OFFER FOR SHARES

This is an offer to subscribe for shares (the "**Shares**") issued without par value in MULTI UNITS LUXEMBOURG (the "**Company**"), each Share being linked to one sub-fund of the Company (the "**Sub-Fund(s)**"), as specified below.

The Shares in each of the Sub-Funds may be divided into classes (the "**Classes**").

For further information about the rights attaching to the various Classes of Shares, see paragraph "Classes of Shares".

Unless otherwise mentioned in the Appendix dedicated to each Sub-Fund, the Shares will not be listed on the Luxembourg Stock Exchange.

IMPORTANT INFORMATION

If you are in any doubt about the contents of this Prospectus, you should consult your stockbroker, attorney, accountant or other financial advisor. No person is authorised to give any information other than that contained in this Prospectus and in the Key Investor Information Document relating to each Sub-Fund, or any of the documents referred to herein that are available for public inspection at 28-32, Place de la gare, L-1616 Luxembourg

- The Company is registered in the Grand Duchy of Luxembourg as an undertaking for collective investment in transferable securities (a "**UCITS**") under the form of an investment company with variable share capital ("**SICAV**"). However, such registration does not imply a positive assessment by the supervisory authority of the contents of this Prospectus or any Key Investor Information Document or of the quality of the Shares offered for sale. Any representation to the contrary is unauthorised and unlawful.

- This Prospectus does not constitute an offer to anyone or solicitation by anyone in any jurisdiction in which such an offer or solicitation is unlawful or in which the person making such an offer or solicitation is not qualified to do so.

- Any information given by any person not mentioned in this Prospectus should be regarded as unauthorised. The Board of Directors has taken the precautions that the information contained in this Prospectus is accurate at the date of its publication and accepts responsibility accordingly. To reflect material changes, this Prospectus may be updated from time to time and potential subscribers should enquire from the Company as to the issue of any later Prospectus and Key Investor Information Documents.

- The distribution of this Prospectus, of the Key Investor Information Documents and the offering of the Shares may be restricted in certain jurisdictions. It is the responsibility of any person in possession of this Prospectus and of the Key Investor Information Documents and any person wishing to subscribe for Shares pursuant to this Prospectus and the Key Investor Information Documents to inform themselves of, and to observe, all applicable laws and regulations of any relevant jurisdictions. Potential subscribers or purchasers of Shares should inform themselves as to the possible tax consequences, the legal requirements and any foreign exchange restrictions or exchange control requirements which they might encounter under the laws of the countries of their citizenship, residence or domicile and which might be relevant to the subscription, purchase, holding, conversion or sale of Shares.

TARGETED INVESTORS

The profile of the typical investor per each Sub-Fund is described in each Appendix annexed to the present Prospectus and in each of the Key Investor Information Documents.

DISTRIBUTION AND SELLING RESTRICTIONS

At the date of this Prospectus, the Company has been authorised for offering in Luxembourg. The Company or specific Sub-Fund(s) may be also authorised for distribution in other jurisdictions. A list of the countries where part or all the Sub-Funds are authorized for distribution can be obtained from the registered office of the Company.

This Prospectus cannot be distributed for the purpose of offering or marketing the Shares in any jurisdiction or in any circumstances where such offering or marketing is not authorised.

No persons receiving a copy of this Prospectus and of the Key Investor Information Documents in any jurisdiction may treat this Prospectus and the Key Investor Information Documents as constituting an invitation to them to subscribe for Shares unless in the relevant jurisdiction such an invitation could lawfully be made without compliance with any registration or other legal requirements.

Shares have not been and will not be registered under the United States Securities Act of 1933 (as amended) or the securities laws of any of the States of the United States. Shares may not be offered, sold or delivered directly or indirectly in the United States, or to or for the account or benefit of any "US Person". Any re-offer or resale of any Shares in the United States or to US Persons may constitute a violation of US law. The Company will not be registered under the United States Investment Company Act of 1940, as amended. Applicants for Shares will be required to certify that they are not US Persons. All Shareholders are required to notify the Company of any change in their status as non-US Person.

RELIANCE ON THIS PROSPECTUS AND ON THE KEY INVESTOR INFORMATION DOCUMENTS

Shares in any Sub-Fund described in this Prospectus as well as in the relevant Key Investor Information Documents are offered only on the basis of the information contained therein and (if applicable) any addendum hereto and the latest audited annual report and any subsequent semi-annual report of the Company.

Any further information or representations given or made by any distributor, intermediary (the "Intermediary" defined as any sales agent, servicing agent and/or nominee, distributor, appointed to offer and sell the Shares to the investors and handle the subscription redemption, conversion or transfer request of Shareholders), dealer, broker or other person should be disregarded and, accordingly, should not be relied upon. No person has been authorised to give any information or to make any representation in connection with the offering of Shares other than those contained in this Prospectus and (if applicable) any addendum hereto and in any subsequent semi-annual or annual report and, if given or made, such information or representations must not be relied on as having been authorised by the Directors, the Management Company, the Depositary, the Registrar and Transfer Agent or the Administrative Agent. Statements in this Prospectus and the Key Investor Information Documents are based on the law and practice currently in force in Luxembourg at the date hereof and are subject to change. Neither the delivery of this Prospectus or of the Key Investor Information Documents nor the issue of Shares shall, under any circumstances, create any implication or constitute any representation that the affairs of the Company have not changed since the date hereof.

Prospective investors may obtain, free of charge, on request, a copy of this Prospectus and of the Key Investor Information Document (s) relating to the Sub-Fund(s) in which they invest, the annual and semi-annual financial reports of the Company and the Articles of Incorporation at the registered office of the Company or the Depositary.

INVESTMENT RISKS

Investment in any Sub-Fund carries with it a degree of financial risk, which may vary among Sub-Funds. The value of Shares and the return generated from them may go up or down, and investors may not recover the amount initially invested.

The Company does not represent an obligation of, nor is it guaranteed by, the Management Company or any other affiliate or subsidiary of Société Générale.

MARKET TIMING POLICY

The Company does not knowingly allow investments which are associated with market timing practices, as such practices may adversely affect the interests of all shareholders.

As per the CSSF Circular 04/146, market timing is to be understood as an arbitrage method through which an investor systematically subscribes and redeems or converts units or shares of the same undertaking for collective investment ("UCI") within a short time period, by taking advantage of time differences and/or imperfections or deficiencies in the method of determination of the net asset value of the UCI.

Opportunities may arise for the market timer either if the net asset value (as defined on hereafter) of the UCI is calculated on the basis of market prices which are no longer up to date (stale prices) or if the UCI is already calculating the net asset value when it is still possible to issue orders.

Market timing practices are not acceptable as they may affect the performance of the UCI through an increase of the costs and/or entail a dilution of the profit.

Accordingly, the Directors may, whenever they deem it appropriate and at their sole discretion, cause the Registrar and Transfer Agent and the Administrative Agent, respectively, to implement any of the following measures:

- Cause the Registrar and Transfer Agent to reject any application for conversion and/or subscription of Shares from investors whom the former considers market timers.
- The Registrar and Transfer Agent may combine Shares which are under common ownership or control for the purposes of ascertaining whether an individual or a group of individuals can be deemed to be involved in market timing practices.
- If a Sub-Fund is primarily invested in markets which are closed for business at the time the Sub-Fund is valued during periods of market volatility cause the Administrative Agent to allow for the Net Asset Value per Share to be adjusted to reflect more accurately the fair value of the Sub-Fund's investments at the point of valuation.

DATA PROTECTION

Certain personal data of investors (including, but not limited to, holding in the Company) may be collected, recorded, stored, adapted, transferred or otherwise processed and used by the Company, the Registrar and Transfer Agent, the Management Company and other companies of Lyxor Asset Management and affiliates and the financial Intermediaries of such investors. In particular, such data may be processed for the purposes of account and distribution fee administration, anti-money laundering identification, tax identification under the European Union Tax Savings Directive 2003/48/EC and to provide client-related services. Such information shall not be passed on any unauthorised third persons.

By subscribing to the Shares, each Shareholder consents to such processing of its personal data. This consent is formalized in writing in the subscription form used by the relevant Intermediary.

INVESTOR RIGHTS

The Management Company draws the investors' attention to the fact that any investor will only be able to fully exercise his investor rights directly against the Company, notably the right to participate in general shareholders' meetings if the investor is registered himself and in his own name in the shareholders' register of the Company. In cases where an investor invests in the Company through an intermediary investing into the Company in its own name but on behalf of the investor, it may not always be possible for the investor to exercise certain shareholder rights directly against the Company. Investors are advised to take advice on their rights.

I/ Investment Objectives/ Investment Powers and Restrictions

INVESTMENT OBJECTIVES

The Company aims to provide investors with professionally managed Sub-Funds investing in a wide range of transferable securities and money market instruments in accordance with Part I of the law of 17 December 2010 on undertakings for collective investment (the “**2010 Law**”) in order to achieve an optimum return from capital invested while reducing investment risk through diversification.

In addition, the Company aims to provide investors with professionally managed index Sub-Funds whose objective is to replicate the composition of a certain financial index recognised by the Luxembourg supervisory authority, unless otherwise mentioned in the relevant Appendix.

The investment policy and objective of each Sub-Fund will be determined in its concerned Appendix annexed to the present Prospectus.

A Sub-Fund may carry out its investment objective via an Indirect Replication and/or a Direct Replication as described in the following paragraphs:

- **a Sub-Fund with an Indirect Replication** may not necessarily invest directly in the constituents of the financial index as set out in its considered Appendix annexed to the present Prospectus.

The exposure to the performance of the considered financial index will be achieved by way of derivative transactions and/or instruments (the “**Indirect Replication**”).

In order to achieve its investment objective via an Indirect Replication and according to the investment restrictions, the Sub-Fund will use at any time one or both funded and/or unfunded technique(s) described in sub-paragraphs a and b below:

a) If the Sub-Fund uses unfunded Indirect Replication technique for whole or part of its assets, it will (i) invest in a basket of transferable securities and liquid assets as further described in

section A below) (the “**Investment Portfolio**”) and (ii) enter into an OTC swap transaction the purpose of which is to reach its investment objective, exchanging the value of its Investment Portfolio against the value of the considered financial index. Such an OTC swap transaction is designated as the “**Unfunded Swap**”.

b) If the Sub-Fund uses funded Indirect Replication technique for whole or part of its assets, it will enter into an OTC swap transaction the purpose of which is to reach its investment objective, exchanging the invested proceeds against the value of the considered financial index. Such an OTC swap transaction is designated as a “**Funded Swap**”. A Sub-Fund investing in a Funded Swap is subject to dedicated Risk Management Process and Collateral Policy set forth in the present Prospectus.

A Sub-Fund with Indirect Replication may use both Funded Swap-based portfolio and Unfunded Swap-based portfolio at the same time, without prejudice to the particular conditions set out in its considered Appendix annexed to the present Prospectus.

Provided that a Sub-Fund may carry out its investment objective through an Unfunded Swap, the basket of securities held by such Sub-Fund in its investment portfolio will be selected on the basis of the following eligibility criteria, in particular:

When the Sub-Fund invests in equities:

- their inclusion in a major stock exchange index;
- liquidity (must exceed a minimum daily trading volume and market capitalization);
- credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating);
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - the geography;
 - the sector.

When the Sub-Fund invests in bonds:

The considered Sub-Fund will invest mainly in bonds issued by a given OECD-member country or by a private-sector issuer, and denominated in one of the OECD country currencies.

These securities will be bonds selected on the basis of the following criteria:

- eligibility criteria and in particular:
 - senior debt;
 - fixed maturity;
 - maximum residual maturity;
 - minimum issuance volume;
 - minimum S&P or equivalent credit rating;
- diversification criteria, including:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - the geography;
 - the sector.

The basket of transferable securities held by the Sub-Fund may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the OTC swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the OTC swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

Information on the updated composition of the basket of assets held in the Sub-Fund and the counterparty risk resulting from the OTC swap is available on the page dedicated to the Sub-Fund on Lyxor's website at www.lyxoretf.com.

The frequency of any updates and/or the date on which the information above is updated is also set out on the same page of the above mentioned website.

The counterparty to the OTC swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

Unless otherwise mentioned in the Sub-Fund's appendix, the using of the OTC swap will not involve leverage.

The net asset value of the Sub-Fund will increase (or decrease) according to the valuation of the OTC swap.

Adjustments of the OTC swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the OTC swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the OTC swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

- **a Sub-Fund with a Direct Replication** are identified by the reference "(DR)" at the end of its name.

A Sub-Fund with a Direct Replication may carry out its investment objective by investing in a portfolio of transferable securities or other eligible assets that will typically comprise the constituents composing the financial index as set out in its considered Appendix annexed to the present Prospectus and in doing so will apply the investment limits as set out in the above section "Investment Objectives / Investment Powers and Restrictions".

In order to optimize such Direct Replication method and to reduce the costs of investing directly in all constituents of the financial index, a Sub-Fund may decide to use a "sampling" technique that consists in investing in a selection of representative constituent of financial index as set out in its considered Appendix annexed to the present Prospectus.

According to this sampling technique, a Sub-Fund may invest in a selection of transferable securities representative of the financial index as set out in its

considered Appendix annexed to the present Prospectus in proportions that do not reflect their weight within the financial index as set out in its considered Appendix annexed to the present Prospectus, and as the case may be invest in securities that are not constituents of the financial index.

In addition, and to a limited extent, a Sub-Fund in Direct Replication may also engage in transactions as financial derivative instruments ("FDI") mainly for achieving the objectives under (i) and (ii) below, including futures transactions, OTC swaps, hedging swap, forward contracts, non-deliverable forwards, spot foreign exchange transactions, to:

- i. reduce the level of tracking errors
or
- ii. optimise its cash management
or
- iii. reduce transaction costs or allowing exposure in the case of illiquid securities or securities which are unavailable for market or regulatory reasons
or
- iv. assist in achieving its investment objective and for reasons such as generating efficiencies in gaining exposure to the constituents of the financial index or to the financial index itself
or
- v. for such other reasons as the Directors deem of benefit to the Sub-Fund.

In circumstances where a Sub-Fund would contract a FDI, the counterparty to that specific FDI would be a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

To ensure transparency on the use of the Direct Replication method (i.e. either full replication of the financial index or sampling to limit replication costs) and on its consequences in terms of the assets in the Sub-Fund's portfolio, information on the updated composition of the basket of assets held by the Sub-Fund is available on the page dedicated to the Sub-Fund accessible on Lyxor's website at www.lyxoretf.com, except otherwise mentioned in the Sub-Fund's Appendix. The frequency of any

updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

INVESTMENT POWERS AND RESTRICTIONS

In order to achieve the Company's investment objectives and policies, the Board of Directors has determined that the following investment powers and restrictions shall apply to all investments by the Company:

A. INVESTMENT IN TRANSFERABLE SECURITIES AND LIQUID ASSETS

- 1) In order to achieve the Company's investment objectives and policies, the Directors have determined that the following investment powers and restrictions shall apply to all investments made by certain Sub-Funds of the Company: The Company, in certain Sub-Funds, may solely invest in
 - a) transferable securities and money market instruments admitted to or dealt in on a regulated market within the meaning of item 1.4 of article 4 of Directive 2004/39/EC;
 - b) transferable securities and money market instruments dealt in on another regulated market that operates regularly and is recognised and is open to the public (a "**Regulated Market**") in a member state as defined in the 2010 Law (the "Member State");
 - c) transferable securities and money market instruments admitted to official listing on a stock exchange or dealt in on another Regulated Market located within any other country in Europe, Asia, Oceania, the Americas and Africa;
 - d) recently issued transferable securities and money market instruments provided that:
 - i) the terms of issue provide that application be made for admission to official listing in any of the stock exchanges or Regulated Markets referred to above;

- ii) such admission is secured within one year of the issue.
- e) units or shares of UCITS authorised according to Directive 2009/65/EC, should they be situated in a Member State or not, provided that the UCITS in which each Sub-Fund of the Company intends to invest, may not, according to its constitutive documents, invest more than 10% of its net assets in aggregate, in units/shares of other UCITS or other UCIs.
- The diversification limits relating to the investment in units or shares of UCITS described in this sub-paragraph are set out in the appendix of each Sub-Fund.
- f) deposits with credit institutions which are repayable on demand or have the right to be withdrawn, and maturing in no more than 12 (twelve) months, provided that the credit institution has its registered office in a Member State or, if the registered office of the credit institution is situated in OECD country being FATF member, provided that it is subject to prudential rules considered by the Luxembourg Supervisory Authority as equivalent to those laid down in European Union law;
- g) financial derivative instruments including cash settlement instruments, dealt in on a Regulated Market referred to in sub-paragraphs a), b), c) and/or financial derivative instruments dealt in over-the-counter ("OTC Derivatives") provided that:
- i) the underlying consists of instruments covered by the paragraph 1) above (points a to f), financial indices, interest rates, foreign exchanges rates or currencies in which each of the Sub-Funds may invest according to their investment objective;
 - ii) the counterparties to OTC derivative transactions are institutions subject to prudential supervision, and belonging to the categories approved by the Luxembourg Supervisory Authority; and
- iii) the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Company's initiative.
- h) money market instruments other than those dealt in on a Regulated Market and referred to in Article 1 of the 2010 Law, if the issuer or the issuer of such instruments is itself regulated for the purpose of protecting investors and savings, and provided that they are:
- i) issued or guaranteed by a central, regional, or local authority, a central bank of a Member State, the European Central Bank, the European Union or the European Investment Bank, a non Member State or, in the case of a Federal State, by one of the members making up the federation, or by a public international body to which one or more Member States belong; or
 - ii) issued by an undertaking whose securities are dealt in on Regulated Markets referred to in sub-paragraphs a), b) or c); or
 - iii) issued or guaranteed by an establishment subject to prudential supervision, in accordance with the criteria defined by the European Union law or by an establishment which is subject to and comply with prudential rules considered by the Luxembourg Supervisory Authority to be at least equivalent to those laid down by European Union law; or
 - iv) issued by other bodies belonging to the categories approved by the Luxembourg Supervisory Authority provided that investments in such instruments are subject to investor protection equivalent to

that laid down in the first, the second and the third indent above and provided that the issuer is a company whose capital and reserves amount at least to ten million Euro (EUR 10,000,000.-) and which presents and publishes its annual accounts in accordance with Directive 2013/34/EU, is an entity which, within a group of companies which includes one or several listed companies, is dedicated to the financing of the group or is an entity which is dedicated to the financing of securitisation vehicles which benefit from a banking liquidity line.

- 2) In addition, each Sub-Fund of the Company may invest a maximum of 10% of its net assets in transferable securities and money market instruments other than those referred to in paragraph (1).
- 3) The Company may hold liquidity on an ancillary basis.
- 4)
 - a) each Sub-Fund may not invest more than 10% of its net assets in transferable securities or money market instruments issued by the same issuer.

Each Sub-Fund may not invest more than 20% of its net assets in deposits made with the same issuer. The risk exposure to a counterparty of each Sub-Fund in an OTC derivative transaction may not exceed 10% of its net assets when the counterparty is a credit institution referred to in (1) f) above or 5% of its net assets in other cases.
 - b) in addition to the limit set forth in point a) above, the total value of transferable securities and money market instruments amounting more than 5% of the net assets of one Sub-Fund, must not exceed 40% of the net assets of this Sub-Fund. This limitation does not apply to deposit and OTC derivative transactions made with financial institutions subject to prudential supervision.
- c) Notwithstanding the individual limits laid down in paragraph a), b) above, each Sub-Fund may not combine:
 - i) investments in transferable securities or money market instruments issued by, and
 - ii) deposits made with,
 - iii) exposures arising from OTC derivatives transactions undertaken with a single issuer for more than 20% of the Sub-Fund's net assets.
- d) the limit of 10% in sub-paragraph 4 a) above may be increased to a maximum of 35% in respect of transferable securities and money market instruments which are issued or guaranteed by a Member State or its local authorities, by an OECD country being FATF member or by public international bodies of which one or more Member States are members, and such securities and money market instruments need not be included in the calculation of the limit of 40% stated in sub-paragraph 4) b).
- e) the limit of 10% in sub-paragraph 4 a) above may be increased to a maximum of 25% in respect of qualifying debt securities issued by a credit institution whose registered office is situated in a Member State and which is subject, by virtue of law, to particular public supervision in order to protect the holders of such qualifying debt securities. For purposes hereof, "qualifying debt securities" are securities the proceeds of which are invested in accordance with applicable law in assets providing a return which will cover the debt service through the maturity date of the securities and which will be applied on a priority basis to the payment of principal and interest in the event of a default by the issuer. To the extent that a relevant Sub-Fund invests more than 5% of its net assets in debt securities issued by such an issuer, the total value of such investments may not exceed 80% of the net assets of such Sub-Fund. Such securities need not be included in the calculation of the limit of 40% stated in sub-paragraph 4) b).

The ceilings set forth in paragraph 4 above may not be aggregated, and accordingly, investments in the securities of any one issuer, effected in compliance with the provisions set forth in paragraph 4, may under no circumstances exceed 35% of any Sub-Fund's net assets.

- f) companies which are included in the same group for the purposes of consolidated accounts (as defined in accordance with Directive 2013/34/EU) or in accordance with recognised international accounting rules are considered as a single body or issuer for the purpose of calculating the limits contained in this section.
Each Sub-Fund may invest in aggregate up to 20% of its net assets in transferable securities and money market instruments with the same group.

- 5) Notwithstanding the ceilings set forth above, each Sub-Fund is authorised to invest in accordance with the principle of risk spreading, up to 100% of its net assets in transferable securities and money market instruments issued or guaranteed by (i) a Member State of the European Union, its local authorities, or a public international body of which one or more Member State(s) of the European Union are member(s), (ii) any member state of the OECD or any member country of the G-20, or (iii) Singapore or Hong Kong, provided that:

- a) such securities are part of at least six different issues; and
b) the securities from any one issue do not account for more than 30% of the net assets of such Sub-Fund.

Such authorisation will be granted should the shareholders have a protection equivalent to that of shareholders in UCITS complying with the limits laid down in 4) above.

- 6) The Company may:

- a) not acquire more than 10% of the debt securities of any single issuing body;

- b) not acquire more than 10% of the non-voting shares of any single issuing body;
c) not acquire more than 10% of the money market instruments of any single issuing body;
d) not acquire more than 25% of the units of any single collective investment undertaking.

These four above limits apply to the Company as a whole.

The limits under a), c) and d) above may be disregarded at the time of acquisition if at that time the gross amount of the bonds or of the money market instruments or the net amount of the instruments in issue cannot be calculated.

The Company may not acquire any shares carrying voting rights which would enable the Company to take legal or management control or to exercise significant influence over the management of the issuing body.

- 7) The ceilings set forth under 6) above do not apply in respect of

- a) transferable securities and money market instruments issued or guaranteed by a Member State or by its local authorities;
b) transferable securities and money market instruments issued or guaranteed by any other State which is not a Member State;
c) transferable securities and money market instruments issued by a public international body of which one or more Member State(s) is/are member(s);
d) shares in the capital of a company which is incorporated under or organised pursuant to the laws of a State which is not a Member State provided that (i) such company invests its assets principally in securities issued by issuers of the State, (ii) pursuant to the law of that State a participation by the relevant Sub-Fund in the equity of such vehicle constitutes the only possible way to purchase securities of issuers of that State, and (iii) such

vehicle observes in its investments policy the restrictions set forth in paragraph 4) and 5) above as well as in **C.** hereafter;

- e) shares held by the Company in the capital of subsidiaries carrying on exclusively the business of management, advice or marketing of the Company in the country/state where the subsidiary is located, regarding the repurchase of units/shares requested by the unit holders/shareholders.

