benefit of any U.S. Person (as such term is defined in Regulation S under the U.S. Securities Act). A prospective investor will be required at the time of acquiring Shares to represent that such investor is not a U.S. Person or acquiring Shares for or on behalf of a U.S. Person or acquiring the Shares with the assets of an ERISA plan (as defined below).

Shares may not be acquired or owned by, or acquired with the assets of:

- i. any retirement plan subject to Title I of ERISA; or
- ii. any individual retirement account or plan subject to Section 4975 of the United States Internal Revenue Code of 1986, as amended;

which are hereinafter collectively referred to as "ERISA plans".

Shareholders are required to notify State Street Bank Luxembourg S.C.A., the Administrator, immediately in the event that they become U.S. Persons or otherwise hold Shares which might result in the Company incurring any liability to taxation or suffering pecuniary disadvantages which the Company might not otherwise have incurred or suffered, or requiring the Company to register under the U.S. Investment Company Act, or register any Class of its securities under the U.S. Securities Act.

Where the Board becomes aware that any Shares are directly or beneficially owned by any person in breach of the above restrictions, they may direct the

Shareholder to transfer his Shares to a person qualified to own such Shares or request the Company to redeem the Shares, in default of which the Shareholder shall, on the expiration of thirty (30) days from the giving of such notice, be deemed to have given a request in writing for the redemption of the Shares. The Shares will be redeemed in accordance with the provisions of the Articles.

The Company will be a "recognised scheme" for the purposes of Section 264 of the United Kingdom's Financial Services and Markets Act 2000.

The Prospectus and KIIDs may be translated into other languages. Any such translation shall only contain the same information and have the same meaning as the English language Prospectus and/or KIID. To the extent that there is any inconsistency between the English language Prospectus and/or KIID and the Prospectus in another language, the English language Prospectus and/or KIID will prevail. All disputes as to the contents of this Prospectus and related KIIDs shall be governed in accordance with the laws of Luxembourg.

1. Glossary

The following summarises the principal features of the Company and should be read in conjunction with the full text of this Prospectus.

1915 Law	the Luxembourg law of 10 August 1915 on commercial companies, as may be amended from time to time.
2002 Law	the Luxembourg law of 2 August 2002 on the protection of persons with regard to the processing of personal data, as may be amended from time to time.
2010 Law	the Luxembourg law of 17 December 2010 relating to undertakings for collective investment, as may be amended from time to time.
Administrator	the central administration agent, registrar and transfer agent, principal paying agent, and domiciliary and corporate agent appointed by the Management Company, with the consent of the Company, in accordance with the provisions of the 2010 Law and pursuant to an administration agreement, as identified in the “Directory” section of this Prospectus.
Application Form	form used to establish an account for purchases of Shares.
Articles	the articles of association of the Company, as may be amended from time to time.
Base Currency	the currency in which a Fund is denominated.
Board	the board of directors of the Company as identified in the Directory.
Board of Managers	the managers of the Management Company as identified in the Directory.
Business Day	a day on which banks are open for non-automated business in Luxembourg, the United Kingdom, and the country in which the relevant Sub-Investment Manager (for Funds where a Sub-Investment Manager has been appointed) is located, provided that each exchange or market on which a substantial portion of the relevant Fund’s investments is traded is also open and/or such other day or days as the Directors may determine and notify in advance to Shareholders. See also; Dealing Calendar.
CET	central European time.
Class Currency	the currency in which any Share Class is denominated.
Closing NAV	the NAV per Share of the relevant Share Class prior to any Performance Fee accrual and gross of the total costs and expenses at the end of each Performance Period.
Company	State Street Global Advisors Luxembourg SICAV.
CRS Law	the Luxembourg law dated 18 December 2015 implementing Council Directive 2014/107/EU of 9 December 2014 as regards mandatory automatic exchange of information in the field of taxation, as may be amended from time to time.
CSSF	<i>Commission de Surveillance du Secteur Financier</i> , the Luxembourg supervisory authority of the financial sector.
Dealing Calendar	the calendar of all non-Dealing Days for the Funds as available on www.ssga.com .
Dealing Day	every Business Day other than days during which normal dealing has been temporarily suspended.
Dealing Form	form used to subscribe for or redeem Shares in a Fund.
Depository	the depository bank appointed by the Company in accordance with the provisions of the 2010 Law and pursuant to a depository agreement, as identified in the Directory.

Dilution Adjustment	the Swing Pricing Adjustment.
Distributor	any person or entity appointed by the Company and/or the Management Company to distribute or arrange for the distribution of Shares.
Eligible State	any EU Member State, any member state of the Organisation for Economic Co-operation and Development, any member state of the European Economic Area, and any other state which the Board deems appropriate with regard to the investment objective of a Fund.
Embedded Costs	any costs incurred by each Fund and payable to the Investment Manager or its affiliates (as relevant) in relation to services provided by them in respect of a Fund or underlying funds in which the Fund invests.
ERISA	the United States Employee Retirement Income Security Act of 1974, as amended.
ESMA	European Securities and Markets Authority.
EU	European Union.
EU Member State	a member state of the EU States that are contracting parties to the agreement creating the European Economic Area other than the member states of the EU, within the limits set forth by this agreement and related acts, are considered as equivalent to the member states of the EU.
FATCA	the provisions of the United States Hiring Incentives to Restore Employment (HIRE) Act of 18 March 2010 commonly referred to as the Foreign Account Tax Compliance Act as well as any related regulations or official interpretation thereof.
FATF	Financial Action Task Force on Money Laundering.
Fund	a portfolio of assets established by the Directors (with the prior approval of the CSSF) and constituting a separate fund represented by a separate series of Shares and invested in accordance with the investment objective and policies applicable to such portfolio of assets.
Hedged Share Class	any Share Class where the currency exposure of the underlying assets is hedged against the Class Currency.
High-Water Mark	the higher of (i) the Closing NAV at the end of the previous Performance Period and (ii) the NAV per Share at which the last Performance Fee has been paid, in each case being the NAV per Share of the relevant Share Class and excluding any accrual for a Performance Fee and gross of the total costs and expenses.
Hurdle Rate	the rate of return provided by the Reference Asset (as defined in the relevant Supplement) in the Performance Period. The Hurdle Rate is not cumulative from year to year and resets at the beginning of each Performance Period.
Index	any financial index which a Fund will use, whether to track, outperform or otherwise reference, pursuant to its investment objective and/or in accordance with its investment policies, as specified in the Relevant Supplement.
Institutional Investor	institutional investors as referred to in articles 174 to 176 of the 2010 Law and defined by the administrative practice of the CSSF. Further detail on the definition of an Institutional Investor can be found “ Share Classes ” section of this Prospectus.
Investment Manager	the investment manager appointed by the Management Company and the Company in accordance with the provisions of the 2010 Law and pursuant to an investment management agreement, as identified in the Directory.

KIID	the key investor information document in respect of any Share Class within the meaning of the 2010 Law, the UCITS Directive, and Commission Regulation (EU) No 583/2010 of 1 July 2010 implementing the UCITS Directive as regards key investor information and conditions to be met when providing key investor information or the prospectus in durable medium other than paper or by means of a website, as updated from time to time.
Management Company	the management company appointed by the Company in accordance with the provisions of the 2010 Law and pursuant to a management company agreement, as identified in the Directory.
NAV	the net asset value of a Fund calculated as described in the “ Valuation and Calculation of the NAV ” section of this Prospectus.
NAV per Share	the net asset value of a Share in any Fund, including a Share of any Share Class issued in a Fund calculated as described in the “ Valuation and Calculation of NAV ” section of this Prospectus.
OECD	Organisation for Economic Cooperation and Development.
Performance Fee	performance-based incentive fee accrued and charged during the relevant Performance Period.
Performance Period	Each financial year of the Company running from 1 January to 31 December. For the purposes of any newly launched Share Class, the starting point shall be the date of the launch of the relevant Share Class and the ending date shall be 31 December. In case a Shareholder switches or redeems their Shares or a Fund is merged or liquidated during the year the ending date will be the Dealing Day at which such operation occurs.
Prospectus	this document, the Relevant Supplement for any Fund and any other supplement or appendix designed to be read and construed together with and to form part of this document as updated from time to time.
Qualifying Agreement	investment management agreement or other arrangements entered into between certain Institutional Investors and the Investment Manager or any of its affiliates, in each case in a format satisfactory to the Directors for the purpose of considering eligibility for Class B Shares.
Recognised Rating Agency	Standard & Poor’s Rating Group, Moody’s Investors Services, Fitch IBCA or an equivalent rating agency.
Redemption Fee	a fee, which the Company may charge upon redemption of Shares of up to 2% of the Redemption Price.
Redemption Price	the price (exclusive of any applicable Redemption Fee and/or Dilution Adjustment) at which the Company may redeem Shares as determined for each Fund or Share Class on the basis of the NAV per Share as at the Valuation Point on the relevant Dealing Day.
Reference NAV	for each Share Class, the greater of (i) the Hurdle Rate applied to the Closing NAV at the end of the previous Performance Period and (ii) the High Water Mark for that Share Class.
Regulated Market	a market as defined in item 14) of article 4 of the European Parliament and the Council Directive 2004/39/EC of 21 April 2004 on markets in financial instruments, as well as any other market which is regulated, operates regularly and is recognized and open to the public in an Eligible State.
Relevant Supplement	a document containing information specific to a Fund.
Securities Lending Programme	the securities lending programme, as described in the “ Financial Techniques and Instruments ” section of the “ Financial Derivative Instruments ” section, in which certain Funds are enrolled.

Share	a share of any Share Class in the capital of the Company entitling the holders to participate in the profits of the Company attributable to the relevant Fund as described in this Prospectus.
Share Class	shares of a Fund representing an interest in that Fund but designated as a share class within such Fund for the purpose of attributing different proportions of the NAV of the relevant Fund to such Shares to accommodate different characteristics including in relation to subscription, switching, and redemption charges, dividend arrangements, currencies, currency hedging policies, minimum investment and ongoing holding requirements and/or fee arrangements specific to such Shares.
Share Class Performance	for each Share Class, the increase of the NAV per Share in the relevant Performance Period before any accrual for Performance Fees and gross of the total costs and expenses.
Share Class Switch	switch of all or part of an investor's holdings from one Share Class of a Fund into Shares of another Share Class of the same Fund provided the Shareholder is eligible to invest in the requested Share Class.
Shareholder	a person registered in the register of shareholders of the Company as a holder of Shares.
Settlement Deadline	5.00 p.m. CET on the third business day in Luxembourg after the relevant Dealing Day, or such later date as may be determined by the Company and notified to Shareholders.
SSGA European Valuation Committee	the committee tasked with assisting the State Street Global Advisors business in EMEA in carrying out its fiduciary valuation responsibilities.
Sub-Investment Manager	any entity appointed as sub-investment manager of a Fund by the Investment Manager pursuant to a sub-investment management agreement and specified in the Relevant Supplement.
Subscription Fee	a fee which the Company may charge upon subscription for Shares of up to 3% of the Subscription Price.
Subscription Price	the price at which investors may subscribe for Shares as determined for each Fund or Share Class on the basis of the NAV per Share as at the Valuation Point on the relevant Dealing Day subject to any applicable Subscription Fee and/or Dilution Adjustment.
Swing Pricing Adjustment	an upward or downward adjustment of the NAV of a Fund to reflect the dealing costs that may be incurred by the Fund and the estimated bid/offer spread of the assets in which the Fund invests. It generally will be applied on any Dealing Day when the net capital activity of a Fund exceeds a pre-determined threshold as further described in the " Dilution Adjustment " section of this Prospectus.
Switching Form	the form used to switch from any Share Class of one Fund into Shares of a different Share Class of the same Fund.
TER	the total expense ratio as described in the " Fees and Expenses " section of this Prospectus.
UCI	an undertaking for collective investment.
UCITS	an undertaking for collective investment in transferable securities within the meaning of the 2010 Law and UCITS Directive.
UCITS Directive	Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities, as may be amended from time to time.
US Investment Company Act	the United States Investment Company Act of 1940, as amended.

US Securities Act	United States Securities Act of 1933, as amended.
Valuation Point	the point on each Dealing Day for a Fund at which the assets are valued as detailed in the Relevant Supplement.
VaR	value at risk which provides a measure of the potential loss that could arise over a given time interval under normal market conditions and at a given confidence level.

3. General Information about the Company

3.1. The Company

The Company is an open-ended public limited company (*société anonyme*) with variable capital (*société d'investissement à capital variable* or SICAV), which was incorporated in Luxembourg on 30 September 2008 under registration number B141.816 and is authorised by the CSSF as a UCITS. The Company has been structured as an umbrella fund, with segregated liability between Funds.

The object of the Company is the collective investment in transferable securities and/or other liquid financial assets of capital raised from the public, operating on the principle of risk spreading in accordance with Part 1 of the 2010 Law.

The capital of the Company is expressed in euro. It is determined by converting the total net assets of all Funds into euro.

The Board may from time to time, with the prior approval of the CSSF, create different Funds representing separate portfolios of assets with each Fund comprised of one or more Share Classes. The investment policy and risk profile of each Fund will be determined by the Board in consultation with the risk management team established within the Investment Manager and any changes with respect to, *inter alia*, a Fund's investment restrictions, policy or objective must be approved by the Board. The portfolio of assets maintained for each Fund will be invested in accordance with the investment objectives and policies applicable to such Fund as specified in the Relevant Supplement.

In accordance with article 181(5) of the 2010 Law, each Fund is considered to constitute a single pool of assets and liabilities; therefore the rights of Shareholders and creditors concerning each Fund are therefore limited to the assets of that Fund. However, there can be no assurance that, should an action be brought against the Company in the

courts of another jurisdiction, the segregated nature of the Company and the Fund will be respected.

Further information with respect to Shares and Share Classes is outlined in the "Shares" section below.

3.2. Management and Administration

3.2.1. The Directors

The Board is responsible for managing the business affairs of the Company in accordance with the Articles. In particular, the Board is responsible for determining the corporate and investment policy for each Fund, based on the principle of risk spreading. Further, the Board is responsible for the overall supervision of the management and administration of the Company, including the selection and supervision of the Management Company and the general monitoring of the performance and operations of the Company.

The members of the Board are elected by the general meeting of Shareholders, subject to the prior approval of the candidate by the CSSF. In the event of a vacancy on the Board, the remaining directors may elect a replacement to act as director until the next general meeting of Shareholders. For the current composition of the Board please refer to the Directory.

The Articles provide that a director may have an interest in any transaction or arrangement with the Company or in which the Company is interested provided that (s)/he has disclosed to the Board the nature and extent of any material interest which (s)/he may have. The Company has granted indemnities to the directors in respect of any loss or damages that they may suffer, save

where this results from the director's gross negligence or wilful misconduct.

3.2.2. The Management Company

The Board has appointed State Street Global Advisors Luxembourg Management S.à r.l. to be responsible for the day-to-day management of the Company's affairs subject to the overall supervision of the Board. The Management Company is responsible for the investment management of the assets of the Company, the administration of the Company and the implementation of the Company's and Funds' distribution and marketing policy.

The Management Company is a private limited company (*société à responsabilité limitée* or S.à r.l.), which was incorporated in Luxembourg on 12 August 2008 under registration number B141.353 and is authorised by the CSSF under Chapter 15 of the 2010 Law as a UCITS management company. The Management Company has appointed, with the prior approval of the CSSF, conducting persons, responsible for the day-to-day management of the Management Company. For the current composition of the Board of Managers of the Management Company and details of the Conducting Persons, please refer to the Directory.

3.2.3. The Depositary

The Depositary is a corporate partnership limited by shares (*société en commandite par actions* or SCA), which was established in Luxembourg originally as a public limited investment company (*société anonyme*) on 19 January 1990 under registration number B32.771. It holds a banking licence in accordance with the Luxembourg law of 5 April 1993 on the financial sector, as amended, is specialized in custody, fund management and related services, and is regulated by the CSSF.

The Depositary has been entrusted with following main functions:

- ensuring that the sale, issue, repurchase, redemption and cancellation of Shares are carried out in accordance with applicable law and the Articles;

- ensuring that the value of the Shares is calculated in accordance with applicable law and the Articles;
- carrying out the instructions of the Management Company unless they conflict with applicable law and the Articles;
- ensuring that in transactions involving the assets of the Funds any consideration is remitted within the usual time limits;
- ensuring that the income of the Company is applied in accordance with applicable law and the Articles.
- monitoring of the Fund's cash and cash flows;
- safe-keeping of the Fund's assets, including the safekeeping of financial instruments to be held in custody and ownership verification and record keeping in relation to other assets.

Depositary's liability

In carrying out its duties the Depositary shall, at all times, act honestly, fairly professionally, independently and solely in the interests of the Company and its Shareholders.

In the event of a loss of a financial instrument held in custody, determined in accordance with the 2010 Law, and in particular Article 18 of the Commission Delegated Regulation No 2016/438, the Depositary shall return financial instruments of identical type or the corresponding amount to the Company without undue delay.

The Depositary shall not be liable if it can prove that the loss of a financial instrument held in custody has arisen as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary pursuant to the 2010 Law and other applicable rules.

In case of a loss of financial instruments held in custody, the Shareholders may invoke the liability of the Depositary directly or indirectly through the Company provided that this does not lead to a duplication of redress or to unequal treatment of the Shareholders.

The Depositary will be liable to the Company for all other losses suffered by the Company as a result of

the Depository's negligent or intentional failure to properly fulfil its obligations pursuant to the 2010 Law and other applicable rules.

To the extent permitted by applicable law the Depository may not be liable for consequential or indirect or special damages or losses, arising out of or in connection with the performance or non-performance by the Depository of its duties and obligations.

Delegation

The Depository has full power to delegate the whole or any part of its safe-keeping functions subject to the terms of the depositary agreement but its liability will not be affected by the fact that it has entrusted to a third party some or all of the assets in its safekeeping. The Depository's liability shall not be affected by any delegation of its safe-keeping functions.

Information about the safe-keeping functions which have been delegated and the identification of the relevant delegates and sub-delegates are contained in Appendix 2 to the Prospectus. The latest version of the list of the relevant delegates can be consulted on the website www.ssga.com.

Conflicts of Interest

The Depository is part of an international group of companies and businesses that, in the ordinary course of their business, act simultaneously for a large number of clients, as well as for their own account, which may result in actual or potential conflicts. Conflicts of interest arise where the Depository or its affiliates engage in activities under the depositary agreement or under separate contractual or other arrangements. Such activities may include:

- (i) providing nominee, administration, registrar and transfer agency, research, agent securities lending, investment management, financial advice and/or other advisory services to the Company;
- (ii) engaging in banking, sales and trading transactions including foreign exchange, derivative, principal lending, broking, market

making or other financial transactions with the Company either as principal and in the interests of itself, or for other clients.

- (iii) In connection with the above activities the Depository or its affiliates:
- (iv) will seek to profit from such activities and are entitled to receive and retain any profits or compensation in any form and are not bound to disclose to, the Company, the nature or amount of any such profits or compensation including any fee, charge, commission, revenue share, spread, mark-up, mark-down, interest, rebate, discount, or other benefit received in connection with any such activities;
- (v) may buy, sell, issue, deal with or hold, securities or other financial products or instruments as principal acting in its own interests, the interests of its affiliates or for its other clients;
- (vi) may trade in the same or opposite direction to the transactions undertaken, including based upon information in its possession that is not available to the Company;
- (vii) may provide the same or similar services to other clients including competitors of the Company;
- (viii) may be granted creditors' rights by the Company which it may exercise.

The Company may use an affiliate of the Depository to execute foreign exchange, spot or swap transactions for the account of the Company. In such instances the affiliate shall be acting in a principal capacity and not as a broker, agent or fiduciary of the Company. The affiliate will seek to profit from these transactions and is entitled to retain and not disclose any profit to the Company. The affiliate shall enter into such transactions on the terms and conditions agreed with the Company.

Where cash belonging to the Company is deposited with an affiliate being a bank, a potential conflict arises in relation to the interest (if any) which the affiliate may pay or charge to such account and the fees or other benefits which it may derive from holding such cash as banker and not as trustee.

The Investment Manager or the Management Company may also be clients or counterparties of the Depositary or its affiliates.

Potential conflicts that may arise in the Depositary's use of sub-delegates include four broad categories:

- (i) conflicts from the sub-delegates selection and asset allocation among multiple sub-delegates influenced by (a) cost factors, including lowest fees charged, fee rebates or similar incentives and (b) broad two-way commercial relationships in which the Depositary may act based on the economic value of the boarder relationship, in addition to objective evaluation criteria;
- (ii) sub-delegates, both affiliated and non-affiliated, act for other clients and in their own proprietary interest, which might conflict with clients' interests;
- (iii) sub-delegates, both affiliated and non-affiliated, have only direct relationships with clients and look to the Depositary as its counterparty, which might create incentive for the Depositary to act in its self-interest, or other clients' interests to the detriment of clients; and
- (iv) sub-delegates may have market-based creditors' rights against client assets that they have an interest in enforcing if not paid for securities transactions.

In carrying out its duties the Depositary shall act honestly, fairly, professionally, independently and solely in the interests of the Company and its Shareholders.

The Depositary has functionally and hierarchically separated the performance of its depositary tasks from its other potentially conflicting tasks. The system of internal controls, the different reporting lines, the allocation of tasks and the management reporting allow potential conflicts of interest and the Depositary issues to be properly identified, managed and monitored. Additionally, in the context of the Depositary's use of sub-delegates, the Depositary imposes contractual restrictions to

address some of the potential conflicts and maintains due diligence and oversight of sub-delegates to ensure a high level of client service by those agents. The Depositary further provides frequent reporting on clients' activity and holdings, with the underlying functions subject to internal and external control audits. Finally, the Depositary internally separates the performance of its custodial tasks from its proprietary activity and follows a Standard of Conduct that requires employees to act ethically, fairly and transparently with clients.

Up-to-date information on the Depositary, its duties, any conflicts that may arise, the safe-keeping functions delegated by the Depositary, the list of delegates and sub-delegates and any conflicts of interest that may arise from such a delegation will be made available by the Depositary to Shareholders on request.

3.2.4. The Administrator

The Company and the Management Company have appointed State Street Bank Luxembourg SCA to further act as the Company's central administration agent, domiciliary and corporate agent, registrar and transfer agent and paying agent and to procure or provide services ancillary thereto. Agreements have been entered into with various affiliates and agents to perform certain administrative or representative services or to facilitate the payment of Share distributions in relevant jurisdictions.

3.2.5. The Investment Manager

The Management Company, and the Company have delegated responsibility for the investment management of the Company to the Investment Manager, State Street Global Advisors Limited, subject to the supervision of the Board and Management Company.

The Investment Manager is a wholly-owned subsidiary of State Street Global Advisors International Holdings Inc., whose ultimate parent entity is State Street Corporation. The Investment Manager is authorised and regulated by the Financial Conduct Authority and its investment management business includes but is not limited

to management of other Luxembourg authorised undertakings for collective investment.

The Investment Manager has the discretion to delegate to sub-investment managers all the powers, duties and discretions exercisable in respect of the management of the relevant percentage of such of the Funds as the Investment Manager and any Sub-Investment Manager may from time to time agree. Any such appointment will be in accordance with the requirements of the CSSF. Details of sub-investment managers appointed to any Fund will be available to Shareholders on request and will be disclosed in the Fund's Relevant Supplement.

3.2.6. The Sub-Investment Managers

The Investment Manager has appointed the following discretionary sub-investment managers in respect of certain Funds, as indicated in the Relevant Supplement including, without limitation:

- State Street Global Advisors, the investment management division of State Street Bank and Trust Company, a Massachusetts trust company;
- State Street Global Advisors Ireland Limited, an Irish limited liability company, regulated by the Central Bank of Ireland (CBI);

3.2.7. The Distributor and sub-distributors

The Company and the Management Company have, in accordance with the applicable laws, appointed State Street Global Advisors Limited as the Distributor of the Shares. The Distributor is responsible for the marketing and distribution of the Shares in Luxembourg and other jurisdictions approved by the Board.

The Distributor is authorised to appoint other sub-distributors and intermediaries and enter into other similar agreements relating to the distribution of Shares. The Distributor is authorised to appoint their group companies to carry out all or any of their duties and functions upon terms which are substantially similar to the terms of the distribution agreements.

3.2.8. Conflicts of interest

The Company is committed to maintaining and operating effective organizational and administrative arrangements to identify and manage any potential conflicts of interests. The Management Company adopted written procedures with respect to conflicts of interest. In formulating the Conflicts of Interest Policy, the Management Company has taken into account the fact that it is a member of the State Street Corporation Group. Once identified, potential conflicts are referred to the relevant governance body, as appropriate.

The Board, the Management Company, the Investment Manager, the Depository, the Administrator and other service providers of the Company, and/or their affiliates, members, employees or any person connected with them may be subject to various conflicts of interest in their relationships with the Company. In such event, each will at all times have regard to its obligations under any agreements to which it is party or by which it is bound in relation to the Company. In particular, when undertaking any dealings or investments where conflicts of interest may arise, each will respectively endeavour to ensure that such conflicts are resolved fairly.

As further described in the Articles and in section "The Directors" of this Prospectus, any director of the Company who has, directly or indirectly, an interest in a transaction submitted to the approval of the Board which conflicts with the Company's interest, must inform the Board. The director may not take part in the discussions on and may not vote on the transaction.

The Management Company has adopted and implemented a conflicts of interest policy and has made appropriate organisational and administrative arrangements to identify and manage conflicts of interests so as to minimise the risk of the Company's interests being prejudiced, and if they cannot be avoided, ensure that the Company is treated fairly.

3.3. General Meeting of Shareholders

The annual general meeting of Shareholders of the Company takes place in Luxembourg every year at 11.00 a.m. (CET) on the fourth Thursday of April or if this date does not fall on a business day in Luxembourg, the next following business day in Luxembourg. Other extraordinary general meetings of Shareholders of the Company or meetings of individual Funds or their Share Classes may be held from time to time.

Notices to the annual general meeting and other meetings are issued in accordance with Luxembourg law. The notices contain information about the place and time of the general meeting, the requirements for attending the meeting, the agenda and, if necessary, the quorum requirements and majority requirements for resolutions.

The requirements as to quorum and majorities at all general meetings will be those set out in the Articles and in the 1915 Law. All Shareholders may attend general meetings in person or by appointing another person as his proxy in writing or by other communication mediums accepted by the Company.

3.4. Rights of Shareholders

Voting rights: Each Share entitles the Shareholder to one (1) vote at all general meetings of the Shareholders of the Company and at all meetings of the Fund or Share Class. Fractions of Shares do not entitle their holder to vote.

Right to receive a share of the profits: The Shares issued are entitled to participate in the net assets allocated to the relevant Fund or Share Class as of the Dealing Day on which they are purchased and up until the date on which they are redeemed.

Shareholder rights directly against the Company: The Company draws the Shareholders' attention to the fact that a Shareholder will only be able to exercise its rights directly against the Company, notably the right to participate in general

shareholders' meetings, if such Shareholder is registered in his own name in the Shareholders' register. In cases where an investor invests in the Company through an intermediary who invests into the Company in its own name but on behalf of the Shareholder, it may not be possible for such investor to exercise certain Shareholder rights directly against the Company. Investors are advised to seek advice in relation to their rights.

Shareholder rights directly against the service providers: Generally, absent a direct contractual relationship between the Shareholders and the service providers mentioned in the "Management and Administration" section, Shareholders will generally have no direct rights against service providers and there will only be limited circumstances in which a Shareholder can potentially bring a claim against a service provider. Instead, the proper claimant in an action in respect of which a wrongdoing is alleged to have been committed against the Company by a service provider is, prima facie, the Company itself. As an exception to this general principle, the Shareholders should be able to invoke claims relating to the liability of the Depositary directly provided that this does not lead to a duplication of redress or to unequal treatment of Shareholders.

3.5. Financial year and statements

The Company's financial year ends on 31 December of each year. The Company will publish an annual report, which will be approved by the Board, and audited annual accounts within four (4) months of the end of the financial period to which they relate. Unaudited semi-annual reports will also be available no later than two (2) months after the end of the half year in question. Copies of these reports may be obtained, free of charge, from the national representatives and at the Company's registered office.

3.6. Liquidation

3.6.1. Termination and liquidation of Funds or Classes

The Board may, having notified the Shareholders concerned in writing, compulsorily redeem all, but not some, of the Shares of any Fund, and may decide to subsequently terminate and liquidate the Fund or keep it dormant, in the event that, for any reason, the Board determines that:

- the NAV of a Fund has decreased to, or has not reached, €50,000,000 or equivalent in the relevant Base Currency, the minimum level for that Fund to be managed and/or administered in an efficient manner; or
- changes in the economic or political circumstances would justify such liquidation.

The liquidation of a Fund associated with the compulsory redemption of all affected Shares for any other reason may only be carried out with the prior agreement of the Shareholders in the Fund to be liquidated at a meeting of Shareholders of the Fund in question, convened in accordance with the Articles. The notice will explain the reasons and the process of the termination and liquidation. Such resolution may be passed with no quorum requirement and with a simple majority of the Shares attending/represented and voting.

Generally, if a Fund is liquidated, all Shares redeemed will be cancelled. Redemption proceeds which have not been claimed by former Shareholders upon the compulsory redemption will be deposited in escrow at the *Caisse de Consignation* in Luxembourg in accordance with applicable laws and regulations. Proceeds not claimed within the statutory period will be forfeited in accordance with applicable laws and regulations.

The termination and liquidation of a Fund will have no influence on the existence of any other Fund. The termination and liquidation of the last Fund of the Company will result in the liquidation of the Company.

The Board may also, at its sole discretion and at any time, close a Class.

3.6.2. Dissolution and liquidation of the Company

The Company is incorporated for an unlimited period. However, it may be dissolved at any time by a resolution passed at a general meeting of Shareholders adopted in compliance with applicable laws.

If and when for any reason the capital of the Company falls below two-thirds of the minimum capital set out in the 2010 Law (*i.e.* €1,250,000), the Board of the Company is required to submit the question of liquidation of the Company to a general meeting of Shareholders within forty (40) days. The general meeting may resolve the question of liquidation with a simple majority of the Shareholders present/represented (no quorum is required).

If the capital of the Company falls below one-quarter of the minimum capital set out in the 2010 Law (*i.e.* €1,250,000), the Board of the Company is required to submit the question of liquidation of the Company to a general meeting of the Shareholders, which must be called within the same period. In this case, a liquidation may be resolved by one-fourth of the votes of the Shareholders present/represented at the general meeting (no quorum is required).

The compulsory dissolution of the Company may be ordered by Luxembourg competent courts in circumstances provided by the 2010 Law and the 1915 Law.

As soon as a decision to dissolve the Company is taken, the issue, redemption or conversion of Shares in all Funds will be prohibited.