The investment restrictions listed above and in **C.** hereafter apply at the time of purchase of the relevant investments. If these limits are exceeded with respect to a Sub-Fund for reasons beyond the control of the Sub-Fund or when exercising subscription rights, the Sub-Fund shall adopt as a priority objective for the sales transactions of the relevant Sub-Fund the remedying of that situation, taking due account of the interests of the shareholders.

While ensuring observance of the principle of risk-spreading, the Company may derogate from limitations 4) to 7) above and in **C.** hereafter for a period of six months following the date of its inscription to the Luxembourg official list of UCIs.

- 8) The Company shall ensure that the global exposure relating to the use of derivative instruments in one Sub-Fund does not exceed its total asset value. The risk exposure is calculated taking into account the current value of the underlying assets, the counterparty risk, future market movements and the time available to liquidate the positions.

If a Sub-Fund invests in financial derivative instruments, the exposure to the underlying assets may not exceed in aggregate the investment limits laid down in paragraph A. 4) above. When the Sub-Fund invests in index-based financial derivative instruments, these investments do not have to be combined to the limits laid down in paragraph A. 4).

When a transferable security or money market instrument embeds a derivative, the latter must be taken into account when complying with the above requirements.

B. INVESTMENT MADE BY INDEX SUB-FUNDS

The aim of the index Sub-Funds investment policy is to replicate the composition of a certain financial index which is recognised by the CSSF, on the following basis:

- a) the composition of the index is sufficiently diversified;
- b) the index represents an adequate benchmark for the market to which it refers;
- c) it is published in an appropriate manner.

Owing to the specific investment policy of the index Sub-Funds and without prejudice to the limits laid down in paragraph A. 6) and 7), the limits laid down in paragraph A. 4) are raised to a maximum of 20% for investments in shares and/or bonds issued by the same body. The aforesaid limit is raised to 35% where that proves to be justified by exceptional market conditions in particular in regulated markets where certain transferable securities or money market instruments are highly dominant as further described in the Appendices (where applicable). The investment up to this limit is only permitted for a single issuer.

C. INVESTMENT IN UCITS

Certain Sub-Funds may acquire units of UCITS referred to in paragraph A. 1) e) above, provided that no more than 10% of a Sub-Fund's net assets be invested in the units. No Sub-Fund may acquire shares or units of any UCIs.

When the Sub-Funds of the Company invest in the units of other UCITS directly or indirectly managed by the Management Company or by a company linked to the Management Company by common management or control, or by a direct or indirect holding which exceeds 10% of the capital or management rights no fees may be charged to the Company on account of its investment in the units of such other UCITS. Moreover, no subscription or redemption fees may be charged to the Company on account of its investment in the units of linked underlying UCITS.

The Company may acquire no more than 25% of the units of the same UCITS. This limit may be disregarded at the time of acquisition if at that time the gross amount of the units in issue cannot be calculated. In case of a UCITS with multiple sub-funds,

this restriction is applicable by reference to all units issued by the UCITS concerned, all sub-funds combined.

The underlying investments held by the UCITS in which the Company invests do not have to be considered for the purpose of the investment restrictions set forth under A above.

D. INVESTMENT IN OTHER ASSETS

a) The Company will not make investments in precious metals or certificates representing them.

b) The Company may not enter into transactions involving commodities or commodity contracts, except that the Company may employ techniques and instruments set out in paragraph E. Below subject to the conditions defined in the applicable regulations. For the avoidance of doubt, OTC total return swaps in relation to eligible Commodities financial indices are permitted.

c) The Company will not purchase or sell real estate or any option, right or interest therein, provided the Company may invest in securities secured by real estate or interests therein or issued by companies which invest in real estate or interests therein.

However, the Company may acquire movable and immovable property which is essential for the direct pursuit of its activity;

d) The Company may not carry out uncovered sales of transferable securities, money market instruments or other financial instruments referred to above.

e) The Company may not borrow for the account of any Sub-Fund, other than amounts which do not in aggregate exceed 10% of the net asset value of the Sub-Fund, and then only as a temporary measure. For the purpose of this restriction, back to back loans are not considered to be borrowings.

f) The Company will not grant loans or act as guarantor on behalf of third parties. This limitation will not prevent the Company from acquiring transferable securities, money market instruments or other financial instruments referred to 1) above.

g) The Company will not mortgage, pledge, hypothecate or otherwise encumber as security for indebtedness any securities

held for the account of any Sub-Fund, except as may be necessary in connection with the borrowings mentioned in e) above, and then such mortgaging, pledging, or hypothecating may not exceed 10% of the Net Asset Value of each Sub-Fund. In connection with swap transactions, option and forward exchange transactions or futures transactions the deposit of securities or other assets in a separate account shall not be considered a mortgage, pledge or hypothecation for this purpose.

h) The Company will not underwrite or sub-underwrite securities of other issuers.

In accordance with the above Investment Restrictions, each Sub-Fund may employ techniques and instruments relating to transferable securities and money market instruments providing that these techniques and instruments are used for the purpose of efficient portfolio management. A Sub-Fund may also employ techniques and instruments intended to provide protection against foreign exchange risks in the context of the management of the assets and liabilities of the Sub-Fund (see below).

The Board of Directors may impose other investment restrictions at any time in the interest of the shareholders whenever necessary to comply with the laws and requirements of those countries where the Company Shares are offered.

E. INVESTMENT TECHNIQUES

1) Techniques and Instruments relating to transferable securities and money market instruments

Subject to the conditions under A. 1) g) above and any limitations set out in their respective investment policies, the Sub-Funds may use the following techniques and instruments for the purpose of efficient portfolio management.

For the purpose of efficient portfolio management, the Sub-Fund may undertake transactions relating to financial futures, warrants and options contracts traded on a Regulated Market. Alternatively, the Sub-Fund may undertake transactions relating to options, swaps (including total return swaps) entered into by private agreement (OTC) with highly rated financial institutions specialising in this type of transaction and participating actively in the relevant OTC market. Such OTC financial derivative instruments shall be safekept by the Depositary.

1. Options on transferable securities/ money market instruments

The Sub-Fund may buy and sell put and call options on transferable securities and money market instruments.

At the conclusion as well as during the existence of contracts for the sale of call options on securities, the Sub-Fund will hold either the underlying securities, matching call options, or other instruments (such as warrants) that provide sufficient coverage of the commitments resulting from these transactions.

The underlying securities related to call options written may not be disposed of as long as these options are outstanding unless such options are covered by matching options or by other instruments that can be used for that purpose. The same applies to equivalent call options or other instruments which the Sub-Fund must hold where it does not have the underlying securities at the time of the writing of such options.

A Sub-Fund may not write uncovered call options on transferable securities and money market instruments. As a derogation from this rule, a Sub-Fund may write call options on securities that it does not hold at inception of the transaction, if the aggregate exercise price of such uncovered call options written does not exceed 25% of the net asset value of the Sub-Fund and the Sub-Fund is, at any time, in a position to cover the open position resulting from such transactions.

Where a put option is sold, the Sub-Fund's corresponding portfolio must be covered for the full duration of the contract by adequate liquid assets that would meet the exercise value of the contract, should the option be exercised by the counterparty.

2. Hedging through Stock Market Index Futures, Warrants and Options

As a global hedge against the risk of unfavourable stock market movements, a Sub-Fund may sell futures contracts on stock market indices, and may also sell call options, buy put options or transact in warrants on stock market indices, provided there is sufficient correlation between the composition of the index used and the Sub-Fund's corresponding portfolio.

The total commitment resulting from such futures, warrants and option contracts on stock market indices may not exceed the global valuation of securities held by the relevant Sub-Fund's corresponding portfolio in the market corresponding to each index.

3. Hedging through Interest Rate Futures, Options, Warrants, Swaps (including total return swaps)

As a global hedge against interest rate fluctuations, a Sub-Fund may sell interest rate futures contracts and may also sell call options, buy put options or transact in warrants on interest rates or enter into OTC interest rates swaps or swaptions with highly rated financial institutions specialising in this type of instruments.

The total commitment resulting from such futures, option, warrants and swaps contracts (including total return swaps) and swaptions on interest rates may not exceed the total market value of the assets to be hedged held by the Sub-Fund in the currency corresponding to these contracts.

4. Futures, Warrants and Options on Other Financial Instruments for a Purpose other than hedging

As a measure towards achieving a fully invested portfolio and retaining sufficient liquidity, a Sub-Fund may buy or sell futures, warrants and options contracts on financial instruments (other than the transferable securities or currency contracts), such as instruments based on stock market indices and interest rates, provided that these are in line with the stated investment objective and policy of the corresponding Sub-Fund and that the total commitment arising from these transactions together with the total commitment arising from the sale of call and put options on transferable securities at no time exceeds the net asset value of the relevant Sub-Fund.

With regard to the "total commitment" referred to in the preceding paragraph, the call options written by the Sub-Fund on transferable securities for which it has adequate cover do not enter into the calculation of the total commitment.

The commitment relating to transactions other than options on transferable securities shall be defined as follows:

- the commitment arising from futures contracts is deemed equal to the value of the underlying net positions payable on those contracts which relate to identical financial instruments (after setting off all sale positions against purchase positions), without taking into account the respective maturity dates; and

- the commitment deriving from options purchased and written as well as warrants purchased and sold is equal to the aggregate of the exercise (striking) prices of net uncovered sales positions which relate to single underlying assets without taking into account respective maturity dates.

The aggregate acquisition prices (in terms of premium paid) of all options on transferable securities purchased by the Sub-Fund together with options acquired for purposes other than hedging (see above) may not exceed 15% of the net assets of the relevant Sub-Fund.

5. OTC total return swaps

In order to achieve the investment objective of the Sub-Funds replicating financial indices via an Indirect Replication methodology, the Company may, on behalf of the Sub-Funds, enter into total return swaps ("TRS") entered into by private agreement (OTC) with regulated financial institutions which have their registered office in one of the OECD countries, and which are specialised in such types of transactions, have a minimum credit rating of investment grade quality and are subject to prudential supervision (such as credit institutions or investment firms). The identity of the counterparties will be disclosed in the annual report.

Each Sub-Fund may incur costs and fees in connection with TRS upon entering into TRS and/or any increase or decrease of their notional amount. The amount of these fees may be fixed or variable. Information on costs and fees incurred by each Fund in this respect, as well as the identity of the recipients and any affiliation they may have with the Depository, the investment adviser or the Management Company, if applicable, may be available in the annual report. All revenues arising from TRS, net of direct and indirect operational costs and fees, will be returned to the relevant Sub-Fund.

A Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default by the counterparty of the

OTC total return swaps. In line with UCITS guidelines, the counterparty risk (whether the counterparty is Société Générale or another third party), cannot exceed 10% of the considered Sub-Fund's total assets, by counterparty.

In accordance with its best execution policy, the Management Company considers that Société Générale is the counterparty that generally obtains the best possible execution for these OTC total return swaps. Accordingly, these OTC total return swaps may be traded via Société Générale without seeking a competitive bid from another counterparty.

TRS entered into by a Sub-Fund may be in the form of Funded Swaps and/or Unfunded Swaps.

The use by any Sub-Fund of TRS will be specified in each Sub-Fund Annex under Part II of the Prospectus, within the meaning of, and under the conditions set out in, applicable laws, regulations and CSSF circulars issued from time to time, in particular, but not limited to regulation (EU) 2015/2365.

6. Efficient portfolio management techniques

The Company may employ techniques and instruments relating to transferable securities and money market instruments provided that such techniques and instruments are used for the purposes of efficient portfolio management within the meaning of, and under the conditions set out in, applicable laws, regulations and circulars issued by the CSSF from time to time. In particular, those techniques and instruments should not result in a change of the declared investment objective of the Sub-Fund or add substantial supplementary risks in comparison to the stated risk profile of the Sub-Fund. Such securities or instruments will be safekept with the Depository.

The risk exposure to a counterparty generated through efficient portfolio management techniques and OTC financial derivatives must be combined when calculating counterparty risk limits laid down under article 52 of the 2009 Directive.

All revenues arising from efficient portfolio management techniques, net of direct and indirect operational costs and fees, will be returned to the considered Sub-Fund. In particular, fees and cost may be paid to

agents of the Company, to the Management Company, and to other intermediaries providing services in connection with efficient portfolio management techniques as normal compensation of their services. Such fees may be calculated as a percentage of gross revenues earned by the Sub-Fund through the use of such techniques. Information on direct and indirect operational costs and fees that may be incurred in this respect as well as the identity of the entities to which such costs and fees are paid – as well as any relationship they may have with the Depositary or Management Company – will be available in the annual report of the Company.

(a) Securities lending and borrowing transactions

The Company may enter into securities lending and borrowing transactions that consist in transactions whereby a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested to do so by the lender, such transaction being considered as securities lending for the party transferring the securities or instruments and being considered as securities borrowing for the counterparty to which they are transferred.

The Company may more specifically enter into securities lending transactions provided that the following rules are complied with in addition to the abovementioned conditions:

- the borrower in a securities lending transaction must be a regulated financial institution which has its registered office in one of the OECD countries, and which is specialised in such types of transactions, has a minimum credit rating of investment grade quality and is subject to prudential supervision (such as credit institution or investment firm). The identity of the borrower will be disclosed in the annual report;

- the Company may only lend securities to a borrower either directly or through a standardised system organised by a recognised clearing institution or through a lending system organised by a financial institution subject to prudential supervision rules considered by the CSSF as equivalent to those provided by EU law and specialised in this type of transaction;
- the Company may only enter into securities lending transactions provided that it is entitled at any time under the terms of the agreement to request the return of the securities lent or to terminate the agreement.

For certain Sub-Funds, the Company and the Management Company have appointed the securities lending agent. The securities lending agent has been authorised (i) to enter into securities lending transactions including but not limited to Global Master Securities Lending Agreements (“GMSLA”), and /or any other internationally recognized master agreement) on behalf of the Company and (ii) to invest any cash received/held on behalf of the Company as collateral pursuant to such securities lending transactions, in accordance with and within the limits set forth in the agency securities lending agreement, the rules set out in this Prospectus and the applicable regulations. Any income generated by securities lending transactions (reduced by any applicable direct or indirect operational costs and fees arising there from and paid to the Securities Lending Agent and, as the case may be, to the Management Company) will be payable to the relevant Sub-Fund. As these direct and indirect operational costs do not increase the costs of running the Sub-Fund, they have been excluded from the ongoing charges. Unless otherwise specified in the relevant Sub-Fund Annex and to the extent a Sub-Fund undertakes Securities Lending Transactions, the Securities Lending Agent and the Management Company shall receive a fee for the services provided in this respect.

For the avoidance of doubt securities lending transaction will be limited to Sub-Fund applying Direct Replication investment policy.

The annual report of the Company contains if applicable the following details:

- the exposure obtained through efficient portfolio management techniques;
- the identity of the counterparty(ies) to these efficient portfolio management techniques;
- the type and amount of collateral received by the UCITS to reduce counterparty exposure; and
- the revenues arising from efficient portfolio management techniques for the entire reporting period together with the direct and indirect operational costs and fees incurred.

The use by any Sub-Fund of securities lending and borrowing transactions will be specified in each Sub-Fund Annex under Part II of the Prospectus, within the meaning of, and under the conditions set out in, applicable laws, regulations and CSSF circulars issued from time to time, in particular, but not limited to regulation (EU) 2015/2365.

(b) repurchase, reverse repurchase and buy-sell-back transactions

The Company may enter into repurchase agreements that consist of forward transactions at the maturity of which the Company (seller) has the obligation to repurchase the assets sold and the counterparty (buyer) the obligation to return the assets purchased under the transactions. The Company may further enter into reverse repurchase agreements that consist of forward transactions at the maturity of which the counterparty (seller) has the obligation to repurchase the asset sold and the Company (buyer) the obligation to return the assets purchased under the transactions.

The Company's involvement in such transactions is, however, subject to the additional following rules:

- the counterparty to these transactions must be a regulated financial institution which has its registered office in one of the OECD countries, and which is specialised in such types of transactions, has a minimum credit rating of investment grade quality and is subject to prudential supervision (such as credit institution or investment firm). The identity of the counterparty will be disclosed in the annual report;

- the Company may only enter into reverse repurchase agreement and/or repurchase agreement transactions provided that it is able at any time (a) to recall the full amount of cash in a reverse repurchase agreement or any securities subject to a repurchase agreement or (b) to terminate the agreement in accordance with applicable regulations. However, fixed-term transactions that do not exceed seven days should be considered as arrangements on terms that allow the assets to be recalled at any time by the Company.

The Company may enter into buy-sell back transactions which consist of transactions, not being governed by a repurchase agreement or a reverse repurchase agreement as described above, whereby a party buys or sells securities or instruments to a counterparty, agreeing, respectively, to sell to or buy back from that counterparty securities or instruments of the same description at a specified price on a future date. Such transactions are commonly referred to as buy-sell back transactions for the party buying the securities or instruments, and sell-buy back transactions for the counterparty selling them.

The use by any Sub-Fund of repurchase, reverse repurchase and buy-sell back transactions will be specified in each Sub-Fund Annex under Part II of the Prospectus.

2) Techniques and Instruments to protect against exchange risks

For the purpose of protecting against currency fluctuations, the Sub-Fund may undertake transactions relating to financial futures, warrants and options contracts traded on a Regulated Market.

Alternatively, the Sub-Fund may undertake transactions relating to options, swaps and forward contracts entered into by private agreement (OTC) with regulated financial institutions which have their registered office in one of the OECD countries, and which are specialised in such types of transactions, have a minimum credit rating of investment grade quality and are subject to prudential supervision (such as credit institutions or investment firms).

In order to hedge foreign exchange risks, a Sub-Fund may have outstanding commitments in currency futures and/or sell call options, purchase put options or transact in warrants with respect to currencies, or enter into currency forward contracts or currency swaps. The hedging objective of the transactions referred to above presupposes the existence of a direct relationship between the contemplated transactions and the assets or liabilities to be hedged and implies that, in principle, transactions in a given currency may not exceed the valuation of the aggregate assets denominated in that currency nor may they, as regards their duration, exceed the period during which such assets are held.

3) Other instruments

(a) Warrants

Warrants shall be considered as transferable securities if they give the investor the right to acquire newly issued or to be issued transferable securities. The Sub-Funds, however, may not invest in warrants where the underlying is gold, oil or other commodities.

The Sub-Funds may invest in warrants based on stock exchange indices for the purpose of efficient portfolio management.

(b) Rules 144 A Securities

The Sub-Funds may invest in so-called Rule 144A securities which are securities that are not required to be registered for resale in the United States under an exemption pursuant to Section 144A of the 1933 Act ("Rule 144A Securities"), but can be sold in the United States to certain institutional buyers. A Sub-Fund may invest in Rule 144A Securities, provided that: such securities are issued with registration rights pursuant to which such securities may be registered under the 1933 Act and traded on the US OTC Fixed Income Securities market. Such securities shall be considered as newly issued transferable securities.

In the event that any such securities are not registered under the 1933 Act within one year of issue, such securities shall be considered as subject to the 10% limit of the net assets of the Sub-Fund applicable to the category of non-listed securities.

(c) Structured Notes

Subject to any limitations in its investment objective and policy and to the Investment Restrictions outlined above, each Sub-Fund may invest in structured notes, comprising listed government bonds, medium-term notes, certificates or other similar instruments issued by prime rated issuers where the respective coupon and/or redemption amount has been modified (or structured), by means of a financial instrument.

The Investment Restrictions apply on the issuer of the Structured Note and also on its underlying assets.

These notes are valued by brokers with reference to the revised discounted future cash flows of the underlying assets.

COLLATERAL POLICY

In the context of OTC financial derivatives transactions and efficient portfolio management techniques, the Company may receive collateral with a view to reduce its counterparty risk. This section sets out the collateral policy applied by the Company in such case. All assets received by the Company in this context shall be considered as collateral for the purposes of this section.

Any Eligible Collateral, as detailed below, within the context described above will be the relevant Sub-Fund's property. It will be delivered on the relevant Sub-Fund's securities account at its Depository.

Eligible collateral:

Collateral received by the Company may be used to reduce its counterparty risk exposure if it complies with the criteria set out in applicable laws, regulations and circulars issued by the Luxembourg Supervisory Authority from time to time notably in terms of liquidity, valuation, issuer credit quality, correlation, risks linked to the management of collateral and enforceability. In particular, collateral should comply with the following conditions:

- (a) any collateral received other than cash should be of high quality, highly liquid and traded on a regulated market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to pre-sale valuation;

- (b) it should be valued on at least a daily basis and assets that exhibit high price volatility should not be accepted as collateral unless suitably conservative haircuts are in place;
- (c) it should be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty;
- (d) it should be sufficiently diversified in terms of country, markets and issuers with a maximum exposure of 20% of the Sub-Fund's Net Asset Value to any single issuer on an aggregate basis, taking into account all collateral received;
- (e) it should be capable of being fully enforced by the Company at any time without reference to or approval from the counterparty;
- (f) where there is a title transfer, collateral received should be held by the Depositary or one of its sub-custodians to which the Depositary has delegated the custody of such collateral. For other types of collateral arrangement (e.g. a pledge), collateral can be held by a third party custodian which is subject to prudential supervision and which is unrelated to the provider of the collateral.

Notwithstanding the condition specified in (d) above, the Sub-Fund may accept collateral that increases its exposure to a single issuer to more than 20% of its net asset value provided that:

- such collateral is issued by (i) a Member State, (ii) one or more of its local authorities, (iii) a third country, or (iv) a public international body to which one or more Member States belong and;
- such collateral consists of at least six different issues, but collateral from any single issue shall not account for more than 30% of the Sub-Fund's net assets.

The Company has established an Eligibility Policy setting out additional eligibility criteria:

- for equities received as collateral, the Company assesses the eligibility through average daily traded volume

and market capitalization thresholds. The Company has also defined eligible countries of issuance for equities received as collateral;

- for bonds received as collateral, the eligibility policy relies on credit risk rating issued by a major rating agency, maturity, seniority of the debt and minimum outstanding issue thresholds. The Company has also defined eligible countries of issuance for bonds received as collateral, depending on the type of bonds considered.

Subject to the abovementioned conditions, collateral received by the Company may consist of:

- cash and cash equivalents, including short-term bank certificates and Money market instruments;
- bonds issued or guaranteed by a Member State of the OECD or by their local public authorities or by supranational institutions and undertakings with EU, regional or worldwide scope or by any country as long as the conditions (a) to (e) set out above are fully complied with;
- shares or units issued by money market UCIs calculating a daily net asset value and being assigned a rating of AAA or its equivalent;
- shares or units issued by UCITS investing mainly in bonds/shares mentioned in (v) and (vi) below;
- bonds issued or guaranteed by first class issuers offering adequate liquidity;
- shares admitted to or dealt in on a regulated market of a Member State of the EU or on a stock exchange of a Member State of the OECD or the stock exchange of any country as long as the conditions (a) to (e) set out above are fully complied with, on the condition that these shares are included in a main index.