In the event of a dissolution of the Company, the liquidators appointed by the general meeting of Shareholders, in accordance with the CSSF, will realise the assets of the Company in the interests of the Shareholders and will subsequently distribute the net proceeds of liquidation (after deducting all liquidation expenses) among

Shareholders of each Fund in proportion to their holding of Shares in such Fund. Liquidation proceeds which have not been claimed by Shareholders at the time of the closure of the liquidation will be deposited in escrow at the *Caisse de Consignation* in Luxembourg. Proceeds not claimed within the statutory period will be forfeited in accordance with applicable laws and regulations.

A liquidation of the Company will be carried out in accordance with the provisions of the 2010 Law and 1915 Law.

3.7. Merger of the Company, a Fund or a Class

The Board may decide to proceed with a merger of one or several Funds with one or several other funds within the Company, or with one or several other Luxembourg or foreign UCITS or sub-funds thereof. In such event, notice of the merger will be given in writing to the Shareholders of the relevant Fund and each Shareholder shall be given the possibility, during a period of at least 30 days before the effective date of the merger (it being understood that the effective date of the merger normally takes place five business days after the expiry of such notice period), to request either the repurchase or switching of his Shares of the Fund, free of charge (other than the cost of disinvestment).

In accordance with the provisions of the 2010 Law and the Articles, a merger does not require the prior consent of Shareholders except where the Company is the absorbed entity, which thus ceases to exist as a result of the merger. In such case, the general meeting of Shareholders of the Company must decide on the merger (and its effective date) of the Company with another Luxembourg or foreign UCITS before a notary. No quorum is required and the decision shall be taken at a simple majority of the Shareholders present or represented and voting. The general meeting of Shareholders will decide by resolution taken with the same quorum and majority requirements as

stipulated in the Articles for a change to the Articles. In any case, the merger will be subject to the conditions and procedures imposed by the 2010 Law, in particular concerning the common draft terms of the merger to be established by the Board and the information to be provided to Shareholders.

The Board may also decide, subject to at least 30 days' prior notice to the shareholders in the Class, merge such Class with another Class of the same or another Fund.

3.8. Applicable Law and Jurisdiction

The Application Form is expressed to be governed by, and construed in accordance with, the laws currently in force in Luxembourg, and contains a choice of international competence of the courts of Luxembourg.

There are no legal instruments in Luxembourg required for the recognition and enforcement of judgments rendered by a Luxembourg court. If a foreign, i.e. non-Luxembourg court, on the basis of mandatory domestic provisions, renders a judgment against the Company, the rules of the Regulation (EU) No 1215/2015 of the European Parliament and of the Council of 12 December 2015 on jurisdiction and the recognition and enforcement of judgments in civil and commercial matters (recast), (regarding judgments from EU Member States) or the rules of the Convention of Lugano of 30 October 2007 on jurisdiction and the enforcement of judgments in civil and commercial matters or of the private international law of Luxembourg (regarding judgments from non-EU Member States) concerning the recognition and enforcement of foreign judgments apply. Investors are advised to seek advice, on a case-by-case basis, on the available rules concerning the recognition and enforcement of judgments.

3.9. Remuneration policy

The Management Company is subject to remuneration policies, procedures and practices (together, the “Remuneration Policy”) which complies with the UCITS Directive. The Remuneration Policy is consistent with and promotes sound and effective risk management. It is designed not to encourage risk-taking which is inconsistent with the risk profile of the Funds. The Remuneration Policy is in line with the business strategy, objectives, values and interests of the Management Company and the Company and of the Shareholders of the Company, and includes measures to avoid conflicts of interest.

The Remuneration Policy applies to staff whose professional activities have a material impact on the risk profile of the Management Company or the Company, and ensures that no individual will be involved in determining or approving their own remuneration.

The Remuneration Policy shall include an assessment of performance set in a multi-year framework appropriate to the holding period recommended to the Shareholders of the Company in order to ensure that the assessment process is based on the longer-term performance of the Funds and their investment risks, and in order to ensure that the actual payment of performance-based components of remuneration is spread over the same period.

In accordance with Luxembourg law, the Remuneration Policy shall appropriately balance fixed and variable components of total remuneration, where the fixed component represents a portion of the total remuneration which is sufficiently high so that a highly flexible policy may be applied with regards to the variable remuneration, including the possibility that no variable component may be paid at all.

The Remuneration Policy will be reviewed annually. Details of the up-to-date Remuneration Policy are available on ssga.com. The Remuneration Policy will also be made available

for inspection and may be obtained, free of charge, at the registered office of the Company.

The Management Company, with the consent of the Board, has delegated certain activities, in respect of the investment management and risk management of the Funds, to the Investment Manager. The global State Street remuneration policy applies to the Investment Manager’s employees. Such remuneration policy is consistent with and promotes sounds and effective risk management and does not encourage risk taking that is inconsistent with the risk profile of the Funds managed by the Company.

4. Risk Information

This section provides information regarding some of the general risks applicable to an investment in the Funds. Additional risk information specific to individual Funds is specified in the Relevant Supplement. This section is not intended to be a complete explanation and other risks may be relevant from time to time. In particular, the Company's and each Fund's performance may be affected by changes in market, economic and political conditions, and in legal, regulatory and tax requirements.

Investors should be aware that an investment in a Fund is not in the nature of a deposit in a bank account and is not protected by any government, government agency or other guarantee scheme. Before making an investment decision with respect to an investment in any Fund, prospective investors should carefully consider all of the information set out in this Prospectus and the Relevant Supplement, as well as their own personal circumstances, and should consult their own stockbroker, bank manager, lawyer, accountant and/or financial adviser. An investment in the Shares of any Fund is only suitable for investors who (either alone or in conjunction with an appropriate financial or other adviser) are capable of evaluating the merits and risks of such an investment and who have sufficient resources to be able to bear any losses that may result therefrom.

The price of the Shares of a Fund can go down as well as up and their value is not guaranteed. Shareholders may not receive, at redemption or liquidation, the amount that they originally invested in a Fund or any amount at all.

Although the Company will do its utmost to achieve the investment objectives of each Fund, there can be no guarantee to which extent these objectives will be reached. Consequently, the Net Asset Values of the Shares may increase or decrease and positive or negative returns of different levels may arise.

Cash Position Risk: A Fund may hold a significant portion of its assets in cash or cash equivalents in the Investment Manager's discretion. If a Fund holds a significant cash position, its investment returns may be adversely affected, and such Fund may not achieve its investment objective.

Concentration Risk: An actively managed Fund may focus its investments in companies or issuers in a particular industry, market, or sector. When a Fund focuses its investments in a particular industry market or sector, any financial, economic, business or other developments affecting issuers in that industry, market, or sector will have a greater effect on the Fund than if it had not focused its assets in that industry, market, or sector, which may, in turn, increase the volatility of the Fund. Any such investment focus may also limit the liquidity of a Fund. In addition, investors may buy or sell substantial amounts of a Fund's shares in response to factors affecting or expected to affect an industry, market, or sector in which the Fund focuses its investments, resulting in extreme inflows or outflows of cash into or out of the Fund. Such extreme cash inflows or outflows might affect management of the Fund adversely.

A passively managed Fund's assets will generally be concentrated in an industry or group of industries or sector to the extent that such Fund's underlying specified index concentrates in a particular industry or group of industries or sector. When a Fund focuses its investments in a particular industry or sector, any financial, economic, business or other developments affecting issuers in that industry, market, or sector will have a greater effect on the Fund than if it had not focused its assets in that industry, market, or sector, which may, in turn, increase the volatility of the Fund. Any such investment focus may also limit the liquidity of the Fund. In addition, investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect an industry, market, or sector in which the Fund focuses its investments, resulting in extreme inflows or outflows of cash

into or out of the Fund. Such extreme cash inflows or outflows might affect management of the Fund adversely.

Conflicts of Interest Risk: An investment in a Fund may be subject to a number of actual or potential conflicts of interest. Subject to applicable law, a Fund may engage in transactions that may trigger or result in a potential conflict of interest. For example: the Investment Manager or its affiliates may provide services to the Fund, such as securities lending agency services, depository, custodial, administrative, bookkeeping, and accounting services, transfer agency, and shareholder servicing, and other services for which the Fund would compensate the Investment Manager and/or such affiliates.

A Fund may enter into securities transactions with the Investment Manager or an affiliate of the Investment Manager where the Investment Manager or an affiliate acts as agent for a Fund in connection with the purchase or sale of securities, or as principal, where the Investment Manager or an affiliate sells securities to a Fund or buys securities from a Fund for its own account.

The Investment Manager on behalf of the Fund may enter into repurchase agreements and derivatives transactions with or through Investment Manager or one of its affiliates. A Fund may invest in other pooled investment vehicles sponsored, managed, or otherwise affiliated with the Investment Manager in which event the Fund may not be charged subscription or redemption fees on account of such investment but will bear a share of the expenses of those other pooled investment vehicles; those investment vehicles may pay fees and other amounts to the Investment Manager or its affiliates, which might have the effect of increasing the expenses of the Fund. It is possible that other clients of the Investment Manager will purchase or sell interests in such other pooled investments at prices and at times more favourable than those at which the Fund does so.

There is no assurance that the rates at which a Fund pays fees or expenses to the Investment

Manager or its affiliates, or the terms on which a Fund enters into transactions with the Investment Manager or its affiliates or on which a Fund invests in any investment vehicles sponsored, managed, or otherwise affiliated with the Investment Manager will be the most favourable available in the market generally or as favourable as the rates the Investment Manager makes available to other clients. There will be no independent oversight of prices, fees or expenses paid to, or services provided by, the Investment Manager or its affiliates. Because of its financial interest, the Investment Manager may have an incentive to enter into transactions or arrangements on behalf of a Fund with itself or its affiliates in circumstances where it might not have done so in the absence of that interest. Transactions and services with or through the Investment Manager or its affiliates will, however, be effected in accordance with the applicable regulatory requirements.

The Investment Manager and its affiliates serve as investment manager to other clients and may make investment decisions for their own accounts and for the accounts of others that may be different from those that will be made by the Investment Manager on behalf of a Fund. For example, the Investment Manager may provide asset allocation advice to some clients that may include a recommendation to invest in or redeem from a particular issuer while not providing that same recommendation to all clients invested in the same or similar issuers.

Other conflicts may arise, for example, when clients of the Investment Manager invest in different parts of an issuer's capital structure, so that one or more clients own senior debt obligations of an issuer and other clients own junior debt of the same issuer, as well as circumstances in which clients invest in different tranches of the same structured financing vehicle. In such circumstances, decisions over whether to trigger an event of default or over the terms of any workout may result in conflicts of interest. When making investment decisions where a conflict of interest may arise, the Investment Manager will endeavour to act in a fair and equitable manner, in

accordance with its conflicts of interest policy, as between the relevant Fund and other clients. Subject to the foregoing, (i) the Investment Manager and its affiliates may invest for their own accounts and for the accounts of clients in various securities that are senior, *pari passu* or junior to, or have interests different from or adverse to, the securities that are owned by a Fund; and (ii) subject to applicable law, the Investment Manager may, at certain times, simultaneously seek to purchase (or sell) investments for a Fund and to sell (or purchase) the same investment for accounts, funds or structured products for which it serves as investment manager now or in the future, or for other clients or affiliates and may enter into cross trades in such circumstances..

In addition, the Investment Manager and its affiliates may buy securities from or sell securities to a Fund, if permitted by applicable law. These other relationships may also result in securities laws restrictions on transactions in these instruments by a Fund and otherwise create potential conflicts of interest for the Investment Manager.

The Investment Manager, in connection with its other business activities, may acquire material non-public confidential information that may restrict the Investment Manager from purchasing securities or selling securities for itself or its clients (including a Fund) or otherwise using such information for the benefit of its clients or itself.

There is no prohibition on dealing in assets of a Fund by the Depositary or Investment Manager, or by any entities related to such parties, provided that such transactions are carried out as if effected on normal commercial terms negotiated at arms' length and are in the best interests of Shareholders. Permitted transactions between a Fund and such parties are subject to (i) a certified valuation by a person approved by the Depositary (or the Directors in the case of a transaction involving the Depositary) as independent and competent; or (ii) execution on best terms on organised investment exchanges under their rules; or (iii) where (i) and (ii) are not practical, execution on terms the Depositary (or the Directors in the

case of a transaction involving the Depositary) is satisfied conform to the principles set out above.

There is no prohibition on the Depositary, the Administrator, the Investment Manager or any other party related to a Fund acting as a "competent person" for the purposes of determining the probable realisation value of an asset of the Fund in accordance with the valuation provisions outlined in "**Valuation and Calculation of the NAV**" section of this Prospectus. Investors should note however, that in circumstances where fees payable by a Fund to such parties are calculated based on the Net Asset Value, a conflict of interest may arise as such fees will increase if the Net Asset Value increases. Any such party will endeavour to ensure that such conflicts are resolved fairly and in the best interest of the Shareholders.

In selecting brokers to make purchases and sales for a Fund, a Fund will require the Investment Manager to choose those brokers who provide best execution to a Fund, with the exception of purchases and sales which are the subject of specific terms requested by an investor and consented to by a Fund and the Investment Manager. In determining what constitutes best execution, the Investment Manager will be required to consider the over-all economic result for a Fund, (price of commission plus other costs), the efficiency of the transaction, the broker's ability to effect the transaction if a large block is involved, availability of the broker for difficult transactions in the future, other services provided by the broker such as research and the provision of statistical and other information and the financial strength and stability of the broker. In managing the assets of a Fund, the Investment Manager may receive certain research and statistical and other information and assistance from brokers. The Investment Manager may allocate brokerage business to brokers who have provided such research and assistance to a Fund and/or other accounts for which the Investment Manager exercises investment discretion. The benefits provided under any soft commission arrangements must assist in the provision of investment services to a Fund and any such soft commission

arrangements must be disclosed in the periodic reports of a Fund.

A Director may be a party to, or otherwise interested in, any transaction or arrangement with a Fund or in which a Fund is interested, provided that he has disclosed to the Directors prior to the conclusion of any such transaction or arrangement the nature and extent of any material interest of his therein. Unless the Directors determine otherwise, a Director may vote in respect of any contract or arrangement or any proposal whatsoever in which he has a material interest, having first disclosed such interest. The Directors shall endeavour to ensure that any conflict of interest is resolved fairly.

The foregoing does not purport to be a comprehensive list or complete explanation of all potential conflicts of interests which may affect a Fund. A Fund may encounter circumstances, or enter into transactions, in which conflicts of interest that are not listed or discussed above may arise.

Counterparty Risk: Each Fund will be subject to credit risk with respect to the counterparties with which such Fund enters into derivatives contracts foreign exchange, currency forward contracts and other transactions such as repurchase agreements. A Fund's ability to profit from these types of investments and transactions will depend on the willingness and ability of its counterparty to perform its obligations. If a counterparty fails to meet its contractual obligations, the relevant Fund(s) may be unable to terminate or realize any gain on the investment or transaction, or to recover collateral posted to a counterparty, resulting in a loss to such Fund(s). A Fund may experience significant delays and expenses in obtaining any recovery in an insolvency, bankruptcy, or other reorganization proceeding involving its counterparty (including recovery of any collateral posted by it) and may obtain only a limited recovery or may obtain no recovery in such circumstances. If a Fund holds collateral posted by its counterparty, it may be delayed or prevented from realizing on the collateral in the event of a bankruptcy or insolvency proceeding relating to

the counterparty. Contractual provisions and applicable law may prevent or delay a Fund from exercising its rights to terminate an investment or transaction with a financial institution experiencing financial difficulties, or to realize on collateral, and another institution may be substituted for that financial institution without the consent of the impacted Fund(s). If the credit rating of a derivatives counterparty declines, an impacted Fund may nonetheless choose or be required to keep existing transactions in place with the counterparty, in which event such Fund would be subject to any increased credit risk associated with those transactions.

OTC derivatives have similar risks as described above and may also be subject to the risk that a contract will be cancelled, for example due to bankruptcy, subsequent illegality or a change in the tax or accounting regulations since the conclusion of the OTC derivative contract.

Currency Hedging Risk: The Company may offer Hedged Share Classes in a Fund which seek to reduce the impact of exchange rate fluctuations between the Class Currency of the Hedged Share Class and the currency in which Fund's underlying assets are denominated. When a derivative is used as a hedge against a position that a Fund holds, any gain generated by the derivative generally should be substantially offset by losses on the hedged investment, and vice versa. While hedging can reduce or eliminate losses, it can also reduce or eliminate gains. Hedges are sometimes subject to imperfect matching between a derivative and its reference asset. While a Fund is designed to hedge against currency fluctuations, it is possible that a degree of currency exposure may remain even at the time a hedging transaction is implemented. As a result, the Fund may not be able to structure its hedging transactions as anticipated or its hedging transactions may not successfully reduce the currency risk included in the Fund's portfolio. The effectiveness of the Fund's currency hedging strategy will also generally be affected by the volatility of both the securities included in the Index, and the volatility of the base currency of the Fund relative to the currencies to be hedged. Increased volatility may reduce the effectiveness

of the Fund's currency hedging strategy and may impact the costs associated with hedging transactions. The effectiveness of the Fund's currency hedging strategy and the costs associated with hedging transactions may also in general be affected by interest rates. There can be no assurance that the Fund's hedging transactions will be effective. The effectiveness of a Fund's currency hedging strategy will also generally be affected by the volatility of both its underlying Index, and the volatility of the Fund's base currency relative to the currencies to be hedged. Increased volatility can reduce the effectiveness of the Fund's currency hedging strategy. The effectiveness of the Fund's currency hedging strategy will also in general be affected by interest rates. Significant differences between a Fund's base currency interest rates and foreign currency interest rates may further impact the effectiveness of the Fund's currency hedging strategy. The Fund will bear the costs associated with any such hedging transaction, regardless of any gain or loss experienced on the hedging transaction.

Where Classes denominated in different currencies are created within a Fund and currency hedging transactions are entered into to hedge any relevant currency exposure, each such transaction will be clearly attributable to the specific Class and any costs shall be for the account of that Class only. It is intended that all gains/losses and expenses arising from such hedging transactions will be borne separately by the Shareholders of the respective Hedged Share Classes and accordingly, all such gains/losses and expenses will be reflected in the NAV per Share of the applicable Hedge Share Class; however, as there is no segregation of liabilities between Share Classes of a Fund, there is a risk that, under certain circumstances, currency hedging transactions in relation to Hedged Share Classes of a Fund could ultimately result in liabilities which might affect the Fund as a whole.

There can be no guarantee that the Investment Manager will be successful in such hedging activities and unsuccessful hedging activities may have a material impact on Shareholder's returns. To the extent that hedging is successful, the

performance of the relevant Class is still likely to move in line with the performance of the underlying assets. The use of Hedged Share Classes may substantially limit holders of the relevant Classes from benefiting if the currency of the Class moves unfavourably versus the currency in which the assets of the Fund are denominated. Recent regulatory changes in a number of jurisdictions may require that certain currency transactions be subject to collateral requirements. These changes could increase the costs to a Fund of entering into currency transactions.

Currency Risk: Investments in issuers in different countries are often denominated in currencies different from a Fund's base currency. Changes in the values of those currencies relative to a Fund's base currency may have a positive or negative effect on the values of a Fund's investments denominated in those currencies. The values of other currencies relative to a Fund's base currency may fluctuate in response to, among other factors, interest rate changes, intervention (or failure to intervene) by national governments, central banks, or supranational entities such as the International Monetary Fund, the imposition of currency or capital controls, and other political or regulatory developments. Currency values can decrease significantly both in the short term and over the long term in response to these and other developments. Continuing uncertainty as to the status of the European Monetary Union (the "EMU") and membership of the European Union (the "EU") has created significant volatility in currency and financial markets generally. Any partial or complete dissolution of the EMU and/or EU, or any continued uncertainty as to its status, could have significant adverse effects on currency and financial markets, and on the values of the Fund's portfolio investments. To the extent the Investment Manager seeks to hedge against adverse changes in the values of currencies on the value of a Fund's assets, such hedging transactions may not have the desired effect or may cause a Fund to lose money.

Cybersecurity Risk: With the increased use of technologies such as the Internet and the dependence on computer systems to perform

business and operational functions, funds (such as the Company) and its service providers (including the Investment Manager) may be prone to operational and information security risks resulting from cyber-attacks and/or technological malfunctions. In general, cyber-attacks are deliberate, but unintentional events may have similar effects. Cyber-attacks include, among others, stealing or corrupting data maintained online or digitally, preventing legitimate users from accessing information or services on a website, releasing confidential information without authorization, and causing operational disruption. Successful cyber-attacks against, or security breakdowns of, the Company, the Investment Manager or the Depositary, a sub-custodian, Central Administrator, or other affiliated or third-party service providers may adversely affect the Company or its shareholders. For instance, cyber-attacks or technical malfunctions may interfere with the processing of shareholder or other transactions, affect a Fund's ability to calculate its net asset value, cause the release of private shareholder information or confidential Company and/or Fund information, impede trading, cause reputational damage, and subject the Company to regulatory fines, penalties or financial losses, reimbursement or other compensation costs, and additional compliance costs. Cyber-attacks or technical malfunctions may render records of Company assets and transactions, shareholder ownership of Company shares, and other data integral to the functioning of the Company and each Fund inaccessible or inaccurate or incomplete. The Company may also incur substantial costs for cybersecurity risk management in order to prevent cyber incidents in the future. The Company and its shareholders could be negatively impacted as a result. While the Investment Manager, Depositary and Central Administrator have established business continuity plans and systems designed to minimize the risk of cyber-attacks through the use of technology, processes and controls, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified given the evolving nature of this threat. The Company relies on third-party service

providers for many of its day-to-day operations, and will be subject to the risk that the protections and protocols implemented by those service providers will be ineffective to protect the Company from cyber-attack. Similar types of cybersecurity risks or technical malfunctions also are present for issuers of securities in which a Fund invests, which could result in material adverse consequences for such issuers, and may cause the Fund's investment in such securities to lose value.

Depositary and Custodial Risk: There are risks involved in dealing with the Depositary, sub-custodians or brokers who hold a Fund's investments or settle a Fund's trades. The Depositary will hold assets in compliance with applicable laws (including but not limited to the UCITS Directive and Commission Delegated Regulations) and such specific provisions as agreed in the depositary agreement. Such requirements are designed to safe keep the assets and provide certain protections against losses including losses from the insolvency of the Depositary or any-sub-custodian but there is no guarantee they will successfully do so.

In certain circumstances, it is possible that, in the event of the insolvency or bankruptcy of a sub-custodian or broker, the Fund would be delayed or prevented from recovering its assets from the sub-custodian or broker, or its estate, and may have only a general unsecured claim against the sub-custodian or broker for those assets.

Depositary Receipts Risk: A Fund may invest in American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs") and European Depositary Receipts ("EDRs"). ADRs are typically trust receipts issued by a U.S. bank or trust company that evidence an indirect interest in underlying securities issued by a foreign entity. GDRs, EDRs, and other types of depositary receipts are typically issued by international banks or financial institutions to evidence an interest in underlying securities issued by either a U.S. or a non-U.S. entity. Investments in depositary receipts may be less liquid and more volatile than the underlying securities in their primary trading

market. If a depositary receipt is denominated in a different currency than its underlying securities, an investing Fund will be subject to the currency risk of both the investment in the depositary receipt and the underlying security. There may be less publicly available information regarding the issuer of the securities underlying a depositary receipt than if those securities were traded directly. Depositary receipts may or may not be sponsored by the issuers of the underlying securities, and information regarding issuers of securities underlying unsponsored depositary receipts may be more limited than for sponsored depositary receipts. The values of depositary receipts may decline for a number of reasons relating to the issuers or sponsors of the depositary receipts, including, but not limited to, insolvency of the issuer or sponsor. Holders of depositary receipts may have limited or no rights to take action with respect to the underlying securities or to compel the issuer of the receipts to take action.

Debt Securities Risk: The values of debt securities may increase or decrease as a result of the following: market fluctuations, increases in interest rates, actual or perceived inability or unwillingness of issuers, guarantors or liquidity providers to make scheduled principal or interest payments or illiquidity in debt securities markets; the risk of low rates of return due to reinvestment of securities during periods of falling interest rates or repayment by issuers with higher coupon or interest rates; and/or the risk of low income due to falling interest rates. To the extent that interest rates rise, certain underlying obligations may be paid off substantially slower than originally anticipated and the value of those securities may fall sharply. A rising interest rate environment may cause the value of a Fund's fixed income securities to decrease, a decline in the Fund's income and yield, an adverse impact on the liquidity of the Fund's fixed income securities, and increased volatility of the fixed income markets. If the principal on a debt obligation is prepaid before expected, the prepayments of principal may have to be reinvested in obligations paying interest at lower rates. During periods of falling interest rates, the income received by a Fund may decline.

Changes in interest rates will likely have a greater effect on the values of debt securities of longer durations. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

- **Credit Risk:** Credit risk is the risk that an issuer, guarantor or liquidity provider of a fixed-income security held by a Fund may be unable or unwilling, or may be perceived (whether by market participants, ratings agencies, pricing services or otherwise) as unable or unwilling, to make timely principal and/or interest payments, or to otherwise honour its obligations. It includes the risk that the security will be downgraded by a credit rating agency; generally, lower credit quality issuers present higher credit risks. An actual or perceived decline in creditworthiness of an issuer of a fixed-income security held by a Fund may result in a decrease in the value of the security. It is possible that the ability of an issuer to meet its obligations will decline substantially during the period when the Fund owns securities of the issuer or that the issuer will default on its obligations or that the obligations of the issuer will be limited or restructured.

The credit rating assigned to any particular investment does not necessarily reflect the issuer's current financial condition and does not reflect an assessment of an investment's volatility or liquidity.

Securities rated in the lowest category of investment grade and securities rated below investment-grade and unrated securities of comparable credit quality (commonly known as "high-yield bonds" or "junk bonds") typically lack outstanding investment characteristics and have speculative characteristics and are subject to greater credit and market risks than higher-rated securities. The

lower ratings of junk bonds reflect a greater possibility that adverse changes in the financial condition of the issuer or in general economic conditions, or an unanticipated rise in interest rates, may impair the ability of the issuer to make payments of interest and principal. If this were to occur, the values of such securities held by a Fund may become more volatile and the Fund could lose some or all of its investment.. Investment-grade investments generally have lower credit risk than investments rated in below investment grade, however such investments may share some of the risks of lower-rated investments, including the possibility that the issuers may be unable to make timely payments of interest and principal and thus default. Consequently, there can be no assurance that investment grade securities will not be subject to credit difficulties leading to the loss of some or all of the sums invested in such securities.

If a security held by a Fund loses its rating or its rating is downgraded, the Fund may nonetheless continue to hold the security in the discretion of the Investment Manager.

In the case of asset-backed or mortgage-related securities, changes in the actual or perceived ability of the obligors on the underlying assets or mortgages to make payments of interest and/or principal may affect the values of those securities.

A Fund will be subject also to credit risk with respect to the counterparties with which a Fund enters into derivatives contracts and other transactions.

- **Extension Risk:** During periods of rising interest rates, the average life of certain types of securities may be extended because of slower-than-expected principal payments. This may increase the period of time during which an

investment earns a below-market interest rate, increase the security's duration and reduce the value of the security. Extension risk may be heightened during periods of adverse economic conditions generally, as payment rates decline due to higher unemployment levels and other factors.

- **Income Risk:** A Fund's income may decline due to falling interest rates or other factors. Issuers of securities held by a Fund may call or redeem the securities during periods of falling interest rates, and such Fund would likely be required to reinvest in securities paying lower interest rates. If an obligation held by the Fund is prepaid, the Fund may have to reinvest the prepayment in other obligations paying income at lower rates. A reduction in the income earned by the Fund may limit the Fund's ability to achieve its investment objective.
- **Interest Rate Risk:** Interest rate risk is the risk that the securities held by a Fund will decline in value because of increases in market interest rates. Debt securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than debt securities with shorter durations. Falling interest rates also create the potential for a decline in a Fund's income and yield. Interest-only and principal-only securities are especially sensitive to interest rate changes, which can affect not only their prices but can also change the income flows and repayment assumptions about those investments. Variable and floating rate securities also generally increase or decrease in value in response to changes in interest rates, although generally to a lesser degree than fixed-rate securities. A substantial increase in interest rates may also have an adverse impact on the liquidity of a security, especially those with longer durations. Changes in governmental

policy, including changes in central bank monetary policy, could cause interest rates to rise rapidly, or cause investors to expect a rapid rise in interest rates. This could lead to heightened levels of interest rate, volatility and liquidity risks for the fixed income markets generally and could have a substantial and immediate effect on the values of the a Fund's investments.

- **Below Investment Grade Securities Risk:** Securities rated below investment-grade and unrated securities of comparable credit quality (commonly known as "high-yield bonds" or "junk bonds") lack strong investment characteristics, are considered predominantly speculative with respect to the issuer's continuing ability to make principal and interest payments, and are subject to greater levels of credit, liquidity and market risk than higher-rated securities. Such securities can involve a substantially greater risk of default than higher-rated securities, and their values can decline significantly over short periods of time and some of a Fund's investments in such securities may be in default. The lower ratings of high-yield bonds/junk bonds reflect a greater possibility that actual or perceived adverse changes in the financial condition of the issuer or in general economic conditions, or an unanticipated rise in interest rates, may impair the ability of the issuer to make payments of interest and principal. If this were to occur, the values of such securities held by a Fund may fall substantially and the Fund could lose some or all of the value of its investment. Lower-quality debt securities tend to be more sensitive to adverse news about the issuer, or the market or economy in general, than higher quality debt securities. The market for lower quality debt securities can be less liquid than for higher quality debt securities, especially during periods of recession or general market decline, which could make

it difficult at times for the Fund to sell certain securities at prices used in calculating the Fund's net asset value. These securities may have significant volatility.

- **Call/Prepayment Risk:** Call/prepayment risk is the risk that an issuer will exercise its right to pay principal on an obligation held by a Fund earlier than expected or required. This may occur, for example, when there is a decline in interest rates, and an issuer of bonds or preferred stock redeems the bonds or stocks in order to replace them with obligations on which it is required to pay a lower interest or dividend rate. It may also occur when there is an unanticipated increase in the rate at which mortgages or other receivables underlying mortgage- or asset-backed securities held by a Fund are prepaid. In any such case, a Fund may be forced to invest the prepaid amounts in lower-yielding investments, resulting in a decline in the Fund's income.
- **Variable and Floating Rate Securities:** Variable or floating rate securities are debt securities with variable or floating interest rates payments. Variable or floating rate securities bear rates of interest that are adjusted periodically according to formulae intended generally to reflect market rates of interest and allow the Fund to participate (determined in accordance with the terms of the securities) in increases in interest rates through upward adjustments of the coupon rates on the securities. However, during periods of increasing interest rates, changes in the coupon rates may lag behind the changes in market rates or may have limits on the maximum increases in coupon rates. Alternatively, during periods of declining interest rates, the coupon rates on such securities will typically readjust downward resulting in a lower yield.

If indicated in the relevant Supplement, the Fund may also invest in variable or floating rate equity securities, whose dividend payments vary based on changes in market rates of interest or other factors.

Derivatives Risk: A Fund may use derivative instruments for both efficient portfolio management and for investment purposes. Each Fund's Supplement will indicate if and how the Fund intends to use derivative instruments. A Fund's use of derivative instruments involves risks different from, and possibly greater than, the risks associated with investing directly in securities.

A derivative is a financial contract the value of which depends on, or is derived from, the value of an underlying asset, interest rate, or index. Derivative transactions typically involve leverage and may have significant volatility. It is possible that a derivative transaction will result in a loss greater than the principal amount invested, and a Fund may not be able to close out a derivative transaction at a favourable time or price. Risks associated with derivative instruments include potential changes in value in response to interest rate changes or other market developments or as a result of the counterparty's credit quality; the potential for the derivative transaction not to have the effect the Investment Manager anticipated or a different or less favourable effect than the Investment Manager anticipated; the failure of the counterparty to the derivative transaction to perform its obligations under the transaction or to settle a trade; possible mispricing or improper valuation of the derivative instrument; imperfect correlation in the value of a derivative with the asset, currency, rate, or index underlying the derivative; the risk that the Fund may be required to post collateral or margin with its counterparty, and will not be able to recover the collateral or margin in the event of the counterparty's insolvency or bankruptcy; the risk that a Fund will experience losses on its derivatives investments and on its other portfolio investments, even when the derivatives investments may be intended in part or entirely to hedge those portfolio investments; the risks specific to the asset

underlying the derivative instrument; lack of liquidity for the derivative instrument, including without limitation absence of a secondary trading market; the potential for reduced returns to the Fund due to losses on the transaction and an increase in volatility; the potential for the derivative transaction to have the effect of accelerating the recognition of gain; and legal risks arising from the documentation relating to the derivative transaction.

EMIR and OTC derivatives contract risk. As a result of the European regulation commonly referred to as the European Market Infrastructure Regulation or "EMIR", OTC derivatives markets have been and will be subject to significant regulation, potentially including, without limitation, increased margin requirements, mandatory reporting, centralised clearing and execution of transactions. These new regulations may result in increased costs, reduced profit margins and reduced investment opportunities, all of which may negatively impact the performance of the Funds.

In particular, EMIR has recently imposed variation margin rules in respect of OTC derivative contracts (with the temporary exception of physically settled forward foreign exchange contracts), which include a requirement to have in place procedures for the timely, accurate and appropriately segregated exchange of collateral with respect to OTC derivative contracts. This may necessitate the amendment of the Company's existing OTC derivative contracts which would result in additional costs. The variation margin rules will also require certain haircuts to be applied to collateral received for OTC derivative contracts, which will vary depending on the issuer, credit rating, currency and residual maturity of the collateral. As the variation margin rules are likely to result in an increase in the level of its assets which a Fund will be required to retain in cash or very liquid assets in order to have available for use as collateral, this could result in a reduced proportion of the Fund's assets being available for allocation to the Fund's investment policy and, consequently, an increase in the potential tracking error for the Fund.

While some of the obligations under EMIR have come into force, a number of the requirements are subject to phase-in periods and certain key issues have not been finalised as yet. As a consequence, it is as yet unclear how the derivatives markets will adapt to the new regulatory regime. Accordingly, it is difficult to predict the full impact of EMIR on the Company, although this may include an increase in the overall costs of entering into and maintaining OTC derivative contracts.

Emerging Markets Risks: Investments in emerging markets are generally subject to a greater risk of loss than investments in developed markets. This may be due to, among other things, the possibility of greater market volatility, lower trading volume and liquidity, greater risk of expropriation, nationalisation, and social, political and economic instability, greater reliance on a few industries, international trade or revenue from particular commodities, less developed accounting, legal and regulatory systems, higher levels of inflation, deflation or currency devaluation, risk that the country will limit or prevent the conversion or repatriation of amounts denominated in that country's currency, risk that it may not be possible to undertake currency hedging techniques, greater risk of market shut down, and more significant governmental limitations on investment policy as compared to those typically found in a developed market.

In addition, issuers (including governments) in emerging market countries may have less financial stability than in other countries. The securities of emerging market companies may trade less frequently and in smaller volumes than more widely held securities and may have significant price volatility and thus the accumulation and disposal of holdings may be more expensive, time-consuming and generally more difficult than in more developed markets. Further, given the lack of an adequate regulatory structure, it is possible that securities in which investments are made may be found to be fraudulent.

Market disruptions or substantial market corrections may limit very significantly the liquidity of securities of certain companies in a particular

country or geographic region, or of all companies in the country or region. In some cases, emerging markets may restrict the access of foreign investors to securities. As a result, certain equity securities may not always be available to a Fund because, for example, the maximum permitted number of or aggregate investment by foreign shareholders has been reached. In addition, the outward remittance by foreign investors of their share of net profits, capital and dividends may be restricted or require governmental approval. A Fund may be unable to liquidate its positions in such securities at any time, or at a favourable price, in order to meet the Fund's obligations. There is also the potential for unfavourable actions such as embargo and acts of war. As a result, there will tend to be an increased risk of price volatility in investments in emerging market countries, which may be magnified by currency fluctuations relative to a Fund's base currency.

Settlement and asset custody practices for transactions in emerging markets may differ and may be less developed than those in developed markets. Standards may not be as high and supervisory and regulatory authorities not as sophisticated. Such differences may include possible delays in settlement and certain settlement practices, such as delivery of securities prior to receipt of payment, which increase the likelihood of a "failed settlement". Failed settlements can result in losses. Custodial services are often more expensive and other investment-related costs higher in emerging countries than in developed countries.

For these and other reasons, investments in emerging markets are often considered speculative and losses may be incurred.

Equity Investing Risk: The market prices of equity securities owned by a Fund may go up or down, sometimes rapidly or unpredictably. The value of a security may decline for a number of reasons that may directly relate to the issuer, such as management performance, financial leverage, non-compliance with regulatory requirements, and reduced demand for the issuer's goods or services. The values of equity securities also may decline

due to general industry or market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. In addition, equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time. A Fund may continue to accept new subscriptions and to make additional investments in equity securities even under general market conditions that the Investment Manager views as unfavourable for equity securities.

Frequent Trading/Portfolio Turnover Risk: A Fund may engage in active and frequent trading of its portfolio securities. Fund turnover generally involves a number of direct and indirect costs and expenses to the trading Fund, including, for example, brokerage dealing commissions, dealer mark-ups and bid/asked spreads, and transaction costs on the sale of securities and reinvestment in other securities. The costs related to increased portfolio turnover have the effect of reducing the Fund's investment return and the sale of securities by a Fund may result in the realisation of taxable capital gains, including short term capital gains. Frequent trading can also result in increased tax liability for the trading Fund.

Geographic Concentration Risk: A Fund that invests its assets in a small number of countries, or in a particular geographic region or regions will be more closely tied to market, currency, economic, political, environmental, or regulatory conditions and developments in the countries or regions in which such Fund invests, and consequently its performance may be more volatile than the performance of a more geographically-diversified fund.

Index Licensing Risk: It is possible that the license under which the Investment Manager or the applicable Fund is permitted to replicate or otherwise use an index will be terminated or may be disputed, impaired or cease to remain in effect. In such a case, the Investment Manager may be required to replace the index with another index

which it considers to be appropriate in light of the investment strategy of the applicable Fund. The use of and/or transition to any such substitute index may have an adverse impact on such Fund's performance. In the event that the Investment Manager is unable to identify a suitable replacement for the relevant index, the Fund may be closed.

Index Tracking Risk: The investment objective of certain Funds will be to track the performance of a specified index. While the Investment Manager seeks to track the performance of the index (i.e., achieve a high degree of correlation with the index), a Fund's return may not match the return of the specified index for a number of reasons. For example, the return on the sample of securities purchased by such Fund) to replicate the performance of the index may not correlate precisely with the return of the index. Each index tracking Fund incurs a number of operating expenses not applicable to the index, and incurs costs in buying and selling securities. In addition, each of these Funds may not be fully invested at times, either as a result of cash flows into or out of the Fund or reserves of cash held by the Fund to meet redemptions. Changes in the composition of the index and regulatory requirements also may impact an index tracking Fund's ability to match the return of the specified index. The Investment Manager may apply one or more "screens" or investment techniques to refine or limit the number or types of issuers included in the index in which a Fund may invest. Application of such screens or techniques may result in investment performance below that of the index and may not produce results expected by the Investment Manager. Index tracking risk may be heightened during times of increased market volatility or other unusual market conditions.

Inflation Risk: Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the values of a Fund's assets can decline.

Inflation-Indexed Securities Risk: The principal amount of an inflation-indexed security typically

increases with inflation and decreases with deflation, as measured by a specified index. It is possible that, in a period of declining inflation rates, a Fund could receive at maturity less than the initial principal amount of an inflation-indexed security. Depending on the changes in inflation rates during the period a Fund holds an inflation-indexed security, such Fund may earn less on the security than on a conventional bond. In relation to actively managed strategies in particular, changes in the values of inflation indexed securities may be difficult to predict, and it is possible that an investment in such securities will have an effect different from that anticipated by the Investment Manager. The principal amounts of inflation-indexed securities are typically only adjusted periodically, and changes in the values of the securities may only approximately reflect changes in inflation rates and may occur substantially after the changes in inflation rates in question occur.

Investment in Multiple Countries: Investments in securities of companies from multiple countries and/or securities of companies with significant exposure to multiple countries can involve additional risks and costs. Political, social, and economic instability, the imposition of currency or capital controls, or the expropriation or nationalisation of assets in a particular country can cause dramatic declines in that country's economy and affect a Fund's investments exposed to such country. Investing in multiple countries creates operational risks due to different systems, procedures and requirements in a particular country, different accounting, auditing, financial reporting, and legal standards and practices and varying laws regarding withholding and other taxes. Enforcing legal rights can be difficult, costly, and slow in some countries, and can be particularly difficult against governments.

Markets in different countries have different clearance and settlement procedures and in certain markets there have been times when settlements have been unable to keep pace with the volume of transactions. Delays in settlement may increase credit risk to a Fund, limit the ability of the Fund to reinvest the proceeds of a sale of

securities, hinder the ability of the Fund to lend its portfolio securities, and potentially subject the Fund to penalties for its failure to deliver to on-purchasers of securities whose delivery to the Fund was delayed. Delays in the settlement of securities purchased by the Fund may limit the ability of the Fund to sell those securities at times and prices it considers desirable, and may subject the Fund to losses and costs due to its own inability to settle with subsequent purchasers of the securities from it. The Fund may be required to borrow monies it had otherwise expected to receive in connection with the settlement of securities sold by it, in order to meet its obligations to others. Limits on the ability of the Fund to purchase or sell securities due to settlement delays could increase any variance between the Fund's performance and that of its benchmark index.

In some countries transactions costs such as brokerage commissions and custody costs may be high.

A Fund invested in multiple countries will be exposed to such risks in more than one country.

Investment Risk: Investment risk includes the possible loss of the entire amount of capital that you invest. The values of the securities and other investments held by the Fund may increase or decrease, at times rapidly and unexpectedly. Your investment in a Fund may at any point in the future be worth less than your original investment. Accordingly, it is important that you periodically evaluate your investment in a Fund.

Investment Style Risk – Green Bond: Certain Fund's assets will be concentrated in companies in green investments which means such Fund will be more affected by the performance of green investments than a fund that is more diversified.

The market for green investments is new and still developing. There may at any time be a limited number of green investments available for purchase in the market and/or a limited number of issuers of green investments, and the market for green investments may be illiquid and the prices of green investments volatile. There is no guarantee

that a robust secondary market for green investments will exist at any point in time. Green investments are subject to the risk that, under certain market conditions, the Fund may underperform funds that invest in a broader range of investments. Some green investments may be dependent on government tax incentives and subsidies, and on political support for certain environmental technologies and companies. There is no industry standard to determine whether a security is “green” or not, and it is possible that the Fund will include securities that index provider considers to be “green” securities but that other investors might not. The index provider may, in any case, rely solely on an issuer’s statements that its securities are, in fact, “green” securities, even if such issuers do not guarantee that fact. Many green investments have in recent periods been favourably affected by increased investor awareness of their availability and investors’ desire to own green investments; green investments may at any time fall out of favour with investors and their values may as a result be adversely affected.

Investment Style Risk – Geographic Focus:

Asia: Certain Fund's will concentrate investments in companies in Asia Pacific and Emerging Asia and, consequently, such Fund’s performance is expected to be closely tied to the social, political, and economic conditions within that region, and its exposure to related risks could make its performance more volatile than the performance of more geographically diversified funds. Certain Asian economies have experienced high inflation, high unemployment, currency devaluations and restrictions, and over-extension of credit. Many Asian economies have experienced rapid growth and industrialization, and there is no assurance that this growth rate will be maintained. During the recent global recession, many of the export-driven Asian economies experienced the effects of the economic slowdown in Europe and the United States, and certain Asian governments implemented stimulus plans, low-rate monetary policies and currency devaluations. Economic events in any one Asian country may have a significant economic effect on the entire Asian region, as well as on major trading partners

outside Asia. Any adverse event in the Asian markets may have a significant adverse effect on some or all of the economies of the countries in which the Fund invests. Many Asian countries are subject to political risk, including corruption and regional conflict with neighbouring countries. In addition, many Asian countries are subject to social and labour risks associated with demands for improved political, economic and social conditions. These risks, among others, may adversely affect the value of the Fund's investments.

Australia: Certain Fund's will concentrate investments in companies in Australia and, consequently, such Fund's performance is expected to be closely tied to the social, political, and economic conditions within that country, and its exposure to related risks could make its performance more volatile than the performance of more geographically diversified funds. The Australian economy is heavily dependent on exports from the agricultural and mining sectors. This makes the Australian economy susceptible to fluctuations in the commodity markets. The Australian economy is also becoming increasingly dependent on its growing services industry. The Australian economy is dependent on trading with key trading partners, including the China, Japan, Singapore, the United States and certain European countries.

Canada: Certain Fund's will concentrate investments in companies in Canada and, consequently, such Fund’s performance is expected to be closely tied to the social, political, and economic conditions within that country, and its exposure to related risks could make its performance more volatile than the performance of more geographically diversified funds. The Canadian economy is heavily dependent on relationships with certain key trading partners. The United States is Canada's largest trading and investment partner, and the Canadian economy is significantly affected by developments in the U.S. economy. Since the implementation of certain intergovernmental measures agreed upon by Canada, the United States and Mexico, total two-way merchandise trade between the United States

and Canada has more than doubled. Any downturn in U.S. or Mexican economic activity is likely to have an adverse impact on the Canadian economy. The Canadian economy is also dependent upon external trade with other key trading partners, including China and the European Union. In addition, Canada is a large supplier of natural resources (e.g., oil, natural gas and agricultural products). As a result, the Canadian economy is sensitive to fluctuations in certain commodity prices.

Europe: Certain Fund's will concentrate investments in companies in the Europe Union ("EU") and, consequently, such Fund's performance is expected to be closely tied to the social, political, and economic conditions within that region, and its exposure to related risks could make its performance more volatile than the performance of more geographically diversified funds.

The Economic and Monetary Union of the EU requires compliance with restrictions on inflation rates, deficits, interest rates, debt levels and fiscal and monetary controls, each of which may significantly affect every country in Europe. Decreasing imports or exports, changes in governmental or EU regulations on trade, changes in the exchange rate of the euro (the common currency of certain EU countries), the default or threat of default by an EU member country on its sovereign debt, and/or an economic recession in an EU member country may have a significant adverse effect on the economies of EU member countries and their trading partners. The European financial markets have recently experienced volatility and adverse trends due to concerns about economic downturns or rising government debt levels in several European countries, including Greece, Ireland, Italy, Portugal and Spain. These events have adversely affected the exchange rate of the euro and may continue to significantly affect every country in Europe, including countries that do not use the euro.

Responses to the financial problems by European governments, central banks and others, including austerity measures and reforms, may not produce

the desired results, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and other entities of their debt could have additional adverse effects on economies, financial markets and asset valuations around the world. In addition, one or more countries may abandon the euro and/or withdraw from the EU. The impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far-reaching.

The United Kingdom held a referendum with respect to its membership in the EU (the "EU Referendum") on 23 June 2016. The United Kingdom has one of the largest economies in Europe, and the United States and other European countries are substantial trading partners of the United Kingdom. Taking into consideration the result of the EU Referendum to leave the EU heightened volatility, increased trading volumes and liquidity constraints in the financial markets may continue for the medium term. Moreover, the terms of the withdrawal will not be known for some time which may cause uncertainty in the global financial markets and the impact of such withdrawal on the United Kingdom, the EU and the global financial markets is not clear but could be significant and far-reaching.

Japan: Certain Fund's will concentrate investments in companies in Japan and, consequently, such Fund's performance is expected to be closely tied to the social, political, and economic conditions within that country, and its exposure to related risks could make its performance more volatile than the performance of more geographically diversified funds. The growth of Japan's economy has historically lagged that of its Asian neighbours and other major developed economies. The Japanese economy is heavily dependent on international trade and has been adversely affected by trade tariffs, other protectionist measures, competition from emerging economies and the economic conditions of its trading partners. China has become an important trading partner with Japan, yet the countries' political relationship has become strained. Should political

tension increase, it could adversely affect the economy, especially the export sector, and destabilize the region as a whole. Japan also remains heavily dependent on oil imports, and higher commodity prices could therefore have a negative impact on the economy. The Japanese economy faces several other concerns, including a financial system with large levels of nonperforming loans, over-leveraged corporate balance sheets, extensive cross-ownership by major corporations, a changing corporate governance structure, and large government deficits. These issues may cause a slowdown of the Japanese economy. The Japanese yen has fluctuated widely at times and any increase in its value may cause a decline in exports that could weaken the Japanese economy. Japan has, in the past, intervened in the currency markets to attempt to maintain or reduce the value of the yen. Japanese intervention in the currency markets could cause the value of the yen to fluctuate sharply and unpredictably and could cause losses to investors. Japan has an aging workforce and has experienced a significant population decline in recent years. Japan's labour market appears to be undergoing fundamental structural changes, as a labour market traditionally accustomed to lifetime employment adjusts to meet the need for increased labour mobility, which may adversely affect Japan's economic competitiveness.

The nuclear power plant catastrophe in Japan in March 2011 may have short- and long-term effects on the Japanese economy and its nuclear energy industry. Natural disasters, such as earthquakes, volcanoes, typhoons or tsunamis, could occur in Japan or surrounding areas and could negatively affect the Japanese economy and, in turn, the Fund.

Latin America: Certain Fund's will concentrate investments in companies in Latin America and, consequently, such Fund's performance is expected to be closely tied to the social, political, and economic conditions within that region, and its exposure to related risks could make its performance more volatile than the performance of more geographically diversified funds. Latin American economies are generally considered

emerging markets and are generally characterized by high interest, inflation, and unemployment rates. Currency devaluations in any one Latin American country can have a significant effect on the entire Latin American region. Because commodities such as oil and gas, minerals, and metals represent a significant percentage of the region's exports, the economies of Latin American countries are particularly sensitive to fluctuations in commodity prices. A relatively small number of Latin American companies represents a large portion of Latin America's total market and thus may be more sensitive to adverse political or economic circumstances and market movements.

North America: Certain Fund's will concentrate investments in companies in North America and, consequently, such Fund's performance is expected to be closely tied to the social, political, and economic conditions within that region, and its exposure to related risks could make its performance more volatile than the performance of more geographically diversified funds. The United States is Canada's and Mexico's largest trading and investment partner. The Canadian and Mexican economies are significantly affected by developments in the U.S. economy. Since the implementation of the North American Free Trade Agreement ("NAFTA") in 1994 among Canada, the United States and Mexico, total merchandise trade between the three countries has increased. To further this relationship, the three NAFTA countries entered into the Security and Prosperity Partnership of North America in March 2005, which may further affect Canada's and Mexico's dependency on the U.S. economy. Economic events in any one North American country can have a significant economic effect on the entire North American region, and on some or all of the North American countries in which the Fund invests.

United Kingdom: Certain Fund's will concentrate investments in companies in the United Kingdom and, consequently, such Fund's performance is expected to be closely tied to the social, political, and economic conditions within that country, and its exposure to related risks could make its performance more volatile than the performance

of more geographically diversified funds. The United Kingdom has one of the largest economies in Europe, and the United States and other European countries are substantial trading partners of the United Kingdom. As a result, the British economy may be impacted by changes to the economic condition of the United States and other European countries. The British economy, along with certain other European Union (“EU”) economies, experienced a significant economic slowdown during the recent financial crisis, and certain British financial institutions suffered significant losses, were severely under-capitalized and required government intervention to survive. The British economy relies heavily on the export of financial services to the United States and other European countries and, therefore, a prolonged slowdown in the financial services sector may have a negative impact on the British economy. Continued governmental involvement or control in certain sectors may stifle competition in certain sectors or cause adverse effects on economic growth. In the past, the United Kingdom has been a target of terrorism. Acts of terrorism in the United Kingdom or against British interests abroad may cause uncertainty in the British financial markets and adversely affect the performance of the issuers to which the Fund has exposure.

The United Kingdom held a referendum with respect to its membership in the EU (the “EU Referendum”) on 23 June 2016. . Taking into consideration the result of the EU Referendum to leave the EU heightened volatility, increased trading volumes and liquidity constraints in the financial markets may continue for the medium term. Moreover, the terms of the withdrawal will not be known for some time which may cause uncertainty in the global financial markets and the impact of such withdrawal on the United Kingdom, the EU and the global financial markets is not clear but could be significant and far-reaching.

Switzerland: The Fund's will concentrate investments in companies in Switzerland and, consequently, its performance is expected to be closely tied to the social, political, and economic conditions within that region, and its exposure to related risks could make its performance more

volatile than the performance of more geographically diversified funds.

Investment Style Risk – Growth: The prices of growth stocks may be based largely on expectations of future earnings, and their prices can decline rapidly and significantly in reaction to negative news about such factors as earnings, revenues, the economy, political developments, or other news. Growth stocks may underperform stocks in other broad style categories (and the stock market as a whole) over any period of time and may shift in and out of favour with investors generally, sometimes rapidly, depending on changes in market, economic, and other factors. As a result, at times when a Fund holds substantial investments in growth stocks it may underperform other investment funds that invest more broadly or that favour different investment styles. Because growth companies typically reinvest their earnings, growth stocks typically do not pay dividends at levels associated with other types of stocks, if at all.

Investment Style Risk – Large Cap Companies: Securities issued by large-capitalization companies may present risks not present in smaller companies. For example, larger companies may be unable to respond as quickly as smaller and mid-sized companies to competitive challenges or to changes in business, product, financial, or other market conditions. Larger companies may not be able to maintain growth at the high rates that may be achieved by well-managed smaller and mid-sized companies, especially during strong economic periods. Returns on investments in securities of large companies could trail the returns on investments in securities of smaller and mid-sized companies.

Investment Style Risk – Quality: A “quality” style of investing emphasizes companies with high returns, stable earnings, and low financial leverage. This style of investing is subject to the risk that the past performance of these companies does not continue or that the returns on “quality” equity securities are less than returns on other styles of investing or the overall stock market.

Investment Style Risk – Small, Mid and Micro – Cap Companies: The securities of small-, mid- and micro-capitalization companies may be more volatile and may involve more risk than the securities of larger companies. These companies may have limited product lines, markets or financial resources, may lack the competitive strength of larger companies, and may depend on a few key employees. These companies, particularly micro-capitalisation companies, may be in the early stages of development of product lines. In addition, these companies may have been recently organized and may have little or no track record of success. The securities of smaller companies may trade less frequently and in smaller volumes than more widely held securities. The prices of these securities may fluctuate more sharply than those of other securities, and a Fund may experience some difficulty in establishing or closing out positions in these securities at prevailing market prices. There may be less publicly available information about the issuers of these securities or less market interest in these securities than in the case of larger companies, both of which can cause significant price volatility. Some securities of smaller issuers may be illiquid or may be restricted as to resale. A Fund investing in these companies may be unable to liquidate its positions in such securities at any time, or at a favourable price, in order to meet the Fund's obligations. Returns on investments in securities of small- or micro-capitalization companies could trail the returns on investments in securities of larger companies.

Investment Style Risk – Value: Value stocks present the risk that they may decline in price or never reach their expected full market value, either because the market fails to recognize the stock's intrinsic worth or the Investment Manager overestimates the stock's expected value. Value stocks may underperform stocks in other broad style categories (and the stock market as a whole) over any period of time and may shift in and out of favour with investors generally, sometimes rapidly, depending on changes in market, economic, and other factors. As a result, at times when a Fund holds substantial investments in value stocks it

may underperform other investment portfolios that invest more broadly or that favour different investment styles.

IPO Risk Factor: A Fund may at times have the opportunity to invest in securities offered in initial public offerings ("IPOs"). IPOs involve companies that have no public operating history and therefore entail more risk than established public companies. The prices of securities offered in IPOs can have significant volatility and a Fund may lose money on an investment in such securities. IPOs may not be available to the Funds at all times, and a Fund may not always invest in IPOs offered to it. Investments in IPOs may have a substantial beneficial effect on a Fund's investment performance. A Fund's investment return earned during a period of substantial investment in IPOs may not be sustained during other periods when the Fund makes more-limited, or no investments in IPOs. There can be no assurance that the Funds will have the opportunity to invest in IPOs that are made available to other clients of the Investment Manager.

Large shareholder risk: To the extent a large proportion of the shares of a Fund are held by a small number of shareholders (or a single shareholder), including funds or accounts over which the Investment Manager or a sub-investment manager has investment discretion, a Fund is subject to the risk that these shareholders will purchase or redeem their shares in large amounts rapidly or unexpectedly, including as a result of an asset allocation decision made by the Investment Manager or a sub-investment manager. These transactions could adversely affect the ability of a Fund to conduct its investment program.

Leveraging Risk: Certain transactions, including, for example, borrowing transactions, certain derivatives transactions, securities lending transactions and other investment transactions, such as when-issued, delayed-delivery, or forward commitment transactions, may create investment leverage. When a Fund engages in transactions

that have a leveraging effect on the Fund's investment portfolio, the value of the Fund will be potentially more volatile and all other risks will tend to be compounded. This is because leverage generally creates investment risk with respect to a larger base of assets than the Fund would otherwise have and so magnifies the effect of any increase or decrease in the value of the Fund's underlying assets. The use of leverage is considered to be a speculative investment practice and may result in losses to the Fund. In transactions involving leverage, a relatively small market movement or change in other underlying indicator can lead to significantly larger losses to the Fund. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment. The use of leverage may cause the Fund to liquidate positions when it may not be advantageous to do so to satisfy repayment, interest payment, or margin obligations or to meet asset segregation or coverage requirements.

Limited Investment Programme Risk: An investment in any Fund, or even in a combination of Funds, is not intended to be a complete investment programme, but rather is intended for investment as part of a diversified investment portfolio. Investors should consult their own advisors as to the role of an investment in any of the Funds in their overall investment programme.

Liquidity Risk: Liquidity risk is the risk that a Fund may not be able to acquire or dispose of securities or close out derivatives transactions readily at a favourable time or prices (or at all) or at prices approximating those at which the Fund currently values them. In large-scale transactions or when markets are partially illiquid (e.g. where there are numerous individually agreed instruments) it may not be possible to execute a transaction or close out a position at an advantageous price.

Illiquid securities that may be held in accordance with applicable law ("Permitted Illiquid Securities") may be subject to restrictions on resale, may trade in the over-the-counter market or in limited volume, or may not have an active trading market. In addition, Permitted Illiquid Securities may trade at a discount from comparable, more liquid

investments and may be subject to wide fluctuations in market value. It may be difficult for a Fund to value Permitted Illiquid Securities accurately. The market for certain investments held by a Fund may become illiquid under adverse market or economic conditions independent of any specific adverse changes in the conditions of a particular issuer. Disposal of Permitted Illiquid Securities may entail registration expenses and other transaction costs that are higher than those for liquid securities.

From time to time, the counterparties with which a Fund effects transactions might cease making markets or quoting prices in certain of the instruments in which a Fund has invested. In such instances, a Fund might be unable to enter into a desired transaction or to enter into any offsetting transaction with respect to an open position, which might adversely affect its performance.

The Company employs an appropriate liquidity risk management process, which takes into account efficient portfolio management transactions employed by the Funds, in order to ensure that each Fund is able to comply with its stated redemption obligations. However, it is possible that in the type of circumstances described above, a Fund may not be able to realise sufficient assets to meet all redemption requests that it receives or the Company may determine that the circumstances are such that meeting some or all of such requests is not in the best interests of the Shareholders in a Fund as a whole. In such circumstances, the Company may take the decision to apply the redemption gate provisions described in the "**Shares - Redemption**" section of this Prospectus or suspend dealings in the relevant Fund as described in the "**Valuation and Calculation of NAV – Temporary Suspension of NAV Calculation and Dealings**" section of this Prospectus.

Management Risk: Certain Funds are actively managed investment portfolios and are subject to a degree of management risk. The Investment Manager's judgments about the implementation of a strategy or the attractiveness, relative value or potential appreciation of a particular sector,

security or investment strategy or hedging strategy may prove incorrect and may cause such Fund to incur losses. There can be no assurance that the Investment Manager's investment techniques and decisions will produce the desired results.

Market Disruption and Geopolitical Risk: Each Fund is subject to the risk that geopolitical events will disrupt securities markets and adversely affect global economies and markets. War, terrorism, and related geopolitical events have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on global economies and markets generally. Likewise, natural and environmental disasters and systemic market dislocations may be highly disruptive to economies and markets. Those events as well as other changes in economic and political conditions also could adversely affect individual issuers or related groups of issuers, securities markets, interest rates, credit ratings, inflation, investor sentiment, and other factors affecting the value of a Fund's investments.

Given the increasing interdependence among global economies and markets, conditions in one country, market, or region might adversely affect markets, issuers, and/or foreign exchange rates in other countries, including the countries in which the Fund invests. Any partial or complete dissolution of the European Union or the European Monetary Union due to the withdrawal of one or more member states or any increased uncertainty as to each of their status, could have significant adverse effects on currency and financial markets, and on the values of the Funds' investments.

Securities and financial markets may be susceptible to market manipulation or other fraudulent trade practices, which could disrupt the orderly functioning of these markets or adversely affect the values of investments traded in these markets, including investments held by the Company.

To the extent a Fund has focused its investments in the market or index of a particular region, adverse geopolitical and other events could have a disproportionate impact on the Fund.