Level and valuation of collateral

The Company will determine the required level of collateral for Funded Swaps by reference to the applicable counterparty risk limits set out in this Prospectus and taking into account the nature and characteristics of transactions, the creditworthiness and

identity of counterparties and prevailing market conditions.

The securities acquired by the Sub-Fund as Funded Swap collateral must be issued by an entity that is independent from the counterparty and which is not expected to display a high correlation with the performance of the counterparty.

Haircut policy

Collateral will be valued, on a daily basis, using available market prices and taking into account appropriate discounts which will be determined for each asset class based on the Management Company’s haircut policy. Such haircut will be determined by the Management Company based on criteria, including, but not limited to:

- (a) nature of the security;
- (b) maturity of the security (when applicable);
- (c) the security issuer rating (when applicable).

The Management Company expects that the discount percentages specified in the table below will be used in the calculation of the value of collateral received by the Sub-Fund (the Management Company reserves the right to vary this policy at any time in which case this Prospectus will be updated accordingly):

Collateral Type	Margin
(i)	100% - 102%
(ii)	100% - 110%
(iii)	100% - 102%
(iv)	100% - 135%
(v)	100% - 115%
(vi)	100% - 135%

Collateral types denominated in a currency other than the currency of the Sub-Fund may be subject to an additional haircut.

Reinvestment of collateral

Non-cash collateral received by the Company may not be sold, re-invested or pledged.

Cash collateral received by the Company can only be:

- i. placed on deposit with credit institutions which have their registered office in an EU Member

State or, if their registered office is located in a third-country, are subject to prudential rules considered by the Luxembourg Supervisory Authority as equivalent to those laid down in European Union law;

- ii. invested in high-quality government bonds;
- iii. used for the purpose of reverse repo transactions provided the transactions are with credit institutions subject to prudential supervision and the Company is able to recall at any time the full amount of cash on accrued basis; and/or
- iv. invested in short-term money market funds as defined in the Guidelines on a Common Definition of European Money Market Funds.

Re-invested cash collateral should be diversified in accordance with the diversification requirements applicable to non-cash collateral as set out above.

The Sub-Fund may incur a loss in reinvesting the cash collateral it receives. Such a loss may arise due to a decline in the value of the investment made with cash collateral received. A decline in the value of such investment of the cash collateral would reduce the amount of collateral available to be returned by the Sub-Fund to the counterparty at the conclusion of the transaction. The Sub-Fund would be required to cover the difference in value between the collateral originally received and the amount available to be returned to the counterparty, thereby resulting in a loss to the Sub-Fund.

Risk Management Process

The Company will employ a risk-management process which enables it to monitor and measure at any time the risk of the positions and their contribution to the overall risk profile of each Sub-Fund. The Company will employ, if applicable, a process for accurate and independent assessment of the value of any OTC derivative instruments.

Risk Warning on the use of financial derivative instruments

A Sub-Fund’s use of financial derivative instruments such as futures, options, warrants, forwards and swaps (including

TRS) involves increased risks. A Sub-Fund's ability to use such instruments successfully depends on its Manager's ability to accurately anticipate movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the Manager's anticipations are wrong, or if the derivatives do not work as anticipated, the Sub-Fund could suffer greater losses than if the Sub-Fund had not used the derivatives. Some financial derivative instruments may require an initial amount to establish a position in such derivative instrument which is much smaller than the exposure obtained through this derivative, so that the transaction is "leveraged" or "geared". A relatively small movement of market prices may then result in a potentially substantial impact, which can prove beneficial or detrimental to the Sub-Fund. However, unless otherwise specified in the relevant Sub-Fund documentation, leveraged derivatives are not used to create leverage at the Sub-Fund level.

Financial derivative instruments are highly volatile instruments and their market values may be subject to wide fluctuations. If the financial derivative instruments do not work as anticipated, the Sub-Fund could suffer greater losses than if the Sub-Fund had not used the financial derivative instruments.

Instruments traded in over-the-counter markets may trade in smaller volumes and their price may be more volatile than those of instruments traded in regulated markets.

Each Sub-Fund may enter into over-the-counter ("OTC") financial derivative instruments (cf. the section INVESTMENT OBJECTIVES / INVESTMENT POWERS AND RESTRICTIONS of the part I of this Prospectus). Trading in those financial derivative instruments may imply a range of risks including (but not limited to) counterparty risk, hedging disruption, Index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a financial derivative instrument and could lead to an adjustment or even the early termination of the financial derivative instrument transaction.

Legal Risk – OTC Derivatives, Reverse Repurchase Transactions, Securities Lending and Re-used Collateral

Certain transactions are entered into on the basis of complex legal documents. Such documents may be difficult to enforce or may be the subject of a dispute as to interpretation in certain circumstances. Whilst the rights and obligations of the parties to a legal document may be governed by English law, in certain circumstances (for example insolvency proceedings) other legal systems may take priority which may affect the enforceability of existing transactions.

II/ Net Asset Value

CALCULATION OF THE NET ASSET VALUE PER SHARE

The net asset value per share (hereinafter the "**Net Asset Value per Share**") of each Class in each Sub-Fund will be calculated by the Administrative Agent in the reference currency (hereinafter the "**Reference Currency**") of each Sub-Fund and Class.

The Net Asset Value per Share is calculated on each Valuation Day as defined in the relevant Appendices, and at least twice per month. The Net Asset Value per Share for all Sub-Funds will be determined on the basis of the last available closing prices or other reference prices as specified in the relevant Appendices. If since the close of business, there has been a material change in the quotations on the markets on which a substantial portion of the investments attributable to a particular Sub-Fund are dealt or quoted, the Company may, in order to safeguard the interests of shareholders and the Company, cancel the first valuation and carry out a second valuation prudently and in good faith.

The Net Asset Value per Share of each Class of Shares for all Sub-Funds is determined by dividing the value of the total assets of the Sub-Fund properly allocable to such Class of Shares less the liabilities of the Sub-Fund properly allocable to such Class of Shares by the total number of Shares of such Class outstanding on any Valuation Day.

The Net Asset Value of the Classes of Shares may differ within each Sub-Fund as a result of the dividend policy, the management fee, the subscription and redemption fees for each Class. In calculating the Net Asset Value per Share, income and expenditure are treated as accruing on a daily basis.

The calculation of the Net Asset Value per Share of the different Classes of Shares shall be made in the following manner:

a) The assets of the Company shall be deemed to include:

- all cash on hand or on deposit, including any interest accrued thereon;
- all bills and demand notes payable and accounts receivable (including proceeds of securities sold but not delivered);
- all bonds, time notes, certificates of deposit, shares, stock, debentures, debenture stocks, units or shares of undertakings for collective investment, subscription rights, warrants, options and other securities, financial instruments and similar assets owned or contracted for by the Company (provided that the Company may make adjustments in a manner not inconsistent with paragraph (i) below with regards to fluctuations in the market value of securities caused by trading ex-dividends, ex-rights, or by similar practices);
- all stock dividends, cash dividends and cash distributions receivable by the Company to the extent information thereon is reasonably available to the Company;
- all interest accrued on any interest-bearing assets owned by the Company except to the extent that the same is included or reflected in the principal amount of such assets;
- the preliminary expenses of the Company insofar as the same have not been written off;
- all other assets of any kind and nature including expenses paid in advance.

The value of such assets shall be determined as follows:

- the value of any cash on hand or on deposit bills and demand notes and accounts receivable, prepaid expenses, cash dividends, interests declared or accrued and not yet received, all of which are deemed to be the full amount thereof, unless in any case the same is unlikely to be

paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof;

- securities listed on a recognised stock exchange or dealt on any other regulated market (hereinafter referred to as a "Regulated Market") that operates regularly, is recognised and is open to the public, will be valued at their last available closing prices, or, in the event that there should be several such markets, on the basis of their last available closing prices on the main market for the relevant security;
- in the event that the last available closing price does not, in the opinion of the Directors, truly reflect the fair market value of the relevant securities, the value of such securities will be determined by the Directors based on the reasonably foreseeable sales proceeds determined prudently and in good faith;
- securities not listed or traded on a stock exchange or not dealt on another Regulated Market will be valued on the basis of the probable sales proceeds determined prudently and in good faith by the Directors;
- the value of financial derivative instruments traded on exchanges or on other Regulated Markets shall be based upon the last available settlement prices of these financial derivative instruments on exchanges and Regulated Markets on which the particular financial derivative instruments are traded by the Company; provided that if financial derivative instruments could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the value of such financial derivative instruments shall be such value as the Directors may deem fair and reasonable;
- the financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market will be valued in a reliable and verifiable manner on a daily basis and verified by a competent professional appointed by the Company;

- investments in UCITS will be valued on the basis of the last available net asset value of the units or shares of such UCITS;
- all other transferable securities and other permitted assets will be valued at fair market value as determined in good faith pursuant to procedures established by the Board of Directors;
- liquid assets and money market instruments may be valued at market value plus any accrued interest or on an amortised cost basis as determined by the Board of Directors. All other assets, where practice allows, may be valued in the same manner. If the method of valuation on an amortised cost basis is used, the portfolio holdings will be reviewed from time to time under the direction of the Board of Directors to determine whether a deviation exists between the Net Asset Value calculated using the market quotation and that calculated on an amortised cost basis. If a deviation exists which may result in a material dilution or other unfair result to investors or existing shareholders, appropriate corrective action will be taken including, if necessary, the calculation of the Net Asset Value by using available market quotations; and
- in the event that the above mentioned calculation methods are inappropriate or misleading, the Board of Directors may adjust the value of any investment or permit some other method of valuation to be used for the assets of the Company if it considers that the circumstances justify that such adjustment or other method of valuation should be adopted to reflect more fairly the value of such investments.

Any assets held not expressed in the reference currency of the Company will be converted into such reference currency at the rate of exchange prevailing in a recognised market on the day preceding the Valuation Day.

Any assets held in a particular Sub-Fund not expressed in the Reference Currency of the Sub-Fund will be translated into such Reference Currency at the rate of exchange prevailing in a recognised market on the Dealing Day preceding the Valuation Day (as defined in the appendix relative to each Sub-Fund). The same rule shall supply mutatis mutandis in relation to Classes.

The Board of Directors, in its discretion, may permit some other method of valuation, based on the probable sales price as determined with prudence and in good faith by the Board of Directors, to be used if it considers that such valuation better reflects the fair value of any asset of the Company.

In the event that the quotations of certain assets held by the Company should not be available for calculation of the Net Asset Value per Share of a Sub-Fund, each one of these quotations might be replaced by its last known quotation (provided this last known quotation is also representative) preceding the last quotation or by the last appraisal of the last quotation as of the relevant Valuation Day, as determined by the Board of Directors.

b) The liabilities of the Company shall be deemed to include:

- i) all loans, bills and accounts payable;
- ii) all accrued or payable administrative expenses payable by the Company;
- iii) all known liabilities, present and future, including all matured contractual obligations for payment of money or property;
- iv) an appropriate provision for future taxes based on capital and income to the Dealing Day preceding the Valuation Day, as determined from time to time by the Company, and other reserves, if any, authorised and approved by the directors, in particular those that have been set aside for a possible

- depreciation of the investments of the Company; and
- v) all other liabilities of the Company of whatsoever kind and nature except liabilities represented by shares of the Company. In determining the amount of such liabilities, the Company shall take into account all expenses payable by the Company.

All shares in the process of being redeemed by the Company shall be deemed to be issued until the close of business on the Valuation Day applicable to the redemption. The redemption price is a liability of the Company from the close of business on this date until paid.

All shares issued by the Company in accordance with subscription applications received shall be deemed issued from the close of business on the Valuation Day applicable to the subscription. The subscription price is an amount owed to the Company from the close of business on such day until paid.

The net assets of the Company are expressed in Euro and are at any time equal to the total of the net assets of the various Sub-Funds.

TEMPORARY SUSPENSION OF THE CALCULATION OF THE NET ASSET VALUE PER SHARE

The Company may suspend the calculation of the Net Asset Value of one or more Sub-Funds and the issue, redemption and conversion of any Classes of Shares in the following circumstances:

- (a) during any period when any of the principal stock exchanges or other markets on which a substantial portion of the investments of the Company attributable to such Sub-Fund from time to time is quoted or dealt in is closed otherwise than for ordinary holidays, or during which dealings therein are restricted or suspended;
- (b) during the existence of any state of affairs which constitutes an emergency in the opinion of the Directors as a result of which disposal or valuation of assets owned by the Company attributable to such Sub-Fund would be

- impracticable;
- (c) during any breakdown or restriction in the means of communication normally employed in determining the price or value of any of the investments of such Sub-Fund or the current price or value on any stock exchange or other market in respect of the assets attributable to such Sub-Fund;
- (d) during any period when the Company is unable to repatriate funds for the purpose of making payments on the redemption of Shares of such Sub-Fund or during which any transfer of funds involved in the realisation or acquisition of investments or payments due on redemption of Shares cannot, in the opinion of the Directors, be effected at normal rates of exchange;
- (e) during any period when in the opinion of the Directors of the Company there exist unusual circumstances where it would be impracticable or unfair towards the Shareholders to continue dealing with Shares of any Sub-Fund of the Company or any other circumstance or circumstances where a failure to do so might result in the Shareholders of the Company, a Sub-Fund or a Class of Shares incurring any liability to taxation or suffering other pecuniary disadvantages or other detriment which the shareholders of the Company, a Sub-Fund or a Class of Shares might not otherwise have suffered;
- (f) in the event of (i) the publication of the convening notice to a general meeting of at which a resolution to wind up the Company or a Sub-Fund is to be proposed, or of (ii) the decision of the Board of Directors to wind up one or more Sub-Funds, or (iii) to the extent that such a suspension is justified for the protection of the Shareholders, of the notice of the general meeting of Shareholders at which the merger of the Company or a Sub-Fund is to be proposed, or of the decision of the Board of Directors to merge one or more Sub-Funds;
- (g) when for any other reason beyond the control of the Board of Directors, the prices of any investments owned by the Company attributable to such Sub-Fund cannot promptly or accurately be ascertained;

- (h) where a UCITS in which a Sub-Fund has invested a substantial portion of its assets temporarily suspends the calculation of the net asset value of its shares/units or the repurchase, redemption or subscription of its shares/units, whether on its own initiative or at the request of its competent authorities;
- (i) following the suspension of the calculation of the net asset value per share/unit, the issue, redemption and/or conversion of shares/units, at the level of a master fund in which a Sub-Fund invests in its quality of feeder fund of such master fund.

The suspension of the calculation of the Asset Value of a Sub-Fund shall have no effect on the calculation of the Net Asset Value per Share, the issue, redemption and conversion of Shares of any other Sub-Fund which is not suspended.

Any such suspension shall be promptly notified to Shareholders requesting redemption or conversion of their Shares by the Company at the time of the filing of the written request for such redemption. The Board of Directors may also make public such suspension in such a manner as it deems appropriate.

Suspended subscription, redemption and conversion applications may be withdrawn by written notice provided that the Company receives such notice before the suspension ends.

Suspended subscription, redemption and conversion applications shall be executed on the first Valuation Day following the resumption of Net Asset Value calculation by the Company.

PUBLICATION OF THE NET ASSET VALUE PER SHARE

The Net Asset Value per Share of each Class within each Sub-Fund is made public at the registered office of the Company and is available at the office of the Depositary. The Company may arrange for the publication of this information in leading financial newspapers. The Company cannot accept any responsibility for any error or delay in publication or for non-publication of prices.

III/ Characteristics of the Shares

THE SHARES (ISSUE AND FORM)

After the initial subscription period, as defined in the relevant Appendices, Shares will be issued at the Net Asset Value per Share of the relevant Class (the "**Issue Price**"). Fractions of Shares will be issued as determined for each Class and each Sub-Fund in the relevant Appendices, the Company being entitled to receive the adjustment.

The shares will only be issued in registered form. The share register is conclusive evidence of ownership. The Company treats the registered owner of a Share as the absolute and beneficial owner thereof.

Registered shares are issued in uncertificated form and shall be materialised by an inscription in the register of shareholders unless a share certificate (the "**Share Certificate**") is specifically requested at the time of subscription. Any charges in connection with the issue of Share Certificate will be borne by the investors. When Certificates will be issued, such Certificates will only be in denominations of 1, 10 and 100 shares. Should an investor request Share Certificates, these will, in principle, be delivered in Luxembourg within fifteen calendar days of receipt of payment of the purchase price.

Holders of Shares Certificates must return their Share Certificates, duly renounced, to the Company before redemption instructions may be effected. The uncertificated form of Shares enables the Company to effect redemption instructions without undue delay, and consequently the Board of Directors recommends that investors maintain their Shares in uncertificated form.

Shares are freely transferable (with the exception that Shares may not be transferred to any person who is not a Qualified Holder, as defined under paragraph "Subscription Procedure").

Shares do not carry any preferential or preemptive rights and each Share, irrespective of the Class to which it belongs or its Net Asset Value, is entitled to one vote at all general meetings of shareholders. Fractions of Shares are not entitled to a vote but are entitled to a prorata portion of the Company's performance made to the relevant Shares and of the distribution

proceeds at the time of liquidation of the Company. Shares are issued with no par value and must be fully paid for on subscription.

Upon the death of a shareholder, the Board of Directors reserves the right to require the provision of appropriate legal documentation in order to verify the rights of all and any successors in title to Shares.

No Shares of any Class will be issued by the Company during any period in which the determination of the Net Asset Value of the Shares is suspended by the Company, as noted at under "Temporary Suspension of Calculation of the Net Asset Value".

CLASSES OF SHARES

Within each Sub-Fund, the Company may create different Classes of Shares which are entitled to regular dividend payments ("**Distribution Shares**") or with earnings reinvested ("**Capitalisation Shares**"), or which differ also by the targeted investors, their reference currencies, their currency hedging policy, by the management fees or the subscription/ redemption fees.

Class "**C**" Shares, Class of Shares dedicated to all Investors, capitalizing, listed at least on one stock exchange (please refer to the Chapter V - Secondary Market for UCITS ETF) and which may be expressed in different currencies.

Class "**D**" Shares, Class of Shares dedicated to all Investors, distributing, listed at least on one stock exchange (please refer to the Chapter V - Secondary Market for UCITS ETF) and which may be expressed in different currencies.

Class "**CI**" Shares: Class of Shares dedicated to Institutional Investors within the meaning of the article 174 (2) c) of the 2010 Law, capitalizing and which may be expressed in different currencies.

Class "**DI**" Shares: Class of Shares dedicated to Institutional Investors within the meaning of the article 174 (2) c) of the 2010 Law, distributing and which may be expressed in different currencies.

The amounts invested in the several Classes of Shares of one Sub-Fund are themselves invested in a common underlying portfolio of investments within the Sub-Fund, although the Net Asset Value per Share of each Class of Shares may

differ as a result of either the distribution policy and/or the management fees and/or Structural Costs (as defined hereafter) and/or the subscription and redemption fees for each Class.

For further information on the Classes of Shares, investors should refer to the relevant Appendix for each Sub-Fund.

IV/ Subscription, redemption and conversion procedure on the primary market

The primary market is the market on which Shares are issued by the Company to and/or redeemed by the Company subject to the terms and conditions stated below and in the relevant Appendices (the "**Primary Market**").

The Primary Market regarding Shares of Sub-Funds denominated as UCITS ETF is essentially relevant for the authorized participants of those UCITS ETF.

CONDITIONS FOR SUBSCRIPTION OF SHARES ON PRIMARY MARKET

Subscription Procedure

Subscriptions for Shares can be accepted only on the basis of the current Prospectus and each relevant Key Investor Information Document. The Company will produce an audited annual report (the "**Annual Report**") containing the audited accounts and an unaudited semi-annual report (the "**Semi-annual Report**"). Following the publication of the first of either report, the current Prospectus at that date will be valid only if accompanied by such Annual Report or Semi-annual Report if more recent. These reports in their latest version will form an integral part of the Prospectus.

An investor's first subscription for Shares must be made to the Registrar and Transfer Agent in Luxembourg or to the Nominee (as more described under paragraph "Management and Administration") as indicated on the subscription form (the "**Subscription Form**"). Subsequent subscriptions for Shares may be made in writing or by fax.

The application for subscription of Shares must include a number of Shares the shareholder wishes to subscribe and the Class(es) and Sub-Fund(s) for which Shares are to be subscribed.

The Company reserves the right to reject, in whole or in part, any subscription without giving any reason therefore.

Subscriptions for Shares received by the Registrar and Transfer Agent on any Dealing Day (as defined in the Appendix of each Sub-Fund) before any Sub-Fund Subscription Deadline (as defined in the Appendix of each Sub-Fund), will be processed on that Dealing Day for Subscription, using the Net Asset Value per Share calculated on the applicable Valuation Day, as defined in the relevant Appendices, and which will be based on the last available closing prices or other reference prices as specified in the relevant Appendices.

All applications for subscription will be dealt at an unknown Net Asset Value ("forward pricing").

Different time limits may apply if subscriptions for Shares are made through a Distributor/Nominee but in any case, the Nominee/Distributor will make sure that on a given Dealing Day (as defined in the Appendix of each Sub-Fund), subscription orders are received by the Registrar and Transfer Agent before the Subscription Deadline. No Distributor/Nominee is permitted to withhold subscription orders to benefit personally from a price change. Investors should note that they might be unable to purchase or redeem Shares through a Distributor/Nominee on days that such Distributor/Nominee is not open for business.

Any applications for subscription received after the Subscription Deadline on the relevant Dealing Day will be processed on the next Dealing Day on the basis of the Net Asset Value per Share determined as of the relevant Valuation Day.

Payment for Shares must be received by the Depositary, as more fully described in each relevant Appendix in the Reference Currency of the relevant Sub-Fund, being the currency in which the Shares of a determined Class may be purchased.

The Company may, at its discretion, decide to accept securities as valid consideration for a subscription provided that these comply with the investment policy and restrictions of the relevant Sub-Fund. Shares will only be issued upon receipt of the securities being transferred as payment

in kind. Such subscription in kind, if made, will be reviewed and the value of the assets so contributed verified by the auditor of the Company. A report will be issued detailing the securities transferred, their respective market values of the day of the transfer and the number of shares issued and such report will be available at the office of the Company. Exceptional costs resulting from a subscription in kind will be borne exclusively by the relevant subscriber.

The Company only accepts the ownership of Shares by any person, firm, partnership or corporate body provided that those holders comply with Luxembourg laws and regulations. Therefore the Company may restrict or prevent the ownership of Shares if it may result in a breach of any Luxembourg law or regulation.

As the Company is not registered under the United States Securities Act of 1933, as amended, neither registered under the United States Investment Company Act of 1940, as amended, its Shares may not be offered or sold, directly or indirectly, in the United States of America or its territories or possessions or areas subject to its jurisdiction, or to citizens or residents thereof.

Accordingly, the Company may require any subscriber to provide it with any information that it may consider necessary for the purpose of deciding whether or not he is, or will be, a Qualified Holder.

"Qualified Holder" means any person who:

- a) is authorized to own Shares pursuant to the Luxembourg laws and regulations; and
- b) is not a US Person and is a Qualified Purchaser (as defined in the US Investment Company Act of 1940 as amended); and
- c) is not a Benefit Plan Investor (as defined in the US Employee Retirement Income Security Act of 1974, as amended); and
- d) is not, or is not related to, a citizen or resident of the United States of America, a US partnership, a US corporation or a certain type of estate or trust insofar as the ownership of any Shares or any other equity securities of the Company by such person would materially increase the risk that the

Company could be or become a "controlled foreign corporation" within the meaning of the US Internal Revenue Code of 1986, as amended.

The Company retains the right to offer only one Class of Shares for subscription in any particular jurisdiction in order to conform to local law, custom, business practice or the Company's commercial objectives.

Payment Procedure

The currency of payment for Shares of each Sub-Fund will be the Reference Currency as more fully described in the relevant appendices. A subscriber may, however with the agreement of the Administrative Agent, effect payment in any other freely convertible currency. The Administrative Agent will arrange for any necessary currency transaction to convert the subscription monies from the currency of subscription (the "**Subscription Currency**") into the Reference Currency of the relevant Sub-Fund. Any such currency transaction will be effected with the Depositary at the subscriber's cost and risk. Currency exchange transactions may delay any issue of Shares since the Administrative Agent may choose at its option to delay executing any foreign exchange transaction until cleared funds have been received.

A Subscription Form accompanies this Prospectus and may also be obtained from the Registrar and Transfer Agent or the Nominee.

If timely payment for Shares is not made, the relevant issue of Shares may be cancelled (or postponed if a Share Certificate has to be issued) and a subscriber may be required to compensate the Company for any loss incurred in relation to such cancellation.

Notification of Transaction

A confirmation statement will be sent to the subscriber (or his nominated agent if so requested by the subscriber) as soon as reasonably practicable, providing full details of the transaction. Subscribers should always check this statement to ensure that the transaction has been accurately recorded.

Subscribers are given a personal account number (the "**Account Number**") on acceptance of their initial subscription, and

this, together with the shareholder's personal details, is proof of their identity to the Company. The Account Number should be used by the shareholder for all future dealings with the Company and the Registrar and Transfer Agent.

Any change to the shareholder's personal details, loss of Account Number or loss of or damage to a Share Certificate, must be notified immediately to the Registrar and Transfer Agent. Failure to do so may result in the delay of an application for redemption. The Company reserves the right to require an indemnity or other verification of title or claim to title countersigned by a bank, stockbroker or other party acceptable to it before accepting such changes.

If any subscription is not accepted in whole or in part, the subscription monies or the balance outstanding will be returned to the subscriber by post or bank transfer at the subscriber's risk.

Rejection of Subscriptions

The Company may reject any subscription in whole or in part, and the Board of Directors may, at any time and from time to time and in its absolute discretion without liability and without notice, discontinue the issue and sale of Shares of any Class in any one or more Sub-Funds.

Suspension of the calculation of the Net Asset Value

No Shares will be issued by the Company during any period in which the calculation of the Net Asset Value of the relevant Sub-Fund is suspended by the Company pursuant to the powers contained in the articles of incorporation of the Company (the "**Articles of Incorporation**") and as discussed under paragraph "Temporary Suspension of Calculation of Net Asset Value per Share".

Notice of suspension will be given to subscribers, and subscriptions made or pending during a suspension period may be withdrawn by notice in writing received by the Company prior to the end of the suspension period. Subscriptions not withdrawn will be processed on the first Dealing Day following the end of the suspension period, on the basis of the Net Asset Value per Share determined on the applicable Valuation Day.

Money Laundering Prevention

Pursuant to international rules and Luxembourg laws and regulations comprising, but not limited to, the law of November 12, 2004 on the fight against money laundering and financing of terrorism, as amended, and circulars of the supervising authority, obligations have been imposed on all professionals of the financial sector to prevent the use of undertakings for collective investment for money laundering and financing of terrorism purposes. As a result of such provisions, the Registrar and Transfer Agent must in principle ascertain the identity of the subscriber in accordance with Luxembourg laws and regulations. The Registrar and Transfer Agent may require subscribers to provide any document it deems necessary to effect such identification.

In case of delay or failure by an applicant to provide the documents required, the application for subscription (or, if applicable, for redemption) will not be accepted. Neither the Company nor the Registrar and Transfer Agent have any liability for delays or failure to process deals as a result of the applicant providing no or only incomplete documentation.

Shareholders may be requested to provide additional or updated identification documents from time to time pursuant to ongoing client due diligence requirements under relevant laws and regulations.

Subscription Charges

The subscription price of the Shares (the "**Subscription Price**") is defined as the "Initial Price" or the "Issue Price" as described in the section "The Shares (issue and form)" plus any subscription charge (the "**Subscription Charge**") and any entry fee (as described below as "**Entry fee**").

An Entry fee representing a percentage of the Subscription Price may be added to the Subscription Price in favour of the Sub-Fund in order to cover the portfolio transactions costs. This commission shall be applied to subscription orders implying a portfolio restructuring. Unless otherwise instructed by the Management Company, simultaneous subscriptions and redemptions for the same amount of the same Sub-Fund shall not involve any portfolio transactions costs.

Detailed information on the Subscription Charge and Entry fee are contained in the relevant Appendices of the relevant Sub-Fund.

CONDITIONS FOR REDEMPTION OF SHARES ON PRIMARY MARKET

Redemption of Shares

Shares of any Class may be redeemed in whole or in part on any Dealing Day on the basis of the Net Asset Value per Share determined on the applicable Valuation Day as described below (the "**Redemption Price**"). Shares redeemed shall be cancelled immediately in the Company's Share Register. Each Sub-Fund shall at all times have enough liquidity to enable satisfaction of any requests for redemption of Shares.

Procedure for Redemption

Shareholders wishing to have all or some of their Shares redeemed by the Company may apply to do so by fax or by letter to the Registrar and Transfer Agent or to the Nominee.

The application for redemption of Shares must include:

- (a) either (i) the monetary amount the shareholder wishes to redeem; or (ii) the number of Shares the shareholder wishes to redeem, and
- (b) the Class and Sub-Funds from which Shares are to be redeemed.

In addition, the application for redemption must include the shareholder's personal details together with his Account Number and the registered Share Certificate if applicable. Failure to provide any of the aforementioned information may result in delay of such application for redemption whilst verification is being sought from the shareholder.

Subject to the provisions explained below under "Temporary Suspension of Redemption", applications for redemption will be considered as binding and irrevocable by the Company and must be duly signed by all registered shareholders, save in the case of joint registered shareholders where an acceptable power of attorney has been provided to the Company. Applications for redemption from all Sub-Funds must be received at the specified time determined in the relevant Appendices

by the Registrar and Transfer Agent before the Redemption Deadline (as defined in the Appendix of each Sub-Fund), and will be processed on that Dealing Day. The Redemption Price being the Net Asset Value per Share calculated on the applicable Valuation Day, as defined in the relevant Appendices, and which will be based on the last available closing prices or other reference prices as specified in the relevant Appendices on the Valuation Day.

All applications for redemption will be dealt at an unknown Net Asset Value ("forward pricing").

A redemption fee may be levied as more fully described in the relevant Appendices.

Any application for redemption received after the Redemption Deadline on the relevant Dealing Day will be processed on the next Dealing Day on the basis of the Net Asset Value per Share determined as of the relevant Valuation Day.

A confirmation statement will be sent to the shareholder detailing the redemption proceeds due thereto as soon as reasonably practicable after determination of the Redemption Price of the Shares being redeemed. Shareholders should check this statement to ensure that the transaction has been accurately recorded.

The Redemption Price of Shares in any Class may be higher or lower than the Initial Subscription Price paid by the shareholder depending on the Net Asset Value per Share of the Class at the time of redemption.

Payment for Shares redeemed will be effected in the delay determined in the relevant Appendices. If necessary, the Administrative Agent will arrange the currency transaction required for conversion of the redemption monies from the Reference Currency of the relevant Class into the relevant Subscription Currency. Such currency transaction will be effected with the Depositary at the relevant shareholder's cost.

The Board of Directors reserves the right to delay payment for a further five Luxembourg Business Days, without interest accruing, if market conditions are unfavourable, and it is, in the Board of Directors' reasonable opinion, in the best interest of the remaining shareholders. However, the delay for the

payment of redeemed Shares will not exceed 10 Luxembourg Business Days.

All redeemed Shares shall be cancelled by the Company.

Redemption in kind

The Company will have the right, if the Board of Directors so determines and with the consent of the shareholder concerned, to satisfy payment in kind of the redemption price to any shareholder by allocating to such shareholder investments from the portfolio set up in connection with such classes of shares equal in value as of the Valuation Day on which the redemption price is calculated to the value of shares to be redeemed. The nature and type of assets to be transferred in such case shall be determined on a fair and reasonable basis and without prejudicing the interests of the other shareholders of the relevant Sub-Fund, and the valuation used shall be confirmed by a special report of the Company's auditor. The cost of such transfer shall be borne by the shareholder involved.

Temporary Suspension of Redemption

The right of any shareholder to require the redemption of its Shares of the Company will be suspended during any period in which the calculation of the Net Asset Value per Share of the relevant Sub-Fund is suspended by the Company pursuant to the powers as discussed under paragraph "Temporary Suspension of Calculation of the Net Asset Value". Notice of the suspension period will be given to any shareholder tendering Shares for redemption. Withdrawal of an application for redemption will only be effective if written notification is received by the Registrar and Transfer Agent before termination of the period of suspension, failing which the Shares in question will be redeemed on the first Dealing Day following the end of the suspension period on the basis of the next Net Asset Value per Share determined.

Compulsory Redemption

If the Company discovers at any time that Shares are owned by any person who is not a Qualified Holder, either alone or in conjunction with any other person, whether directly or indirectly, the Board of Directors may at their discretion and without liability, compulsorily redeem the Shares at the Redemption Price as described above after

giving notice of at least ten calendar days, and upon redemption, the person who is not a Qualified Holder will cease to be the owner of those Shares. The Company may require any shareholder to provide it with any information that it may consider necessary for the purpose of determining whether or not such owner of Shares is or will be a Qualified Holder.

Procedures for Redemptions and Conversions representing 10% or more of the net assets of any Sub-Fund

If any application for redemption or conversion is received in respect of any one Valuation Day (the "**First Valuation Day**"), which either singly or when aggregated with other such applications so received, represents more than 10% of the Net Asset Value of any Sub-Fund, the Company reserves the right, in its sole and absolute discretion and without liability (and in the reasonable opinion of the Board of Directors to do so is in the best interest of the remaining shareholders), to scale down pro rata each application with respect to such First Valuation Day so that not more than 10% of the Net Asset Value of the Sub-Funds be redeemed or converted on such First Valuation Day.

To the extent that any application for redemption or conversion is not given full effect on such First Valuation Day by virtue of the exercise by the Company of its power to pro-rate applications, such application shall be treated with respect to the unsatisfied balance thereof as if a further request had been made by the shareholder in question in respect of the next Valuation Day and, if necessary, subsequent Valuation Days, until such application shall have been satisfied in full.

With respect to any application received in respect of the First Valuation Day, to the extent that subsequent applications shall be received in respect of following Valuation Days, such later applications shall be postponed in priority to the satisfaction of applications relating to the First Valuation Day, but subject thereto shall be dealt with as set out above.

Redemption Charges

The redemption price of the Shares (the "**Redemption Price**") is defined as the "Initial Price" or the "Issue Price" as described in the section "The Shares (issue and form)" plus any redemption charge (the

"**Redemption Charge**") and any exit fee (as described below as an "**Exit fee**").

An Exit fee representing a percentage of the Redemption Price may be added to the Redemption Price in favour of the Sub-Fund in order to cover the portfolio transactions costs. This commission shall be applied to redemption orders implying a portfolio restructuring. Unless otherwise instructed by the Management Company, simultaneous subscriptions and redemptions for the same amount of the same Sub-Fund shall not involve any portfolio transactions costs.

Detailed information on the Redemption Charge and Entry fee are contained in the relevant Appendices of the relevant Sub-Fund.

CONDITIONS FOR CONVERSION OF SHARES

Unless otherwise mentioned in the Appendices, conversions of Shares between Sub-Funds and between Classes of Shares are possible as detailed hereunder. Also, unless otherwise mentioned in the Appendices, no conversion fee will be levied.

Shareholders may convert all or part of their Shares into Shares of another Class of the same Sub-Fund or of other Sub-Funds by application in writing or by fax to the Registrar and Transfer Agent or the Nominee, stating which Shares are to be converted into which Sub-Funds and/or Classes.

The application for conversion must include either the monetary amount the shareholder wishes to convert or the number of Shares the shareholder wishes to convert. In addition, the application for conversion must include the shareholder's personal details together with his Account Number, (and if applicable) the registered Share Certificate. Failure to provide any of this information may result in delay of the application for conversion.

Applications for conversion must be received by the Registrar and Transfer Agent in the delay described in the relevant Appendices before the conversion deadline, which is 5 p.m. in Luxembourg (the "**Conversion Deadline**" as defined in the Appendix of each Sub-Fund), and will be processed on that Dealing Day, using the Net Asset Value calculated on the

applicable Valuation Day, as defined in the relevant Appendices, which will be based on the last available closing prices or other reference prices as specified in the relevant Appendices on such Valuation Day.

All applications for conversion will be dealt at an unknown Net Asset Value ("forward pricing").

Any application received after the Conversion Deadline on Dealing Day will be processed on the next Dealing Day, on the basis of the Net Asset Value per Share determined as of the relevant Valuation Day.

Applications for conversion on any one Valuation Day, which either singly or when aggregated with other such applications so received, represent more than 10% of the Net Asset Value of any one Sub-Fund, may be subject to additional procedures set forth under paragraph "Procedures for Redemptions and Conversions Representing 10% or more of the net assets of any Sub-Fund."

The rate at which all or part of the Shares in an original Sub-Fund are converted into Shares in a new Sub-Fund or a new Class of Shares is determined in accordance with the following formula:

$$A = \frac{(B \times C \times D)}{E}$$

where:

- A is the number of Shares to be allocated in the new Sub-Fund/Class;
- B is the number of Shares of the original Sub-Fund/Class to be converted;
- C is the Net Asset Value per Share of the original Sub-Fund/Class as of the relevant Valuation Day;
- D is the actual rate of exchange on the day concerned in respect of the Reference Currency of the original Sub-Fund/Class and the Reference Currency of the new Sub-Fund/Class;
- E is the Net Asset Value per Share of the new Sub-Fund/Class as of the relevant Valuation Day.

Following such conversion of Shares, the Administrative Agent will inform the shareholder of the number of Shares of the new Sub-Fund/Class obtained by conversion and the price thereof.

V/ Secondary Market for UCITS ETF

LISTING ON THE STOCK EXCHANGE

The intention of the Company is for each of its Sub-Funds denominated as UCITS ETF (as mentioned in the corresponding Appendix, if applicable), to have all of its Share class traded throughout the day on at least one regulated market or multilateral trading facility with at least one market maker which takes action to ensure that the stock exchange value of its Share class does not significantly vary from its Net Asset Value and where applicable its Indicative Net Asset Value (as defined below).

It is contemplated to make an application to list the Classes of Shares of the Sub-Funds denominated as UCITS ETF on one or several stock exchanges.

A list of these stock exchanges where the Shares can be bought and sold can be obtained from the registered office of the Company.

Unless otherwise mentioned in the relevant Appendices, the main market maker for all the Sub-Funds denominated as UCITS ETF is Société Générale Paris office. For the avoidance of doubt, other market makers (whether or not member of the Société Générale's group) could be appointed from time to time by the Company in respect of one or several stock exchange on which the certain shares classes are listed.

INDICATIVE NET ASSET VALUE PER SHARE

The Company may at its discretion make available, or may designate other persons to make available on its behalf, on each Business Day, an intra-day net asset value (the "iNAV") for one or more Sub-Funds considered as UCITS ETF. If the Company or its designee makes such information available on any Business Day, the iNAV will be calculated based upon information available during the trading day or any portion of the trading day, and will ordinarily be based upon the current value of the assets/exposures, adjusted by the relevant foreign exchange rate, as the case may be,

of the Sub-Fund and/or the considered financial index in effect on such Business Day, together with any cash amount in the Sub-Fund as at the previous Business Day. The Company or its designee will make available an iNAV if this is required by any relevant stock exchange.

An iNAV is not, and should not be taken to be or relied on as being, the value of a Share or the price at which Shares may be subscribed for or redeemed or purchased or sold on any relevant stock exchange. In particular, any iNAV provided for any Sub-Fund where the constituents of the concerned financial index are not actively traded during the time of publication of such iNAV may not reflect the true value of a Share, may be misleading and should not be relied on.

Investors should be aware that the calculation and reporting of any iNAV may reflect time delays in the receipt of the prices of the relevant constituent securities in comparison to other calculated values based upon the same constituent securities including, for example, the concerned financial index or the iNAV of other exchange traded funds based on the same concerned financial index. Investors interested in buying or selling Shares on a relevant stock exchange should not rely solely on any iNAV which is made available in making investment decisions, but should also consider other market information and relevant economic and other factors (including, where relevant, information regarding the concerned financial index, the relevant constituent securities and financial instruments based on the concerned financial index corresponding to the relevant Sub-Fund).

PURCHASE AND SALE PROCEDURE ON THE SECONDARY MARKET

The secondary market is the market on which the Shares can be purchased and/or sold directly on the stock exchanges (the **“Secondary Market”**).

For all purchases and/or sales of Shares made on the Secondary Market, no minimum purchase and/or sale is required other than the minimum that may be required by the relevant stock exchange.

The Company will not charge any purchase or sale fee in relation to the purchase or sale of the Shares of UCITS ETF on any exchange where they are listed. However,

some market intermediaries may charge broker fees or other kind of fees. The Company does not receive these fees.

The Shares of the Sub-Funds purchased on the Secondary Market are generally not redeemable from the Company. Investors must buy and sell the Shares on the Secondary Market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying Shares and may receive less than the current net asset value when selling them.

In the event of a Suspension of the Secondary Market (as defined below), not based on an Index Liquidity Event (as defined below), the Management Company will allow shareholders to redeem their Shares on the Primary Market at a price based at the applicable Net Asset Value per Share, provided that the Net Asset Value per Shares is not itself suspended under the applicable regulations and/or the Prospectus and/or the Articles of Incorporation.

“Suspension of the Secondary Market” means any situation where it is impossible for shareholders to sell their Shares on all the stock exchanges where the considered Sub-Fund is listed for a period of at least of three Business Days since the occurrence of (i) the suspension of quotation by the market operator or (ii) the impossibility to trade observed by all shareholders on the considered stock exchange, and which is based on either:

- i. the significant variation of the stock exchange value of the considered listed Shares of the Sub-Fund in comparison with its indicative net asset value;
- ii. the lack of authorized participants, or the inability by the authorized participants to meet their commitment to conduct their business by means of a permanent presence on the market, thus making it impossible to trade the considered Shares on the considered place of quotation to which the share class is admitted.

“Index Liquidity Event” means any market disruption event and/or any liquidity issue affecting part or all the components of the

Index, which leads to a suspension of their market appreciation.

Upon Suspension of the Secondary Market, the following redemption procedure (the “**Procedure**”) will apply. Redemption orders initiated in case of Suspension of the Secondary Market shall be sent by any considered Shareholder to the financial intermediary acting as account keeper of its Shares (the “**Relevant Intermediary**”) and shall contain (i) the number of Shares to be redeemed and the (ii) targeted redemption date and (ii) a copy of the notice published by the Management Company on its website (www.lyxoretff.com) and presenting the decision to extend the Primary Market (the “**Extended Primary Market Notification**”) for any considered Share Class of a Sub-Fund.

Redemption orders dealt in those circumstances shall be relayed, through the Relevant Intermediary, to a member of Euroclear France and then transmitted by such member to the pre-centralization agent of the considered Sub-Fund “**Société Générale SGSS/CHB/SET/DIR/NANT, 32 avenue du Champ de Tir, BP 81 236, 44312 NANTES CEDEX 3, FRANCE**”.

The aforementioned pre-centralisation agent will forward the redemption orders to the Registrar and Transfer Agent.

Depending on the arrangements in place between the Relevant Intermediary and the other investment firms involved in the redemption chain, additional constraints, delays or intermediary fees could be applicable, and the Shareholders are invited to contact their Relevant Intermediary in order to obtain additional information about those eventual constraints and/or fees (being understood that such Intermediary fees will not benefit to the Management Company).

The foregoing is a summary of the Procedure which will be further detailed in the Extended Primary Market Notification.

Redemption orders dealt with in these circumstances in accordance of the terms of the Procedure will not be subject to the potentially applicable minimum redemption thresholds and the redemption costs should only consist in the exit charge as described for each Sub-Fund in the relevant Appendix.

VI/ Miscellaneous

COMPANY CHARGES

The Company (or each Sub-Fund or Classes of Shares if relevant on a pro rata basis) will pay a total fee, as a percentage of its Net Asset Value. This total fee will cover both (i) the structural costs and (ii) compensate the Management Company for the services provided in relation to the relevant Sub-Fund. The total fee may be paid by the Company either directly to the Management Company (which may in turn pay the Service Provider when applicable) or directly to the relevant Service Providers as defined below.

Are deemed to constitute structural cost (hereafter the “**Structural Cost**”) the fees and expenses of the Company which are generally based on the net assets of the relevant Sub-Funds or Classes of Shares if relevant and which include but are not limited to: taxes, establishment expenses, expenses for legal and auditing services, costs of any proposed listings, maintaining such listings, printing share certificates, shareholders’ reports, costs associated with information to shareholders in any form, Prospectuses, Key Investor Information Documents, translation costs, all reasonable out-of-pocket expenses of the members of the Board of Directors, registration fees and other expenses payable to supervisory authorities in any relevant jurisdictions, foreign registration costs, insurance costs, interests and the costs of publication of the Net Asset Value per Share of each Sub-Fund, the transfer agent fee, depositary and paying agent fee, distributor and nominee agent fee, administrative agent fee, corporate an domiciliary agent fee, fees payable to index sponsors, if applicable.

Such Structural Costs also include all other costs incurred by the Management Company in maintaining and operating the Sub-Funds.

For avoidance of doubt, the brokerage fees are excluded from the “**Total Fee**”.

DISTRIBUTION POLICY

Unless otherwise (i) mentioned in the Appendices or (ii) decided by the Board of Directors, the Company does not intend to distribute all or part of either its investment income or the net capital gains realised. The Board of Directors shall therefore recommend the reinvestment of the results

of the Company and as a consequence no dividend shall be paid to shareholders.

In any case, no distribution of dividends may be made if, as a result, the share capital of the Company would fall below the minimum capital required by the Luxembourg law.

Notwithstanding, the Board of Directors may propose to the Annual General Meeting of Shareholders the payment of a dividend if it considers it is in the interest of the Shareholders; in this case, subject to approval of the Shareholders, a cash dividend may be distributed out of the available net investment income and the net capital gains of the Company.

Upon proposal of the Board of Directors, the Annual General Meeting of Shareholders may also decide to distribute to the Shareholders a dividend in the form of Shares of one or more Sub-Funds, in proportion to the existing Shares of the same Sub-Fund, if any, already held by each Shareholder.

In relation to the Distribution Shares existing in certain Sub-Funds (please refer to Appendices), it is intended that the Company will distribute dividends in the form of cash in the relevant Sub-Fund's Reference Currency. Annual dividends are declared separately in respect of such Distribution Shares at the Annual General Meeting of Shareholders. In addition, the Directors may declare interim dividends.