Market Risk: Market prices of investments held by a Fund may increase or decrease, at times rapidly or unpredictably. A Fund's investments are subject to changes in general economic conditions, general market fluctuations and the risks inherent in investment in international securities markets. Investment markets can be volatile and prices of investments can change substantially due to various factors including, but not limited to, economic growth or recession, changes in interest rates, changes in actual or perceived creditworthiness of issuers and general market liquidity. Even if general economic conditions do not change, the value of an investment in a Fund could decline and be worth less than your original investment if the particular industries, sectors or companies in which the Fund invests do not perform well or are adversely affected by events. Further, legal, political, regulatory and tax changes also may cause fluctuations in markets and securities prices. The magnitude of these price fluctuations will be greater when the maturity of the outstanding securities is longer. Since a Fund may make investments in currencies other than its base currency, the value of a Fund's assets may also be affected by changes in currency rates and imposition of currency or capital controls.

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. These models may be proprietary to the Investment Manager or they may be licensed from third parties. Any imperfections, errors or limitations in these models could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. These models may make simplifying assumptions that limit their effectiveness and may draw from historical data that does not adequately identify or reflect factors necessary to an appropriate or useful output. There can be no assurance that the models will behave as expected in all market conditions. In addition, computer programming used to create quantitative models, or the data on which such models operate, might contain one or more errors.

Such errors might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance) related to such errors.

It is possible that the license under which the Investment Manager or the applicable Fund is permitted to use the quantitative models will be terminated or may be disputed, impaired or cease to remain in effect. In such a case, the Investment Manager may be required to replace the quantitative model with another quantitative model which it considers to be appropriate in light of the investment strategy of the applicable Fund. The use of any such substitute quantitative model may have an adverse impact on such Fund's performance. In the event that the Investment Manager is unable to identify a suitable replacement for the relevant quantitative model, the Fund may be wound up.

Mortgage-related and Asset-Backed Securities

Risk: Investments in mortgage-related and other asset-backed securities are subject to the risk of significant credit downgrades, illiquidity, and defaults to a greater extent than many other types of fixed income investments. Mortgage-related securities represent a participation in, or are secured by, mortgage loans. Other asset-backed securities are typically structured like mortgage-related securities, but instead of mortgage loans or interests in mortgage loans, the underlying assets may include, for example, items such as motor vehicle instalment sales or instalment loan contracts, leases on various types of real and personal property, and receivables from credit card agreements. During periods of falling interest rates, mortgage-related and other asset-backed securities, which typically provide the issuer with the right to prepay the security prior to maturity, may be prepaid, which may result in a Fund having to reinvest the proceeds in other investments at lower interest rates. During periods of rising interest rates, the average life of mortgage-related and other asset-backed securities may extend because of slower-than expected principal payments. This may lock in a below market interest rate, increase the security's duration and interest rate sensitivity, and reduce the value of the security. As a result, mortgage-related and

other asset-backed securities may have less potential for capital appreciation during periods of declining interest rates than other debt securities of comparable maturities, although they may have a similar risk of decline in market values during periods of rising interest rates. Prepayment rates are difficult to predict and the potential impact of prepayments on the value of a mortgage-related or other asset-backed security depends on the terms of the instrument and can result in significant volatility. The price of a mortgage-related or other asset-backed security also depends on the credit quality and adequacy of the underlying assets or collateral. Defaults on the underlying assets, if any, may impair the value of a mortgage-related or other asset-backed security. For some asset-backed securities in which the Fund invests, such as those backed by credit card receivables, the underlying cash flows may not be supported by a security interest in a related asset. Moreover, the values of mortgage-related and other asset-backed securities may be substantially dependent on the servicing of the underlying asset pools, and are therefore subject to risks associated with the negligence or malfeasance by their servicers and to the credit risk of their servicers. In certain situations, the mishandling of related documentation may also affect the rights of securities holders in and to the underlying collateral. There may be legal and practical limitations on the enforceability of any security interest granted with respect to underlying assets, or the value of the underlying assets, if any, may be insufficient if the issuer defaults. Unanticipated legal and administrative costs incurred when enforcing a security interest may reduce the value of the Fund that holds such security.

In a "forward roll" transaction, the Fund will sell a mortgage-related security to a bank or other permitted entity and simultaneously agree to purchase a similar security from the institution at a later date at an agreed upon price. The mortgage securities that are purchased will bear the same interest rate as those sold, but generally will be collateralized by different pools of mortgages with different prepayment histories than those sold. The values of such transactions will be affected by

many of the same factors that affect the values of mortgage-related securities generally. In addition, forward roll transactions may have the effect of creating investment leverage in the Fund.

OTC Clearing Risk: Certain derivatives transactions entered into by a Fund will be required to be centrally cleared. In a cleared derivatives transaction, a Fund's counterparty to the transaction is a central derivatives clearing organization, or clearing house, rather than a bank or dealer. A Fund will typically clear derivatives transactions through clearing members that are futures commission merchants and members of the clearing houses. A Fund will make and receive payments owed under cleared derivatives transactions (including margin payments) through its accounts at clearing members. A Fund's clearing members guarantee a Fund's performance of its obligations to the clearing house. In contrast to bilateral derivatives transactions, clearing members can generally require termination of existing cleared derivatives transactions at any time or increase the amount of margin required to be provided by a Fund to the clearing member for any new or existing cleared derivatives transaction above the amount of margin required by the clearing house or clearing member. Any such termination or increase could result in losses to a Fund on its cleared derivatives position. Also, a Fund is subject to execution risk in respect of cleared derivatives transactions, because it is possible that no clearing member will be willing to clear a particular transaction on Fund's behalf. In that case, the transaction might have to be terminated, and a Fund could lose some or all of the benefit of any increase in the value of the transaction after the time of the trade. In addition, the documentation governing the relationship between a Fund and a clearing member that is drafted by the clearing members is generally not negotiable and therefore less favourable to a Fund than typical bilateral derivatives documentation. These and other new rules and regulations could, among other things, restrict a Fund's ability to engage in, or increase the cost to a Fund of, derivatives transactions and could make the use of derivatives by the Fund impractical or generally

undesirable. These regulations are new and evolving, so their potential impact on a Fund and the financial system are not yet known. While the new regulations and central clearing of some derivatives transactions are designed to reduce systemic risk, there is no assurance that the new clearing mechanisms will achieve that result, and in the meantime, as noted above, central clearing exposes Funds to new kinds of risks and costs.

Passive Strategy/Index Risk: As set forth in the relevant Supplement, certain Funds are managed with a passive investment strategy, attempting to track the performance of an unmanaged index of securities. Such Fund will seek to replicate index returns regardless of the current or projected performance of the index or of the actual securities comprising the index. The Fund generally will buy and will not sell a security included in the index as long as the security is part of the index regardless of any sudden or material decline in value or foreseeable material decline in value of the security, even though the Investment Manager may make a different investment decision for other managed accounts or portfolios that hold the security. As a result, a passively managed Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the index will affect the performance, volatility, and risk of the index (in absolute terms and by comparison with other indices) and, consequently, the performance, volatility, and risk of the relevant Fund. Such Fund's performance may not match that of the index. This differs from an actively-managed fund, which typically seeks to outperform a benchmark index.

Preferred Securities Risk: Generally, preferred security holders have no or limited voting rights with respect to the issuing company unless certain events occur. In addition, preferred securities are subordinated to bonds and other debt instruments in a company's capital structure and therefore will be subject to greater credit risk than those debt instruments. Unlike debt securities, dividend payments on a preferred security typically must be declared by the issuer's board of directors. An

issuer's board of directors is generally not under any obligation to pay a dividend (even if such dividends have accrued), and may suspend payment of dividends on preferred securities at any time. In the event an issuer of preferred securities experiences economic difficulties, the issuer's preferred securities may lose substantial value due to the reduced likelihood that the issuer's board of directors will declare a dividend and the fact that the preferred security may be subordinated to other securities of the same issuer. Further, because many preferred securities pay dividends at a fixed rate, their market price can be sensitive to changes in interest rates in a manner similar to bonds—that is, as interest rates rise, the value of the preferred securities held by a Fund are likely to decline. Therefore, to the extent that the Fund invests a substantial portion of its assets in fixed rate preferred securities, rising interest rates may cause the value of the Fund's investments to decline significantly. In addition, because many preferred securities allow holders to convert the preferred securities into common stock of the issuer, their market price can be sensitive to changes in the value of the issuer's common stock and, therefore, declining common stock values may also cause the value of the Fund's investments to decline. Preferred securities often have call features which allow the issuer to redeem the security at its discretion. The redemption of a preferred security having a higher than average yield may cause a decrease in the Fund's yield.

The value of a preferred security held by a Fund may decline due to a number of factors affecting, or perceived to affect, the issuer of the security, such as, for example, management performance, financial leverage, and reduced demand for the issuer's goods or services as well as the historical and prospective earnings of the issuer and the value of its assets. In addition, there may be political changes that impact the ability of issuers to repay principal and to make interest payments on securities. Changes to the financial condition or credit rating of issuers may also adversely affect the value of the securities issued.

Provisional Allotment Risk: As the Company may provisionally allot Shares to proposed investors prior to receipt of the requisite subscription monies for those Shares, the Company may suffer losses as a result of the non-payment of such subscription monies.

Real Property Securities Risk: There are special risks associated with investment in securities of companies engaged in real property markets, including without limitation real estate operating companies. An investment in a real property company may be subject to risks similar to those associated with direct ownership of real estate, including, by way of example, the possibility of declines in the value of real estate, losses from casualty or condemnation, and changes in local and general economic conditions, supply and demand, interest rates, environmental liability, zoning laws, regulatory limitations on rents, property taxes, and operating expenses. An investment in a real property company is subject to additional risks, such as poor performance by the manager of the real property company, adverse changes in tax laws, difficulties in valuing and disposing of real estate, and the effect of general declines in stock prices. Some real property companies have limited diversification because they invest in a limited number of properties, a narrow geographic area, or a single type of property. Also, the organizational documents of a real property company may contain provisions that make changes in control of the company difficult and time-consuming. As a shareholder in a real property company a Fund, and indirectly the Fund's shareholders, would bear their rateable shares of the real property company's expenses and would at the same time continue to pay their own fees and expenses.

REIT Risk. In addition to the risks associated with investing in the securities of real property companies, REITs are subject to certain additional risks. REITs may be affected by changes in the values of the underlying properties that they own or operate. Further, REITs are dependent upon specialised management skills, and their investments may be concentrated in relatively few properties, or in a small geographic area or a single

property type. REITs are also subject to heavy cash flow dependency and, as a result, are particularly reliant on the proper functioning of capital markets, as well as defaults by borrowers and self-liquidation. A variety of economic and other factors may adversely affect a lessee's ability to meet its obligations to a REIT. In the event of a default by a lessee, the REIT may experience delays in enforcing its rights as a lessor and may incur substantial costs associated in protecting its investments. Investments in REITs are also subject to the risks affecting equity markets generally.

Repurchase agreements: Repurchase agreements may be viewed as loans made by a Fund which are collateralized by the securities subject to repurchase. A Fund's investment return on such transactions will depend on the counterparty's willingness and ability to perform its obligations under a repurchase agreement. If a Fund's counterparty should default on its obligations and a Fund is delayed or prevented from recovering the collateral, or if the value of the collateral is insufficient, a Fund may realize a loss.

Risk of Investment in Other UCIs: When a Fund invests in another UCI, it is exposed to the risk that such UCI will not perform as expected. Such a Fund is exposed indirectly to all of the risks applicable to an investment in such UCI. In addition, lack of liquidity in the underlying UCI could result in its value being more volatile than the underlying portfolio of securities, and may limit the ability of the Fund to sell or redeem its interest in the UCI at a time or at a price it might consider desirable and the Fund may achieve a reduced investment return. The investment policies and limitations of the other UCI may not be the same as those of the Fund; as a result, the Fund may be subject to additional or different risks, or may achieve a reduced investment return, as a result of its investment in such UCI.

If a UCI is an exchange-traded fund or other product traded on a securities exchange or otherwise actively traded, its shares may trade at a premium or discount to their net asset value, an effect that might be more pronounced in less liquid markets. A Fund investing in a UCI bears its

proportionate share of the fees and expenses of any UCI in which it invests. The Investment Manager or an affiliate may serve as investment manager and/or advisor to a UCI in which the Fund may invest, leading to potential conflicts of interest. For example, the Investment Manager or its affiliates may receive fees based on the amount of assets invested in the UCI. Investment by a Fund in the UCI may be beneficial to the Investment Manager or an affiliate in the management of the UCI, by helping to achieve economies of scale or enhancing cash flows. Due to this and other factors, the Investment Manager may have an incentive to invest a Fund's assets in a UCI sponsored or managed by the Investment Manager or its affiliates in lieu of investments by the Fund directly in portfolio securities, or may have an incentive to invest in such UCI over a different UCI sponsored or managed by others. Similarly, the Investment Manager may have an incentive to delay or decide against the sale of interests held by a Fund in a UCI sponsored or managed by the Investment Manager or its affiliates. It is possible that other clients of the Investment Manager or its affiliates will purchase or sell interests in a UCI sponsored or managed by the Investment Manager or its affiliates at prices and at times more favourable than those at which an invested Fund does so.

Risks related to Screening: The Investment Manager and/or Sub-Investment Manager may use a screen to identify securities in a Fund's investable universe based on criteria relating to the Fund's investment objective. The screen may be proprietary or provided by a third party provider. There is a risk that errors are made in the screening process. Errors may include, but are not limited to, incorrect constituents, incorrect interpretation of company accounts, transcription errors from company accounts and incorrect assessment of the relevant screening criteria. There is an additional risk that a screen provider may discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result

in a similar screening process or would be available.

Securities Lending Risk: A Fund may participate in a securities lending program sponsored by an affiliate of the Investment Manager for the purpose of lending the Fund's securities.

If a Fund engages in securities lending, there is a risk that the borrower may become insolvent or otherwise become unable to meet, or refuse to honour, its obligations to return equivalent securities to the loaned securities. In this event, the Fund could experience delays in recovering the securities and may incur a capital loss. There is the risk that, when lending portfolio securities, the securities may not be available to the Fund on a timely basis and the Fund may, therefore, lose the opportunity to sell the securities at a desirable price.

If a counterparty defaults and fails to return equivalent securities to those loaned, the Fund may suffer a loss equal to the shortfall between the value of the realised collateral and the market value of the replacement securities. To the extent that any securities lending is not fully collateralised (for example, due to timing lags associated with the posting of collateral), the Fund will have a credit risk exposure to the counterparty of a securities lending contract. Investors should also read the risk warning headed "**Counterparty Risk**" in the "**Risk Information**" section. The Fund could also lose money if the value of collateral falls. These events could trigger adverse tax consequences for the Fund.

Sovereign Risk/ Sovereign Debt Obligations Risk:

A Fund may invest in debt securities issued by governments or by agencies, instrumentalities and sponsored enterprises of governments. These securities involve the risk that the governmental entities responsible for repayment may be unable or unwilling to pay interest and repay principal when due. A governmental entity's willingness or ability to pay interest and repay principal in a timely manner may be affected by a variety of factors, including its cash flow, the size of its reserves, its access to foreign exchange, the

relative size of its debt service burden to its economy as a whole, and political constraints.

A governmental entity may default on its obligations or may require renegotiation or reschedule of debt payments. Any restructuring of a sovereign debt obligation held by a Fund will likely have a significant adverse effect on the value of the obligation. In the event of default of sovereign debt it holds, the Fund may be unable to pursue legal action against the sovereign issuer or to realize on collateral securing the debt.

The value of these securities may be affected by the creditworthiness of the relevant government, including any default or potential default by the relevant government. The sovereign debt of certain governments, including their sub-divisions and instrumentalities, is rated below investment grade ("junk" bonds). Sovereign debt risk may be greater for debt securities issued or guaranteed by emerging and/or frontier countries.

Tax Risk: The tax information provided in the "Tax Information" section is based on the law and rules currently applied in the Grand Duchy of Luxembourg as at the date of this Prospectus and is subject to change (prospective or retroactive) from time to time. Any change in the taxation legislation in Luxembourg or in any jurisdiction where a Fund is registered, listed, marketed or invested could affect the tax status of the Company and any Fund, affect the value of the relevant Fund's investments in the affected jurisdiction, affect the relevant Fund's ability to achieve its investment objective, and/or alter the after-tax returns to Shareholders.

The availability and value of any tax reliefs available to Shareholders depend on the individual circumstances of each Shareholder. The information in the "Tax Information" section is not exhaustive and does not constitute legal or tax advice. Prospective Shareholders should consult their tax advisors with respect to their particular tax situations and the tax effects of an investment in a Fund. Where a Fund invests in a jurisdiction where the tax regime is not fully developed or is not sufficiently certain, the Company, the relevant

Fund, the Investment Manager, the Depositary and the Administrator shall not be liable to account to any Shareholder for any payment made or suffered by the Company or the relevant Fund in good faith to a fiscal authority for taxes or other charges of the Company or the relevant Fund notwithstanding that it is later found that such payments need not or ought not have been made or suffered.

The Company may be liable to taxes (including withholding taxes) in countries other than Luxembourg on income earned and capital gains arising on its investments. The Company may not be able to benefit from a reduction in the rate of such foreign tax by virtue of the double taxation treaties between Luxembourg and other countries. The Company may not, therefore, be able to reclaim any foreign withholding tax borne by it in particular countries. If this position changes and the Company obtains a repayment of foreign tax, the Net Asset Value of a Fund will not be restated and the benefit will be allocated to the then-existing Shareholders rateably at the time of repayment.

Shareholders should be aware that the performance of passively managed Funds, as compared to an Index, may be adversely affected in circumstances where the assumptions about tax made by the relevant index provider in their index calculation methodology differ to the actual tax treatment of the underlying securities in the Index held within Funds.

Temporary Defensive Positions Risk (non-principal risk): In response to actual or perceived adverse market, economic, political, or other conditions, an actively managed Fund may (but will not necessarily), without notice, depart from its investment strategy by temporarily investing for defensive purposes. Temporary defensive positions may include, but are not limited to, cash, cash equivalents, certain government securities, repurchase agreements collateralized by such securities, money market instruments, and high-quality debt investments (provided such investments are consistent with the Fund's investment objective and are in the best interest

of the Fund). There is no guarantee that a defensive strategy will work as intended.

In general, passively managed funds seek to track the performance of an index regardless of market conditions and do not take defensive positions. However, in certain situations or market conditions, a Fund may temporarily depart from its normal investment strategy, provided that the alternative is consistent with the Fund's investment objective and is in the best interest of the Fund. For example, the Fund may make larger than normal investments in derivatives to maintain exposure to its specified index if it is unable to invest directly in a component security.

Valuation Risk: A Fund's investments will typically be valued at the relevant market value, in accordance with the Company's Articles and applicable law. In certain circumstances, a portion of a Fund's assets may be valued by the Company at fair value using prices provided by a pricing service or, alternatively, broker-dealers or other market intermediaries (and at times may be a single broker-dealer or other market intermediary) when other reliable pricing sources may not be available. If relevant information is not available from any of those sources or the Company considers it unreliable, the Company may value a Fund's assets based on such other information as the Company may in its discretion consider appropriate. The value established for any portfolio holding at a point in time might differ from what would be produced using a different methodology or if it had been priced using market quotations. Portfolio holdings that are valued using techniques other than market quotations, including fair valued securities, may be subject to greater fluctuation in their valuations from one day to the next than if market quotations were used. There can be no assurance that such prices will accurately reflect the price a Fund would receive upon sale of a security, and to the extent a Fund sells a security at a price lower than the price it has been using to value the security, its net asset value will be adversely affected. When a Fund invests in other funds or investment pools, it will generally value its investments in those funds or pools based on the valuations determined by the

funds or pools , which may not be the same as if the net assets of the funds or pools had been valued using the procedures employed by the Fund to value its own assets.

5. Shares

5.1. Types of Shares

Shares are available in registered form only and ownership will be demonstrated by an entry in the Shareholders' register. Written confirmation of ownership shall be issued to Shareholders; however no physical share certificates will be issued.

Registered Shares may also be issued in fractions of Shares, which are rounded up or down to four decimal places. Fractions less than 0.0001 of a Share will not be issued nor will subscription or redemption monies representing less than 0.0001 of a Share be returned to the Shareholder. Fractional Shares will be entitled to participate on a pro rata basis in the net assets attributable to the Fund or Share Class to which they belong but do not confer any voting rights on their holder.

Shares do not include rights of priority, subscription rights, options or other special rights. Shares are transferable to eligible investors only.

5.2. Share Classes

The Company may from time to time offer Shares of each Fund in various Share Classes. Each Share Class will accommodate different characteristics, such as currency, dividend policies, etc. the details of which are set out in the Relevant Supplement. The Board is authorized to issue Shares in any Share Class at the respective NAV per Share, determined in accordance with Articles. In addition, the Board is also authorized to discontinue offering one or more Share Classes subject to applicable notice and the Articles. Information regarding the availability of Share Classes for each Fund can be found in the Dealing Forms available on www.ssga.com. A KIID may be obtained for each available Share Class at www.ssga.com.

At the date of this Prospectus, the Company offers the following Share Classes:

Share Class	Eligible Investors
A	All investors.
A2	All investors, who meet the minimum initial investment and ongoing holding requirements for this Share Class to be issued at the discretion of the Board.
B	Institutional Investors who have entered into a Qualifying Agreement.
I	Institutional Investors.
P	All investors.
S	Institutional Investors who meet the minimum initial investment requirement for this Share Class to be issued at the discretion of the Board.

Based on the administrative practice of the CSSF, as of the date of this Prospectus, the Board adopted the following definition of Institutional Investors:

1. **Credit institutions** or other **professionals of the financial sector** ("PFS") whether established in Luxembourg or abroad, investing either:

- (i) in their own name and on their behalf; OR
- (ii) in their own name and on behalf of an "institutional investor"; OR
- (iii) in their own name but on behalf of another party who is not an "institutional investor", (the "**Third Party**") provided that:
 - (a) the Third Party has entered into a *discretionary* management relationship with the credit institution or the other PFS, AND
 - (b) the Third Party is not entitled to any direct claim against the UCI, but only against the credit institution or the other PFS.

2. **Insurance and reinsurance companies:** even if policy holders do not qualify as 'institutional', the insurance company may qualify if:

(i) the insurance company is the sole subscriber vis-à-vis the fund, AND

(ii) the policyholder has no direct access to the assets of the fund, *i.e.* he is not entitled to receive, upon termination of the insurance policy, units/shares of the Company.

3. **Pension funds/plans,** if the beneficiaries of the pension fund/plan are not entitled to any direct claim against the Company.

4. **Undertakings for Collective Investment (i.e. other funds),** whether domiciled in Luxembourg or abroad, even if their investors are not institutional investors.

5. **Local authorities,** such as regions, provinces, cantons and municipalities, insofar as they invest their own funds.

6. **Holding companies or similar companies** which are EITHER:

(i) holding companies or similar companies all the shareholders of which are institutional investors, OR

(ii) holding companies or similar companies all the shareholders of which are not institutional investors provided that EITHER:

(a) they have material substance, a separate structure and activities from those of the shareholders, and hold significant financial interests; OR

(b) they may be regarded as "family" holding companies or similar structures through which a family or a branch of a family holds significant financial interests.

7. **Financial or industrial groups.**

8. **Foundations** holding significant other financial investments and having an existence independent from the beneficiaries or recipients of their income

or assets. This implies that such foundations must not be "transparent", which would be the case if all their income is redistributed directly to beneficiaries and control were exercised by their beneficiaries.

Certain Share Classes may not be available for each Fund and certain Funds and/or Share Classes may not be available in an investor's country of residence or domicile. Further information with respect to the offering of Shares is outlined in the "**Distribution and Selling Restrictions**" section below.

The Board may at a future date create and offer additional Share Classes without the approval of Shareholders. Such new Share Classes may be issued on terms and conditions that differ from the existing Share Classes. In such an event, the new Share Classes will be added to the Relevant Supplement.

5.3. Class Currencies and Class Currency Hedging

Each Fund is denominated in a Base Currency and Share Classes may be issued in that Base Currency or in a Class Currency, which may or may not be hedged. Details of the Base Currency, Class Currencies, Hedged Share Classes or unhedged Share Classes available are set out in the Relevant Supplement.

Hedged Share Classes aim to reduce the impact of exchange rate fluctuations between the Class Currency and the currency in which the underlying assets are denominated.

Financial derivative instruments, including forward foreign exchange contracts, will be used to hedge against the effect of changes in the values of foreign currencies on investments a Fund holds or may purchase. Currency hedging transactions in respect of a currency hedged Share Class will be clearly attributable to that Share Class and any costs shall be for the account of that Share Class only. Accordingly, all such costs, related liabilities

and/or benefits will be reflected in the NAV per Share of the Share Class. The performance of a Fund may be impacted if a Fund is required to hold or to borrow cash in order to satisfy collateral or margin requirements arising under derivatives transactions.

The Company draws Shareholders' attention to the fact that hedging transactions carry specific risks and may not produce expected results. The risk warnings headed "Currency Risk" and "Currency Hedging Risk" in the "Risk Information" section provide further details on these potential risks.

5.4. Minimum investments and holdings

The minimum initial and subsequent subscription amounts as well as the ongoing minimum holding per Share Class are set out below. These minimums may be waived by the Board or its duly authorised delegate. The Company may redeem holdings of any Shareholder that fall below these minimums at any time.

Share Class	A	A2	B	I	P*	S
Minimum Initial Investment and Minimum Holding	€250,000 \$250,000 £250,000 AUD\$250,000 CAD\$250,000 CHF250,000 ¥25,000,000	€300,000,000**	€10,000,000 \$10,000,000 £10,000,000 AUD\$10,000,000 CAD\$10,000,000 CHF10,000,000 ¥1,000,000,000	€3,000,000 \$3,000,000 £3,000,000 AUD\$3,000,000 CAD\$3,000,000 CHF3,000,000 ¥300,000,000	€50 \$50 £50 AUD\$50 CAD\$50 CHF50 ¥5,000	\$125,000,000
Minimum Subsequent Investment and Redemption Amount	€50 \$50 £50 AUD\$50 CAD\$50 CHF50 ¥5,000	€50**	€5,000 \$5,000 £5,000 AUD\$5,000 CAD\$5,000 CHF5,000 ¥500,000	€1,000 \$1,000 £1,000 AUD\$1,000 CAD\$1,000 CHF1,000 ¥100,000	€50 \$50 £50 AUD\$50 CAD\$50 CHF50 ¥5,000	\$1,000,000

* minimum as indicated in this table or as otherwise set out in the Relevant Supplement;

** or equivalent in the relevant Class Currency or equivalent in the relevant Class Currency.

5.5. Subscription

Application procedure: Initial applications for Shares must be made using the Application Form for each Share Class that is available from the Administrator or on www.ssga.com. Amendments to or updates of the details provided in the Application Form will only be effected by an original written signed instruction.

Completed Application Forms should be sent by facsimile to the Administrator by the Dealing Deadline as specified for each Fund in the Relevant Supplement using the details included in the Application Form. Investors must also send the hard-copy original of the executed Application Form and supporting anti-money laundering documentation to the Administrator within 5 Business Days of the Application Form being sent to the Administrator. Failure to provide the above documentation by such time may result in the rejection of the application or in the compulsory redemption of the Shares. The Administrator will seek to return any monies received prior to the Application Form being accepted (minus any handling charge incurred in any such return) as soon as possible by wire transfer (but without interest, costs or compensation). The Company, the Administrator as well as agents of the Administrator have the right to request additional information deemed necessary to process the application, e.g. as to identity and corporate authorisation, and failure to provide such information may prevent the processing of an investor's application. The Company, the Administrator as well as agents of the Administrator, will not accept liability for any loss suffered by applicants as a result of unclear or incomplete applications. No interest will be paid to investors on subscription proceeds received by the Company prior to receiving clear and complete applications.

Subscription procedure: Once the application has been accepted and an appropriate account has been opened by the Administrator, investors may subscribe for Shares on any Dealing Day. Subscription requests can be made by faxing a completed Dealing Form to the Administrator by

the Dealing Deadline indicated in the Relevant Supplement. Dealing Forms received after the Dealing Deadline will be treated as a request for subscription on the following Dealing Day, unless otherwise the Board or its duly authorised delegate, in exceptional circumstances, decides to accept subscription requests sent prior to but received after the relevant Dealing Deadline provided that, in all cases, such request is received before the relevant Valuation Point.

Investors may subscribe for Shares directly from the Company.

Investors may also subscribe via dealing platforms or other electronic means which have been approved by the Board or their delegates. Investors wishing to transact through a dealing platform or via electronic means should contact the Company for a list of approved dealing platforms and investors are reminded that they must refer to the provider of the dealing platform or electronic means for the procedures that apply to such trading arrangements. Alternatively, investors may purchase Shares in a Fund using the nominee services offered by a Distributor or sub-distributor or its correspondent bank. Distributors or sub-distributors that offer nominee services are either domiciled in countries that have ratified the resolutions adopted by the FATF or their correspondent bank is domiciled in a FATF country. The Distributor(s), sub-distributor(s) or their correspondent bank(s) will subscribe for and hold the Shares as a nominee in its own name but for the account of the investor and will thereafter send a letter of confirmation to the investor confirming the subscription of the Shares. Investors who use a nominee service may issue instructions to the nominee regarding the exercise of votes conferred by their Shares as well as request direct ownership by submitting an appropriate request in writing to the relevant Distributor or Depository.

The Board or its duly authorised delegate may accept or reject, in whole or in part, any application for Shares at its discretion. If a subscription request is rejected, the Administrator will seek to return any monies received (minus any handling charge incurred in any such return) as

soon as possible by wire transfer (but without interest, costs or compensation).

The Board is also empowered to impose such restrictions, including the compulsorily redemption of the Company's Shares, it believes are necessary to ensure that no Shares are acquired or held by any person who might expose the Company or any Fund to adverse tax or regulatory consequences or by any person in breach of the law or requirement of any country or governmental authority. In addition, the Board may decide to restrict or suspend the issuance of Shares and/or the switch into Shares for a limited or unlimited duration if this is in the interest of the Company and/or Shareholders, including situations where the Company or a Fund have reached a size that could impact the ability to find suitable investments for the Company and/or Fund.

Settlement of subscription: Subscription payments, in the relevant Class Currency, should be sent by wire transfer to the account specified in the Dealing Form by the Settlement Deadline. Other methods and currencies of payment are subject to the prior approval of the Board with the agreement of the Administrator. If cleared funds representing the subscription monies are not received by the Settlement Deadline, any allotment of Shares made in respect of such subscription may be cancelled. The Administrator will inform the investor that the application has been rejected or the subscription cancelled, as applicable, and the money received after the Settlement Deadline, if any, will be returned to the investor at its risks and costs, without interest. Notwithstanding cancellation of the allotment of Shares, the Company may charge the investor for any expense incurred by the Company or the Fund or for any loss to the Fund arising out of such non-receipt or non-clearance. In addition, the Board will have the right to sell all or part of the Shareholder's holding of Shares in the relevant Class in order to meet those charges.

More specifically, the Company may restrict or prevent the ownership of shares in the Company by any person, firm or corporate body, and without limitation, by any "U.S. person", as defined hereafter. For such purposes, the Company may:

- decline to issue any Share and decline to register any transfer of a Share, where it appears to it that such registry or transfer would or might result in beneficial ownership of such share being vested in a person who is precluded from holding Shares in the Company;
- at any time require any person whose name is entered in, or any person seeking to register the transfer of Shares on, the register of Shareholders to furnish it with any information, supported by affidavit, which it may consider necessary for the purpose of determining whether or not, to what extent and under which circumstances, beneficial ownership of such Shareholder's Shares rests or will rest in a person who is precluded from holding Shares in the Company; and
- where it appears to the Company that any person who is precluded from holding Shares in the Company either alone or in conjunction with any other person is a beneficial owner of Shares, compulsorily redeem from any such Shareholder all Shares held by such Shareholder in the following manner:
 1. the Company shall serve a notice (hereinafter called the "redemption notice") upon the Shareholder, bearing such Shares or appearing in the register of Shareholders as the owner of the Shares to be redeemed, specifying the Shares to be redeemed as aforesaid, the price to be paid for such Shares, and the place at which the redemption price in respect of such Shares is payable. Any such notice may be served upon such Shareholder by posting the same in a prepaid registered envelope addressed to such Shareholder at his last address known to or appearing in the books of the Company. The said Shareholder shall thereupon forthwith be obliged to deliver to the Company the Share certificate or certificates representing the Shares in the redemption notice. Immediately after the close of business on the date specified in the redemption notice, such Shareholder shall cease to be a Shareholder and the

Shares previously held by him shall be cancelled.

2. The price at which the Shares specified in any redemption notice shall be redeemed (hereinafter called “the redemption price”) shall be an amount equal to the per Share NAV of shares in the Company of the relevant Fund, determined in accordance with the Articles, and may be reduced in accordance with the provisions of the Articles.
 3. Payment of the redemption price will be made to the owner of such Shares in Euro, except during periods of exchange restrictions, and will be deposited by the Company with a bank in Luxembourg or elsewhere (as specified in the redemption notice) for payment to such owner upon surrender of the Share certificate or certificates representing the Shares specified in such notice. Upon deposit of such price as aforesaid no person interested in the Shares specified in such purchase notice shall have any further interest in such Shares or any of them, or any claim against the Company or its assets in respect thereof, except the right of the Shareholder appearing as the owner thereof to receive the price so deposited (without interest) from such bank upon effective surrender of the Share certificate or certificates as aforesaid.
 4. The exercise by the Company of the powers conferred by the Articles in this respect shall not be questioned or invalidated in any case on the ground that there was insufficient evidence of ownership of Shares by any person or that the true ownership of any Shares was otherwise than appeared to the Company at the date of any redemption notice, provided that in such case the said powers were exercised by the Company in good faith; and
- decline to accept the vote of any person who is precluded from holding Shares in the Company at any meeting of Shareholders of the Company.

The term “U.S. Person” shall have the meaning set forth in Regulation S of the US Securities Act.

Subscription pricing: Except during an initial offer period, the Board operates “forward pricing” for all Funds and Share Classes, i.e. by reference to the Subscription Price calculated as at the Valuation Point for the relevant Dealing Day. A Subscription Fee may be charged in addition and will be determined by the Board upon the advice of the Investment Manager. The Company may pay any such Subscription Fee to its sub-distributor(s) in respect of subscriptions for Shares. This fee will be further to any Dilution Adjustment that may be included in the Subscription Price. See “Dilution Adjustment” below.

Subscription in-kind: With prior approval of the Board, investors may be permitted to subscribe for Shares in-kind, provided the composition of such contribution in-kind is consistent with the investment limits contained in this Prospectus as well as with the investment objective and policy of the Fund as described in the Relevant Supplement. In accepting or rejecting such a contribution at any given time, the Company shall take into account the interest of other Shareholders of the Company and the principle of fair treatment. With regard to the subscription in-kind, the Auditor will execute a special audit report and any costs associated with the subscription in-kind, including the cost of the special audit report, will be borne by the subscribing Shareholder.

5.6. Redemption

Redemption procedure: Redemption requests can be made on any Dealing Day and must be made using the Dealing Form which is available from and should be sent to the Administrator in accordance with the instructions on that form by the Dealing Deadline indicated in the Relevant Supplement. Dealing Forms received after the Dealing Deadline will be treated as a request for redemption on the following Dealing Day unless the Board or its duly authorised delegate, in exceptional circumstances, decides to accept redemption requests sent prior to but received after the relevant Dealing Deadline provided that, in all cases, such request is received before the relevant Valuation Point. Redemption

requests shall be irrevocable. Shareholders who subscribed for Shares via a dealing platform or other electronic means may only request redemption of their Shares via this same dealing platform or electronic means. The Company or the Administrator will only process redemption applications that it considers clear and complete. Applications will be considered complete only if the Company or the Administrator has received all information and supporting documentation it deems necessary to process the application. Unclear or incomplete applications may lead to delays in their execution. The Company, the Administrator as well as agents of the Administrator will not accept liability for any loss suffered by applicants as a result of unclear or incomplete applications.

The redemption of Shares of a Fund or Share Class shall be suspended whenever the determination of the NAV per Share of such Fund or Share Class is suspended by the Company, as described in the section **“Temporary Suspension of NAV calculation and Dealings”** below. The redemption of shares of a Fund or Share Class may also be suspended in other exceptional cases where the circumstances and the best interest of the Shareholders so require.

Redemption limits: If redemption requests received in respect of Shares of a particular Fund on any Dealing Day total, in aggregate, more than 10% of the outstanding Shares of that Fund, the Company is not obliged to redeem on any Dealing Day or within a period of seven (7) consecutive Dealing Days more than 10% of the outstanding Shares of any one Fund. Alternatively, the Board may, at its discretion, defer redemption requests for an amount of Shares exceeding 10% up to the seventh consecutive Dealing Day. If the Fund refuses to redeem Shares for the above reasons, such applications for redemption of Shares will take precedence over applications subsequently received.

Settlement of redemption: Redemption proceeds will be paid three (3) bank business days in Luxembourg after the date on which the NAV was calculated, or after such other period as the Board may determine in their discretion, provided the

Administrator has received the original Application Form and all required supporting anti-money laundering documentation. As may be required by settlement and/or other constraints prevailing in the market on which a substantial portion of the relevant Fund’s investments is traded, the Board may extend the payment period up to and including forty-five (45) bank business days in Luxembourg for Funds whose investment objective and policy provides for investments in securities of issuers in developing countries. Payment of redemption proceeds will be made only to the account of record, at the risks and costs of the redeeming Shareholder, and are generally made in the relevant Class Currency. Other methods and currencies of payment are at the discretion of the Board with the agreement of the Administrator.

The Company, the Administrator as well as agents of the Administrator will not accept responsibility for any delays or charges incurred at any receiving bank or clearing system.

Redemption Pricing: All redemption requests are dealt with on a “forward” pricing basis, i.e. by reference to the Redemption Price calculated as at the Valuation Point for the relevant Dealing Day. In addition a Redemption Fee may be charged in exceptional circumstances, e.g. in the event of excessive trading, at the discretion of the Board. This fee will be for the benefit of the Fund and Shareholders will be notified in their contract notes if such a fee has been charged. This fee will be further to any Dilution Adjustment that may be added to the Redemption Price. See “Dilution Adjustment” below. As of the date of this Prospectus, a Redemption Fee has never been levied by any of the Funds.

Redemption in-kind: In the Board’s discretion, the Company may choose to redeem Shares in kind where the redeeming Shareholder requests such a redemption. All Shareholders shall be treated fairly. Any redemption in kind will be valued independently in a special report issued by the Auditor or any other independent auditor (*réviseur d’entreprises agréé*) agreed by the Company. The costs associated with the redemption in-kind shall be borne by the redeeming Shareholder.

Compulsory redemption: The Shares of the Company, the Shares of any Fund, or the Shares of a particular Shareholder, as applicable, may be compulsorily redeemed by the Board in the following circumstances:

- the NAV of all outstanding Shares of the Company is less than €50,000,000;
- the NAV of a Fund falls below €50,000,000;
- the Board deems it necessary because of changes in the economic or political circumstances that affect the Fund;
- the Shares are acquired by investors who do not satisfy applicable eligibility requirements; or
- a redemption request causes a Shareholder's holding in a Fund to fall below the minimum holding.

The Shares will be redeemed at the Redemption Price on the relevant Dealing Day. All redeemed Shares will be cancelled.

5.7. Switching

Switching procedure: Applications for a Share Class Switch of all or part of a Shareholder's Shares in a Fund (the "**Original Shares**") into shares of another Share Class of the same Fund can be made on any Dealing Day. Switching applications must be made by using a Switching Form which is available from and should be sent to the Administrator by the Dealing Deadline indicated in the Relevant Supplement.

It should be noted that the right to switch Shares is subject to compliance with any investor eligibility requirements which may result from the conversion of the Original Shares into Shares of another Share Class of the same Fund (the "**New Shares**").

In addition, switching applications are subject to the provisions on the minimum initial or additional subscription amounts applicable to the New Shares and the minimum holding amount applicable to the Original Shares.

The number of Shares issued upon switching will be based on the respective NAVs per Share of the Original Shares and the New Shares on the day of

the switching. The Original Shares will be redeemed and the New Shares will be issued on such day.

The Company or the Administrator will only process switching applications that they consider clear and complete. Applications will be considered complete only if the Company or the Administrator has received all information and supporting documentation it deems necessary to process the application. The Company or the Administrator may delay the acceptance of unclear or incomplete applications until reception of all necessary information and supporting documentation in a form satisfactory to the Company or the Administrator. Unclear or incomplete applications may lead to delays in their execution. The Fund, the Administrator as well as agents of the Administrator will not accept liability for any loss suffered by applicants as a result of unclear or incomplete applications.

The Company reserves the right to reject any application for switching of Original Shares to New Shares, in whole or in part, including, without limitation, where the Company decides to close a Share Class to new subscriptions or new investors.

The switching of Shares shall be suspended whenever the determination of the NAV per Share of the Original Shares or the New Shares is suspended by the Company in accordance with section "**Temporary Suspension of NAV calculation and Dealings**" below, or when the redemption of Original Shares or the subscription for New Shares is suspended in accordance with the Articles and this Prospectus.

Any request to convert Shares from one Fund to another Fund will be treated as a redemption from one Fund followed by a subscription into another Fund. Such operation may have tax implications for a Shareholder. No Subscription Fee will be charged for such operation.

5.8. Listing of Shares

The Company may, from time to time, determine to list or remove existing listing of the Shares of any Fund or Share Class on the Luxembourg Stock Exchange, Euro MTF or any other stock exchange.

The Board will approve any new listing on any stock exchange as well as removal of such listing. Full details on the listing of each Share Class of each Fund may be obtained at any time at the registered office of the Company upon request. Unless otherwise specified in the Relevant Supplement, the Shares of each Fund of the Company are not listed on any stock exchange.

5.9. Dilution Adjustment

A Fund may suffer dilution of the NAV per Share due to investors buying or selling Shares in a Fund at a price that does not reflect the dealing and other costs that arise when security trades are undertaken by the Investment Manager and/or Sub-Investment Manager to accommodate cash inflows or outflows. In order to mitigate the effects of dilution on remaining Shareholders and to allocate such costs to the redeeming, subscribing or converting Shareholder, the technique described below may be applied to protect the interests of Shareholders. The Relevant Supplement will indicate technique applied in relation to the Fund in question.

Swing Pricing Adjustment: an adjustment of the NAV of the relevant Fund by an amount not exceeding either 2% or 3% of the NAV per Share (the "Swing Factor") depending on each Fund's investment policy as detailed in the Relevant Supplement. The Swing Pricing Adjustment is used to reflect the dealing costs that may be incurred by the Fund and the estimated bid/offer spread of the assets in which the Fund invests and generally will be applied on any Dealing Day when the aggregate total of subscriptions, switches or redemption of Shares of all Share Classes of a Fund result in a net capital inflow or outflow which exceeds a pre-determined threshold, as determined and reviewed by the Company from time to time for that Fund. In addition, the Board may agree to include anticipated fiscal charges, trading costs and related expenses in the amount of the adjustment. The Swing Pricing Adjustment will be an addition when the net movement results in a net capital inflow from all Share Classes the Fund and a deduction when it results in a net capital outflow. As certain stock markets and jurisdictions may have different charging structures on the buy and

sell sides, the resulting adjustment may be different for net inflows than for net outflows. A periodical review will be undertaken in order to verify the appropriateness of the Swing Factor in view of market conditions. In certain circumstances, the Board may decide that it is not appropriate to make such an adjustment. The volatility of the NAV of the Fund might not reflect the true portfolio performance (and therefore might deviate from the Fund's benchmark, where applicable) as a consequence of the application of swing pricing.

5.10. Distribution

Shareholders of each Fund are entitled to their share of a Fund's income and net realised gains on its investments. Each Fund typically earns income in the form of dividends from stocks, interest from debt securities and, if relevant, securities lending income. Each Fund realises capital gains or losses whenever it sells securities.

All Share Classes available in each Fund may include both accumulating Shares, which capitalise their entire earnings, and distributing Shares, which may distribute capital gains and income to Shareholders in or around April. The distribution policy of any Fund or of any Share Class may be changed by the Board upon reasonable notice to Shareholders of that Fund or Share Class as the case may be and, in such circumstances, the distribution policies will be disclosed in an updated Prospectus and/or Relevant Supplement.

Dividends in respect of each Share Class of distributing Shares will be declared annually by the annual general meeting of Shareholders, upon proposal by the Board. Dividends can also be declared as interim dividends by the Board in accordance with the Articles and the applicable law. Special dividend arrangements relating to a particular Fund or Share Class will be decided by the Board. Any dividend paid on a Share that has not been claimed will not earn interest and, if not claimed within five years of its declaration, will be forfeited and will accrue for the benefit of that Fund or Share Class.

5.11. Excessive Trading Policy

Subscriptions and redemptions shall be made for investment purposes only and the Company does not permit market timing (as set out in CSSF circular 04/146) or related excessive trading practices. Excessive trading includes investors, individually or as a group, whose securities transactions are excessively frequent and large in size and seem to follow a timing pattern. Such practices may adversely impact the performance of the Funds and the interest of all Shareholders.

While the Company and its Funds do not knowingly allow investments that are associated with excessive trading practices, Shareholders and potential Shareholders should, nevertheless, be

aware that investments in the Funds may be made for various investment purposes by different types of investors, including but not limited to asset allocation or structured product providers. Such investors require periodic re-balance and re-allocation of their assets, and also between Funds. This activity, under normal circumstances, is not classified as excessive trading. Where, in the opinion of the Board, an investor's trading appears to constitute excessive trading, the Company may compulsorily redeem the Shares of a Shareholder engaging in or having engaged in such practices. Further, the Company may reject any subscription or switching order it suspects is related to such practices. The Company shall not be liable for any gain or loss resulting from such rejected applications for subscription or switching or compulsory redemptions.

6. Valuation and Calculation of NAV

6.1. Calculation of NAV

The Administrator will carry out the calculation of the NAV of each Fund and the NAV per Share on each Dealing Day and at least twice monthly. The NAV of a Fund is made up of the value of the assets of the Company less its liabilities.

The NAV of the Fund or Share Class per Share will be calculated by dividing the NAV of the relevant Fund or Share Class by the number of Shares of the relevant Fund or Share Class outstanding as of the relevant Dealing Day and will be rounded up or down to the nearest fourth decimal.

Unless otherwise determined by the Board in accordance with the Articles, the NAV per Share of each Fund will be expressed in its Base Currency and the NAV per Share of each Share Class will be expressed in its Class Currency, if different from the Base Currency.

The NAV of the Fund or Share Class will be calculated to two (2) decimal places and the NAV per Share of the Fund or Share Class will be calculated to four (4) decimal places, as the Board may determine from time to time.

6.2. Valuation Procedure

6.2.1. Assets of the Company

Subject to the rules on allocation of assets and liabilities of the Company to the Funds and Share Classes in the “**Allocation of assets and liabilities**” section, the assets of the Company shall include the following:

- all cash on hand or on deposit, including any interest accrued thereon;
- all bills and demand notes and accounts receivable (including proceeds of securities sold but not delivered) except those receivable from a subsidiary of the Company;
- all bonds, time notes, shares, stock, debenture stocks, subscription rights, warrants, options and other investments and securities owned or contracted for by the Company;

- all stock, stock dividends, cash dividends and cash distributions receivable by the Company to the extent information thereon is reasonably available to the Company (provided that the Company may make adjustments with regard to fluctuations in the market value of securities caused by trading ex-dividends, ex-rights, or by similar practices);
- all interest accrued on any interest-bearing securities owned by the Company except to the extent that the same is included or reflected in the principal amount of such security; and
- all other assets of every kind and nature, including prepaid expenses.

6.2.2. Liabilities of the Company

Subject to the rules on allocation of assets and liabilities of the Company to the Funds and Share Classes in the “**Allocation of assets and liabilities**” section, the liabilities of the Company shall include the following:

- all loans, bills and accounts payable, except those payable to any subsidiary;
- all accrued or payable administrative expenses (including investment management fee, depositary fee and corporate agents’ fees);
- all known liabilities, present and future, including all matured contractual obligations for payments of money or property, including the amount of any unpaid dividends declared by the Company where the Dealing Day falls on the record date for determination of the person entitled thereto or is subsequent thereto;
- an appropriate provision for future taxes based on capital and income to the Dealing Day, as determined from time to time by the Company, and other reserves if any authorised and approved by the Board;
- the preliminary expenses of the Company insofar as the same have not been written off, provided that such preliminary expenses may be written off directly from the capital of the Company; and

- all other liabilities of the Company of whatsoever kind and nature.

6.2.3. Valuation Principles

The value of the assets of each Share Class is determined as follows:

- the value of any cash on hand or on deposit, bills and demand notes, accounts receivable, prepaid expenses, cash dividends and interest declared or accrued but not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be determined after making such discount as the Company may consider appropriate to reflect the true value thereof;
- the value of securities quoted or dealt in on any stock exchange is based on the latest available price on the principal market on which the securities are traded applicable to the relevant Dealing Day;
- the value of securities dealt in on a regulated market is based on the latest available price applicable to the relevant Dealing Day;
- the value of the derivatives and structured products used by the Company will be performed on a regular basis by using the mark-to-market principle, being the latest available price; and
- securities held in the Company's portfolio on the relevant Dealing Day that are not quoted or dealt in on any stock exchange or other regulated market or if, with respect to securities quoted or dealt in on any stock exchange or dealt in on another regulated market, the price as determined pursuant to indents 2) or 3) is not representative of the fair market value of the relevant securities, the value of such securities will be determined based on the probable realisation price determined prudently and in good faith.

All assets and liabilities in a currency other than that of the Fund in question are converted using the exchange rate determined at the time of valuation.

6.2.4. Allocation of assets and liabilities

The Articles require the assets and liabilities of the Company to be allocated to each Fund and Share Class in the following manner:

- the records and accounts of each Fund shall be maintained separately in its Base Currency;
- the liabilities of each Fund shall be attributable exclusively to that Fund;
- the assets of each Fund shall belong exclusively to that Fund, shall be segregated in the records of the Depositary from the assets of other Funds, and shall not be used to discharge directly or indirectly the liabilities of or claims against any other Fund of the Company;
- the proceeds from the issue of each Share Class shall be applied to the relevant Fund established for that Share Class, and the assets and liabilities and income and expenditure attributable thereto shall be applied to such Fund subject to the provisions of the Articles;
- where any asset is derived from another asset, the derived asset shall be applied to the same Fund as the assets from which it was derived and on each revaluation of an asset the increase or diminution in value shall be applied to the relevant Fund;
- all liabilities incurred in connection with the creation, operation or liquidation of a Fund or Share Class will be charged to that Fund or Share Class and, together with any increase or decrease in the value thereof, will be allocated to that Fund or Share Class and recorded in its books. In particular and without limitation, the costs and any benefit of any Share Class specific feature will be allocated solely to the Share Class to which the specific feature relates.; and
- in the case where an asset or a liability of the Company which cannot be considered as being attributable to a particular Fund or Share Class, the Board shall have discretion, subject to Luxembourg law and the approval of the Auditor, to determine the basis upon which any such asset or liability shall be allocated between the Funds and Share Class. The Board shall also have power at any time subject as aforesaid to vary such basis provided that the

approval of the Auditors shall not be required in any case where the asset or liability is allocated between all Funds and Share Classes pro rata to their NAVs.

6.2.5. Alternative method of valuation

The Board may apply, in good faith and in accordance with generally accepted valuation principles and procedures, other valuation principles or alternative methods of valuation that it considers appropriate in order to determine the probable realisation value of any asset if applying the rules described above appears inappropriate or impracticable.

With respect to the determination of the probable realisable value of assets in the absence of a representative price, the Board is assisted by the SSGA European Valuation Committee. The SSGA European Valuation Committee is made up of representatives from a cross section of functional areas including portfolio managers who are non-voting participants. As a general rule, the Board must be informed by the SSGA European Valuation Committee and will make a case-by-case decision on the basis of the SSGA European Valuation Committee's recommendations.

In order to address valuation issues that have an insignificant impact on the NAV in a more efficient and faster manner, the Board has decided that the SSGA European Valuation Committee's recommendations may be implemented immediately if the impact on the NAV will be less than 50 bps. This is a permanent and ongoing permission which may be revoked, at any time, by the Board. In contrast, where the impact on the NAV will be greater than 50 bps, the Board will take a case-by-case decision on the basis of the recommendations made by the SSGA European Valuation Committee.

6.2.6. Adjustment

The Board may decide to adjust the NAV of any Fund if it determines that the level of subscriptions, redemptions or switching in a particular Fund will require significant purchases or sales of assets in order to provide the required liquidity. Taking into account the best interests of the Shareholders, the NAV of such Fund may be

adjusted to account for the estimated dealing spreads, costs and charges incurred in purchasing or liquidating investments in order to more closely reflect the actual prices of the underlying transactions. The adjustment shall not exceed such percentage of the NAV of the relevant Fund as is set out in the Prospectus and the Relevant Supplement on the relevant Dealing Day. Details of swing pricing may be found in the "Dilution Adjustment" section of the "Shares" section.

The Board may also adjust the value of any asset if it determines that such adjustment is required to reflect its fair value taking into account its denomination, maturity, liquidity, applicable or anticipated interest rates or dividend distributions or any other relevant considerations.

6.3. Publication of NAV

Save where the determination of the NAV per Share in respect of any Fund has been temporarily suspended in the circumstances described under "Temporary Suspension of Dealings" below, the NAV per Share shall be made public daily on www.ssga.com on the next day after the relevant Valuation Point.

6.4. Temporary Suspension of NAV calculation and Dealings

The Board may at any time, with prior notification to the Depositary, temporarily suspend the calculation of the NAV in the following circumstances:

- where one or more stock exchanges or other markets which are the basis for valuing a significant part of the NAV are closed (apart from on normal public holidays), or during which trading is suspended;
- where in the opinion of the Company it is impossible to sell or to value assets as a result of particular circumstances;
- where the communication technology normally used in determining the price of a

security of the Fund fails or provides only partial functionality;

- where the transfer of moneys for the purchase or sale of investments of the Company is impractical;
- following a decision to merge a Fund or the Company, if justified in order to protect the interest of Shareholders;
- where a Fund is a feeder fund and the net asset value calculation of the master UCITS (or sub-fund thereof) is suspended;
- in the case of a resolution to liquidate the Company on or after the date of publication of the first calling of a general meeting of Shareholders for the purpose of such resolution.

The Company will suspend immediately the issue, redemption, and switching of Shares in the event that any issue, redemption or switching would result in the liquidation of the Company or by order of the CSSF.

The suspension of calculation of the NAV per Share of one Fund will not necessarily imply a suspension in respect of other Funds unaffected by the relevant events. Investors who have requested the subscription, redemption or switching of their Shares will be notified of any suspension in writing within seven (7) days and of the termination of such suspension period immediately. Shareholders who have requested the issue, redemption or switching of Shares of any Share Class will have their subscription, redemption or switching request dealt with on the first Dealing Day after the suspension has been lifted unless applications or redemption requests have been withdrawn prior to the lifting of the suspension. Where possible, all reasonable steps will be taken to bring any period of suspension to an end as soon as possible.

7. Fees and Expenses

The Company bears all costs with respect to all fixed and variable charges, fees and other expenses incurred in the operation of the Company. The total costs and expenses for each Share Class (the “**Total Expense Ratio**” or “**TER**”) are capped at a maximum rate as set out in the Relevant Supplement as a portion of the NAV of the Share Class.

The Investment Manager has voluntarily agreed to reimburse such amounts as is necessary to ensure that the TER attributable to each Share Class does not exceed the maximum TER as specified in the Relevant Supplement. The Investment Manager reserves the right, at a future date, to cease any such reimbursements in which case the Shareholders will be notified thereof prior to the Investment Manager ceasing these reimbursements.

The TER shall include (i) operating and administrative expenses, (ii) directors’ fees, (iii) Depositary and Administrator’s fees, (iv) the investment manager’s fee, (v) fees and expenses of the Management Company and (vi) the *taxe d’abonnement*. The TER excludes (i) any performance fee and (ii) Embedded Costs which, if applicable, will be paid separately and in addition to the TER by the Company.

7.1. Operating and Administrative Expenses

All ordinary operating and administrative costs and expenses incurred in the operation and administration of the Company will be borne by the Company. These ordinary operating and administrative expenses include, but are not limited to, costs and expenses incurred in connection with:

- preparing, producing, translating, printing, publishing and distributing, inter alia, the

Articles, Prospectus, KIID(s), accounts, and notices to shareholders;

- the authorization of the Company, the Funds and Share Classes, regulatory compliance obligations and reporting requirements of the Company (e.g. filing fees, and any regulatory or other fees assessed by the CSSF or other applicable regulatory authority);
- initial and ongoing obligations relating to the registration and/or listing of the Company, a Fund or a Share Class and the distribution of Shares in Luxembourg and abroad (including translation fees);
- licensing or other fees payable to any index provider or other licensor of intellectual property, trademarks or service marks used by the Company;
- professional advisory services (e.g. audit, tax, legal, other consulting services);
- entity-level taxes, charges, duties, and contingent liabilities as determined from time to time by the Board;
- any costs incurred as a result of periodic or sporadic updates to the Company documents (including Articles);
- fees and expenses relating to the operation of the Company or attributable to the investments of the Company, including expenses associated with acquiring and disposing of investments;
- fees in respect of publishing details of the NAV of each Fund (including publishing prices) and NAV per Share of each Share Class;
- in respect of each financial year of the Company in which expenses are being determined, such proportion, if any, of the establishment expenses as are being amortised in that year;
- convening and holding the general meetings of Shareholders and the Board meetings; and
- such other costs and expenses (including non-recurring and extraordinary costs and expenses) as may arise from time to time and which have been approved by the Directors as

necessary or appropriate for the continued operation of the Company or of any Fund.

7.2. Directors' Fees

The directors shall be entitled to receive remuneration for their services at a rate to be determined from time to time by the Board. The directors may also be reimbursed for all expenses incurred by them in attending, *inter alia*, Board meetings and general meetings of Shareholders.

Directors' fees are reviewed annually by the Board, disclosed in the annual financial statements and approved by the annual general meeting of Shareholders. The directors that are employees of the State Street Group have waived fees for their services as directors.

7.3. Depositary and Administrator's Fees

The Depositary and Administrator are entitled to receive a maximum fee of 0.50% and 0.025% respectively per annum of the NAV of the relevant Fund, as may be agreed from time to time with the Company. In addition, the Depositary and Administrator are entitled to charge, per transaction, a flat fee for certain services or products, out-of-pocket expenses and for charges of any correspondent banks, if applicable. The fees of the Administrator and Depositary shall be accrued daily based on the NAV of each Fund and will be paid monthly in arrears.

7.4. Investment Management Fee

The Management Company is entitled to charge a fee of up to 3% per annum of the NAV of each Fund. Different rates may be charged in respect of different Share Classes of the same Fund. The Management Company will discharge, from this fee, the fees payable to the Investment Manager, any Sub-Investment Manager and any other delegate appointed by the Management Company in respect of a Fund. The investment management fee will be accrued daily based on the NAV of each

Fund and will be paid monthly in arrears. Subject to the "Embedded Costs" section below, no double-charging of fees will occur. The current maximum investment management fee for all Share Classes is set out in the Relevant Supplements.

7.5. Sub-distributors' Fees

The Investment Manager also acts as global distributor for the Company, responsible for the marketing and distribution of Funds or Share Classes of the Company. The Investment Manager is not remunerated separately for these global distribution services. The Management Company and Investment Manager are entitled to appoint sub-distributors and intermediaries relating to the distribution of Shares. Any sub-distributor or intermediary appointed by the Management Company or the Investment Manager is also entitled to receive compensation for its marketing and distribution of particular Funds or Share Classes of the Company. This fee may be discharged from the investment management fee or will equal a percentage of any Subscription Fee which the Company charges upon the subscription of Shares.

7.6. Performance Fee

In respect of certain Share Classes of particular Funds, a Performance Fee may be charged (payable to the Management Company, the Investment Manager and/or Sub-Investment Manager) in addition to other fees and expenses. Such Performance Fee is accrued and charged in accordance with the methodology described below, unless otherwise described in the relevant Supplement. The Performance Fee Rate and the Reference Asset are specified in the Relevant Supplement.

No Performance Fee will accrue unless both of the following conditions are met:

- The Share Class Performance exceeds the Hurdle Rate over the same Performance Period; and
- The Closing NAV exceeds the current High Water Mark of that Share Class.

The Performance Fee is calculated at the end of the relevant Performance Period on each Share outstanding within each relevant Share Class. The Performance Fee is equal to the Performance Fee Rate applied to the portion of the Closing NAV in excess of the Reference NAV for such Share Class.

For the purpose of determining the NAV per Share of each relevant Shares Class, the Performance Fee is accrued on each Dealing Day by reference to the Share Class Performance over the Performance Period and such accrual may fluctuate accordingly.

If a Shareholder redeems or switches all or part of their Shares or a Fund is merged or liquidated before the end of the Performance Period, any Performance Fee that has accrued on such redeemed or switched Shares or merged or liquidated Fund during that Performance Period will crystallise on that Dealing Day and will then become payable to the Investment Manager and/or the Sub-Investment Manager. Further, any subscriptions during any Performance Period will be based on the Subscription Price, taking into account any Performance Fee accrued in accordance with the above. Since the Company does not operate an equalisation mechanism the Performance Fee may not equate precisely with the performance received by each Shareholder. The potential for the Management Company, the Investment Manager and/or the Sub-Investment Manager to earn the Performance Fee may create certain risks described below.