The Board of Directors may decide also that dividends be automatically reinvested by the purchase of further Shares. In such case, the dividends will be paid to the Registrar and Transfer Agent who will reinvest the money on behalf of the Shareholders in additional Shares of the same Class. Such Shares will be issued on the payment date at the Net Asset Value per Share of the relevant Class in non-certificated form. Fractional entitlements to registered Shares will be recognised for each Class according to the mention determined in the relevant Appendix.

Declared dividends not claimed within five years of the due date will lapse and revert to the Company. No interest shall be paid on a dividend declared and held by the Company at the disposal of its beneficiary.

TAXATION

The information set forth below is based on law and administrative practice in Luxembourg as at the date of this Prospectus and may be subject to modification thereof. The Company, the Management Company and their affiliates do not provide tax advice. The tax treatment of investments will depend on an individual's circumstances. If investors are in any doubt as to their tax position, they must consult with an appropriate professional tax adviser.

The Company

At the date of this Prospectus, the Company is not liable to any Luxembourg tax other than a once-and-for-all tax of EUR 1,250.- that was paid by the Company upon incorporation.

Investment income from dividends and interest received by the Company may be subject to withholding taxes at varying rates. Such withholding taxes are not usually recoverable.

Shareholders

The Council of the European Union has adopted, on 3 June 2003, the European Savings Directive 2003/48/EC of the Council on savings income in the forms of interest implemented into Luxembourg National Law by the law of 12 April 2005 (the "**2005 Law**"). According to the provision of the 2005 Law, a taxation may apply to individual resident of a Member State of the European Unions who have invested assets in another Member State of the European Union.

The EU Savings Directive has been repealed by Council Directive of 2015/2060 of 10 November 2015 with effect from 1 January 2016. However, for a transitional period, the EU Savings Directive shall continue to apply and notably regarding reporting obligations and scope of information to be provided by the Luxembourg paying agent (within the meaning of the EU Savings Directive) and regarding obligations of the EU Member States in respect of the issuance of the tax residence certificate and elimination of double taxation.

As a consequence of the repeal of the EU Savings Directive, the 2005 Law will no longer apply, save for the provisions related to the above mentioned obligations and

within the transitional period foreseen by the said Council Directive.

On 9 December 2014, the Council of the European Union adopted Directive 2014/107/EU amending Directive 2011/16/EU of 15 February 2011 on administrative cooperation in the field of taxation, which now provides for an automatic exchange of financial account information between EU Member States ("**DAC Directive**"), including income categories contained in the EU Savings Directive. The adoption of the aforementioned directive implements the OECD Common Reporting Standard and generalizes the automatic exchange of information within the European Union as of 1 January 2016.

Thus, the measures of cooperation provided by the EU Savings Directive are to be replaced by the implementation of the DAC Directive which is also to prevail in cases of overlap of scope. As Austria has been allowed to start applying the DAC Directive up to one year later than other Member States, special transitional arrangements taking account of this derogation apply to Austria.

In addition, Luxembourg signed the OECD's multilateral competent authority agreement ("**Multilateral Agreement**") to automatically exchange information under the CRS. Under this Multilateral Agreement, Luxembourg will automatically exchange financial account information with other participating jurisdictions as of 1 January 2016.

The Luxembourg law of 18 December 2015 relating to the automatic exchange of information in tax matters that implements the DAC Directive and the Multilateral Agreement in Luxembourg has been published in the official journal on 24 December 2015 and is effective as from 1 January 2016 (the "**CRS Law**").

Shareholders should get information about, and where appropriate take advice on, the impact of the changes to the EU Savings Directive, the implementation of the DAC Directive and the Multilateral Agreement in Luxembourg and in their country of residence on their investment.

AUTOMATIC EXCHANGE OF INFORMATION

The Company may be subject to the Standard for Automatic Exchange of Financial Account Information in Tax matters (the "**Standard**") and its Common Reporting Standard (the "**CRS**") as set out in the CRS Law.

Under the terms of the CRS Law, the Company is likely to be treated as a Luxembourg Reporting Financial Institution. As such, as of 30 June 2017 and without prejudice to other applicable data protection provisions as set out in the Company documentation, the Company will be required to annually report to the Luxembourg tax authority (the "**LTA**") personal and financial information related, inter alia, to the identification of, holdings by and payments made to (i) certain investors as per the CRS Law (the "**Reportable Persons**") and (ii) the controlling persons (i.e. the natural persons who exercise control over an entity, in accordance with the Financial Action Task Force Recommendations - the "**Controlling Persons**") of certain non-financial entities ("**NFEs**") which are themselves Reportable Persons. This information, as exhaustively set out in Annex I of the CRS Law (the "**Information**"), will include personal data related to the Reportable Persons.

The Company's ability to satisfy its reporting obligations under the CRS Law will depend on each investor providing the Company with the Information, along with the required supporting documentary evidence. In this context, the investors are hereby informed that, as data controller, the Company will process the Information for the purposes as set out in the CRS Law. The investors undertake to inform their Controlling Persons, if applicable, of the processing of their Information by the Company.

The investors are further informed that the Information related to Reportable Persons within the meaning of the CRS Law will be disclosed to the LTA annually for the purposes set out in the CRS Law. In particular, the investors are also informed that the Management Company or its delegates may from time to time require the investors to provide information in relation to their identity and fiscal residence of financial account holders (including certain entities and their Controlling Persons) in order to ascertain their CRS status and report

information regarding a shareholder and his/her/its account to the LTA.

The investors further undertake to immediately inform the Company of, and provide the Company with all supporting documentary evidence of any changes related to the Information after occurrence of such changes.

Any investor that fails to comply with the Company's Information or documentation requests may be held liable for penalties imposed on the Company and attributable to such investor's failure to provide the Information or subject to disclosure of the Information by the Company to the LTA, in accordance with the applicable domestic legislation.

The Company reserves the right to refuse any application for Shares if the information provided or not provided does not satisfy the requirements under the CRS Law.

Investors should consult their professional advisors on the possible tax and other consequences with respect to the implementation of the CRS.

THE COMPANY - GENERAL INFORMATION

The Company has been incorporated on 29 March 2006 under Luxembourg laws as a "*société d'investissement à capital variable*" for an unlimited period of time with a constitutive capital of EUR 31,100. The Company is subject to Part I of the 2010 Law. Its registered office is established in Luxembourg.

The Articles of Incorporation have been deposited with the *Registre de Commerce et des Sociétés* of Luxembourg and shall be published in the *Mémorial C Recueil des Sociétés et Associations* (the "*Mémorial*") of 14 April 2006. The Company has been registered with the *Registre de Commerce et des Sociétés* of Luxembourg under number B 115 129.

The Articles of Incorporation may be amended from time to time by a general meeting of shareholders, subject to the quorum and majority requirements provided by the laws of Luxembourg.

The Company is established as an umbrella fund and will issue Shares in different Classes in the different Sub-Funds. The

Directors shall maintain for each Sub-Fund a separate portfolio.

Vis-à-vis third parties, the Company shall constitute one single legal entity, but by derogation from article 2093 of the Luxembourg Civil Code, the assets of a particular Sub-Fund are only applicable to the debts, engagements and obligations of that Sub-Fund. The assets, commitments, charges and expenses which cannot be allocated to one specific Sub-Fund will be charged to the different Sub-Funds proportionally to their respective net assets, and prorata temporis, if appropriate due to the amounts considered.

In relation between shareholders, each Sub-Fund is treated as a separate legal entity.

For consolidation purposes, the base currency of the Company is the EURO.

MANAGEMENT AND ADMINISTRATION

The Board of Directors

The Board of Directors, whose members' names (the "**Directors**") appear on the first pages of this Prospectus, is responsible for the information contained in this Prospectus. They have taken all reasonable care to ensure that at the date of this Prospectus, the information contained herein is accurate and complete in all material respects. The Board of Directors accepts responsibility accordingly.

Despite the delegation by the Company of the management and administration functions to the Management Company (as described in the next paragraph), the Board of Directors remains responsible for the Company's management, control, administration and the determination of its overall investment objectives and policies.

There are no existing or proposed service contracts between any of the Directors and the Company, although the Directors are entitled to receive remuneration in accordance with usual market practice.

The Management Company

Pursuant to the 2010 Law, the Board of Directors has designated Lyxor International Asset Management to act as its management company.

The Management Company has been incorporated on June 12, 1998 for 99 (ninety

nine) years. Its registered office is established in France.

The Management Company has been designated pursuant to a Main Delegation Agreement concluded between the Management Company and the Company as may be amended from time to time. This agreement is for an indefinite period of time and may be terminated by either party upon 120 days' notice.

The Management Company's main object is the management, the administration and the marketing of UCITS.

As of the date of the Prospectus, the Management Company also acts as management company for other investment funds. The names of these other funds are available upon request from the Management Company.

The Management Company shall be in charge of the management and administration of the Company and the distribution of Shares in Luxembourg and abroad.

As of the date of this Prospectus, the Management Company has delegated certain functions to the entities described here below.

The Management Company has established a remuneration policy in compliance with the applicable regulations. Such policy complies with the economic strategy, the objectives, the values and the interests of the Management Company and the funds managed by it as well as with those of the investors in such funds, and it includes measures intended to avoid conflicts of interests.

The remuneration policy of the Management Company implements a balanced regime under which the remuneration of the relevant employees is notably based on the principles listed below:

- the remuneration policy of the Management Company shall be compatible with sound and efficient risk management, shall favour it and shall not encourage any risk-taking which would be incompatible with the risk profiles, this prospectus or the other constitutive documents of the funds managed by the Management Company;
- the remuneration policy has been adopted by the supervisory board of the Management Company, which shall adopt

and review the general principles of the said policy at least once a year;

- the staff carrying out control functions shall be remunerated depending on the achievement of the objectives related to their functions, independently of the performance of the business areas which they control;

- when remuneration varies according to performance, its total amount shall be established by combining the valuation both in respect of the performances of the relevant person and operational units or the relevant funds and in respect of their risks with the valuation of the overall results of the Management Company when individual performances are valued, taking into account financial and non-financial criteria;

- an appropriate balance shall be established between the fixed and variable components of the overall remuneration;

- beyond a certain threshold, a substantial portion which in any event amounts to at least 50% of the whole variable component of the remuneration shall consist of exposure to an index the components and functioning rules of which allow for an alignment of the interests of the relevant staff with those of investors;

- beyond a certain threshold, a substantial portion which in any event amounts to at least 40% of the whole variable component of the remuneration shall be carried over during an appropriate period of time;

- the variable remuneration, including the portion which has been carried over, shall be paid or acquired only if it is compatible with the financial situation of the Management Company as a whole and if it is justified by the performances of the operational unit, of the funds and of the relevant person.

The details of the remuneration policy are available on the following website: <http://www.lyxor.com/en/the-company/policies-tax/>.

The Distributor and Nominee Agent

The Management Company, may delegate under its responsibility and control to one or several banks, financial institutions and other authorised Intermediaries as Distributors and Nominees to offer and sell the Shares to investors and handle the subscription, redemption, conversion or transfer requests of shareholders. Subject to the law of the countries where Shares are offered, such Intermediaries may, with the agreement of the Board of Directors, and the Depositary, act as nominees for the investor.

In this capacity, the Intermediary shall apply for the subscription, conversion or redemption of Shares for the account of its client and request registration of such operations in the Sub-Fund's Shares' register in the name of the Intermediary.

Notwithstanding the foregoing, a shareholder may invest directly in the Company without using the services of a nominee. The agreement between the Company and any nominee shall contain a provision that gives the shareholder the right to exercise its title to the Shares subscribed through the nominee. The Nominee Agent will have no power to vote at any general meeting of shareholders, unless the shareholder grants it a power of attorney in writing his authority to do so.

An investor may ask at any time in writing that the Shares shall be registered in his name and in such case, upon delivery by the investor to the Registrar and Transfer Agent of the relevant confirmation letter of the Nominee, the Registrar and Transfer Agent shall enter the corresponding transfer and investors' name into the shareholder register and notify the Nominee Agent accordingly.

However, the aforesaid provisions are not applicable for shareholders who have acquired Shares in countries where the use of the services of a nominee (or other Intermediary) is necessary or compulsory for legal, regulatory or compelling practical reasons.

In relation to any subscription, an Intermediary authorised to act as nominee is deemed to represent to the Directors that:

a) the investor is a Qualified Holder;

- b) it will notify the Board of Directors and the Registrar and Transfer Agent immediately if it learns that an investor is no longer a Qualified Holder;
- c) in the event that it has discretionary authority with respect to Shares which become beneficially owned by any person who is not a Qualified Holder, the Intermediary will cause such Shares to be redeemed and;
- d) it will not knowingly transfer or deliver any Shares or any part thereof or interest therein to any person who is not a Qualified Holder nor will any Shares be transferred to the United States.

The Board of Directors may, at any time, require Intermediaries who act as nominees to make additional representations to comply with any changes in applicable laws and regulations.

The list of Nominee Agents is available at the registered office of the Company.

The Depositary

Société Générale Bank & Trust is the Company's depositary and paying agent (the "**Depositary**").

The Depositary is a wholly-owned subsidiary of Société Générale, a Paris-based credit institution. The Depositary is a Luxembourg public limited company registered with the Luxembourg trade and companies register under number B 6061 and whose registered office is situated at 11, avenue Emile Reuter, L-2420 Luxembourg. Its operational center is located 28-32, place de la Gare, L-1616 Luxembourg. It is a credit institution in the meaning of the law of 5 April 1993 relating to the financial sector, as amended.

The Depositary will assume its functions and duties in accordance with articles 33 to 37 of the 2010 Law and the Commission Delegated Regulation (EU) 2016/438 of 17 December 2015 supplementing the UCITS Directive (the "EU Level 2 Regulation"). The relationship between the Company, the Management Company and the Depositary is subject to the terms of a depositary and paying agent agreement entered into for an unlimited period of time (the "**Depositary and Paying Agent Agreement**").

In accordance with the 2010 Law, and pursuant to the Depositary and Paying

Agent Agreement, the Depositary carries out, *inter alia*, the safe-keeping of the assets of the Company as well as the monitoring of the cash flows and the monitoring and oversight of certain tasks of the Company.

In addition, Société Générale Bank & Trust will act as the Company's principal paying agent. In that capacity, Société Générale Bank & Trust will have as its principal function the operation of procedures in connection with the payment of distributions and, as the case may be, redemption proceeds on the Shares.

The Depositary may delegate Safe-keeping Services (as defined in the Depositary and Paying Agent Agreement) to Safe-keeping Delegates (as defined in the Depositary and Paying Agent Agreement) under the conditions stipulated in the Depositary and Paying Agent Agreement and in accordance with article 34*bis* of the 2010 Law and articles 13 to 17 of the EU Level 2 Regulation. A list of the Safe-keeping Delegates is available on <http://www.securities-services.societegenerale.com/en/who-are/key-figures/financial-reports/>.

The Depositary is also authorized to delegate any other services under the Depositary and Paying Agent Agreement other than Oversight Services and Cash Monitoring Services (as defined in the Depositary and Paying Agent Agreement).

The Depositary is liable to the Company for the loss of Held In Custody Assets (as defined in the Depositary and Paying Agent Agreement and in accordance with article 18 of the EU Level 2 Regulation) by the Depositary or the Safe-keeping Delegate. In such case, the Depositary shall be liable to return a Held In Custody Assets of an identical type or the corresponding amount to the Company without undue delay, unless the Depositary can prove that the loss arose as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary.

In performing any of its other duties under the Depositary and Paying Agent Agreement, the Depositary shall act with all due skill, care and diligence that a leading professional Depositary for hire engaged in like activities would observe. The Depositary is liable to the Company for any other losses (other than loss of Held In Custody Assets described above) as a

result of negligence, bad faith, fraud, or intentional failure on the part of the Depositary (and each of its directors, officers, servants or employees). The liability of the Depositary as to Safe-keeping Services shall not be affected by any delegation as referred to in article 34*bis* of the 2010 Law or excluded or limited by agreement.

The Depositary and Paying Agent Agreement is entered into for an unlimited period. Each party to the Depositary and Paying Agent Agreement may terminate it upon a ninety (90) calendar days' prior written notice. In case of termination of the Depositary and Paying Agent Agreement, a new depositary shall be appointed. Until it is replaced, the resigning or, as the case may be, removed depositary shall continue only its custody duties (and no other duties), and to that extent shall take all necessary steps for the safeguard of the interests of the shareholders.

The Depositary is not responsible for any investment decisions of the Company or of one of its agents or the effect of such decisions on the performance of a relevant Sub-Fund.

The Depositary is not allowed to carry out activities with regard to the Company that may create conflicts of interest between the Company, the shareholders and the Depositary itself, unless the Depositary has properly identified any such potential conflicts of interest, has functionally and hierarchically separated the performance of its depositaries tasks from its other potentially conflicting tasks, and the potential conflicts of interest are properly identified, managed, monitored and disclosed to the shareholders.

In that respect, the Depositary has in place a policy for the prevention, detection and management of conflicts of interest resulting from the concentration of activities in Société Générale's group or from the delegation of safekeeping functions to other Société Générale entities or to an entity linked to the Management Company.

This conflict of interest management policy intends to:

- (a) identify and analyse potential conflict of interest situations;
- (b) record, manage and track conflict of interest situations by:
 - implementing permanent measures to manage

conflicts of interest including the separation of tasks, the separation of reporting and functional lines, the tracking of insider lists and dedicated IT environments;

- implementing, on a case-by-case basis:
 - appropriate preventive measures including the creation of an ad hoc tracking list and new chinese walls, and by verifying that transactions are processed appropriately and/or by informing the clients in question;
 - or, by refusing to manage activities which may create potential conflicts of interest.

Thus, the Depositary in its capacity, in one hand, as depositary and paying agent and, on the other hand, as administrative, registrar and transfer, corporate and domiciliary agent of the Company has established a functional, hierarchical and contractual separation between the performance of its depositary functions and the performance of those tasks outsourced by the Company.

The Administrative, Corporate and Domiciliary Agent

Société Générale Bank & Trust has been appointed by the Management Company as Administrative, Corporate and Domiciliary Agent.

In such capacities, Société Générale Bank & Trust is responsible for the administrative functions required by Luxembourg law such as the calculation of the Net Asset Value, the proper book-keeping of the Company and all other administrative functions as required by the laws of the Grand Duchy of Luxembourg and as further described in the aforementioned agreement.

Société Générale Bank & Trust is a Luxembourg limited company (*société anonyme*), wholly owned by Société Générale.

It has its registered office in Luxembourg at 11, avenue Emile Reuter, L-2420 Luxembourg and its operational center at 28-32, Place de la gare, L-1616 Luxembourg. Its main activity consists in

corporate and private banking and custody. As of July 1st, 2009, its fully paid-in capital was EUR 1,389,042,648.

The aforementioned agreement may be terminated by either party upon ninety days' prior written notice or immediately in certain circumstances.

The Registrar and Transfer Agent

Société Générale Bank & Trust S.A. has been appointed by the Management Company as Registrar and Transfer Agent of the Company.

Société Générale Bank & Trust S.A. is a Luxembourg limited company (*société anonyme*).

It has its registered office in Luxembourg at 28-32, Place de la Gare, L-1616 Luxembourg.

The Registrar and Transfer Agent will be responsible for handling the processing of subscriptions for Shares, dealing with requests for redemptions and conversions and accepting transfers of funds, for the safekeeping of the shareholders Register of the Company, the delivery of Share Certificates, if requested, the safekeeping of all non-issued Share Certificates of the Company, for accepting Shares Certificates rendered for replacement, redemption or conversion and for providing and supervising the mailing of statements, reports, notices and other documents to the shareholders, as further described in the above mentioned agreement.

Dissolution and Liquidation of the Company

The Company may at any time be dissolved by a resolution taken by the general meeting of shareholders subject to the quorum and majority requirements as defined in the Articles of Incorporation of the Company.

Whenever the capital falls below two thirds of the minimum capital as provided by the 2010 Law, the Board of Directors has to submit the question of the dissolution and liquidation of the Company to the general meeting of shareholders. The general meeting, for which no quorum shall be required, shall decide on simple majority of the votes of the Shares presented and voting at the meeting.

The question of the dissolution and liquidation of the Company shall also be referred to the general meeting of shareholders whenever the capital falls below one quarter of the minimum capital. In such event, the general meeting shall be held without quorum requirements and the dissolution may be decided by the shareholders holding one quarter of the votes present or represented at that meeting.

The meeting must be convened so that it is held within a period of forty days from when it is ascertained that the net assets of the Company have fallen below two thirds or one quarter of the legal minimum as the case may be.

The issue of new Shares by the Company shall cease on the date of publication of the notice of the general meeting of shareholders, to which the dissolution and liquidation of the Company shall be proposed.

This notice will be published in at least two newspapers one of which is in Luxembourg. One or more liquidators shall be appointed by the general meeting of shareholders to realise the assets of the Company, subject to the supervision of the relevant supervisory authority in the best interests of the shareholders.

The proceeds of the liquidation of each Sub-Fund, net of all liquidation expenses, shall be distributed by the liquidators among the holders of Shares in each Class in accordance with their respective rights. The amounts not claimed by shareholders at the end of the liquidation process shall be deposited, in accordance with Luxembourg law, with the *Caisse de Consignation* in Luxembourg until the statutory limitation period has lapsed.

Termination of a Sub-Fund / Class of Shares

The Directors may decide at any moment the termination of any Sub-Fund or Class of Shares. In the case of termination of a Sub-Fund or Class of Shares, the Directors may offer to the shareholders of such Sub-Fund or Class of Shares the conversion of their Shares into Classes of Shares of another Sub-Fund or into another Class of Shares within the same Sub-Fund, under terms fixed by the Directors, or the redemption of their Shares for cash at the Net Asset Value per Share (including all estimated expenses

and costs relating to the termination) determined on the Valuation Day (as defined in the Appendix of each Sub-Fund).

In the event that for any reason the value of the assets in any Sub-Fund or any Class of Shares within a Sub-Fund has decreased below 50 million Euros or any other amount determined by the Directors as mentioned in the Appendix to be the minimum level for such Sub-Fund or such Class of Shares to be operated in an economically efficient manner, or if a change in the economic or political situation relating to the Sub-Fund or Class of Shares concerned would have material adverse consequences on the investments of that Sub-Fund, the Directors may decide to (i) compulsorily redeem all the Shares of the Sub-Fund or Class of Shares at the Net Asset Value per Share (taking into account actual realisation prices of investments and realisation expenses), calculated on the Valuation Day at which such decision shall take effect or (ii) to offer to the Shareholders of the relevant Sub-Fund or Class of Shares the conversion of their Shares into Shares of another Sub-fund or Class of Shares.

The Company shall serve a notice to the Shareholders of the relevant Sub-Fund or Class of Shares in writing prior to the effective date for such Compulsory Redemption, which will indicate the reasons for, and the procedure of, the redemption operations. Unless it is otherwise decided in the interests of, or to maintain equal treatment between, the Shareholders, the Shareholders of the Sub-Fund or Class of Shares concerned may continue to request redemption or conversion of their Shares free of charge, taking into account actual realisation prices of investments and realisation expenses and prior to the date effective for the compulsory redemption.

Any request for subscription shall be suspended as from the moment of the announcement of the termination, the merger or the transfer of the relevant Sub-Fund or Class of Shares.

Notwithstanding the powers conferred on the Board of Directors by the first paragraph hereof, the general meeting of Shareholders of any one Classes of Shares issued in a Sub-Fund or Class of Shares may, upon proposal from the Directors, redeem all the Shares issued in such Sub-Fund or Class of Shares and refund to the Shareholders the Net Asset Value of their Shares (taking into account actual realisation prices of

investments and realisation expenses) calculated on the Valuation Day at which such decision shall take effect. There shall be no quorum requirements for such general meeting of Shareholders that shall decide by resolution taken by simple majority of those present or represented.

Assets which may not be distributed to their owners upon the implementation of the redemption will be deposited with the *Caisse de Consignation* on behalf of the persons entitled thereto.

All redeemed Shares shall be cancelled thereafter by the Company.

Merger and Division of Sub-Funds

The Board of Directors may decide to proceed with a merger (within the meaning of the 2010 Law) of the assets and of the liabilities of the Company or a Sub-Fund with those of (i) another existing Sub-Fund within the Company or another existing sub-fund within another Luxembourg or foreign UCITS, or of (ii) another Luxembourg or foreign UCITS. In such a case, the Board of Directors is competent to decide on or to approve the effective date of the merger. Such a merger shall be subject to the conditions and procedures imposed by the Law, in particular concerning the terms of the merger to be established by the Board of Directors and the information to be provided to the Shareholders.

The Board of Directors may also decide to absorb (i) any sub-fund within another Luxembourg or a foreign UCI irrespective of their form, or (ii) any Luxembourg or foreign UCI constituted under a non-corporate form. Without prejudice to the more stringent and/or specific provisions contained in any applicable law or regulation, the decision of the Board of Directors will be published (either in newspapers to be determined by the Board of Directors or by way of a notice sent to the relevant Shareholders at their addresses indicated in the Shareholders Register) one month before the date on which the merger becomes effective in order to enable Shareholders to request during such period the repurchase or redemption of their units or, where possible, the conversion thereof into Shares in another Sub-Fund with similar investment, without any charge other than those retained by the Sub-Fund to meet disinvestment costs. At the expiry of this period, the decision to absorb shall bind all the Shareholders who have not exercised such right. The

exchange ratio between the relevant Shares of the Company and those of the absorbed UCI or of the relevant sub-fund thereof will be calculated on the effective date of the absorption on the basis of the relevant net asset value per Share on such date.

Notwithstanding the powers conferred to the Board of Directors by the preceding paragraphs, the Shareholders of the Company or the Shareholders of the relevant Sub-Fund(s), as the case may be, may also decide on any of the mergers or absorptions described above as well as on the effective date thereof by resolution taken with no quorum requirement and adopted at a simple majority of the votes validly cast. Where the Company is the absorbed entity which, thus, ceases to exist as a result of the merger, the general meeting of Shareholders of the Company must decide on the effective date of the merger. Such general meeting will decide by resolution taken with no quorum requirement and adopted by a simple majority of the votes validly cast.

In addition to the above, the Company may also absorb another Luxembourg or foreign UCI incorporated under a corporate form in compliance with the Luxembourg law dated 10 August 1915 on commercial companies as amended from time to time.

In the event that the Board of Directors believes it is required for the interests of the Shareholders of the relevant Sub-Fund or that a change in the economic or political situation relating to the Sub-Fund concerned has occurred which would justify it, the Board of Directors may decide to divide any Sub-Fund. In the case of division of Sub-Funds, the existing Shareholders of the respective Sub-Funds have the right to require, within thirty days of notification and enforcement of such event, the redemption by the Company of their Shares without redemption costs.

Any request for subscription, redemption and conversion shall be suspended as from the moment of the announcement of the division of the relevant Sub-Fund.

Reorganisation of Share Classes

The Board of Directors may decide to reorganise Share Classes, as further described below, in the event that, for any reason, the Board of Directors determines that:

1. the Net Asset Value of a Share Class has decreased to, or has not reached, the minimum level for that Share Class to be operated in an efficient manner; or
2. changes in the legal, economic or political environment would justify such reorganisation; or
3. the product rationalisation would justify such reorganization.

In such a case, the Board of Directors may decide to re-allocate the assets and liabilities of any Share Class to those of one or several other Share Classes, and to re-designate the Shares of the Share Class concerned as Shares of such other Share Class or Share Classes (following a split or amalgamation of Shares, if necessary, and the payment to shareholders of the amount corresponding to any fractional entitlement).

In addition, the shareholders will be informed in due time of such reorganisation by way of a written notice, prior to the entrance into force of such reorganisation. The notice will be published and/or communicated to shareholders as required by applicable laws and regulations in Luxembourg. The notice will explain the reasons for and the process of the reorganisation.

General Meetings

The annual general meeting of shareholders will be held at the registered office of the Company on the first Friday of April of each year (or the immediately next Luxembourg Business Day if this day is not a Business Day) at 10 a.m.

Shareholders in any Sub-Fund may hold, at any time, general meetings to decide on any matters that relate exclusively to such Sub-Fund. In addition, the shareholders of any Class of Shares may hold, at any time,

general meetings to decide on any matters that relate exclusively to such Class of Shares.

Notices of all general meetings are sent by mail to all registered shareholders at their registered address at least eight days prior to such meeting. Such notice will indicate the time and place of such meeting and the conditions of admission thereto, will contain the agenda and will refer to the requirements of Luxembourg law with regard to the necessary quorum and majority at such meeting.

Annual and Semi-annual Reports

Audited Annual Reports and unaudited Semi-annual Reports will be made available for public inspection at each of the registered offices of the Company and the Administrative Agent within four, respectively two months following the relevant accounting period, and the latest Annual Report shall be available at least fifteen days before the annual general meeting. The Company's financial year ends on December 31st of each year.

Documents Available for Inspection

Copies of the following documents may be inspected free of charge during usual business hours on any weekday (Saturday and public holidays excepted) at the registered office of the Company, 28-32, Place de la Gare L-1616 Luxembourg:

1. the Articles of Incorporation of the Company;
2. the Key Investor Information Documents;
3. the last audited Annual Report and the Semi-annual Report of the Company.

A copy of the documents listed above may be delivered without cost to interested investors at their request.

Statements made in this Prospectus are based on the laws and practice in force at the date of this Prospectus in the Grand Duchy of Luxembourg, and are subject to changes in those laws and practice.

APPENDICES

APPENDIX 1

MULTI UNITS LUXEMBOURG – Lyxor DAX (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the EURO (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor DAX (DR) UCITS ETF is to track both the upward and the downward evolution of the DAX® (the "Index").

The anticipated level of the tracking error under normal market conditions is expected to be 0.05%.

THE INDEX

Deutsche Börse (provider of the Index) is the German leading provider of equity indices.

All equity indices of Deutsche Börse are weighted by market capitalisation; however, only freely available and tradable shares ("free float") are taken into account. The Index described herein is constructed and maintained by Deutsche Börse in accordance with this methodology. Shareholders may obtain information on the methodology by accessing Deutsche Börse's website on www.deutsche-boerse.com.

Deutsche Börse's editorial decisions regarding the Index are made independently of any party.

Whilst the Directors believe that the following description of the Index is correct, it has been based on public information obtained from Deutsche Börse and available on Deutsche Börse's website and such description has not been endorsed by Deutsche Börse.

- **Index Objectives**

The DAX® reflects the German blue chip segment comprising the largest and most actively traded German companies that are listed at the Frankfurt Stock Exchange (FWB®). Its 30 component issues have been admitted to the Prime Standard Segment. The DAX® was conceived as the successor to the 'Börsen-Zeitung Index', with a historical time series dating back until 1959.

- **Index Methodology**

The DAX® Index is capital-weighted, whereby the weight of any individual issue is proportionate to its respective share in the overall capitalisation of the index.

However, only freely available and tradable shares ("free float") are taken into account. So weighting in the Index is based exclusively on the free-float portion of the issued share capital. The number of shares of individual companies might be capped for the DAX® Index to achieve a limited weight of such companies within the Index.

The composition of the Index is reviewed and rebalanced on quarterly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "Licence"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by Deutsche Börse. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.dax-indices.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward evolution of the DAX® (the "Index").

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same body. This 20% cap will be monitored on each Index rebalancing date, based on the Index's calculation method, which limits exposure to equities of the same issuer to 20% and which is calculated by the Index sponsor or calculation agent. This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of strong volatility of a financial instrument or securities linked to an economic sector represented in the Index. This could be the case if takeover bid does affect one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The Sub-Fund is denominated in EUR.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents. The Sub-Fund will carry out its investment objective via a Direct Replication as described in the present Prospectus.

In order to realize this Investment Objective through a Direct Replication, the Sub-Fund investment policy will be to invest in a portfolio of equity securities that as far as possible and practicable consists of the Index component/underlying securities.

The Sub-Fund will seek to carry out its investment objective by investing in a portfolio of transferable securities or other eligible assets that will comprise all (or, on an exceptional basis, a substantial number of) the constituents composing the benchmark Index and in doing so will apply the investment limits as set out in the above section "Investment Objectives / Investment Powers and Restrictions".

In addition, and to a limited extent, the Sub-Fund may also engage in transactions as financial derivative instruments ("FDI") mainly for achieving the objectives under (i) and (ii) below, including Futures

transactions, Swaps, hedging swap, forward contracts, non deliverable forwards, spot foreign exchange transactions, to:

- (i) reduce the level of tracking errors;
or
- (ii) optimise the cash management of the Sub-Fund;
or
- (iii) reduce transaction costs or allowing exposure in the case of illiquid securities or securities which are unavailable for market or regulatory reasons;
or
- (iv) assist in achieving its investment objective and for reasons such as generating efficiencies in gaining exposure to the constituents of the Index or to the Index itself;
or
- (v) for such other reasons as the Directors deem of benefit to the Sub-Fund.

In circumstances where the Sub-Fund would contract a FDI, the counterparty to that specific FDI would be a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 25% and is expected to represent approximately 10% of the Net Asset Value. In certain circumstances this proportion may be higher.

ADDITIONAL INFORMATION

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) or, when the Sub-Fund would engage itself into transactions as FDI, the mark to market value of the FDI, is available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists

the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange class is also available under the "factsheet" section of the website www.lyxoretf.com.

ELIGIBILITY OF THE SUB-FUND

According to the investment objective and policy described above, the Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs

The Sub-Fund is eligible to the French equity savings plans (**PEA**) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the German blue-chip market.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "Total Fee") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.15% per year (inclusive of VAT) of the Net Asset Value per Share.

Within the Total Fee, the Structural Cost will not exceed 0.10% p.a.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management

Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Risks in relation to the optimized Index replication

Investors should be aware and understand that the Index replication by investing in a portfolio comprising all the Index components might be costly and/or not be always possible or operationally practicable. In some circumstances the Sub-Fund's

Manager may use optimized replication methodology, in particular an optimized sampling Index replication strategy. In doing so, the Sub-Fund's Manager will attempt to replicate the Index either by i) investing through a selection of representative transferable securities constituting the benchmark Index but potentially with different weighting compared to the Index constituents and/or ii) by investing in a portfolio of transferable securities that might not be comprised within this Index or other eligible assets as FDI. While the Sub-Fund will seek to track the performance of the Index through an optimized sampling Index replication strategy, there is no guarantee that the Sub-Fund will achieve perfect tracking and the Sub-Fund may potentially be subject to an increase of the tracking error risk, which is the risk that Sub-fund return may not track exactly the return of the Index, from time to time.

3) Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

4) Capital at Risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads.

An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

7) Counterparty Risk

When the Sub-Fund would engage into transactions as FDI, the Sub-Fund will be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund would be predominantly exposed to a counterparty risk resulting from the use of over-the-counter FDI. In-line with UCITS guidelines, the counterparty risk to the FDI counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the FDI could be early terminated.

- i. Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- ii. Risk of using financial derivative instrument

To a limited extent, the Sub-Fund may enter into over-the-counter FDI which may imply a range of risks including counterparty risk, hedging disruption, Index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect an over-the-counter FDI and could lead to an adjustment or even the early termination of the over-the-counter FDI transaction.

- iii. Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the shareholders

of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- iv. Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlying of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to a FDI, the net asset value of the Sub-Fund may be affected.

- v. Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

- vi. Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- vii. Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

- i) the Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Index is permanently cancelled by the Index provider;
- iii) the Index provider fails to calculate and announce the Index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the Index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

viii. Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

ix. Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

8) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in

selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 2

MULTI UNITS LUXEMBOURG – Lyxor DAILY LevDAX UCITS ETF

The Reference Currency of the Sub-Fund is the EURO (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor DAILY LevDAX UCITS ETF is to track both the upward and the downward evolution of the LevDAX® (the "Index").

The anticipated level of the tracking error under normal market conditions is expected to be 0.40%.

THE INDEX

Deutsche Börse (provider of the Index) is the German leading provider of equity indices. All equity indices of Deutsche Börse are weighted by market capitalisation; however, only freely available and tradable shares ("free float") are taken into account. The Index described herein is constructed and maintained by Deutsche Börse in accordance with this methodology. Shareholders may obtain information on the methodology by accessing Deutsche Börse's website on www.deutsche-boerse.com.

Deutsche Börse's editorial decisions regarding the Index are made independently of any party.

Whilst the Directors believe that the following description of the Index is correct, it has been based on public information obtained from Deutsche Börse and available on Deutsche Börse's website and such description has not been endorsed by Deutsche Börse.

- **Index Objectives**

The LevDAX® gives a daily leveraged exposure to the DAX®. The DAX® reflects the German blue chip segment comprising the largest and most actively traded German companies that are listed at the Frankfurt Stock Exchange (FWB®). Its 30 component issues have been admitted to the Prime Standard Segment.

- **Index Methodology**

The LevDAX® gives a daily 200% leveraged exposure to the DAX® minus leverage

financing costs. The Leverage strategy will be applied at the level of the Index.

Leverage can be readjusted intraday if the DAX® value decreases intraday of 25%. Intraday adjustments will be based on algorithmic objective frameworks.

The DAX® is capital-weighted, whereby the weight of any individual issue is proportionate to its respective share in the overall capitalisation of the DAX®. However, only freely available and tradable shares ("free float") are taken into account. So weighting in the DAX® is based exclusively on the free-float portion of the issued share capital. The number of shares of individual companies might be capped for the DAX® to achieve a limited weight of such companies within the DAX®.

The composition of the Index is reviewed and rebalanced on quarterly basis.

Rebalancing operations carried out within the frequency stated above could have an impact in terms of costs paid or incurred by the Sub-Fund and could consequently affect the performance of the Sub-Fund.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "Licence"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by Deutsche Börse. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.dax-indices.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward evolution of the LevDAX® (the "**Index**").

The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area, the remaining part of the assets being invested into transferable securities and notably into international equities and (ii) entering into a total return swap agreement (the "**Swap**") to track both the upward and the downward evolution of the Index.

The aforementioned equities will be selected on the basis of the following eligibility criteria, in particular:

- a) their inclusion in a major stock exchange index;
- b) liquidity (must exceed a minimum daily trading volume and market capitalization);
- c) credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating);
- d) diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - geography;
 - sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less

than or equal to zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer. This 20% cap will be monitored on each Index rebalancing date, based on the Index's calculation method, which limits exposure to equities of the same issuer to 20% and which is calculated by the Index sponsor or calculation agent. This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of strong volatility of a financial instrument or securities linked to an economic sector represented in the Index. This could be the case if takeover bid does affect one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The counterparty to the Swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

The use of the Swap will involve leverage at the level of the Index.

The value of the Sub-Fund's portfolio will be exchanged against the value of the Index. The net asset value of the Sub-Fund will therefore increase (or decrease) according to the valuation of the Swap.

Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the balance sheet assets held in the portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange class is also available under the "factsheet" section of the website www.lyxoretf.com.

ELIGIBILITY OF THE SUB-FUND

According to the investment objective and policy described above, the Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS; No investment will be made in any UCIs.

The Sub-Fund is eligible to the French equity savings plans (**PEA**) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union

member state or in a member state of the European Economic Area.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the German blue-chip market.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S, was appointed as Management Company of the Company.

A total fee (hereafter the “**Total Fee**”) is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.40% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Capital at Risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

3) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

4) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

5) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In-line with UCITS guidelines, the counterparty risk to the Swap counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Risk incurred from the daily readjustment in leverage

Investors are doubly exposed to fluctuations that affect the price or level of the Parent Index from day to day. In particular, any loss in value on the underlying market will be amplified and result in an even greater depreciation in the Sub-Fund's net asset value. The daily readjustment in the index formula of the underlying "leveraged" strategy means that, for a period of more than one trading day, the Sub-Fund's performance will not be equal to the double of the Parent Index's performance.

For example, if the Parent Index gains 10% on a given trading day, then declines 5% on the following day, the ETF will have gained a total of 8% after these two days (and before deduction of applicable fees), while the Parent Index will have gained 4.5% over the same period.

If the Parent Index loses 5% on each of two consecutive trading days, it will have lost a total of 9.75%, while the ETF will have lost 19% over the same period (before deduction of applicable fees).

An unfavourable upside case

	Parent Index	Benchmark	Resulting leverage
Performance on Day1	+ 10%	+ 20%	x2
Performance on Day 2	- 5%	- 10%	x2
Total performance, period	+4.5%	+8%	x1.78

A favourable upside case

	Parent Index	Benchmark	Resulting leverage
Performance on Day 1	- 5%	- 10%	x2
Performance on Day 2	- 5%	- 10%	x2

Total performance, period	-9.75%	-19%	x1.95
---------------------------	--------	------	-------

Moreover, it possible that, during an observation period of more than one day and in the event of steep volatility of the Parent Index during this period, the Sub-Fund's net asset value could decline even if the Parent Index shows a gain over this same period.

Example of reverse leverage:

	Parent Index	Benchmark			
	Performance on Day i	Value on day i	Performance on Day i	Value on day i	Resulting leverage
		100		100	
Day 1	20%	120	40%	140	x2
Day 2	-20%	96	-40%	84	x2
Day 3	30%	124.8	60%	134.4	x2
Day 4	-20%	99.84	-40%	80.64	x2
Day 5	10%	109.824	20%	96.768	x2
Total, period	+ 9.82%		- 3.23%		x -0.33

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- (i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, Index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- (ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-

Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- (iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- (iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

- (v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of shares may be affected.

- (vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

- i) the Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Index is permanently cancelled by the Index provider;
- iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- (vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- (viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

6) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in

selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

MULTI UNITS LUXEMBOURG – Lyxor WIG20 UCITS ETF

The Reference Currency of the Sub-Fund is the Zloty (PLN).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor WIG20 UCITS ETF** is to track both the upward and the downward evolution of the WIG20 index (the "Index") denominated in Zloty (PLN) increased by the revenues the Sub-Fund would receive, should it be the holder of the stocks of the Index.

The anticipated level of the tracking error under normal market conditions is expected to be 0.07%.

THE INDEX

The WIG20 index is based on the value of portfolio with shares in 20 major and most liquid companies in the Warsaw Stock Exchange ("**WSE**") Main List.

The Warsaw Stock Exchange (provider of the Index) is the Polish leading provider of equity indices.

Weightings of all index participants are determined based on the number of shares in free float and rounded up to the nearest whole thousand. If the number of shares in free float is higher than the number of shares introduced into stock exchange trading, then the weighting is the number of shares introduced into stock exchange trading. Shareholders may obtain information on the methodology by accessing Warsaw Stock Exchange's website on www.gpw.pl.

Warsaw Stock Exchange's editorial decisions regarding the Index are made independently of any party.

Whilst the Directors believe that the following description of the Index is correct, it has been based on public information obtained from the Warsaw Stock Exchange and available on Warsaw Stock Exchange's website and such description has not been endorsed by Warsaw Stock Exchange.

The composition of the Index is reviewed and rebalanced on quarterly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Index Objectives**

The WIG20 index has been calculated since April 16, 1994 based on the value of portfolio with shares in 20 major and most liquid companies in the WSE Main List. The initial value of the WIG20 index was 1,000 points. It is a price return index and thus when it is calculated it accounts only for prices of underlying shares whereas dividend income is excluded. The WIG20 index may not include more than 5 companies from a single exchange sector.

- **Index Methodology**

The WIG20 index may include the companies from the highest positions in the Ranking of this Index. Unconditionally the Index:

- comprises the companies ranked at 15th position or higher until annual revision (10th position or higher until quarterly adjustment); and
- does not comprise the companies ranked at 26th position or lower until annual revision (31st position or lower until quarterly adjustment).

The companies that were ranked high in Index Ranking and were not put on the list of index participants are put on an index reserve list. The size of weighting is reduced proportionally as of the ranking date, if the value of shares in a certain index company exceeds 15% of its value.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "Licence"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

The Sub-Licensing Agreement starts on the first listing date and ends three years after the first listing date. The first listing date is the date at which the Shares of the Sub-Fund will be listed on any stock exchange for the first time.

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Index methodology as described in section above will not be changed by Warsaw Stock Exchange. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.gpw.pl>.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus. Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S was appointed as Management Company of the Company.

A Total Fee (hereafter the "**Total Fee**") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.45% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such

fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING**1) Equity Risk**

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

2) Low Diversification Risk

Investors are exposed to a benchmark index representing a region, a sector or a strategy, which may provide a lesser diversification of assets compared to a broader index which will be exposed to various regions, sectors and strategies. Hence, exposure to concentrated indices may result in higher volatility compared to diversified markets. However, UCITS diversification rules will still apply to the underlyings of the Sub-Fund.

3) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

4) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

5) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

6) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and

the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

7) Emerging Market Risk

Exposure to emerging markets carries a greater risk of potential loss than investment in developed markets. Specifically, market operating and supervision conditions may differ from standards applicable in developed markets. Exposure to emerging markets is subject to factors such as: market's greater volatility, lower trading volumes, the risk of economic and/or political instability, an uncertain or variable tax regime and regulatory environment, market closure risks, government restrictions on foreign investments, interruption or limitation of convertibility or transferability of one of the currencies making up the benchmark index.

8) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the Index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the

constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

9) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-EUR Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 4

MULTI UNITS LUXEMBOURG – Lyxor S&P 500 UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor S&P 500 UCITS ETF** is to track both the upward and the downward evolution of the S&P 500® Net Total Return (the "**Index**") denominated in United States dollars (USD).

The anticipated level of the tracking error under normal market conditions is expected to be 0.03%.

THE INDEX

- **Index Objectives**

The S&P 500 Net Total Return is a free-float capitalization-weighted index, published since 1957, of the prices of 500 large-cap common stocks actively traded in the United States. The stocks included in the S&P 500 Net Total Return are those of large publicly held companies that trade on either of the two largest American stock market companies (the NYSE Euronext and the NASDAQ OMX).

- **Index Methodology**

The S&P Index Committee follows a set of published guidelines for maintaining the index. Complete details of these guidelines, including the criteria for index additions and removals, policy statements, and research papers are available on the Web site at www.indices.standardandpoors.com.

CRITERIA FOR INDEX ADDITIONS

- **Financial Viability.** Companies should have four consecutive quarters of positive as-reported earnings, whereas-reported earnings are defined as GAAP Net Income excluding discontinued operations and extraordinary items.