The Performance Fee is calculated on the relevant Share Class performance over the Performance Period. The Performance Fee is calculated on a Share Class basis and not on an individual Share basis. It is accrued on each Dealing Day for the purpose of determining the NAV per Share of each Share Class and is reflected in the Subscription Price. Due to the mechanics of the Performance Fee accrual, in certain circumstances, Shareholders who purchase Shares during a Performance Period may not pay a full Performance Fee on the performance of their Shares (if Shares are purchased at a Subscription Price below the prior High Water Mark). If the Share Class performance falls below the High Water Mark after the

purchase of such Shares, depending on the time of purchase, some Shareholders may benefit of a reversal of the Performance Fee accrual greater than the Performance Fee accrual reflected in the Subscription Price they paid whereas other Shareholders may not fully recover the Performance Fee accrual reflected in the Subscription Price they paid.

The Performance Fee may create an incentive for the Investment Manager to effect transactions in securities that are riskier or more speculative than would be the case in the absence of such a fee. Since the Performance Fee is calculated on a basis that includes unrealised appreciation of the Sub-Fund's assets, such fee may be greater than if it were based solely on realised gains.

Shareholders should note that while the Performance Fee is reflected in the NAV per Share on a daily basis, the amount of the accrued Performance Fee is only paid to Investment Manager and/or Sub-Investment Manager out of the net assets attributable to the relevant Share Class, annually, one month after the end of the Performance Period if the conditions to earning the Performance Fee have been met.

7.7. Formation Expenses

The fees and expenses incurred in connection with the formation of the Company were borne by the Company and amortised over the first 5 years of the Company. In the Board's discretion, the formation expenses of each new Fund will be borne by such Fund and may be amortised over the first 5 years from the date this Fund is launched.

7.8. Embedded Costs

The Funds may invest in other existing UCIs and/or UCITS. Where this occurs charges may exist at the level of both the UCI/UCITS and the Company. If a Fund invests in the shares of other UCITS or UCIs that are managed, directly or by delegation, by the Management Company or by any other company with which the Management Company is linked by common management or control, or by a substantial direct or indirect holding, the

Management Company or other company shall not charge subscription or redemption fees on account of the Fund's investment in the shares of such other UCITS or UCI.

Embedded Costs apply in respect of exchange traded fund investments held by each Fund which includes costs paid to the Investment Manager or its affiliates (as relevant), in respect of investment management, custody and administration services. These Embedded Costs will be borne by the Fund and not the individual Shareholders. Further detail is available from the Investment Manager or its affiliates (as relevant) upon request.

In addition, subscriptions, redemptions and switching made through a third party agent may result in additional fees and expenses being incurred by Shareholders.

7.9. Allocation of Expenses

Expenses readily attributable to a particular Share Class or Share Classes will be paid by such Share Class or Share Classes. Where an expense is not considered by the Board to be attributable to any one Share Class, this expense will normally be allocated, insofar as practicable, to all Share Classes pro-rata to their NAV. In certain circumstances however, the Board may exercise their discretion to vary this allocation subject to Luxembourg law and, if applicable, auditor approval.

8. Investment Techniques

When pursuing the investment objective and policy set out in the Relevant Supplement, each Fund must comply with the following investment techniques. These investment techniques are subject, at all times, to any regulations and guidance issued by the CSSF or any other appropriate regulatory body.

8.1. Investment Strategies

Funds will pursue their investment objectives and policies as set out in the Relevant Supplement by applying one of the following strategies:

Replication Strategy – this passive strategy seeks to physically hold all or close to all of the securities of the particular Index, with the approximate weightings as in that Index. Essentially, the portfolio of the Fund would be a near mirror-image of the particular Index.

Stratified Sampling Strategy – this passive strategy seeks to build a representative portfolio that matches the risk and return characteristics of the Index in the most efficient way, including but not limited to, risks related to currencies, countries, sectors, quality, maturity duration and issuers. Stratified sampling is typically used because the Index contains too many securities to efficiently purchase and, at times, certain securities included in that index may be difficult, or too costly, to purchase in the open markets. Consequently, a Fund using this strategy will typically hold only a subset of the securities included in the Index.

Optimisation Strategy – this passive strategy seeks to build a representative portfolio that matches the risk and return characteristics of the applicable Index, including risks related to currencies, countries, sectors, industries and size. Optimisation is typically used because the applicable Index contains too many securities to efficiently purchase and, at times, certain securities included in the Index may be difficult to purchase in the open markets. Consequently, a Fund using this strategy will typically hold only a subset of the securities included in the Index.

Flexible Asset Allocation Strategy – this active tactical asset allocation strategy uses a top-down proprietary quantitative model to determine an appropriate asset allocation based on an assessment of the current market regime. In following this strategy a long only diversified portfolio is built through direct investment in each asset class as well as indirect investment via derivatives and UCIs.

Fundamental Equity Strategy – this actively managed strategy uses a proprietary fundamentally driven and bottom-up research process to identify companies with a dislocation between the intrinsic value of the company and the price of its equity security.

Multi-Factor Equity Strategy – this actively managed strategy uses quantitative stock selection and multi-factor models to evaluate stocks based on their exposure to valuation, volatility and quality factors. In following this strategy, the Investment Manager and/or Sub-Investment Manager will tilt the composition of the relevant portfolio towards securities with favourable exposures to the relevant factors. The Multi-Factor Strategy involves a limited use of derivatives and direct investment in equity securities.

Quantitative Equity Strategy – this active strategy uses quantitative country allocation, stock selection and multi-factor models to evaluate the attractiveness of stocks. In following this strategy, the Investment Manager and/or Sub-Investment Manager may invest in or gain exposure to securities registered in or trading in markets other than those included in the relevant index. Defined risk parameters include limits on country, sector and security weights on an absolute basis and relative to the respective index.

Managed Volatility Equity Strategy – this active strategy uses a multi-factor risk model to select securities that are assessed as having low exposure to market risk factors and are expected to exhibit lower volatility than the relevant index with the potential to provide returns comparable with the

relative index. In following this strategy, the Investment Manager and/or Sub-Investment Manager will invest directly in equity securities and will build a portfolio of securities that may differ from that of the relevant index. Defined risk parameters include limits on country, sector and security weights on an absolute basis and relative to the respective index.

Defensive Equity Strategy – this actively managed strategy uses quantitative stock selection and multi-factor models to evaluate stocks. Investments are chosen based on their potential to produce returns in excess of the relevant index with reduced volatility relative to the index. Defined risk parameters include limits on country, sector and security weights on an absolute basis and relative to the respective index.

Equity Market Neutral Strategy – this strategy uses a multi-factor model for stock selection purposes to evaluate the attractiveness of stocks. The strategy takes long and short positions in listed equity securities but aims to be balanced and targets a neutral exposure to equity markets. Exposure may be achieved by purchasing the securities directly or by entering into derivative transactions. Potential investors and Shareholders should note that this strategy is likely to have significant exposure to derivative instruments, and therefore, the return Shareholders receive will be dependent on the performance of these instruments and the underlying assets to which they relate.

8.2. Investment Restrictions and Limits

8.2.1. Permitted Investments

The investments of each Fund shall comprise only one or more of the following:

- i. transferable securities and money market instruments which are either admitted to official listing on or are dealt in on another Regulated Market; and/or
- ii. recently issued transferable securities and money market instruments provided that

the terms of issue include an undertaking that application will be made for admission to official listing on a Regulated Market and such admission is secured within a year of the issue; and/or

- iii. Shares or units in UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1 (2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State, provided that:
 - such other UCIs are authorised under laws which provide that they are subject to supervision considered by the CSSF to be equivalent to that under EU law and that cooperation between authorities is sufficiently ensured;
 - the level of protection for unitholders in such other UCIs is equivalent to that provided for unitholders in a UCITS and in particular that the rules on asset segregation, borrowing, lending and uncovered sales of transferable securities and money market instruments are equivalent to the requirements of the UCITS Directive;
 - the business of the other UCIs is subject to semi-annual and annual reports which enable an assessment of the assets and liabilities, income and transactions over the reporting period; and
 - the UCITS or other UCI, whose units or shares are to be acquired, may, according to their constitutional documents, invest, in total, no more than 10% of their net assets in units or shares of other UCITS or UCIs; and/or
- iv. Deposits with a credit institution which are repayable on demand or have the right to be withdrawn, and maturing in no more than 12 months, provided that the credit institutions has its registered office in an EU Member State or, if the registered office of the credit institution is situated in a third country, provided that

it is subject to prudential rules considered by the CSSF as equivalent to those laid down in EU law; and/or

v. Financial derivative instruments, including equivalent cash-settled instruments, which are dealt in on a Regulated Market referred to in subparagraph (i) above, and/or over the counter derivatives (“OTC derivatives”), provided that:

- the underlying securities are instruments as defined by this section 8.2.1., financial indices, interest rates, exchange rates or currencies in which the Funds may invest according to their investment objective;
- the counterparties to OTC derivative transactions are institutions subject to prudential supervision and belonging to the categories approved by the CSSF; and
- the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or settled through an offsetting transaction at any time at the initiative of the Company at their fair value; and/or

vi. Money market instruments other than those dealt in on a Regulated Market provided the issue or issuer of these instruments is itself subject to regulations concerning the protection of savings and investors, and provided the instruments are:

- issued or guaranteed by a central, regional or local authority or the central bank of an EU Member State, the European Central Bank, the EU or the European Investment Bank, a third country or, in the case of a federal state, one of the members making up the federation, or by a public international institution to which at least one EU Member State belongs;

- issued by an undertaking whose securities are traded on Regulated Markets;

- issued or guaranteed by an establishment subject to prudential supervision in accordance with the criteria defined by EU law, or by an institution which is subject to and complies with prudential rules considered by the CSSF to be at least as stringent as those under EU law; or
- issued by other issuers belonging to a category approved by the CSSF provided such instruments are subject to investor protection regulations which are equivalent to those of the first, second or third indent of this paragraph and provided the issuer is either a company whose capital and reserves amount to at least ten (10) million euro which presents and publishes its annual accounts in accordance with Directive 78/660/EEC, or an entity within a group comprising one or more companies listed on an official stock exchange which is dedicated to the financing of that group, or is an entity which is dedicated to the financing of the securitization vehicles which benefit from a banking liquidity line.

vii. The Company may hold ancillary liquid assets:

- Property; and
- Liquid.

The Relevant Supplement will indicate which of these permitted investments are available for each Fund.

8.2.2. Investment Restrictions

(A) (i) Each Fund may not invest more than 10% of its net assets in transferable securities or money market instruments of the same issuer. Each Fund may invest no more than 20% of the net assets in deposits made with the same institution. The risk exposure to a counterparty in

OTC derivative transactions by the Company may not exceed 10% of the net assets of each Fund when the counterparty is a credit institution referred to in 8.2.1 (iv) above or 5% of each Fund's assets in other cases.

- (ii) The total value of the transferable securities and money market instruments held by a Fund in the issuing bodies in each of which it invests more than 5% of the net assets of such Fund must not exceed 40% of the net assets of such Fund. This limitation does not apply to deposits or OTC derivative transactions made with financial institutions subject to prudential supervision.

Irrespective of the individual limits under (A) (i) above a Fund may not combine:

- investments in transferable securities or money market instruments issued by a single body; and/or
- deposits made with a single body; and/or
- exposure arising from OTC derivative transactions undertaken with a single body

in excess of 20% of its assets.

- (iii) The 10% limit laid down in (A) (i) above may be increased to:

- 35% if the transferable securities or money market instruments are issued or guaranteed by a EU Member State or by its local authorities, by a non-EU Member State or by public international institutions of which at least one EU Member State is a member;
- 25% for certain debt securities when they are issued by a credit institution with its registered office in an EU Member State which is subject, by law, to special prudential supervision designed to protect investors in debt securities. In particular sums deriving from the issue of these debt securities must be invested in

conformity with the law in assets which, during the whole period of validity of the debt securities, are capable of covering claims attaching to the debt securities and which, in case of bankruptcy of the issuer, would be used on a priority basis for the repayment of principal and of the accrued interest. If a Fund invests more than 5% of its Net Asset Value in the debt securities referred to above and which are issued by one issuer, the total value of such investments may not exceed 80% of the NAV of the Fund concerned.

- (iv) The transferable securities and money market instruments referred to in (A) (iii) above are not taken into account in the calculation of the limit of 40% referred to in (A) (ii) above.

The limits laid down in (A) (i), (ii), and (iii) may not be combined, and thus, investments in transferable securities or money market instruments issued by the same body or in deposits or derivatives made with this body carried out in accordance with (A) (i), (ii) and (iii) shall not exceed in total 35% of the assets of any Fund.

Companies which are included in the same group for the purpose of consolidated accounts as defined in the Directive 83/349/EEC or in accordance with recognized international accounting rules are regarded as a single issuer for the purpose of calculating the aforementioned limits.

A Fund may cumulatively invest up to 20% of its assets in transferable securities and money market instruments within the same group.

- (v) Without prejudice to the limits set out in (B) and (C) below, the limits set out in (A) (i) for investors in Shares and/or debt securities issued by the same issuer may be raised to a maximum of 20% when the

investment strategy of the Fund is to replicate the composition of a certain stock or bond index which is recognized by CSSF, on the following basis:

- that the composition of the index is sufficiently diversified;
- that the index represents an adequate benchmark for the market to which it refers; and
- that the index is published in an appropriate manner.

This limit is raised to 35% where this proves to be justified by exceptional market conditions, in particular on Regulated Markets where certain transferable securities or money market instruments are highly dominant. The investment up to this limit is only permitted for a single issuer.

(vi) Notwithstanding points (A) (i), (ii), (iii) and (iv), each Fund is authorised to invest up to 100% of its net assets in different transferable securities and money market instruments issued or guaranteed by an EU Member State, its local authorities, by a member state of the OECD or public international bodies of which one or more EU Member States are members, provided that (i) such securities are part of at least six different issues and (ii) securities from any one issue do not account for more than 30% of the net assets of such Fund.

(vii) Each Fund may acquire units of UCITS and/or other UCIs as defined within 8.2.1 (iii) above, provided that no more than 10% of a Fund's assets may in aggregate be invested in units of UCITS or other UCIs, unless the Relevant Supplement relating to a particular Fund provides for the possibility for such Fund to invest in aggregate more than 10% of its assets in units of UCITS or other UCIs.

If the Relevant Supplement of a particular Fund allows the Fund to invest in aggregate more than 10% of its assets

into UCITS or other UCIs the following restrictions will apply:

- no more than 20% of its assets may be invested in the units of a single UCITS or other UCI. For the purpose of the application of this investment limit, each sub-fund of a UCI is to be considered as a separate issuer provided that the principle of segregation of the obligations of the various Funds vis-à-vis third parties is ensured;
- investments made in units of UCIs other than UCITS may not, in aggregate, exceed 30% of the NAV of a Fund.

(viii) The underlying investments held by the UCITS or other UCIs in which the Fund invests do not have to be considered for the purpose of the investment restrictions set forth above in paragraph (A) (i), (ii), (iii), and (iv).

(ix) When a Fund invests in the units of UCITS and/or other UCIs which are managed directly or indirectly by the Management Company or by another company to which the Management Company is linked by common management or control or by a substantial direct or indirect shareholding, no subscription or redemption fees may be charged to the Fund on account of its investment in the units of such other UCITS and/or UCIs.

(B) The Company may not acquire:

- i. shares carrying voting rights which would enable it to exercise significant influence over the management of the issuer.

(C) Each Fund may not acquire more than:

- i. 10% of the non-voting shares from the same issuer; and/or
- ii. 10% of debt securities from the same issuer; and/or
- iii. 25% of the units of the same target fund; and/or
- iv. 10% of the money market instruments of any single issuer.

The limits set out in (C) (ii), (iii), and (iv) may be disregarded at the time of acquisition if at that time the gross amount of debt securities or money market instruments, or the net amount of the Shares in issue cannot be calculated.

The foregoing sub-paragraphs (i) and (ii) shall not apply to:

- transferable securities and money market instruments issued or guaranteed by a EU Member State or its local authorities;
- transferable securities and money market instruments issued or guaranteed by a non-EU Member State;
- transferable securities and money market instruments issued by public international institutions of which one or more EU Member States are members;
- shares held by the Company in the capital of a company incorporated in a non-EU Member State which invests its assets mainly in the securities of issuers having their registered office in that state, where under the legislation of that state, such a holding represents the only way in which the Company can invest in the securities of issuers of that state. This derogation, however, shall only apply if in its investment policy the company from the non-EU Member State complies with the limits laid down in (A) (i), (ii), (iii), (iv), (vii), (viii) and (ix), and (B) (i) and (ii). Where the limits set in (A) (i), (ii), (iii), (iv), (vii), (viii) and (ix), are exceeded, section 8.3 (viii) and (ix) shall mutatis mutandis apply;
- shares held by the Company alone or together with other UCIs in the capital of subsidiary companies which, exclusively on its or their behalf carry on only the business of management, advice or marketing in

the country where the subsidiary is located, in regard to the redemption of Shares at the request of Shareholders.

8.2.3. Other Investment Restrictions

In addition, the Company may not:

- i. invest more than 10% of the assets of any Fund in transferable securities and money market instruments other than those referred to in section 8.2.1 above.
- ii. acquire precious metals or certificates representing them;
- iii. carry out uncovered sales of transferable securities or money market instruments or other financial instruments referred to in 8.2.1 (iii), (v) and (vi);
- iv. grant loans to or act as guarantor on behalf of third parties for the account of the Fund, provided that this restriction shall not prevent the Company from:
 - Lending its portfolio securities and
 - Acquiring transferable securities or money market instruments or other financial instruments referred to in 8.2.1 (iii), (v) and (vi) which are not fully paid.
- v. borrow for the account of any Fund amounts in excess of 10% of the total assets of that Fund, any such borrowings to be effected only on a temporary basis. The Company may however acquire foreign currencies by means of back to back loans;
- vi. mortgage, pledge or otherwise encumber as security for indebtedness any securities held for the account of any Fund, except as may be necessary in connection with the borrowings mentioned in (iv) above, and then such mortgaging, pledging, or hypothecating may not exceed 10% of the asset value of each Fund. In connection with OTC transactions including but not limited to option and forward exchange or futures transactions, or swap transaction the deposit of securities or other assets in a separate account shall

- not be considered a mortgage, pledge or hypothecation for this purpose;
- vii. underwrite or sub-underwrite securities of other issuers;
 - viii. acquire securities which entail unlimited liability;
 - ix. The Company need not comply with the limits set out in this section when exercising subscription rights attaching to transferable securities and money market instruments which form part of its assets.
 - x. During the first six months following its launch, a Fund may derogate from the rules set out in (A) (i), (ii), (iii), (iv), (v), (vi), (vii), (viii), and (ix) while ensuring observance of the principle of risk-spreading.

The Company may implement further investment restrictions.

8.2.4. Cross-Fund Investments

A Fund may subscribe, acquire and/or hold Shares of one or more Funds (the “**Target Fund(s)**”), without it being subject to the requirements of the 1915 Law, with respect to the subscription, acquisition and/or the holding by a company of its own shares provided that:

- the Target Fund does not, in turn, invest in the Fund invested in such Target Fund;
- no more than 10% of the net assets of the Target Fund, the acquisition of which is contemplated, may be invested in aggregate in units/shares of other UCIs;
- voting rights, if any, attaching to the Shares of the Target Fund(s) are suspended for as long as they are held by the Fund concerned and without prejudice to the appropriate processing in the accounts and the periodic reports; and
- in any event, for as long as these Shares of the Target Fund(s) are held by the Fund, their value will not be taken into consideration for the calculation of the net assets of the Fund for the purposes of verifying the minimum threshold of the net assets of the Fund as imposed by the 2010 Law.

8.2.5. Master Feeder Structures

Under the conditions and within the limits set out in the 2010 Law, the Company may create any Fund qualifying as a feeder UCITS or convert any existing Fund into a feeder UCITS.

A feeder UCITS shall invest at least 85% of its assets in the units or shares of another master UCITS. A feeder UCITS may hold up to 15% of its assets in one or more of the following:

- ancillary liquid assets in accordance with 8.2.1 (vii);
- financial derivative instruments, which may only be used for hedging purposes; and
- movable and immovable property which is essential for the direct pursuit of its business.

8.3. Financial Derivative Instruments

8.3.1. General

Each Fund may use those financial derivative instruments for the purpose of efficient portfolio management, including hedging, and investment purposes as indicated in the Relevant Supplements. The use of financial derivative instruments may not cause a Fund to deviate from its stated investment objective and policy. Further, each Fund shall, at all times, hold sufficient liquid assets (including if relevant sufficient liquid long positions) to cover its financial obligations arising from its financial derivative positions (including short positions).

Efficient portfolio management means the reduction of risks, including the risk of tracking error between the performance of a Fund and the performance of the Index tracked by the relevant Fund, the reduction of costs to a Fund, the generation of additional capital or income for a Fund and hedging against market movements, currency exchange or interest rate risks, subject to the general restrictions outlined in the “**Investment Restrictions and Limits**” section of this Prospectus. Hedging is a technique used to minimise an exposure created from an underlying position by counteracting the exposure by

acquiring an offsetting position. The positions taken for hedging purposes will not be allowed to materially exceed the value of the assets they seek to offset. If a Fund uses financial derivative instruments for investment purposes they form part of such Fund's general investment policy.

To the extent that a Fund uses financial derivative instruments, there may be a risk that the volatility of the Fund's Net Asset Value may increase.

The Company will use financial institutions it reasonably believes are highly rated as counterparties for investments in derivative instruments. When assessing a financial institution's creditworthiness, the Company will consider long term and short term credit ratings and bank financial strength ratings. Notwithstanding any assessment made in respect of a financial institution's creditworthiness, there can be no assurance that the credit quality of any counterparty will not deteriorate during the course of a derivative transaction and that a Fund will not sustain a loss on a transaction as a result.

The following is a non-exhaustive summary description of certain types of financial derivative instruments, which may be used by a Fund. The types of financial derivative instruments used by each individual Fund are set out in the Relevant Supplement.

- **Contract for difference (CFD)** – CFDs are contracts where the buyer is the holder of the long position and will receive or pay the difference between the current value of an asset and the price when the contract is closed.

- **Forward foreign exchange contracts** – Forward foreign exchange contracts are agreements between parties to exchange fixed amounts of different currencies at an agreed exchange rate at an agreed time in the future. Forward foreign exchange contracts are similar to currency futures, except that they are not exchange-traded, but are instead over the counter instruments. Forward foreign exchange contracts may be used to manage currency exposures represented in the Index. Non-deliverable forward foreign exchange contracts may be used for the same reasons. They

differ from standard forward foreign exchange contracts in that at least one of the currencies in the transaction is not permitted to be delivered in settlement of any profit or loss resulting from the transaction. Typically, profit or loss in this case will be delivered in US Dollars or Euros.

- **Futures** - futures contracts are agreements to buy or sell a fixed amount of an index, equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

- **Options** – Options are contracts, usually exchange-traded, in which the writer (seller) promises that the contract buyer has the right, but not the obligation, to buy or sell a certain index, equity, bond or currency at a certain price (the strike price) on or before a certain expiration date, or exercise date. An option giving the buyer the right to buy at a certain price is called a call, while one that gives him/her the right to sell is called a put. The Fund may purchase and write call and put options on securities (including straddles), securities indices and currencies and use options on futures contracts (including straddles) and swap agreements, and / or hedge against changes in interest rates, currency exchange rates or securities prices. OTC options may only be concluded if the counterparties are highly rated financial institutions which specialize in transactions of this kind.

- **Swaps** – swaps are a bilateral contract to exchange two securities, performance, income, interest rates or currencies.

- **Total return swaps (TRS)**

In particular, a total return swap is an agreement in which one party (total return payer) transfers the total economic performance of a reference obligation, which may for example be a share, bond or index, to the other party (total return receiver). The total return receiver must in turn pay the total return payer any reduction in the value of the reference obligation and possibly certain other cash flows. Total economic performance includes income from interest and

fees, gains or losses from market movement, and credit losses. A Fund may use a total return swap to gain exposure to an asset (or other reference obligation), which it does not wish to buy and hold itself, or otherwise to make a profit or avoid a loss.

Total return swaps entered into by a Fund may be in the form of funded and/or unfunded swaps. An unfunded swap means a swap where no upfront payment is made by the total return receiver at inception. A funded swap means a swap where the total return receiver pays an upfront amount in return for the total return of the reference obligation.

Each Fund may employ total return swaps (within the meaning of, and under the conditions set out in, applicable laws, regulations and CSSF circulars issued from time to time, in particular, but not limited to, Regulation (EU) 2015/2365).

The counterparties to such total return swaps will be entities (which may or may not be related to the Management Company, the Depositary or their delegates) with any type of legal personality typically located in OECD jurisdictions. They will be subject to ongoing supervision by a public authority, be financially sound and have the necessary organisational structure and resources for the relevant type of transaction. In addition, a credit assessment (which may, but is not obliged to, include a minimum credit rating requirement) will be undertaken with respect to each counterparty. The credit assessment considers in particular asset quality, capital adequacy, funding profile, earnings stability and liquidity.

Where a Fund uses total return swaps, the maximum and the expected proportion of assets that could be subject to these instruments will be expressed as a percentage of the sum of the gross notional exposures of the total return swaps entered into by the Fund divided by its net asset value and set out in the Relevant Supplement.

Each Fund may incur costs and fees in connection with total return swaps. In particular, a Fund may pay fees to agents and other intermediaries, which may be affiliated with the Depositary or the Investment Manager to the extent permitted

under applicable laws and regulations, in consideration for the functions and risks they assume. The amount of these fees may be fixed or variable. Information on direct and indirect operational costs and fees incurred by each Fund in this respect, as well as the identity of the entities to which such costs and fees are paid and any affiliation they may have with the Depositary or the Management Company, if applicable, will be available in the annual report. The entire return generated by total return swaps, net of applicable counterparty, brokerage and/or other intermediary fees and expenses, will be returned to the Fund. The Investment Manager does not charge any specific fee, in addition to the investment management fee, upon entering into transactions under total return swap agreements.

- **TBA securities** – To Be Announced (“TBA”) mortgage-backed securities are, typically, debt securities structured by agencies such as the Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac) etc. In the case of a typical TBA transaction, the terms of the security, including coupon, face value, price and settlement date are determined at the time of the trade but there is, effectively, a delayed delivery obligation and there is settlement of TBA mortgage-backed securities, usually on one specific date in each calendar month. For example, although a Fund may enter into a transaction to acquire a TBA mortgage-backed security, the issuer is not actually obliged to deliver that security to the Fund for a period of, for example, three months. Typically, the Investment Manager and/or Sub-Investment Manager will dispose of any TBA mortgage-backed securities immediately prior to the projected date of settlement and realise any gain on the acquisition and disposal of the TBA mortgage-backed security in that manner. Accordingly, a Fund may use TBA mortgage-backed securities to gain exposure to the mortgage sector without being subject to a requirement to take delivery of the relevant securities. A Fund may use TBA mortgage-backed securities to gain a liquid exposure to the component of the Index that is comprised of U.S. mortgage-backed securities with

the intention of minimising tracking error between the Fund and the Index.

8.3.2. Global Exposure

The global exposure (*i.e.* aggregate exposure) to financial derivative instruments is measured daily using either the commitment approach or VaR methodology. It is calculated taking into account the current value of the underlying assets, counterparty risk, foreseeable market movements and the time available to liquidate the positions.

The Company shall ensure that the global exposure of each Fund to financial derivative instruments using the commitment approach does not exceed the total net assets of that Fund.. In addition, this overall risk exposure may not be increased by more than 10% by means of temporary borrowings.

Commitment approach

Unless otherwise indicated in the Relevant Supplement, each Fund uses the commitment approach to calculate its global exposure. Each Fund using this approach will make use of financial derivative instruments in a manner which will not materially alter the Fund's risk profile with respect to what it would be if financial derivative instruments were not used.

Under the commitment approach, positions on financial derivative instruments held by a Fund are converted into the equivalent positions in the underlying assets. The Fund's total commitment to financial derivative instruments is then quantified as the sum of the individual commitments. Netting and hedging arrangements are permitted in certain cases only.

VaR approach

Certain Funds apply a VaR approach to calculate their global exposure and this will be specified for each applicable Fund in the Relevant Supplement. A global exposure calculation using the VaR approach should consider all the positions of the relevant Fund.

VaR is a measure of the maximum potential loss due to market risk and is expressed as the maximum potential loss at a given confidence level

over a specific time period under normal market conditions, as specified in the Relevant Supplement(s).

VaR is calculated using either the absolute or relative approach. The Investment Manager's investment risk team will decide which VaR approach is the most appropriate methodology given the risk profile and investment strategy of the Fund. The VaR approach selected for each Fund using the VaR methodology is specified in the Relevant Supplement.

Funds using the VaR approach are required to disclose their expected level of leverage which is stated in the Relevant Supplement. The expected level of leverage disclosed for each Fund is an indicative level and is not a regulatory limit. The Fund's actual level of leverage might significantly exceed the expected level from time to time however the use of financial derivatives will remain consistent with the Fund's investment objective and risk profile and comply with its VaR limit.

Leverage is a measure of the aggregate derivative use and is calculated as the sum of the notionals exposure of the financial derivatives used. The sum of the notionals does not permit the offsetting of hedging transactions and other risk mitigation strategies involving financial derivative instruments or the netting of derivative positions and does not take into account the underlying assets' volatility or make any distinction between short term and long term assets.

Relative VaR

The relative VaR approach is used for Funds where a derivative free benchmark or reference portfolio is defined reflecting the investment strategy which the Fund is pursuing. The relative VaR of a Fund is expressed as a multiple of the VaR of a benchmark or reference portfolio and is limited to no more than twice the VaR on that benchmark or reference portfolio. The reference portfolio for VaR purposes, as amended from time to time, may be different from the benchmark as stated in the Relevant Supplement.

Absolute VaR

The absolute VaR approach calculates a Fund's VaR as a percentage of the NAV of the Fund and is measured against an absolute limit of 20% as defined by the ESMA Guidelines 10-788. Absolute VaR is generally an appropriate approach in the absence of an identifiable reference portfolio or benchmark (for instance, where the Fund has an absolute return target).

8.3.3. Financial Techniques and Instruments

The Company may enter into repurchase agreements and securities lending agreements for efficient portfolio management purposes (as described in section 8.3.1 above), subject to article 42(2) of the 2010 Law and the conditions and limits set out in CSSF circular 08/356, CSSF circular 14/592, ESMA guidelines ESMA/2014/937, Regulation (EU) 2015/2365 and other applicable laws, regulations, and administrative practice of the CSSF. Investors should review the Relevant Supplement for confirmation of whether or not a Fund uses such techniques.

In order to limit the exposure of a Fund to the risk of default of the counterparty under a securities lending or repurchase transaction, the Fund will receive collateral, as further specified in 8.7.4 below.

Details of the exposures obtained through efficient portfolio management techniques, the identity of the counterparties used, the type and amount of collateral received to reduce such exposures and any income and expenses, whether direct or indirect, generated by efficient portfolio management techniques will be disclosed in the periodic reports of the Company.

8.3.3.1 Repurchase Agreements

A repurchase agreement is an agreement between a seller and a buyer of specified securities under which the seller agrees to repurchase securities at an agreed upon price and, usually, at a stated time. If the Company is the seller, the agreement is categorised by the Company as a repurchase agreement; if the Company is the buyer, the agreement is categorised by the Company as a

reverse repurchase agreement. The difference between the purchase price and the repurchase price represents the yield to the buyer from the repurchase transaction. Each Fund may enter into repurchase agreements with the Sub-Investment Manager or an affiliate of the Investment Manager, provided that such transactions will be effected on an arm's length basis.

The entire return generated by repurchase agreements, net of applicable counterparty, brokerage and/or other intermediary fees and expenses, will be returned to the Fund. The Investment Manager does not charge any specific fee, in addition to the investment management fee, upon entering into transactions under repurchase agreements. Information on direct and indirect operational costs and fees incurred by each Fund in this respect, as well as the identity of the entities to which such costs and fees are paid and any affiliation they may have with the Depositary or the Management Company, if applicable, will be available in the annual report.

Investors should also read the risk warning headed "**Repurchase agreements**" in the section "**Risk Information**".

8.3.3.2 Securities Lending

In a securities lending transaction, the lender makes a loan of securities to the borrower upon terms that require the borrower to return equivalent securities to the lender within a specified period and the borrower pays the lender a fee for the use of the securities during the period that they are on loan. The Fund should ensure that it can, at any time, recall any security lent out within five (5) Business Days or such other period as is considered normal practice or terminate any securities lending agreement into which it has entered.

The Board may determine to lend the portfolio securities of any Fund via a securities lending programme through an appointed securities lending agent, including State Street Bank International GmbH London Branch and any of its affiliates, to brokers, dealers and other financial institutions desiring to borrow securities to

complete transactions and for other purposes. The Company has enrolled certain Funds in the Securities Lending Programme sponsored by State Street Bank and Trust Company. Eligibility of a Fund to participate in the Securities Lending Programme is flagged in the Relevant Supplement. Investors should read the risk warning headed “**Conflicts of Interest Risk**” in the “**Risk Information**” section for further information regarding the risks associated with the use of affiliates to provide securities lending agency services to the Company.

Participating in a securities lending programme allows a Fund to receive the net income generated by lending its securities. All revenues from efficient portfolio management techniques, net of direct and indirect operational costs, will be returned to the relevant Fund. Pursuant to the terms of the relevant Securities Lending Programme, the lending agent (State Street Bank and Trust Company, or any of its affiliates) will be entitled to retain a portion of up to 30% of the securities lending revenue to cover all fees and costs associated with the securities lending activity, including the delivery of loans, the management of collateral. Information on direct and indirect operational costs and fees incurred by each Fund in this respect, as well as the identity of the entities to which such costs and fees are paid and any affiliation they may have with the Depositary or the Management Company, if applicable, will be available in the annual report. Investors should also read the risk warning headed “**Securities Lending Risk**” in the section “**Risk Information**”. Unless otherwise indicated in the Relevant Supplement, no Fund shall participate in a securities lending programme.

8.3.3.3 Selection of counterparties

A Fund may only enter into securities lending agreements and repurchase agreements with counterparties which (i) are financial institution with any type of legal personality and typically located in an OECD member state (and which may or may not be related to the Investment Manager, Depositary or their delegates), (ii) subject to prudential supervision rules considered by the CSSF as equivalent to those provided by European

Union law, (iii) be of good reputation, and (iii) where a credit assessment has been undertaken. Where the counterparty is subject to a credit rating by any agency registered and supervised by the European Securities and Markets Authority, that rating shall be taken into account in the credit assessment. Where a counterparty is downgraded to A2 or below (or comparable rating) by such a credit rating agency, a new credit assessment in respect of the counterparty will be undertaken without delay. Use of the efficient portfolio management techniques described above could adversely affect the liquidity of a Fund’s portfolio and will be taken into account by the Investment Manager in managing the Fund’s liquidity risk and in this respect, investors should also read the risk warning headed “**Liquidity Risk**” in the “**Risk Information**” section.

8.3.4. Collateral

A Fund may enter securities lending agreements and repurchase agreements only where it acts in accordance with normal market practice, in the best interests of Company and provided that all collateral received under the securities lending contract or repurchase agreement and any financial derivative instrument meet, at all times, the following criteria:

- **Liquidity:** Collateral (other than cash) should be highly liquid and traded on a regulated market or multi-lateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to its pre-sale valuation.
- **Valuation:** Collateral should be valued on a daily basis and assets that exhibit high price volatility should not be accepted as collateral unless suitably conservative haircuts are in place.
- **Issuer Credit Quality:** Collateral received should be of high quality.
- **Correlation:** Collateral should be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty.
- **Diversification:** Collateral should be sufficiently diversified in terms of country,

markets and issuers. Non-cash collateral will be considered to be sufficiently diversified if the relevant Fund receives from a counterparty a basket of collateral with a maximum exposure to any one issuer of 20% of the Fund's Net Asset Value. When the Fund is exposed to a variety of different counterparties, the various baskets of collateral are aggregated to ensure exposure to a single issuer does not exceed 20% of the Fund's Net Asset Value.

- **Immediately available:** Assets received as collateral should be capable of being fully enforced by the Company at any time without reference to or approval from the counterparty.

Eligible collateral

It is proposed that each Fund will accept the following types of collateral:

- Cash (except in the framework of securities lending transaction);
- Bonds issued or guaranteed by an EU Member State of the OECD or by their local public authorities or by supranational institutions and undertakings with EU, regional or worldwide scope;
- Shares or units issued by money market UCIs calculating a daily net asset value and being assigned a rating of AAA or its equivalent;
- Shares or units issued by UCITS investing mainly in bonds/shares mentioned in the following two bullet points;
- Bonds issued or guaranteed by first class issuers offering adequate liquidity; or
- Shares admitted to or dealt in on a regulated market of an EU Member State or on a stock exchange of a member state of the OECD, on the condition that these Shares are included in a main index.

Level of collateral

The Fund will determine the required level of collateral for OTC financial derivatives transactions by reference to the applicable counterparty risk limits set out in this section of the Prospectus and taking into account the nature and characteristics of transactions, the creditworthiness and identity

of counterparties and prevailing market conditions.

Haircut Policy

The Company has implemented a haircut policy in respect of each class of assets received as collateral. This policy takes account of the characteristics of the relevant asset class, including the credit standing of the issuer of the collateral, the price volatility of the collateral and the results of any stress tests which may be performed in accordance with the stress testing policy.

Depending on the foregoing factors, the haircut applied to the collateral received in relation to the securities lending transactions will be at least included in the following ranges:

- Government bonds: from 2% to 5%;
- Equities: from 5% to 8%.

Depending on the foregoing factors, the haircut applied to the collateral received in relation to the OTC financial derivatives transactions will be at least included in the following ranges:

- Cash in eligible currencies (EUR, GBP, USD): 0%;
- Government bonds: from 1% to 13%.

Depending on the foregoing factors, it is expected that the haircut applied to the collateral received in relation to the repurchase transactions will be at least included in the following ranges:

- Government bonds: from 0% to 5%.

Valuation of collateral

Collateral will be valued on a daily basis using available market prices and taking into account appropriate discounts which will be determined for each asset class based on the haircut policy described above, and will be subject to daily variation margin requirements.

Stress Testing

Any Fund receiving collateral for at least 30% of its assets will undergo regular stress testing in accordance with the Company's liquidity stress-testing policy to assess the liquidity risk attached to the collateral it has received.

Reinvestment of collateral

Non-cash collateral received by a Fund may not be sold, re-invested or pledged.

Cash collateral received for the benefit of a Fund can only be:

- placed on deposit with a credit institution which has its registered office in a EU Member State or a credit institution located in a third-country which is subject to prudential rules considered by the CSSF as equivalent to those laid down in EU law;
- invested in high-quality government bonds;
- used for the purpose of reverse repurchase transactions provided the transactions are with credit institutions subject to prudential supervision and the Fund is able to recall at any time the full amount of cash on accrued basis; and/or
- invested in short-term money market funds as defined in the Guidelines on a Common Definition of European Money Market Funds issued by ESMA (CESR/10-049) as may be amended from time to time..

Re-invested cash collateral should be diversified in accordance with the diversification requirements applicable to non-cash collateral as set out above.

8.3.5. Safekeeping

Any securities received by a Fund under a securities lending transaction, a repurchase or

reverse repurchase agreement transaction or a total return swap, including securities received as collateral under these transactions, will be safe-kept with the Depositary, including via its sub-custodians, where there is title transfer. Where there is no title transfer, it can be held by a third party custodian.

However, in relation to securities lending transactions, the first requirement is not applicable in the event that the Company uses tri-party collateral management services of international central securities depositories or relevant institutions which are generally recognised as specialists in this type of transaction, which are subject to prudential supervision and which are unrelated to the provider of the assets. Furthermore, notwithstanding the first requirement above, the Company may enter into securities lending programmes organised by generally recognised international central securities depositories systems provided that the programme is subject to a guarantee from the system operator. The Depositary must be a named participant to the collateral arrangements. Cash received by a Fund under such transactions, including cash received as collateral under such transactions, may be held in a cash account with the Depositary or another bank or credit institution, subject to the conditions of the 2010 Law.

9. Tax Information

The following is a summary of certain material Luxembourg tax consequences concerning the purchase, ownership and disposal of Shares. The summary does not purport to be a comprehensive description of all of the Luxembourg tax considerations that may be relevant. The summary relates only to the position of persons who are the absolute beneficial owners of Shares (other than dealers in securities). It is included herein solely for preliminary information purposes. It is not intended to be, nor should it be construed to be legal or tax advice. The summary is based on the Luxembourg law and regulations in effect and as interpreted by the Luxembourg tax authorities on the date of the Prospectus (and is subject to any prospective or retroactive change). Prospective investors in Shares should consult their own tax advisers as to the Luxembourg or other tax consequences of subscribing, purchasing, holding and disposing of Shares.

9.1. Taxation of the Company

9.1.1. Subscription tax

Under Luxembourg tax law the Company is not subject to either income tax or any tax on capital gains in respect of realized or unrealized valuation profits. Furthermore, no taxes are payable in Luxembourg on the issue of Shares. The Company is, however, subject to an annual subscription tax of 0.05% based on its NAV at the end of each quarter, calculated and paid quarterly. A reduced rate of 0.01% per annum applies to:

- funds and share classes thereof reserved to one or more Institutional Investors;
- funds whose sole object is the collective investment in money market instruments and the placing of deposits with credit institutions; and/or
- funds whose sole object is the collective investment in deposits with credit institutions.

A subscription tax exemption is available for:

- investments made in a Luxembourg UCI, which is itself subject to a subscription tax under the 2010 Law, under the law of 13 February 2007 on specialised investment funds, as amended or under the law of 23 July 2016 on reserved alternative investment funds;
- funds and share classes thereof reserved for Institutional Investors whose sole object is the collective investment in money market instruments and the placing of deposits with credit institutions (within the conditions set forth in article 175(b) of the 2010 Law);
- funds whose Shares are reserved for retirement pension schemes within the condition of article 175 (c) of the 2010 Law;
- funds and share classes thereof whose main objective is the investment in microfinance institutions; and
- funds and share classes thereof replicating one or more indices (within the conditions of article 175 (e) of the 2010 Law).

Under current Luxembourg tax law, no tax is payable on the realised capital appreciation of the assets of the Company.

9.1.2. Withholding tax

The Company may be subject to non-recoverable withholding tax on dividends and interest and to tax on capital gains in the country of origin of its investments. Under current Luxembourg tax law there is no withholding tax on any distribution or redemption payments made by the Company to its Shareholders or on the distribution of liquidation proceeds to Shareholders.

9.1.3. Stamp duty

No stamp duty or other tax will be payable in Luxembourg in connection with the issue of Shares of the Company. A fixed registration duty of Euro 75 will be levied upon amendments of the Articles of the Company.

9.1.4. Net wealth tax

The Company is exempt from net wealth tax.

9.2. Taxation of Luxembourg non-resident Shareholders

Shareholders should note that the residence concept used in the following paragraphs applies for Luxembourg income tax assessment purposes only.

9.2.1. Non-resident individual Shareholders

Shareholders, who are non-residents of Luxembourg and who have neither a permanent establishment nor a permanent representative in Luxembourg to which or whom the Shares are attributable, are not liable to any Luxembourg income tax on income received and capital gains realized upon the sale, disposal or redemption of the Shares.

9.2.2. Non-resident corporate Shareholders

Non-resident corporate Shareholders having a permanent establishment or a permanent representative in Luxembourg, to which or whom the Shares are attributable, must include any income received, as well as any gain realized on the sale, disposal or redemption of Shares, in their taxable income for Luxembourg tax assessment purposes. The same inclusion applies to individuals, acting in the course of the management of a professional or business undertaking, who have a permanent establishment or a permanent representative in Luxembourg to which or whom the Shares are attributable.

Taxable gains are determined as being the difference between the sale, repurchase or redemption price and the lower of the cost or book value of the Shares sold or redeemed.

9.3. Taxation of Luxembourg Shareholders

9.3.1. Luxembourg resident individuals

Dividends and other payments derived from the Shares by resident individual Shareholders, who act in the course of the management of either their private wealth or their professional/business activity, are subject to income tax at the ordinary progressive rates.

Capital gains realised upon the disposal of the Shares by a resident individual Shareholder, who acts in the course of the management of their private wealth, are not subject to income tax, unless said capital gains qualify either as speculative gains or as gains on a substantial participation. Capital gains are deemed to be speculative and are thus subject to income tax at ordinary rates if the Shares are disposed of within 6 months after their acquisition or if their disposal precedes their acquisition. A participation is deemed to be substantial where a resident individual Shareholder holds or has held, either alone or together with his/her spouse or partner and/or minor children, directly or indirectly at any time within the 5 years preceding the disposal, more than 10% of the share capital of the company whose shares are being disposed of. A Shareholder is also deemed to alienate a substantial participation if he acquired free of charge, within the 5 years preceding the transfer, a participation that constituted a substantial participation in the hands of the alienator (or the alienators in case of successive transfers free of charge within the same 5-year period). Capital gains realised on a substantial participation more than 6 months after the acquisition thereof are taxed according to the half-global rate method (i.e. the average rate applicable to the total income is calculated according to progressive income tax rates and half of the average rate is applied to the capital gains realised on the substantial participation). A disposal may include a sale, an exchange, a contribution or any other kind of alienation of the participation.

Capital gains realised on the disposal of the Shares by resident individual Shareholders, who act in the course of their professional/business activity, are subject to income tax at ordinary rates. Taxable gains are defined as being the difference between the price for which the Shares have been disposed of and the lower of their cost or book value.

9.3.2. Luxembourg resident companies

Luxembourg resident corporate (*sociétés de capitaux*) Shareholders must include any income received, as well as any gain realised on the sale, disposal or redemption of Shares, in their taxable income for Luxembourg income tax assessment purposes.

9.3.3. Luxembourg residents benefiting from a special tax regime

Luxembourg resident corporate Shareholders which are companies benefiting from a special tax regime (such as (i) undertakings for collective investment subject to the 2010 Law, (ii) specialised investment funds subject to the amended law of 13 February 2007, (iii) family wealth management companies governed by the amended law of 11 May 2007 (iv) and reserved alternative investment funds governed by the law of 23 July 2016 and treated as specialised investment funds for Luxembourg tax purposes) are tax exempt entities in Luxembourg, and are thus not subject to any Luxembourg income tax.

9.4. Exchange of Information

Capitalized terms used in this section should have the meaning as set forth in the CRS Law (as defined below), unless provided otherwise herein.

The Company may be subject to the Standard for Automatic Exchange of Financial Account Information in Tax Matters (the “Standard”) and its Common Reporting Standard (the “CRS”) as set out in the Luxembourg law dated 18 December 2015 on the Common Reporting Standard (the “CRS Law”).

Under the terms of the CRS Law, the Company is likely to be treated as a Luxembourg Reporting Financial Institution. As such, as of 30 June 2017 and without prejudice to other applicable data protection provisions as set out in the fund documentation, the Company will be required to annually report to the Luxembourg tax authorities personal and financial information related, inter alia, to the identification of, holdings by and payments made to (i) investors that are reportable persons under the CRS Law, and (ii) Controlling Persons (as defined below) of certain non-financial entities which are themselves reportable persons. This information, as exhaustively set out in Annex I of the CRS Law, will include personal data related to the reportable persons (the “CRS Information”).

The Company is responsible for the processing of personal data and each shareholder has a right to access the data communicated to the Luxembourg tax authorities and to correct such data (if necessary). Any data obtained by the Company are to be processed in accordance with the Luxembourg law of 2 August 2002 on the protection of persons with regard to the processing of personal data, as amended.

The Company’s ability to satisfy its reporting obligations under the CRS Law will depend on each investor providing the Company with the required CRS Information, as described above, along with the required supporting documentary evidence. Upon request of the Company, each investor shall agree to provide the Company such information. In this context, the investors are hereby informed that, as data controller, the Company will process the CRS Information for the purposes as set out in the CRS Law. The investors undertake to inform their Controlling Persons, if applicable, of the processing of their CRS Information by the Company.

For the purposes of this section, “Controlling Person” means the natural persons who exercise control over an entity. In the case of a trust, the settlor(s), the trustee(s), the protector(s) (if any), the beneficiary(ies) or class(es) of beneficiaries, and any other natural person(s) exercising ultimate effective control over the trust, and in the case of

a legal arrangement other than a trust, such term means persons in equivalent or similar positions. The term "Controlling Persons" must be interpreted in a manner consistent with the Financial Action Task Force Recommendations.

Investors are further informed that the CRS Information related to reportable persons within the meaning of the CRS Law will be disclosed to the Luxembourg tax authorities annually for the purposes set out in the CRS Law. In particular, reportable persons are informed that certain operations performed by them will be reported to them through the issuance of statements, and that part of this information will serve as a basis for the annual disclosure to the Luxembourg tax authorities.

Similarly, investors undertake to inform the Company within thirty (30) days of receipt of these statements should any personal data not be accurate. The investors further undertake to inform the Company of, and provide the Company with all supporting documentary evidence of any changes related to the CRS Information after occurrence of such changes within thirty (30) days.

Any investor that fails to comply with the Company's CRS Information or documentation requests may be held liable for penalties imposed on the Company and attributable to such investor's failure to provide the CRS Information or subject to disclosure of the CRS Information by the Company to the Luxembourg tax authorities. The Company may, in its sole discretion, redeem the Shares of such investor.

It is the responsibility of investors to seek advice on taxes and other consequences which may result from the subscription, ownership, redemption, switching and transfer of Shares, including any regulations regarding the control on the movement of capital.

9.5. FATCA

The Company may be subject to regulations imposed by foreign regulators, in particular, the United States Hiring Incentives to Restore Employment Act (Hire Act) which was enacted into

U.S. law on 18 March 2010. It includes provisions generally known as FATCA. FATCA provisions generally impose a reporting to the U.S. Internal Revenue Services of non-U.S. financial institutions that do not comply with FATCA and U.S. persons' (within the meaning of FATCA) direct and indirect ownership of non-U.S. accounts and non-U.S. entities. Failure to provide the requested information will lead to a 30% withholding tax applying to certain U.S. source income (including dividends and interest) and gross proceeds from the sale or other disposal of property that can produce U.S. source interest or dividends.

Luxembourg has entered into a 'model 1' intergovernmental agreement with the United States of America (the "IGA") in relation to FATCA and has adopted a law to introduce the provisions of the IGA into Luxembourg law. This law requires financial institutions located in Luxembourg to report, when required, information on financial accounts held by U.S. Specified Persons (within the meaning of the IGA) and non-U.S. financial institutions that do not comply with FATCA and, if any, to the competent authorities.

The Company may be treated as a Foreign Financial Institution (within the meaning of the IGA). This status obliges the Company to regularly obtain and verify information on all of its Shareholders concerning their tax residence and all other information deemed necessary to comply with the above mentioned regulations. Upon request of the Company, each Shareholder shall agree to provide certain information, including, in case of a Non-Financial Foreign Entity ("NFFE") (within the meaning of the IGA), the direct or indirect owners above a certain threshold of ownership of such NFFE, along with the required supporting documentation. Similarly, each Shareholder shall agree to actively provide to the Company within thirty days any information that would affect its status, as for instance a new mailing address or a new residency address.

FATCA and the IGA may result in the obligation for the Company to disclose the name, address and taxpayer identification number (if available) of the Shareholder as well as information such as account

balances, income and gross proceeds (non-exhaustive list) to the Luxembourg tax authorities (*administration des contributions directes*) under the terms of the IGA. Such information will be onward reported by the Luxembourg tax authorities to the U.S. Internal Revenue Service.

Additionally, the Company is responsible for the processing of personal data and each investor has a right to access the data communicated to the Luxembourg tax authorities and to correct such data (if necessary). Any data obtained by the Company are to be processed in accordance with the Luxembourg law dated 2 August 2002 on the protection of persons with regard to the processing of personal data, as amended.

Although the Company will attempt to satisfy any obligation imposed on it to avoid imposition of FATCA withholding tax, no assurance can be given that the Company will be able to satisfy these obligations. If the Company becomes subject to a withholding tax as result of the FATCA regime, the value of the shares held by the Shareholders may suffer material losses. A failure for the Company to obtain such information from each Shareholder and to transmit it to the Luxembourg tax authorities may trigger the 30% withholding tax to be imposed on payments of U.S. source income and on proceeds from the sale of property or other assets that could give rise to U.S. source interest and dividends.

Any Shareholder that fails to comply with the Company's documentation requests may be charged with any taxes imposed on the Company attributable to such Shareholder's failure to provide the information and the Company may, in its sole discretion, redeem the shares of such Shareholder.

Shareholders who invest through intermediaries are reminded to check if and how their intermediaries will comply with this U.S. withholding tax and reporting regime.

The Company and/or the investors may also be indirectly affected by the fact that a non U.S. financial entity does not comply with FATCA

regulations even if the Company satisfies with its own FATCA obligations.

Despite anything else herein contained and as far as permitted by Luxembourg law, the Company shall have the right to:

- withhold any taxes or similar charges that it is legally required to withhold, whether by law or otherwise, in respect of any Shares issued by the Company;
- require any investor or beneficial owner of the Shares to promptly furnish such personal data as may be required by the Company in its discretion in order to comply with any law and/or to promptly determine the amount of withholding to be retained;
- divulge any such personal information to any tax authority, as may be required by applicable laws or regulations or requested by such authority; and
- delay payments to a Shareholder until the Company holds sufficient information to comply with applicable laws and regulations or determine the correct amount to be withheld.

10. Other Information

10.1. Where to learn more about the Funds

Copies of the following documents may be inspected at the registered office of the Company during normal Luxembourg business hours:

- the investment management agreement;
- the custodian agreement;
- the administration agreement; and
- the Articles.

In addition, the KIID(s), the Prospectus, and the annual or semi-annual reports may be obtained from the Administrator free of charge or may be inspected at the registered office of the Administrator during normal Luxembourg business hours or online at www.ssga.com.

The most recent audited financial statements for the Company will be available at the registered office of the Administrator during normal Luxembourg business hours within four months in the case of the annual report and two months in the case of the half-yearly report.

SHAREHOLDER INFORMATION: Telephone: +352 464 010 700, Website: www.ssga.com

Shareholder inquiries may be directed to the Funds by calling the Shareholder Information number listed above. Email: ssgaquerydesk@statestreet.com

No person has been authorised to give any information or to make any representations other than those contained in this Prospectus in connection with the offer of each Fund's Shares, and, if given or made, the information or representations must not be relied upon as having been authorised by the Company. Neither the delivery of this Prospectus or any Relevant Supplement nor any sale of Shares shall under any circumstance imply that the information contained herein is correct as of any date after the date of this Prospectus.

10.2. Complaints

Any investor wishing to make a complaint about the Company may file a complaint by writing to the Management Company. Details on the complaints handling procedure may be obtained from the registered office of the Management Company upon request.

10.3. Distribution and Selling Restrictions

The distribution of this Prospectus and the offering or purchase of Shares may be restricted or prohibited by law in certain jurisdictions. This Prospectus does not constitute and may not be treated as an offer or solicitation by or to anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make such offer or solicitation. It is the responsibility of any persons in possession of this Prospectus and any persons wishing to apply for Shares pursuant to this Prospectus to inform themselves of and to observe all applicable laws and regulations of any relevant jurisdiction.

Shares are offered only on the basis of the information contained in this Prospectus. Any further information or representations given or made by any dealer, broker or other person should be disregarded and, accordingly, should not be relied upon. No person has been authorised to give any information or to make any representation in connection with the offering of Shares other than those contained in this Prospectus for the Company and, if given or made, such information or representations must not be relied on as having been authorised by the Company, the Directors or the Investment Manager. Statements in this Prospectus are in accordance with the law and practice in force in Luxembourg at the date hereof and are subject to change. Neither the delivery of this Prospectus nor the issue of Shares shall, under any circumstances,

create any implication or constitute any representation that the affairs of the Company have not changed since the date hereof.

This Prospectus may also be translated into other languages. Any such translation shall only contain the same information and have the same meaning as the English language Prospectus. To the extent that there is any inconsistency between the English language Prospectus and the Prospectus in another language, this English language Prospectus will prevail, except, to the extent (but only to the extent) required by law of any jurisdiction where the Shares are sold, that in an action based upon disclosure in a Prospectus in a language other than English, the language of the Prospectus on which such action is based shall prevail. All disputes as to the contents of this Prospectus shall be governed in accordance with the laws of Luxembourg.

10.4. Data Protection

The following provisions are set out in accordance with the provisions of the law of 2 August 2002 on the protection of persons with regard to the processing of personal data, as amended.

Categories of personal data processed by the Company

The personal data processed includes the name, address and invested amount of each Shareholder (“**Personal Data**”).

Identity of the data controller

The Company and the Management Company are the data controllers for the purposes of Shareholders’ Personal Data.

How Shareholders’ Personal Data is used

The Company, the Management Company, the Investment Manager, the Depositary, the Administrator and any delegates or intermediaries of the Company may collect, record, transfer, adapt, store and process Shareholders’ Personal Data for the following purposes:

- to fulfil the services required by the Shareholders; and

- to comply with applicable legal obligations.

In particular, the data supplied by Shareholders is processed for the purpose of (i) maintaining the register of Shareholders, (ii) processing subscriptions, redemptions and switches of Shares and payments of dividends to Shareholders, (iii) the calculation of performance fees, (iv) client relationship management and marketing, (v) performing controls on late trading and market timing practices, (vi) tax identification as may be required under Luxembourg or foreign laws and regulations (including laws and regulations relating to FATCA or CRS or disclosure of beneficial owners of the Funds in countries where the Funds invest), and (vii) complying with applicable anti-money laundering rules (including disclosure of beneficial owners of the Funds to foreign authorities if required under local laws and regulations in countries where the Funds invest).

The legal basis for processing Shareholders’ Personal Data is that it is necessary for:

- the performance of (i) the services required by Shareholders and (ii) any contract to which the Shareholders are a party; and
- compliance with a legal obligation to which we are subject.

A Shareholder may, at his/her/its discretion, refuse to communicate the Personal Data to the Company. In this case the Company may reject a Shareholder’s request for subscription of Shares in the Company.

The Company may delegate to another entity (the “**Processors**”) (such as the Administrator, Depositary and the Management Company) the processing of the Personal Data, in compliance and within the limits of the applicable laws and regulations. The Administrator and/or Depositary may delegate the processing of the Personal Data to one or several of their agents or delegates which are located in or outside the European Union (see section “**Transfer of Shareholders’ Personal Data**” below).

Each Shareholder has a right to:

- access his/her/its Personal Data, including data communicated to the Luxembourg tax authorities;
- access his/her/its Personal Data, including data communicated to the Luxembourg tax authorities;
- have his/her/its Personal Data rectified where it is inaccurate or incomplete. In relation thereto, the Shareholder can ask for a rectification by letter to the Company;
- refuse to have his/her/its Personal Data used for marketing purposes. This refusal should be made by letter addressed to the Company;
- have his/her/its Personal Data erased in certain circumstances, for example, where the Personal Data is no longer required for the purposes for which we have collected it;
- obtain restriction of processing in certain circumstances, for example, where he/she/it has contested the accuracy of the Personal Data, for the period enabling us to verify the accuracy of that Personal Data;
- lodge a complaint to the relevant data protection authority;
- data portability, i.e. to receive his/her/its Personal Data in a structured, commonly used and machine-readable format, and to have that Personal Data transmitted directly to another data controller.

Transfer of Shareholders' Personal Data

The Company, the Management Company, the Investment Manager, the Depositary and the Administrator may transfer Shareholders' Personal Data to one or several of their agents or delegates located outside the EEA. For these transfers the Management Company has entered into model clauses. This reflects our commitment to adequately protecting Shareholders' Personal Data regardless of where such Personal Data resides.

The Company may also transfer the Shareholders' Personal Data to third parties such as governmental or regulatory agencies, including tax authorities, in or outside the EEA, in accordance with applicable laws and regulations. In particular,

such Shareholders' Personal Data may be disclosed to the Luxembourg tax authorities, which in turn may acting as data controller, disclose the same to foreign tax authorities.

The Shareholder's Personal Data shall not be held for longer than necessary with regard to the purpose of the data processing and the legal periods of limitation will at all times be observed.

10.5. Changes to the Prospectus

The Board may from time to time amend this Prospectus to reflect various changes it deems necessary and in the best interest of the Company, such as implementing changes to laws and regulations, changes to a Fund's objective and policy or changes to fees and costs charged to a Fund or Share Class. Any amendment of this Prospectus will require approval by the CSSF prior to taking effect. In accordance with applicable laws and regulations, investors in the Funds or Share Classes will be informed about the changes and, will be given prior notice of any proposed material changes and where appropriate given a right to request the redemption of their Shares should they disagree, free of charge.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the Euro core government bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the German, French and Dutch government bond markets. Securities must be fixed rate and rated investment grade as defined by the Index methodology.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the "Investment Techniques" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Government and government-related bonds;
- Other funds;
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to futures, forward foreign exchange contracts options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund will not engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund's exposure to repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium or long term horizon who want to gain exposure to the performance of the Euro core government bond market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section "Shares" of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the Barclays index disclaimer.

State Street EMU Government Bond Index Fund

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus. Prospective investors should review the entire Supplement, Prospectus and relevant KIID carefully.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the Euro government bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the Euro government bond market. Securities must be fixed rate and rated investment grade as defined by the Index methodology.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the "Investment Techniques" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Government and government-related bonds;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to, futures, forward foreign exchange contracts, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund will not engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund's exposure to repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of the Euro government bond market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section "Shares" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the long-dated Euro government bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the Euro government bond market. Securities must be fixed rate, have a maturity of more than 15 years and rated investment grade as defined by the Index methodology.

The Investment Manager, on behalf of the Fund, will invest using the Replication Strategy as further described in the "Investment Techniques" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Government and government-related bonds;
- Other funds;
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to futures, forward foreign exchange contracts, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund will not engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund's exposure to repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium or long term horizon who want to gain exposure to the performance of the long-dated Euro government bond market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Duration / Interest Rate Risk: Changes in interest rates are likely to affect the value of bonds and other debt instruments. Rising interest rates generally result in a decline in bond values, while falling interest rates generally result in bond values increasing. Investments with longer maturities and higher durations are more sensitive to interest rate changes; therefore a change in interest rates could have a substantial and immediate negative effect on the values of the Fund's investments.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the inflation-linked Euro government bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the Euro government bond market. Securities must be rated investment grade as defined by the Index methodology. The principal and the interest of all constituent bonds must be inflation-linked and denominated in Euro. Nominal Euro government bonds and floating rate bonds are excluded.

The Investment Manager, on behalf of the Fund, will invest using the Replication Strategy as further described in the "Investment Techniques" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Government and government-related bonds,
- Other funds;
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to futures, forward foreign exchange contracts, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund will not engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund's exposure to repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium or long term horizon who want to gain exposure to the performance of the

inflation-linked Euro government bond market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Valuation of Inflation Linked Local Bonds Risk: The value of the inflation linked securities in which the Fund may invest will be linked to the rate of inflation in the relevant market. If inflation rises at a faster rate than nominal interest rates, real interest rates (i.e., the rate of interest an investor expects to receive after allowing for inflation) might decline, leading to an increase in value of inflation linked securities which the Fund holds. In addition, there is no guarantee that the strategy and statistics used by the relevant market country in calculating its rate of inflation is or will remain accurate. As a result there is risk that the change in value of the inflation linked security purchased by the Fund may not accurately correspond to the actual rate of inflation in the relevant market.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the fixed-rate, investment grade, Euro-denominated corporate bond market excluding securities issued by financial institutions.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the Euro corporate bond market. Securities must be fixed rate, Euro-denominated and rated investment grade as defined by the Index methodology. Securities from financial institutions are excluded. Inclusion is based on the currency of the issue, not the domicile of the issuer.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the "Investment Techniques" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Corporate bonds;
- Other funds;
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to futures, forward foreign exchange contracts, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund will not engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund's exposure to repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium or long term

horizon who want to gain exposure to the performance of the fixed-rate, investment grade Euro-denominated corporate ex financials bond market and are prepared to accept the risks associated with an investment of this type and the expected low to medium volatility of the Fund

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region / sector, the financial, economic, business, and other developments affecting issuers in that region/sector will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by

the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the Barclays index disclaimer.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the fixed-rate, investment grade, Euro-denominated sustainable corporate bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the Euro corporate bond market, screened based on sustainability criteria. Securities must be fixed rate, Euro-denominated and rated investment grade as defined by the Index methodology. Inclusion is based on the currency of the issue, not the domicile of the issuer.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the "Investment Techniques" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Corporate bonds;
- Other funds;
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to futures, forward foreign exchange contracts, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund will not engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund's exposure to repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium

or long term horizon who want to gain exposure to the performance of fixed-rate, investment grade, Euro-denominated sustainable corporate bond market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement

screen provided would result in a similar screening process to that intended or would be available at all.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Index Disclaimer

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the global government bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the global government bond market. Securities must be fixed rate and rated investment grade as defined by the Index methodology.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the "Investment Techniques" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Government and government-related bonds;
- Other funds;
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to forward foreign exchange contracts, futures, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund will not engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund's exposure to repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium or long term horizon who want to gain exposure to the performance of the global government bond markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section "Shares" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the global bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the global bond market. The Index includes government, government-related and corporate bonds, as well as asset-backed, mortgage-backed and commercial mortgage-backed securities from both developed and emerging markets issuers. Securities must be fixed rate and rated investment grade as defined by the Index methodology.

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the "Investment Techniques" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager and/or Sub-Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Government and government-related bonds, corporate bonds, asset-backed securities, mortgage-backed securities, commercial mortgage-backed securities, covered bonds, collateralised bonds;
- Other funds;
- Liquid assets;
- Derivatives for efficient portfolio management and investment purposes, limited to futures, forward foreign exchange contracts, options and swaps; and
- To Be Announced ("TBA") securities.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund will not engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund's exposure to repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium or long term horizon who want to gain exposure to the performance of the global bond markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager and/or Sub-Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Mortgage related and Other Asset Backed Securities Risk: Investments in mortgage-related and other asset-backed securities are subject to the risk of significant credit downgrades, illiquidity, and defaults to a greater extent than many other types of fixed-income investments. During periods of falling interest rates, mortgage- and asset-backed securities may be called or prepaid, which may result in the Fund having to reinvest proceeds in other investments at a lower interest rate. During periods of rising interest rates, the average life of mortgage- and asset-backed securities may extend, which may lock in a below-market interest rate, increase the security's duration and interest rate sensitivity, and reduce the value of the security. Enforcing rights against the underlying assets or collateral may be difficult, and the underlying assets or collateral may be insufficient if the issuer defaults.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Index Disclaimer

** Fees, expressed as a percentage of NAV, are accrued daily and paid monthly in arrears. Shareholders should refer to the “Fees and Expenses” section of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the fixed-rate, investment grade, global green bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the investable green bond market. Securities must be fixed rate and rated investment grade as defined by the Index methodology.

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the "Investment Techniques" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager and/or Sub-Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Government and government-related bonds, corporate bonds;
- Other funds;
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to futures, forward foreign exchange contracts options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund will not engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund's exposure to repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium or long term horizon who want to gain exposure to the performance of the fixed-rate, investment grade, global green bond market and are

prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager and/or Sub-Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Green Bond Risk: The market for green investments is new and still developing. There may be a concentration of issuers and investments, the market for green investments may be illiquid and the prices of green investments volatile. There is no guarantee that a robust secondary market for green investments will exist at any point in time. There is no industry standard to determine whether a security is "green" or not and it is possible that the Fund will hold securities that index provider considers to be "green" securities but that other investors might not or that the index provider may make errors in the screening process.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of the Australian equity market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and

switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the Canadian equity market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of Canadian equities. Securities are weighted by market capitalisation.

The Investment Manager, on behalf of the Fund, will invest using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund may engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund's exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-50%*	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

* Depending on market conditions and opportunities

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of the Canadian equity market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the

Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of the US equity market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the

Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the MSCI index disclaimer.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the Eurozone equity markets.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of Eurozone equities. Securities are weighted by market capitalisation.

The Investment Manager, on behalf of the Fund, will invest using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund may engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund's exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-50%*	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

* Depending on market conditions and opportunities

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of Eurozone equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by

the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of global developed equity markets.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while screening out securities based on an assessment of their adherence to international norms in relation to environmental protection, human rights, labour standards, anti-corruption and controversial weapons. The Investment Manager seeks to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of global developed equity market securities, reweighting from free-float market cap weights using certain Environmental, Social and Governance (ESG) metrics to tilt the index towards securities demonstrating both a robust ESG profile and a positive trend in improving that ESG profile.

The Investment Manager, on behalf of the Fund, will invest using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund may engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund's exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-50%*	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

* Depending on market conditions and opportunities

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of global developed equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of global emerging market equities.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimize as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of global emerging market equities. Securities are weighted by market capitalisation.

The Investment Manager, on behalf of the Fund, will invest using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of global emerging market equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the "Risk Information" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by

the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

**Fees, expressed as a percentage of NAV, are accrued daily and paid monthly in arrears. Shareholders should refer to section “Fees and Expenses” of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over the medium to long term through exposure to a broad range of asset classes.

Investment Policy: The investment policy of the Fund is to provide an investment return in excess of the performance of the one month EURIBOR rate.

The Investment Manager, on behalf of the Fund, will invest actively using the Flexible Asset Allocation Strategy as further described in the “**Investment Strategies**” section of the Prospectus. The Fund may gain exposure to commodities through the investment in index futures contracts on commodities.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Bonds;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund currently does not engage in the Securities Lending Programme, though it is entitled to do so. The Fund also does not currently engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of a broad range of asset classes and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “**Risk Information**” section of the Prospectus. The following are the principal risks of investing in the Fund:

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of

the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund’s holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Derivatives Risk: The Fund’s use of derivative instruments involves risks different from, and possibly greater than, the risks associated with investing directly in securities. Derivative transactions typically involve leverage and may have significant volatility. It is possible that the derivative transaction will have a different or less favourable effect than the Investment Manager anticipated and that a derivative transaction will result in a loss greater than the principal amount invested.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision

for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section **"Shares"** of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over the medium to long term through investment in European equity securities.

Investment Policy: The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Fundamental Equity Strategy as further described in the “Investment Strategies” section of the Prospectus, to build a concentrated portfolio of 30-40 securities.

The performance of the Fund will be measured against the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund currently does not engage in the Securities Lending Programme, though it is entitled to do so. The Fund also does not currently engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of a concentrated portfolio of European equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “Risk Information” section of the Prospectus. The following are the principal risks of investing in the Fund:

Management Risk: The Investment Manager’s and/or Sub-Investment Manager’s judgment about the implementation of the investment strategy or a hedging strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Investment Manager and/or Sub-Investment Manager’s investment techniques and decisions will produce the desired results.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a small number of stocks, the financial, economic, business, and other developments affecting that small number of stocks will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund’s shares in response to factors affecting or expected to affect the stocks in which the Fund focuses its investments.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “Shares” of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over the medium to long term through investment in Eurozone equity securities.

Investment Policy: The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Fundamental Equity Strategy as further described in the “**Investment Strategies**” section of the Prospectus, to build a concentrated portfolio of 30-40 securities.

The performance of the Fund will be measured against the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund currently does not engage in the Securities Lending Programme, though it is entitled to do so. The Fund also does not currently engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of a concentrated portfolio of Eurozone equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “**Risk Information**” section of the Prospectus. The following are the principal risks of investing in the Fund:

Management Risk: The Investment Manager’s and/or Sub-Investment Manager’s judgment about the implementation of the investment strategy or a hedging strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Investment Manager and/or Sub-Investment Manager’s investment techniques and decisions will produce the desired results.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a small number of stocks, the financial, economic, business, and other developments affecting that small number of stocks will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund’s shares in response to factors affecting or expected to affect the stocks in which the Fund focuses its investments.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the MSCI index disclaimer.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over the medium to long term through investment in US equity securities.

Investment Policy: The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Fundamental Equity Strategy as further described in the “Investment Strategies” section of the Prospectus, to build a concentrated portfolio of 30-40 securities.

The performance of the Fund will be measured against the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund currently does not engage in the Securities Lending Programme, though it is entitled to do so. The Fund also does not currently engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium or long term horizon who want to gain exposure to the performance of a concentrated portfolio of US equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “Risk Information” section of the Prospectus. The following are the principal risks of investing in the Fund:

Management Risk: The Investment Manager’s and/or Sub-Investment Manager’s judgment about the implementation of the investment strategy or a hedging strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Investment Manager and/or Sub-Investment Manager’s investment techniques and decisions will produce the desired results.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a small number of stocks, the financial, economic, business, and other developments affecting that small number of stocks will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund’s shares in response to factors affecting or expected to affect the stocks in which the Fund focuses its investments.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “Shares” of the Prospectus for further information.

Index Disclaimer

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over the medium to long term through investment in global equity securities.

Investment Policy: The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Fundamental Equity Strategy as further described in the “Investment Strategies” section of the Prospectus to build a concentrated portfolio of 70-90 securities.

The performance of the Fund will be measured against the Index.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund currently does not engage in the Securities Lending Programme, though it is entitled to do so. The Fund also does not currently engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium or long term horizon who want to gain exposure to the performance of the global equity market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “Risk Information” section of the Prospectus. The following are the principal risks of investing in the Fund:

Management Risk: The Investment Manager’s and/or Sub-Investment Manager’s judgment about the implementation of the investment strategy or a hedging strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Investment Manager and/or Sub-Investment Manager’s investment techniques and decisions will produce the desired results.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a small number of stocks, the financial, economic, business, and other developments affecting that small number of stocks will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund’s shares in response to factors affecting or expected to affect the stocks in which the Fund focuses its investments.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of global equity securities.

Investment Policy: The investment policy of the Fund is to generate a return in excess of the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) over the medium to long term

The Investment Manager, on behalf of the Fund, will invest actively using the Multi-Factor Equity Strategy as further described in the “**Investment Strategies**” section of the Prospectus.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund may engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-50%*	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

* Depending on market conditions and opportunities

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium or long term horizon who want to gain exposure to the performance of the global equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “**Risk Information**” section of the Prospectus. The following are the principal risks of investing in the Fund:

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors

or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of European equity markets.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to represent substantially the same market as the Index) over the medium and long term.

The Investment Manager, on behalf of the Fund, will invest actively with limited risk parameters relative to the Index, using the Quantitative Equity Strategy as further described in the “Investment Strategies” section of the Prospectus.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund may engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-50%*	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

* Depending on market conditions and opportunities

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of the European equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “Risk Information” section of the Prospectus. The following are the principal risks of investing in the Fund:

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors

or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund’s shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “Shares” of the Prospectus for further information.

* Depending on market conditions and opportunities

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of the North American equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “Risk Information” section of the Prospectus. The following are the principal risks of investing in the Fund:

Modelling Risk: The Investment Manager and/or Sub-Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could

result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager and/or Sub-Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. Investors may buy or sell substantial amounts of the Fund’s shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Subscriptions, Redemptions and Switches

Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of global developed equity markets.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to represent substantially the same market as the Index) over the medium and long term.

The Investment Manager, on behalf of the Fund, will invest actively with limited risk parameters relative to the Index, using the Quantitative Equity Strategy as further described in the “Investment Strategies” section of the Prospectus.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to futures and forward foreign exchange contracts

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund may engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-50%*	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

* Depending on market conditions and opportunities

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of global developed equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “Risk Information” section of the Prospectus. The following are the principal risks of investing in the Fund:

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or

desired by the Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “Shares” of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of emerging market equities.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to represent substantially the same market as the Index) over the medium and long term while screening out securities based on an assessment of their adherence to international norms in relation to environmental protection, human rights, labour standards, anti-corruption, tobacco and controversial weapons.

The Investment Manager and/or the Sub-Investment Manager, on behalf of the Fund, will invest actively with limited risk parameters relative to the Index, using the Quantitative Equity Strategy as further described in the “Investment Strategies” section of the Prospectus.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law. The Fund may hold up to 5% of its net assets in unhedged cash.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund may engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-50%*	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

* Depending on market conditions and opportunities

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of emerging market equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “Risk Information” section of the Prospectus. The following are the principal risks of investing in the Fund:

Modelling Risk: The Investment Manager and/or Sub-Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager and/or Sub-Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund may engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-50%*	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

* Depending on market conditions and opportunities

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of the Eurozone equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “Risk Information” section of the Prospectus. The following are the principal risks of investing in the Fund:

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors

or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund’s shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “Shares” of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of European small capitalisation equity markets.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) over the medium and long term.

The Investment Manager, on behalf of the Fund, will invest actively using the Quantitative Equity Strategy as further described in the “Investment Strategies” section of the Prospectus.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund may engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-50%*	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

* Depending on market conditions and opportunities

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of the European small cap equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “Risk Information” section of the Prospectus. The following are the principal risks of investing in the Fund:

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors

or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund’s shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Smaller Companies Risk: The securities of small-, mid-, and micro-capitalisation companies may be more volatile and trade less frequently and in smaller volumes than the securities of larger companies. These companies may have limited product lines, markets or financial resources, may lack the competitive strength of larger companies, and may depend on a few key employees. In addition, these companies may have little or no track record of success.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should

refer to section “**Shares**” of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of emerging markets in Asia.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) over the medium and long term.

The Investment Manager and/or the Sub-Investment Manager, on behalf of the Fund, will invest actively using the Quantitative Equity Strategy as further described in the “Investment Strategies” section of the Prospectus.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund may engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-50%*	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

* Depending on market conditions and opportunities

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of the emerging Asia markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “Risk Information” section of the Prospectus. The following are the principal risks of investing in the Fund:

Modelling Risk: The Investment Manager and/or Sub-Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment

Manager and/or Sub-Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund’s shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by

the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of emerging market equities.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) over the medium and long term.

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Quantitative Equity Strategy as further described in the “Investment Strategies” section of the Prospectus.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund may engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-50%*	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

* Depending on market conditions and opportunities

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium, or long term horizon who want to gain exposure to the performance of emerging market equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “Risk Information” section of the Prospectus. The following are the principal risks of investing in the Fund:

Modelling Risk: The Investment Manager and/or Sub-Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment

Manager and/or Sub-Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “Shares” of the Prospectus for further information.

- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund may engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-50%*	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

* Depending on market conditions and opportunities

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium or long term horizon who want to gain exposure to the performance of the emerging market small cap equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “Risk Information” section of the Prospectus. The following are the principal risks of investing in the Fund:

Modelling Risk: The Investment Manager and/or Sub-Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could

result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager and/or Sub-Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund’s shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Smaller Companies Risk: The securities of small-, mid-, and micro-capitalisation companies may be more volatile and trade less frequently and in smaller volumes than the securities of larger companies. These companies may have limited product lines, markets or financial resources, may lack the competitive strength of larger companies, and may depend on a few key

employees. In addition, these companies may have little or no track record of success.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “**Shares**” of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate lower volatility returns than, and performance comparable to, European equity markets over the long term.

Investment Policy: The investment policy of the Fund is to generate returns that exhibit lower volatility than the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) while remaining comparable to the Index over the long term.

The Investment Manager, on behalf of the Fund, will invest actively using the Managed Volatility Equity Strategy as further described in the “Investment Strategies” section of the Prospectus.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over the medium to long term through investment in global equity securities while exhibiting lower volatility and a reduced impact from market drawdowns.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) over the long term with lower volatility and reduced impact from market drawdowns.

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Defensive Equity Strategy as further described in the “Investment Strategies” section of the Prospectus.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities;
- Other funds
- Liquid assets; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law.

Securities Lending, Repurchase Agreements, Reverse Repurchase Agreements and Total Return Swaps

The Fund may engage in the Securities Lending Programme. The Fund currently does not engage in repurchase agreements, reverse repurchase agreements and total return swaps, though it is entitled to do so. The Fund’s exposure to securities lending, repurchase and reverse repurchase agreements and total return swaps is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-50%*	70%
Repurchase and Reverse Repurchase Agreements	0%	10%
Total Return Swaps	0%	10%

* Depending on market conditions and opportunities

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a short, medium or long term horizon who want to gain exposure to the performance of global equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the “Risk Information” section of the Prospectus. The following are the principal risks of investing in the Fund:

Modelling Risk: The Investment Manager and/or Sub-Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit

any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager and/or Sub-Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund’s hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund’s assets are denominated appreciates.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Subscription Fee or Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the Administrator by the Dealing Deadline. Shareholders should refer to section “Shares” of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the MSCI index disclaimer.

Appendix 1 – Index Disclaimers

Barclays

Neither Barclays Bank plc, Barclays Capital inc., Barclays Risk Analytics and Index Solutions Limited (“BRAIS”) nor any affiliate (collectively “Barclays”) issues, produces, sells, sponsors, endorses or promotes the funds and Barclays has no responsibilities, obligations or duties to investors in funds. The Barclays indices (“Barclays Indices”) referred to are a trademark owned by Barclays Bank plc, Barclays Capital inc., or BRAIS and licensed for use by state Street Global Advisors Limited (“Issuer”) as the issuer of funds. Barclays only relationship with the Issuer in respect of the Barclays Indices referred to is (i) the licensing of the Barclays Indices, which is determined, composed and calculated by the “Index Sponsor”, being BRAIS, or any successor thereto, without regard to the issuer or the funds or the owners of the funds, and (ii) the Issuer may for itself execute transaction(s) with Barclays in or relating to the Barclays Indices in connection with funds. Barclays is not responsible for and has not participated in the determination of the timing of, prices at, or quantities of the funds to be issued. Barclays has no obligation to take the needs of the Issuer or the owners of the funds or any other third party into consideration in determining, composing or calculating the Barclays Indices. Barclays has no obligation or liability in connection with administration, marketing or trading of the funds.

Barclays shall have no liability to the Issuer, Investors or to other third parties for the quality, accuracy and/or completeness of the Barclays Indices or any data included therein or for interruptions in the delivery of the Barclays Indices. Barclays makes no warranty, express or implied, as to (i) the advisability of investing in the funds or the advisability of investing in securities generally, (ii) the ability of the Barclays Indices to track corresponding or relative market

performance, (iii) the results to be obtained by the Issuer, the Investors or any other person or entity from the use of the Barclays Indices or any data included therein, or (iv) the merchantability or fitness for a particular purpose or use with respect to the Barclays Indices or any data included therein. Barclays reserves the right to change the methods of calculation or publication, or to cease the calculation or publication of the Barclays Indices, and Barclays shall not be liable for any miscalculation of or any incorrect, delayed or interrupted publication with respect to any of the Barclays Indices. Barclays shall not be liable for any damages, including, without limitation, any special, indirect or consequential damages, or any lost profits and even if advised of the possibility of such, resulting from the use of the Barclays Indices or any data included therein or with respect to the funds.

None of the information supplied by Barclays Bank PLC and used in this publication may be reproduced in any manner without the prior written permission of Barclays Capital, the investment banking division of Barclays Bank PLC. Barclays Bank PLC is registered in England No. 1026167. Registered office 1 Churchill Place London E14 5HP.

Citigroup

The funds are not issued, sponsored, endorsed, sold or promoted by Citigroup Index LLC (“CitilIndex”). CitilIndex’s only relationship to SSGA (“Licensee”) is the licensing of certain information and data of CitilIndex regarding the Citigroup indices (“Citigroup Indices”). The Index is determined, composed and calculated by CitilIndex without regard to Licensee, the fund or shareholders of the fund. CitilIndex has no obligation to take the needs of Licensee or the owners or prospective owners of the fund into consideration in determining, composing or

calculating the Citigroup Indices. CitiIndex is not responsible for and has not participated in the determination of the prices and amount of the shares to be issued by the fund or the timing of the issuance or sale of the shares to be issued by the fund or in the determination or calculation of the equation by which the shares to be issued by the fund are to be converted into cash. CitiIndex has no obligation or liability in connection with the administration, marketing or trading of the fund.

The information and data (collectively, "Index Data") contained or referred to herein regarding the Citigroup Indices is provided solely for information purposes and nothing in the Index Data constitutes (a) a recommendation or an offer to sell or a solicitation to deal in any financial product, enter into any transaction or adopt any investment strategy or (b) legal, tax, regulatory, financial or accounting advice. None of CitiIndex, its directors, officers, employees, representatives, delegates, contractors or agents (each, a "Citi Index Person") makes any express or implied representations or warranties as to (a) the accuracy, adequacy or completeness of the Citigroup Indices or Index Data, (b) the levels of the Citigroup Indices at any particular time on any particular date, (c) the advisability of purchasing or entering into any financial product the performance of which is linked, in whole or in part, to the Citigroup Indices, or investing in securities generally or in the fund particularly, (d) the results to be obtained by the issuer of any product linked to the Citigroup Indices or by any other person or entity, from the use of the Index or any data included therein for any purpose, (e) the ability of the fund to track the price and yield performance of the Citigroup Indices or the ability of the Citigroup Indices to track general bond market performance, (f) the merchantability or fitness for a particular purpose of the Citigroup Indices, or (g) any other matter. Each CitiIndex Person hereby expressly disclaims, to the fullest extent permitted by applicable law, all warranties of accuracy, completeness, merchantability or fitness for a particular purpose with respect to the Citigroup Indices and any Index Data. To the fullest extent permitted by applicable law, no CitiIndex Person

shall have any liability (direct or indirect, special, punitive, consequential or otherwise) to any person even if notified of the possibility of damages. CitiIndex is not under any obligation to continue the calculation, publication and dissemination of the Citigroup Indices except as set forth in the applicable agreement with Licensee, nor shall it have any liability for any errors, omissions, interruptions or delays relating to the Citigroup Indices. CitiIndex shall each act as principal and not as agent or fiduciary of any other person.

The Citigroup Indices reflect the performance of notional investment positions in its constituents. There is no actual portfolio of assets to which any person is entitled or in which any person has any ownership interest. The Citigroup Indices merely identify certain hypothetical investment positions, the performance of which will be used as a reference point for the purpose of calculating the level of the Citigroup Indices.

The Citigroup Indices and the Index Data are CitiIndex's proprietary material. No person may use the Citigroup Indices in any way or reproduce or disseminate the Index Data without the prior written consent of CitiIndex (which consent may be pursuant to a license agreement with CitiIndex). The Citigroup Indices are not in any way sponsored, endorsed or promoted by the issuer or sponsor, as applicable, of any of its constituents.

Markit iBoxx

Markit makes no representation or warranty, express or implied, and expressly disclaims all warranties of accuracy, merchantability or fitness for a particular purpose or use with respect to the Index or any data included there with regard to the Index, or any data from which it is based. Markit shall have no liability for any errors, omissions, or interruptions therein. Markit make no warranty, express or implied, as to results to be obtained from the use of the Index. Markit does not sponsor, endorse, sell, or promote any investment fund or other vehicle that is offered by State Street Global Advisors or third parties and that seeks to provide an investment return based

on the returns of the Index. A decision to invest in any such investment fund or other vehicle should not be made in reliance on any of the statements set forth in this document. Prospective investors are advised to make an investment in any such fund or vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or vehicle.

MSCI

This fund is not sponsored, endorsed, sold or promoted by MSCI INC. (“MSCI”), any of its affiliates, any of its information providers or any other third party involved in, or related to, compiling, computing or creating any MSCI index (collectively, the “MSCI Parties”). The MSCI indices are the exclusive property of MSCI (“MSCI Indices”). MSCI and the MSCI Indices names are service mark(s) of MSCI or its affiliates and have been licensed for use for certain purposes by licensee. None of the MSCI Parties makes any representation or warranty, express or implied, to the issuer or owners of the fund or any other person or entity regarding the advisability of investing in funds generally or in this fund particularly or the ability of any MSCI Indices to track corresponding stock market performance. MSCI or its affiliates are the licensors of certain trademarks, service marks and trade names and of the MSCI Indices which are determined, composed and calculated by MSCI without regard to this fund or the issuer or owners of this fund or any other person or entity. None of the MSCI Parties has any obligation to take the needs of the issuer or owners of this fund or any other person or entity into consideration in determining, composing or calculating the MSCI Indices. None of the MSCI Parties is responsible for or has participated in the determination of the timing of, prices at, or quantities of this fund to be issued or in the determination or calculation of the equation by or the consideration into which this fund is redeemable. Further, none of the MSCI Parties has any obligation or liability to the issuer or owners of this fund or any other person or entity in

connection with the administration, marketing or offering of this fund.

Although MSCI shall obtain information for inclusion in or for use in the calculation of the MSCI Indices from sources that MSCI considers reliable, none of the MSCI parties warrants or guarantees the originality, accuracy and/or the completeness of any MSCI Indices or any data included therein. None of the MSCI Parties makes any warranty, express or implied, as to results to be obtained by the issuer of the fund, owners of the fund, or any other person or entity, from the use of any MSCI Indices or any data included therein. None of the MSCI Parties shall have any liability for any errors, omissions or interruptions of or in connection with any MSCI Indices or any data included therein. Further, none of the MSCI Parties makes any express or implied warranties of any kind, and the MSCI Parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to each MSCI Indices and any data included therein. Without limiting any of the foregoing, in no event shall any of the MSCI Parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

S&P 500

The S&P 500 Index is a product of S&P Dow Jones Indices LLC (“SPDJI”), and has been licensed for use by SSGA. Standard & Poor’s®, S&P® and S&P 500® are registered trademarks of Standard & Poor’s Financial Services LLC (“S&P”); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC (“Dow Jones”); and these trademarks have been licensed for use by SPDJI and sublicensed for certain purposes by SSGA. The Company is not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, any of their respective affiliates (collectively, “S&P Dow Jones Indices”). S&P Dow Jones Indices makes no representation or warranty, express or implied, to the owners of the Company or any member of the public regarding the advisability of investing in securities generally or in the Company particularly

or the ability of the S&P 500 Index to track general market performance. S&P Dow Jones Indices' only relationship to SSGA with respect to the S&P 500 Index is the licensing of the Index and certain trademarks, service marks and/or trade names of S&P Dow Jones Indices or its licensors. The S&P 500 Index is determined, composed and calculated by S&P Dow Jones Indices without regard to SSGA or the Company. S&P Dow Jones Indices have no obligation to take the needs of SSGA or the owners of the Company into consideration in determining, composing or calculating the S&P 500 Index. S&P Dow Jones Indices is not responsible for and has not participated in the determination of the prices, and amount of the Company or the timing of the issuance or sale of the Company or in the determination or calculation of the equation by which the Company is to be converted into cash, surrendered or redeemed, as the case may be. S&P Dow Jones Indices has no obligation or liability in connection with the administration, marketing or trading of the Company. There is no assurance that investment products based on the S&P 500 Index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment advisor. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice. Notwithstanding the foregoing, CME Group Inc. and its affiliates may independently issue and/or sponsor financial products unrelated to the Company currently being issued by SSGA, but which may be similar to and competitive with the Company. In addition, CME Group Inc. and its affiliates may trade financial products which are linked to the performance of the S&P 500 Index.

S&P Dow Jones Indices does not guarantee the adequacy, accuracy, timeliness and/or the completeness of the S&P 500 index or any data related thereto or any communication, including but not limited to, oral or written communication (including electronic communications) with respect thereto. S&P Dow Jones Indices shall not be subject to any damages or liability for any errors, omissions, or delays therein. S&P Dow Jones

Indices makes no express or implied warranties, and expressly disclaims all warranties, of merchantability or fitness for a particular purpose or use or as to results to be obtained by SSGA, owners of the Company, or any other person or entity from the use of the S&P 500 index or with respect to any data related thereto. Without limiting any of the foregoing, in no event whatsoever shall S&P Dow Jones Indices be liable for any indirect, special, incidental, punitive, or consequential damages including but not limited to, loss of profits, trading losses, lost time or goodwill, even if they have been advised of the possibility of such damages, whether in contract, tort, strict liability, or otherwise. There are no third party beneficiaries of any agreements or arrangements between S&P Dow Jones Indices and SSGA, other than the licensors of S&P Dow Jones Indices.

Appendix 2 – Sub-Custodians