- **Adequate Liquidity and Reasonable Price.**

- **Sector Representation:** companies' industry classifications contribute to the maintenance of a sector balance that is in line with the sector composition of the

universe of eligible companies with market cap in excess of US\$ 3.5 billion.

- **Company Type:** constituents must be operating companies. Closed-end funds, holding companies, partnerships, investment vehicles and royalty trusts are not eligible. The Index Committee strives to minimize unnecessary turnover in index membership and each removal is determined on a case-by-case basis.

CRITERIA FOR INDEX REMOVALS

- Companies that substantially violate one or more of the criteria for index inclusion.

- Companies involved in merger, acquisition, or significant restructuring such that they no longer meet the criteria for index inclusion.

The composition of the Index is reviewed and rebalanced on quarterly basis, or, in limited circumstances as further described in the Index methodology, at an earlier date as decided by the Index sponsor.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the I Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by S&P. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.spindices.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward evolution of the S&P 500® Net Total Return (the "**Index**").

The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing in a diversified portfolio of transferable securities (and notably into international equities) and (ii) entering into a total return swap agreement (the "**Swap**") to track both the upward and the downward evolution of the Index.

The aforementioned equities will be selected on the basis of the following eligibility criteria, in particular:

- a) their inclusion in a major stock exchange index;
- b) liquidity (must exceed a minimum daily trading volume and market capitalization);
- c) credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating);
- d) diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - geography;
 - sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less than or equal to

zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer. This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of strong volatility on a financial instrument or securities linked to an economic sector represented in the Index, for example in the event of a takeover bid affecting one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The counterparty to the Swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

The using of the Swap will not involve leverage.

The value of the Sub-Fund's portfolio will be exchanged against the value of the Index. The net asset value of the Sub-Fund will therefore increase (or decrease) according to the valuation of the Swap.

Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any UCITS ETF share class is also available under the "factsheet" section of the website www.lyxoretf.com.

ELIGIBILITY OF THE SUB-FUND

According to the investment objective and policy described above, the Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

The Sub-Fund is eligible to the French equity savings plans (**PEA**) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the prices of 500 large-cap common stocks actively traded in the United States.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "**Total Fee**") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.15% per year (inclusive of VAT) of the Net Asset Value per Share.

Within the Total Fee, the Structural Cost will not exceed 0.10% p.a.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING**1) Equity Risk**

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

Currency Risk related to Classes denominated in a currency other than the reference currency of the Index.

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

2) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

3) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer

spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

4) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

5) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In-line with UCITS guidelines, the counterparty risk to the Swap counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- (i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlying of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

The index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the Index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

(ix) Currency Hedge Risk applicable to the four share class Daily Hedged D-EUR Daily Hedged C-EUR, Daily Hedged D-GBP, C-GBP, D-CHF and C-CHF

In order to hedge the EUR/USD currency risk for the Daily Hedged D-EUR and Daily

Hedged C-EUR share classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the benchmark index's currency against the share class currency. As the hedging exposure is reset daily and at the same time could not be successful, the hedging strategy could imply costs and exchange rates movements which would affect the share class net asset value.

6) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR, Class D-USD, Class Daily Hedged D-EUR, Class Daily Hedged D-CHF and Class Daily Hedged D-GBP Shares.

No distribution will be carried out in respect of Class C – EUR Shares, Class Daily Hedged C-EUR, Class Daily Hedged C-CHF and Class Daily Hedged C-GBP Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Sub-Fund is not sponsored, endorsed, sold or promoted by Standard & Poor's and

its affiliates ("S&P"). S&P makes no representation, condition or warranty, express or implied, to the owners of the fund or any member of the public regarding the advisability of investing in securities generally or in the fund particularly or the ability of the S&P 500 Net Total Return Index to track the performance of certain financial markets and/or sections thereof and/or of groups of assets or asset classes. S&P's only relationship to Lyxor International Asset Management is the licensing of certain trademarks and trade names and of the S&P 500 Index which is determined, composed and calculated by S&P without regard to Lyxor International Asset Management or the fund. S&P has no obligation to take the needs of Lyxor International Asset Management or the owners of the fund into consideration in determining, composing or calculating the S&P 500 Net Total Return Index. S&P is not responsible for and has not participated in the determination of the prices and amount of the fund or the timing of the issuance or sale of the fund or in the determination or calculation of the equation by which the fund shares are to be converted into cash. S&P has no obligation or liability in connection with the administration, marketing, or trading of the fund.

S&P does not guarantee the accuracy and/or the completeness of the S&P 500 Net Total Return Index or any data included therein and S&P shall have no liability for any errors, omissions, or interruptions therein. S&P makes no warranty, condition or representation, express or implied, as to results to be obtained by Lyxor International Asset Management, owners of the fund, or any other person or entity from the use of the S&P 500 Net Total Return Index or any data included therein. S&P makes no express or implied warranties, representations or conditions, and expressly disclaims all warranties or conditions of merchantability or fitness for a particular purpose or use and any other express or implied warranty or condition with respect to the S&P 500 Net Total Return Index or any data included therein. without limiting any of the foregoing, in no event shall S&P have any liability for any special, punitive, indirect, or consequential damages (including lost profits) resulting from the use of the S&P 500 Net Total Return Index or any data included therein, even if notified of the possibility of such damages.

APPENDIX 5

MULTI UNITS LUXEMBOURG – Lyxor MSCI Canada UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – **Lyxor MSCI Canada UCITS ETF** is to track both the upward and the downward evolution of the MSCI Canada Net Return CAD Index (denominated in Canadian dollars) (CAD) (the "**Index**") and representative of the performance of the large and mid cap segments of the Canada equity market.

The anticipated level of the tracking error under normal market conditions is expected to be 0.07%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the large and mid cap segments of Canada market.

- **Index Methodology**

The Index is based on the MSCI Global Investable Market Indices methodology taking into account size-segmentation methodology and investability requirements.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI web site: <http://www.msci.com>.

The composition of the Index is reviewed and rebalanced every 6 months with quarterly adjustment in February, May, August and November.

The Index is a total return index. A total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by MSCI Inc. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/937 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing in a diversified portfolio of transferable securities (including notably international equities) and (ii) entering into a total return swap agreement (the "**Swap**") to track both the upward and the downward evolution of the Index.

The aforementioned equities will be selected on the basis of the following eligibility criteria, in particular:

- their inclusion in a major stock exchange index;

- liquidity (must exceed a minimum daily trading volume and market capitalization);
- credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating);
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS; pursuant to the 2010 Law);
 - geography;
 - sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer. This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of strong volatility on a financial instrument or securities linked to an economic sector represented in the Index, for example in the event of a takeover bid affecting one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The counterparty to the Swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the

composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

The using of the Swap will not involve leverage.

The value of the Sub-Fund's portfolio will be exchanged against the value of the Index. The net asset value of the Sub-Fund will therefore increase (or decrease) according to the valuation of the Swap.

Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any UCITS ETF share class is also

available under the “factsheet” section of the website www.lyxoretf.com.

ELIGIBILITY OF THE SUB-FUND

According to the investment objective and policy described above, the Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

Sub-Fund’s exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the performance of the large and mid cap segments of Canada equity market.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S was appointed as Management Company of the Company.

A total fee (Hereafter the "**Total Fee**") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.40% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Risk of investment in Medium Capitalization Stocks

The Sub-Fund is exposed to stocks of medium-capitalization companies, which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply than those of large-capitalization stocks. The Sub-Fund's net asset value could behave similarly and therefore fall more sharply than the value of a similar investment in large-capitalization equities.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR and Class D-USD Shares.

No distribution will be carried out in respect of Class C-EUR, Class CI-CAD and Class CI-EUR Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 6

MULTI UNITS LUXEMBOURG – Lyxor Australia (S&P ASX 200) UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor Australia (S&P ASX 200) UCITS ETF** is to track both the upward and the downward evolution of the S&P/ASX 200 Net Total Return Index denominated in Australian dollars (AUD) (the "**Index**").

The anticipated level of the tracking error under normal market conditions is expected to be 0.04%.

THE INDEX

• Index Objectives

The S&P/ASX 200 Net Total Return measures the performance of the 200 largest index-eligible stocks listed on the ASX by float-adjusted market capitalization. The index is float-adjusted, covering approximately 80% of Australian equity market capitalization.

The S&P/ASX 200 Net Total Return index constituents are rebalanced quarterly to ensure adequate market capitalization and liquidity.

The S&P/ASX 200 Net Total Return is maintained by the S&P Australian Index Committee, including Standard & Poor's economists and index analysts and Australian Securities Exchange representatives.

• Index Methodology

The S&P Australian Index Committee follows a set of published guidelines for maintaining the index. Complete details of these guidelines, including the criteria for index additions and removals, policy statements, and research papers are available on the Web site at www.indices.standardandpoors.com.

The Index Committee reviews constituents quarterly to ensure adequate market capitalization and liquidity. Quarterly review changes take effect the third Friday of December, March, June, and September.

The weighting of constituents in the S&P/ASX 200 Net Total Return is determined by the float-adjusted market capitalization assigned to each security by the Index Committee. Every index constituents' float adjustment is reviewed as part of the March quarterly review.

CRITERIA FOR INDEX ADDITIONS

- **Listing:** Only securities listed on the Australian Securities Exchange are considered for inclusion in any of the S&P/ASX indices.
- **Market Capitalization:** Companies are assessed based on the average of their previous 6-month day-end float adjusted market capitalization.
- **Public Float:** There must be public float of at least 30% for a stock to warrant inclusion in the S&P/ASX indices.
- **Liquidity:** Only securities that are actively and regularly traded are eligible for inclusion in any S&P/ASX indices.

The Index Committee strives to minimize unnecessary turnover in index membership and each removal is determined on a case-by-case basis.

CRITERIA FOR INDEX REMOVALS

- Companies that substantially violate one or more of the criteria for index inclusion.
- Companies involved in merger, acquisition, or significant restructuring such that they no longer meet the criteria for index inclusion.

The composition of the Index is reviewed and rebalanced on quarterly basis, or, in limited circumstances as further described in the Index methodology, at an earlier date as decided by the Index sponsor.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

• Licence

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by S&P. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.spindices.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward evolution of the S&P/ASX 200 Net Total Return Index (the "**Index**").

The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing in a diversified portfolio of transferable securities (including notably international equities) and (ii) entering into a total return swap agreement (the "**Swap**") to track both the upward and the downward evolution of the Index.

The aforementioned equities will be selected on the basis of the following eligibility criteria, in particular:

- a) their inclusion in a major stock exchange index;
- b) liquidity (must exceed a minimum daily trading volume and market capitalization);
- c) credit rating of the country where the issuer has its registered office

(must have a least a minimum S&P or equivalent rating);

d) diversification criteria, in particular regarding:

- the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
- geography;
- sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer.

This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of strong volatility on a financial instrument or securities linked to an economic sector represented in the Index, for example in the event of a takeover bid affecting one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the

The counterparty to the Swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

The using of the Swap will not involve leverage.

The value of the Sub-Fund's portfolio will be exchanged against the value of the Index. The net asset value of the Sub-Fund will therefore increase (or decrease) according to the valuation of the Swap.

Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any UCITS ETF share class is also available under the "factsheet" section of the website www.lyxoretf.com

ELIGIBILITY OF THE SUB-FUND

According to the investment objective and policy described above, the Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the 200 largest index-eligible stocks listed on the ASX by float-adjusted market capitalization.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are

predictable over a certain period of time under the same macro risk conditions.

Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

2) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

3) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

4) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

5) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In-line with UCITS guidelines, the counterparty risk to the Swap counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering

into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the

process of subscriptions, conversions and redemptions of Shares may be affected.

- (v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- (vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

- i) the Index is deemed to be inaccurate or does not reflect actual market developments;

- ii) the Index is permanently cancelled by the index provider;

- iii) the Index provider fails to calculate and announce the index level;

- iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

- v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

- vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- (vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- (viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

6) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR and Class D-USD Shares.

No distribution will be carried out in respect of Class C-EUR Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Sub-Fund is not sponsored, endorsed, sold or promoted by Standard & Poor's and its affiliates ("S&P"). S&P makes no representation, condition or warranty, express or implied, to the owners of the fund or any member of the public regarding the advisability of investing in securities generally or in the fund particularly or the ability of the S&P ASX 200 Net Total Return Index to track the performance of certain financial markets and/or sections thereof and/or of groups of assets or asset classes. S&P's only relationship to Lyxor International Asset Management is the licensing of certain trademarks and trade names and of the S&P ASX 200 Net Total Return Index which is determined, composed and calculated by S&P without regard to Lyxor International Asset Management or the fund. S&P has no obligation to take the needs of Lyxor International Asset Management or the owners of the fund into consideration in determining, composing or calculating the S&P ASX 200 Net Total Return Index. S&P is not responsible for and has not participated in the determination of the prices and amount of the fund or the timing of the issuance or sale of the fund or in the determination or calculation of the equation by which the fund shares are to be converted into cash. S&P has no obligation or liability in connection with the administration, marketing, or trading of the fund.

S&P does not guarantee the accuracy and/or the completeness of the S&P ASX 200 Net Total Return Index or any data included therein and S&P shall have no liability for any errors, omissions, or interruptions therein. S&P makes no warranty, condition or representation, express or implied, as to results to be obtained by Lyxor International Asset Management, owners of the fund, or any other person or entity from the use of the S&P ASX 200 Net Total Return Index or any data included therein. S&P makes no express or implied warranties, representations or conditions, and expressly disclaims all warranties or conditions of merchantability or fitness for a particular purpose or use and any other express or implied warranty or condition with respect to the S&P ASX 200 Net Total Return Index or any data included therein. without limiting any of the foregoing, in no event shall S&P have any liability for any special, punitive, indirect, or consequential damages (including lost profits) resulting from the use of the S&P ASX 200 Net Total Return Index

or any data included therein, even if notified of the possibility of such damages.

There is no guarantee that the index methodology as described in section above will not be changed by MSCI Inc. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward evolution of the MSCI World Utilities Index – Net Total Return (the "**Index**").

The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing in a diversified portfolio of transferable securities (including notably international equities) and (ii) entering into a total return swap agreement (the "**Swap**") to track both the upward and the downward evolution of the Index.

The aforementioned equities will be selected on the basis of the following eligibility criteria, in particular:

- their inclusion in a major stock exchange index;
- liquidity (must exceed a minimum daily trading volume and market capitalization);

- credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating);
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - geography;
 - sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer. This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of strong volatility on a financial instrument or securities linked to an economic sector represented in the Index, for example in the event of a takeover bid affecting one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The counterparty to the Swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

The using of the Swap will not involve leverage.

The value of the Sub-Fund's portfolio will be exchanged against the value of the Index. The net asset value of the Sub-Fund will therefore increase (or decrease) according to the valuation of the Swap.

Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any UCITS ETF share class is also available under the "factsheet" section of the website www.lyxoretf.com.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading

facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Currency Risk related to the Index

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

3) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

4) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

5) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

6) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In-line with UCITS guidelines, the counterparty risk to the Swap counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- (i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including

counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments,

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund.

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds).

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

7) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Classes C-EUR and C-USD Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

APPENDIX 8

MULTI UNITS LUXEMBOURG – Lyxor MSCI World Materials TR UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor MSCI World Materials TR UCITS ETF** is to track both the upward and the downward evolution of the MSCI World Materials Index – Net Total Return (the "**Index**") denominated in US dollars (USD).

The anticipated level of the tracking error under normal market conditions is expected to be 0.07%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the investable universe composed of listed material companies worldwide (classified according to the Global Industry Classification Standard (GICS®)). It is designed to cover large and mid cap securities. As of 20 April 2010, the Index was composed of 158 constituents in 24 countries.

- **Index Methodology**

The Index is based on the MSCI Global Investable Market Indices methodology taking into account the size, liquidity and minimum free float criteria of the investable universe.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI web site: www.msibarra.com.

The composition of the Index is reviewed and rebalanced on quarterly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no

guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by MSCI Inc. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward evolution of the MSCI World Materials Index – Net Total Return (the "**Index**").

The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing in a diversified portfolio of transferable securities (including notably international equities) and (ii) entering into a total return swap agreement (the "**Swap**") to track both the upward and the downward evolution of the Index.

 - geography;
 - sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer. Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any UCITS ETF share class is also available under the "factsheet" section of the website www.lyxoretf.com.

Subscription and redemption charges, if any, shall be payable to the Management Company.

No fees will be charged by the Company to investors buying shares on the stock exchange.

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 1% of the Net Asset Value per Share multiplied by the number of shares redeemed.

DEFINITIONS

"Business Day": any full working day in Luxembourg and in Paris when the banks are opened for business.

"Dealing Day": any week day when the Index is published and investable.

"Valuation Day": each Dealing Day, taking into account the closing price of the Index on such Dealing Day.

"Subscription Deadline" and "Redemption Deadline": any Dealing Day at 6:30 p.m. Luxembourg time at the latest.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "Total Fee") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.40% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading

facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Currency Risk related to the Index

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

3) Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

4) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

7) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In-line with UCITS guidelines, the counterparty risk to the Swap counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- (i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including

counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(v) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;
ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vi) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(vii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

8) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or

pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Classes C-EUR and C-USD Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

APPENDIX 9

**MULTI UNITS LUXEMBOURG – Lyxor
MSCI World Telecommunication
Services TR UCITS ETF**

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor MSCI World Telecommunication Services TR UCITS ETF** is to track both the upward and the downward evolution of the MSCI World Telecommunication Services Index – Net Total Return (the "**Index**") denominated in US dollars (USD).

The anticipated level of the tracking error under normal market conditions is expected to be 0.07%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the investable universe composed of listed telecommunication service companies worldwide (classified according to the Global Industry Classification Standard (GICS®)). As of 20 April 2010, the Index was composed of 48 constituents in 24 countries.

- **Index Methodology**

The Index is based on the MSCI Global Investable Market Indices methodology taking into account the size, liquidity and minimum free float criteria of the investable universe.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI web site: www.msci.com.

The composition of the Index is reviewed and rebalanced on quarterly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by MSCI Inc. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward evolution of the MSCI World Telecommunication Services Index – Net Total Return (the "**Index**").

The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing in a diversified portfolio of transferable securities (including notably international equities) and (ii) entering into a total return swap agreement (the "**Swap**") to track both the upward and the downward evolution of the Index.

The aforementioned equities will be selected on the basis of the following eligibility criteria, in particular:

- their inclusion in a major stock exchange index;
- liquidity (must exceed a minimum daily trading volume and market capitalization);
- credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating);
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - geography;
 - sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer. This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of strong volatility on a financial instrument or securities linked to an economic sector represented in the Index, for example in the event of a takeover bid affecting one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The counterparty to the Swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the

composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

The using of the Swap will not involve leverage.

The value of the Sub-Fund's portfolio will be exchanged against the value of the Index. The net asset value of the Sub-Fund will therefore increase (or decrease) according to the valuation of the Swap.

Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any UCITS ETF share class is also

available under the “factsheet” section of the website www.lyxoretf.com.

ELIGIBILITY OF THE SUB-FUND

According to the investment objective and policy described above, the Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

Sub-Fund’s exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the performance of the leading telecommunication service companies worldwide.

APPENDIX 10

MULTI UNITS LUXEMBOURG – Lyxor MSCI World Information Technology TR UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor MSCI World Information Technology TR UCITS ETF is to track both the upward and the downward evolution of the MSCI World Information Technology Index – Net Total Return (the "**Index**") denominated in US dollars (USD).

The anticipated level of the tracking error under normal market conditions is expected to be 0.07%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the investable universe composed of listed information technology companies worldwide (classified according to the Global Industry Classification Standard (GICS®)). It is designed to cover large and mid cap securities. As of 20 April 2010, the Index was composed of 148 constituents in 24 countries.

- **Index Methodology**

The Index is based on the MSCI Global Investable Market Indices methodology taking into account the size, liquidity and minimum free float criteria of the investable universe.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI web site: www.msci.com.

The composition of the Index is reviewed and rebalanced on quarterly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by MSCI Inc. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward evolution of the MSCI World Information Technology Index – Net Total Return (the "**Index**").

The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing in a diversified portfolio of transferable securities (including notably international equities) and (ii) entering into a total return swap agreement (the "Swap") to track both the upward and the downward evolution of the Index.

The aforementioned equities will be selected on the basis of the following eligibility criteria, in particular:

- their inclusion in a major stock exchange index;
- liquidity (must exceed a minimum daily trading volume and market capitalization);
- credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating);
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - geography;
 - sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer. This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of strong volatility on a financial instrument or securities linked to an economic sector represented in the Index, for example in the event of a takeover bid affecting one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The counterparty to the Swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the

composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

The using of the Swap will not involve leverage.

The value of the Sub-Fund's portfolio will be exchanged against the value of the Index. The net asset value of the Sub-Fund will therefore increase (or decrease) according to the valuation of the Swap.

Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any UCITS ETF share class is also

available under the “factsheet” section of the website www.lyxoretf.com.

ELIGIBILITY OF THE SUB-FUND

According to the investment objective and policy described above, the Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

Sub-Fund’s exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the performance of the leading information technology companies worldwide.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "Total Fee") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.40% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which

takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Currency Risk related to the Index

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

3) Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

4) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

7) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In-line with UCITS guidelines, the counterparty risk to the Swap counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index

disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

8) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Classes C-EUR and C-USD Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "Total Fee") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.40% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading

facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Currency Risk related to the Index

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

3) Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

4) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

7) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In-line with UCITS guidelines, the counterparty risk to the Swap counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including

counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;
ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

8) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or

pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Classes C-EUR and C-USD Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

APPENDIX 12

MULTI UNITS LUXEMBOURG – Lyxor MSCI World Industrials TR UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor MSCI World Industrials TR UCITS ETF is to track both the upward and the downward evolution of the MSCI World Industrials Index – Net Total Return (the "**Index**") denominated in US dollars (USD).

The anticipated level of the tracking error under normal market conditions is expected to be 0.07%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the investable universe composed of listed industrial companies worldwide (classified according to the Global Industry Classification Standard (GICS®)). It is designed to cover large and mid cap securities. As of 20 April 2010, the Index was composed of 262 constituents in 24 countries.

- **Index Methodology**

The Index is based on the MSCI Global Investable Market Indices methodology taking into account the size, liquidity and minimum free float criteria of the investable universe.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI web site: www.msibarra.com.

The composition of the Index is reviewed and rebalanced on quarterly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no

guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by MSCI Inc. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward evolution of the MSCI World Industrials Index – Net Total Return (the "**Index**").

The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing in a diversified portfolio of transferable securities (including notably international equities) and (ii) entering into a total return swap agreement (the "**Swap**") to track both the upward and the downward evolution of the Index.

The aforementioned equities will be selected on the basis of the following eligibility criteria, in particular:

- their inclusion in a major stock exchange index;
- liquidity (must exceed a minimum daily trading volume and market capitalization);

- credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating);
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - geography;
 - sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer. This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of strong volatility on a financial instrument or securities linked to an economic sector represented in the Index, for example in the event of a takeover bid affecting one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The counterparty to the Swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

The using of the Swap will not involve leverage.

The value of the Sub-Fund's portfolio will be exchanged against the value of the Index. The net asset value of the Sub-Fund will therefore increase (or decrease) according to the valuation of the Swap.

Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any UCITS ETF share class is also available under the "factsheet" section of the website www.lyxoretf.com.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

7) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In-line with UCITS guidelines, the counterparty risk to the Swap counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- (i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including

counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;
ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

8) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or

pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Classes C-EUR and C-USD Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 13

MULTI UNITS LUXEMBOURG – Lyxor MSCI World Energy TR UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor MSCI World Energy TR UCITS ETF** is to track both the upward and the downward evolution of the MSCI World Energy Index – Net Total Return (the "**Index**") denominated in US dollars (USD).

The anticipated level of the tracking error under normal market conditions is expected to be 0.07%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the investable universe composed of listed energy companies worldwide (classified according to the Global Industry Classification Standard (GICS®)). It is designed to cover large and mid cap securities. As of 20 April 2010, the Index was composed of 115 constituents in 24 countries.

- **Index Methodology**

The Index is based on the MSCI Global Investable Market Indices methodology taking into account the size, liquidity and minimum free float criteria of the investable universe.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI web site: www.msicibarra.com.

The composition of the Index is reviewed and rebalanced on quarterly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended

beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by MSCI Inc. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward evolution of the MSCI World Energy Index – Net Total Return (the "**Index**").

The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing in a diversified portfolio of transferable securities (including notably international equities) and (ii) entering into a total return swap agreement (the "**Swap**") to track both the upward and the downward evolution of the Index.

The aforementioned equities will be selected on the basis of the following eligibility criteria, in particular:

- their inclusion in a major stock exchange index;
- liquidity (must exceed a minimum daily trading volume and market capitalization);

- credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating);
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - geography;
 - sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer. This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of strong volatility on a financial instrument or securities linked to an economic sector represented in the Index, for example in the event of a takeover bid affecting one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The counterparty to the Swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

The using of the Swap will not involve leverage.

The value of the Sub-Fund's portfolio will be exchanged against the value of the Index. The net asset value of the Sub-Fund will therefore increase (or decrease) according to the valuation of the Swap.

Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any UCITS ETF share class is also available under the "factsheet" section of the website www.lyxoretf.com.

ELIGIBILITY OF THE SUB-FUND

According to the investment objective and policy described above, the Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the performance of the leading energy companies worldwide.

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which

takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions. Currency Risk related to the Index.

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

2) Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

3) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

4) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

5) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

6) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In-line with UCITS guidelines, the counterparty risk to the Swap counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its Investment Objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including

counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;
ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

7) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or

pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Classes C-EUR and C-USD Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor MSCI World Financials TR UCITS ETF is to track both the upward and the downward evolution of the MSCI World Financials Index – Net Total Return (the "**Index**") denominated in US dollars (USD).

The anticipated level of the tracking error under normal market conditions is expected to be 0.07%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the investable universe composed of listed financial companies worldwide (classified according to the Global Industry Classification Standard (GICS®)). It is designed to cover large and mid cap securities. As of 20 April 2010, the Index was composed of 338 constituents in 24 countries.

- **Index Methodology**

The Index is based on the MSCI Global Investable Market Indices methodology taking into account the size, liquidity and minimum free float criteria of the investable universe.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI web site: www.msibarra.com.

The composition of the Index is reviewed and rebalanced on quarterly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no

guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by MSCI Inc. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward evolution of the MSCI World Financials Index – Net Total Return (the "**Index**").

The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing in a diversified portfolio of transferable securities (including notably international equities) and (ii) entering into a total return swap agreement (the "**Swap**") to track both the upward and the downward evolution of the Index.

The aforementioned equities will be selected on the basis of the following eligibility criteria, in particular:

- their inclusion in a major stock exchange index;
- liquidity (must exceed a minimum daily trading volume and market capitalization);

- credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating);
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - geography;
 - sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer. This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of strong volatility on a financial instrument or securities linked to an economic sector represented in the Index, for example in the event of a takeover bid affecting one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The counterparty to the Swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

The using of the Swap will not involve leverage.

The value of the Sub-Fund's portfolio will be exchanged against the value of the Index. The net asset value of the Sub-Fund will therefore increase (or decrease) according to the valuation of the Swap.

Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any UCITS ETF share class is also available under the "factsheet" section of the website www.lyxoretf.com.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading

facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Currency Risk related to the Index

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

3) Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

4) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

7) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In-line with UCITS guidelines, the counterparty risk to the Swap counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including

counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;
ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

8) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or

pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Classes C-EUR and C-USD Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

Requests for redemption of Shares shall be centralised by the Registrar and Transfer Agent, before 6:30 p.m. (Luxembourg time), on each Dealing Day (as defined hereunder) and processed at the net asset value calculated as of the following Valuation Day. Requests for redemptions forwarded after 6:30 p.m. (Luxembourg time) on a Dealing Day shall be deemed to have been received before 6:30 p.m. on the following Dealing Day. Payment for Shares redeemed will be effected as soon as possible but not later than five Business Days after the relevant Dealing Day.

FEES CHARGED TO INVESTORS WHEN SUBSCRIBING OR REDEEMING SHARES OF THE SUB-FUND ON THE PRIMARY MARKET

- Maximum subscription charge

For any request for subscription: the higher of either (i) EUR 50,000 (or the equivalent of 50 000 EUR in the Class of Shares currency when such currency is denominated in another currency other than the EUR, being specified that the final amount will be determined by converting the subscription amount in EUR into such Class of Shares currency (rounded down to the nearest 2 decimal places) by using the WM / Reuters exchange rate for converting EUR into such currency as of the Payment Date) per subscription request; or (ii) 5% of the Net Asset Value per Share multiplied by the number of shares subscribed.

- Maximum redemption charge

For any request for redemption: the higher of either (i) EUR 50,000 (or the equivalent of 50 000 EUR in the Class of Shares currency when such currency is denominated in another currency other than the EUR, being specified that the final amount will be determined by converting the redemption amount in EUR into such Class of Shares currency (rounded down to the nearest 2 decimal places) by using the WM / Reuters exchange rate for converting EUR into such currency as of the Payment Date) per redemption request; or (ii) 5% of the Net Asset Value per Share multiplied by the number of shares redeemed.

Subscription and redemption charges, if any, shall be payable to the Management Company.

No fees will be charged by the Company to investors buying shares on the stock exchange.

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 1% of the Net Asset Value per Share multiplied by the number of shares redeemed.

DEFINITIONS

"Business Day": any full working day in Luxembourg and in Paris when the banks are opened for business.

"Dealing Day": any week day when the Index is published and investable.

"Valuation Day": each Dealing Day, taking into account the closing price of the Index on such Dealing Day.

"Subscription Deadline" and "Redemption Deadline": any Dealing Day at 6:30 p.m. Luxembourg time at the latest.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "Total Fee") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.40% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading

facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Currency Risk related to the Index

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

3) Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

4) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

7) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In-line with UCITS guidelines, the counterparty risk to the Swap counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including

counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

8) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or

pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Classes C-EUR and C-USD Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

APPENDIX 16

MULTI UNITS LUXEMBOURG – Lyxor MSCI World Consumer Staples TR UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor MSCI World Consumer Staples TR UCITS ETF is to track both the upward and the downward evolution of the MSCI World Consumer Staples Index – Net Total Return (the "**Index**") denominated in US dollars (USD).

The anticipated level of the tracking error under normal market conditions is expected to be 0.07%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the investable universe composed of listed consumer staples companies worldwide (classified according to the Global Industry Classification Standard (GICS®)). It is designed to cover large and mid cap securities. As of 20 April 2010, the Index was composed of 125 constituents in 24 countries.

- **Index Methodology**

The Index is based on the MSCI Global Investable Market Indices methodology taking into account the size, liquidity and minimum free float criteria of the investable universe.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI web site: www.msциbarra.com.

The composition of the Index is reviewed and rebalanced on quarterly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by MSCI Inc. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward evolution of the MSCI World Consumer Staples Index – Net Total Return (the "**Index**").

The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing in a diversified portfolio of transferable securities (including notably international equities) and (ii) entering into a total return swap agreement (the "**Swap**") to track both the upward and the downward evolution of the Index.

The aforementioned equities will be selected on the basis of the following eligibility criteria, in particular:

- their inclusion in a major stock exchange index;
- liquidity (must exceed a minimum daily trading volume and market capitalization);
- credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating);
- diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - geography;
 - sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer. This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of strong volatility on a financial instrument or securities linked to an economic sector represented in the Index, for example in the event of a takeover bid affecting one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The counterparty to the Swap is a first class financial institution that specialises in that type of transaction. Such counterparty will not assume any discretion over the

composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

The using of the Swap will not involve leverage.

The value of the Sub-Fund's portfolio will be exchanged against the value of the Index. The net asset value of the Sub-Fund will therefore increase (or decrease) according to the valuation of the Swap.

Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any UCITS ETF share class is also

available under the “factsheet” section of the website www.lyxoretf.com.

ELIGIBILITY OF THE SUB-FUND

According to the investment objective and policy described above, the Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

Sub-Fund’s exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

3) Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

4) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

7) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. (ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' Tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;
ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

8) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a

counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Classes C-EUR and C-USD Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

APPENDIX 17

MULTI UNITS LUXEMBOURG – Lyxor S&P 500 VIX Futures Enhanced Roll UCITS ETF

The Reference Currency of the Sub-Fund is the US Dollars (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor S&P 500 VIX Futures Enhanced Roll UCITS ETF** is to track both the upward and the downward evolution of the "S&P 500 VIX Futures Enhanced Roll Index" (the "**Index**") denominated in US Dollars.

The anticipated level of the tracking error under normal market conditions is expected to be 0.25%.

THE INDEX

- **Index Objectives**

The S&P 500 VIX Futures Enhanced Roll Index provides exposure, both positive and negative, to the movement of the futures contracts market, as listed on the Chicago CBOE pertaining to the implicit volatility of the S&P 500 index.

This Index also provides exposure to the US money market, given the absence of financing to implement the strategy.

The S&P 500 index comprises the 500 leading American companies and is denominated in US dollars.

This Index is calculated in real time and is available on the S&P website: www.standardandpoors.com.

- **Index Methodology**

The performance of the Index is equal to the performance of a basket of short-term (1 to 2 month maturities) and medium-term (3-5 term maturities) futures on the VIX index increased by the cumulative performance of American Treasury interest rates (3-month T-Bill). In order to optimise the performance of the Index, the basket comprises medium-term futures in calm periods and short-term futures in stress periods. Movement from one basket to the other is defined, according to Index methodology, by signals based on the value of the VIX in relation to its moving average.

The monitored performance is based on the Index at 3.15 pm in Chicago (GMT-6) in US Dollars.

An exhaustive description and complete construction methodology for the Index is available on the website: www.standardandpoors.com.

The tracked performance is at Index close.

The composition of the Index is reviewed and rebalanced on quarterly basis, or, in limited circumstances as further described in the Index methodology, at an earlier date as decided by the Index sponsor.

Rebalancing operations carried out within the frequency stated above could have an impact in terms of costs paid or incurred by the Sub-Fund and could consequently affect the performance of the Sub-Fund.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by Standards & Poor's. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.spindices.com>.

INVESTMENT POLICY

• Investment Objective

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

• Specific investment restrictions

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the implicit volatility market of shares making up the S&P 500 index.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as

detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- Market risk linked to the implicit volatility of the S&P 500 index:

The Sub-Fund is fully exposed to variations in the Index. The Sub-Fund is therefore exposed to 100% of market risks relating to movements arising from the implicit volatility of the securities making up the S&P 500 index. Investors are exposed, in particular, to a downward trend in volatility over the coming years.

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

- Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's I Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-

Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

- Risk resulting from the roll of future contracts used by the Sub-Funds

The Index being composed of future contracts on the Vix volatility Index, the exposure to the Index is maintained by rolling positions on such future contracts on a daily basis. Such a roll consists in transferring a position on a contract close to its maturity, before its maturity, on contracts with a later maturity. The investor is exposed to a risk resulting from the roll of these contracts. In certain market situations, this phenomenon could trigger a systematic loss when rolling these contracts on a daily basis. The spread between the Sub-Fund's performance and the underlyings performance could therefore increase progressively and negatively and have a significant impact on the Sub-Fund's performance, notably in case of long term investment made in the Sub-Fund.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C - EUR Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

APPENDIX 18

MULTI UNITS LUXEMBOURG – Lyxor SG Global Quality Income NTR UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor SG Global Quality Income NTR UCITS ETF** is to track the unlevered performance of the “SG Global Quality Income NTR” index (the “**Index**”) denominated in Euro (EUR).

For monthly hedged share classes mentioned below, the Sub-Fund would also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index component.

The anticipated level of the tracking error under normal market conditions is expected to be 0.05%.

THE INDEX

- **Index Objectives**

The “SG Global Quality Income NTR” index is composed of companies with attractive and sustainable dividends.

The Index is designed by Société Générale Research, according to a proprietary methodology.

The Index is calculated by Solactive A.G. and published by Stuttgart Boerse A.G.

- **Index Methodology**

The Index tracks companies with attractive and sustainable dividends recognizing that in the long run, dividends have dominated equity returns while higher risk has not provided higher rewards.

In that respect, the Index methodology defines an investment universe of non financial companies having a free float adjusted market capitalisation of at least USD 3bn from developed countries as set forth below: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Israel, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway,

Portugal, Singapore, Spain, Sweden, South Korea, Switzerland, United Kingdom, United States.

Then an algorithm is applied on the above mentioned investment universe. This algorithm sets the three following filters:

- a quality score (defined as the sum of 9 criteria based on profitability, leverage and operating efficiency of the issuer, such as ROA, Cash flows, etc.) of 7 or better out of 9;
- a balance sheet risk score, measured by calculating a distance to default that ranks within the top 40% of the universe;
- an expected dividend score determined through an analyst consensus. Only stocks whose expected dividend is above the maximum of 4% and 125% of the average of the universe are kept.

The process as set out in the Index methodology is based on quantitative criteria and the sources used in the context of such process are independent, in particular the annual reports and the dividends anticipations forecast from Factset. These data are subject to a quality control in order to be included within the algorithm.

All securities that meet the three above criteria are retained in the index. They are equally weighed. The number of selected securities must be between 75 and 125. If the application of the above method leads to less than 75 selected securities, (resp. more than 125), filtering thresholds are softened (resp. hardened) until leading to 75 securities in the basket (resp. 125).

The Index was set based on 1000 as of 14 May 2012 and is rebalanced quarterly over five business days, starting on the 7th Business Day in January, April, July and October.

Additional information in the Index methodology is available on Solactive’s website.

The performance tracked is the closing price of the Index.

The composition of the Index is reviewed and rebalanced on quarterly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "Licence"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by Société Générale. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.solactive.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track the unlevered performance of the SG Global Quality Income NTR (the "**Index**"). The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing in a diversified portfolio of transferable securities (including notably international equities) and (ii) entering into a total return swap agreement (the "**Swap**") to track both the upward and the downward evolution of the Index.

The aforementioned equities will be selected on the basis of the following eligibility criteria, in particular:

- a) their inclusion in a major stock exchange index;
- b) liquidity (must exceed a minimum daily trading volume and market capitalization);
- c) credit rating of the country where the issuer has its registered office (must have a least a minimum S&P or equivalent rating);
- d) diversification criteria, in particular regarding:
 - the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
 - geography;
 - sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer. This 20% cap will be monitored on each Index rebalancing date, based on the Index's calculation method, which limits exposure to equities of the same issuer to 20% and which is calculated by the Index sponsor or calculation agent. This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of steep

volatility of a financial instrument or securities linked to an economic sector represented in the Index. This could be the case for a public offering affecting one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The counterparty to the Swap is a first class financial institution that specializes in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

The use of the Swap will not involve leverage.

The value of the Sub-Fund's portfolio will be exchanged against the value of the Index. The net asset value of the Sub-Fund will therefore increase (or decrease) according to the valuation of the Swap.

Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard. Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also

specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any UCITS ETF share class is also available under the "factsheet" section of the website www.lyxoretf.com.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A Total Fee (hereafter the "**Total Fee**") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.45% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the

Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

- Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions

- Currency Risk related to the Index

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

- Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In-line with UCITS guidelines, the counterparty risk to the Swap counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

There is no guarantee that the Sub-Fund's Investment Objective will be achieved.

Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and

redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

Currency Hedge Risk applicable to the following share classes: Monthly Hedged D-EUR Monthly Hedged C-EUR Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-GBP Monthly Hedged C-GBP Monthly Hedged D-USD, Monthly Hedged C-USD:

In order to hedge EUR-currency risk (respectively USD, CHF and GBP currency risk) against each index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR share classes (respectively Monthly Hedged D-USD and Monthly Hedged C-USD; Monthly Hedged D-CHF and Monthly Hedged C-CHF; Monthly Hedged D-GBP and Monthly Hedged C-GBP), the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Index component.

However, this hedging strategy remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-GBP, Monthly Hedged C-GBP, Monthly Hedged D-USD and Monthly Hedged C-USD.

Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the

Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Sub-Fund does not benefit in any manner whatsoever from the sponsorship, support or promotion and is not sold by Société Générale (the “**Sponsor**”).

The Sponsor makes no warranty, whether express or implied, relating to (i) the merchantability or fitness for a particular purpose of the Index, and (ii) the results of the use of the Index or any data included therein.

The Sponsor shall have no liability for any losses, damages, costs or expenses (including loss of profits) arising, directly or indirectly, from the use of the Index or any data included therein. The levels of the Index do not represent a valuation or a price for any product referencing such Index.

The Sponsor gives no assurance regarding any modification or change in any methodology used in calculating the Index and is under no obligation to continue the calculation, publication and dissemination of the Index.

The Sub-Fund is not in any way sponsored, endorsed or promoted by Solactive A.G. Solactive AG does not make any warranty or representation whatsoever express or implied, either as to the results to be obtained as to the use of the Index or the figure as which the Index stands at any particular day or otherwise.

The Index is the sole and exclusive property of the Sponsor.

DISTRIBUTION OF INCOME

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR, Class D-GBP and Class D-USD Shares.

No distribution will be carried out in respect of Class C – EUR, Class C – USD and Class C – GBP Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 19**MULTI UNITS LUXEMBOURG – Lyxor MSCI ACWI Gold UCITS ETF**

The Reference Currency of the Sub-Fund is the US Dollars (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor MSCI ACWI Gold UCITS ETF** is to track both the upward and the downward evolution of the “MSCI ACWI Gold with EM DR 18% Group Entity Capped Index” (the “**Index**”) denominated in USD.

The anticipated level of the tracking error under normal market conditions is expected to be 0.10%.

THE INDEX

- **Index Objectives**

The MSCI ACWI Gold with EM DR 18% Group Entity Capped Index provides exposure, both positive and negative, to the movement of the equity performance of companies in both emerging and developed markets that obtain the majority of their revenues from gold mining activity. The constituents of the Index universe which are classified as being situated in emerging markets are represented by corresponding liquid Depositary Receipts (DR). A cap of 18% is applied to all Index components.

The Index universe comprises 24 developed countries and 21 emerging market countries and is denominated in US dollars.

This index is calculated in real time and is available on the MSCI website: www.msci.com/products/indices/tools/index.html#ACWI.

- **Index Methodology**

The Index is a free float-adjusted market capitalization weighted index designed to track the performance of global listed gold producers. The Index is capped in order to increase diversification.

The Index is based on the MSCI ACWI Gold Index since the universe for the Index is the MSCI ACWI Gold Index. MSCI ACWI is a global equity index consisting of developed and emerging market countries across the large and, mid cap size-segments. The MSCI ACWI Gold Index is made of the constituents of the MSCI ACWI which are

classified under the Gold sub-industry of the Global Industry Classification Standard (GICS®). The Gold sub-industry includes producers of gold and related products.

All constituents of the Index universe which are classified as being situated in emerging markets are substituted with corresponding liquid Depositary Receipts (DR). Only level II and level III American Depositary Receipts (ADR) listed on the New York Stock Exchange or the NASDAQ, Global Depositary Receipts (GDR) as well as ADRs listed on the London Stock Exchange are included in the Index. DRs are deemed liquid if their 12-month Annualized Traded Value Ratio (ATVR) is 15% or above.

If no such liquid DR exists for a constituent of the Index universe, this constituent is not included in the Index. If more than one liquid DR exists for a constituent, the most liquid listing based on 12-month ATVR is included in the Index.

The maximum weight of a single constituent of the Index is set at 18%. In the event a constituent has a weight greater than 18% after the step as set out above, its weight is capped at 18% and the weight of other constituents is increased in proportion to their weight prior to such capping. For each constituent a constraint factor is determined as the ratio of the capped constituent level weight and the uncapped constituent level weight.

An exhaustive description and complete construction methodology for the MSCI ACWI Gold with EM DR 18% Group Entity Capped Index is available on the website: www.msci.com/products/indices.

The tracked performance is at Index close.

The composition of the Index is reviewed and rebalanced on quarterly basis.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the “**Licence**”). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by MSCI Ltd. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

INVESTMENT POLICY

The objective of the Sub-Fund is to track both the upward and the downward of the MSCI ACWI Gold with EM DR 18% Group Entity Capped Index (the "**Index**").

The Sub-Fund will carry out its investment objective via an Indirect Replication as described in the present Prospectus.

The Sub-Fund seeks to achieve its objective by (i) investing in a diversified portfolio of transferable securities (including notably international equities) and (ii) entering into a total return swap agreement (the "**Swap**") to track both the upward and the downward evolution of the Index.

The aforementioned equities will be selected on the basis of the following eligibility criteria, in particular:

- a) their inclusion in a major stock exchange index;
- b) liquidity (must exceed a minimum daily trading volume and market capitalization);
- c) credit rating of the country where the issuer has its registered office (must

have a least a minimum S&P or equivalent rating);

- d) diversification criteria, in particular regarding:

- the issuer (application of investment ratios to assets that qualify for UCITS, pursuant to the 2010 Law);
- geography;
- sector.

The basket of transferable securities held may be adjusted daily such that its value will generally be at least 100% of the Sub-Fund's net assets. When necessary, this adjustment will be made to ensure that the market value of the swap contract mentioned above is less than or equal to zero, which will neutralize the counterparty risk arising from the swap.

Investors may find more information on the above eligibility and diversification criteria, and in particular the list of eligible indices, on Lyxor's website at www.lyxoretf.com.

With a view of future optimisation of the Sub-Funds management, the Company reserves the right to invest into other financial instruments, subject to applicable rules and restrictions mentioned in the common part of this prospectus.

The limits laid down in the chapter "Investment Objectives/ Investment Powers and Restrictions" of the present prospectus are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuer. This 20% cap will be monitored on each Index rebalancing date, based on the Index's calculation method, which limits exposure to equities of the same issuer to 20% and which is calculated by the Index sponsor or calculation agent. This 20% cap may be raised to 35% for a single issuer when justified by exceptional market conditions, for example when some securities are predominant and/or in the event of strong volatility of a financial instrument or securities linked to an economic sector represented in the Index. This could be the case if takeover bid does affect one of the securities in the Index or in the event of a significant restriction on liquidity affecting one or more financial instruments in the Index.

The counterparty to the Swap is a first class financial institution that specializes in that type of transaction. Such counterparty will not assume any discretion over the composition of the Sub-Fund's portfolio or over the underlying of the financial derivatives instruments.

The use of the Swap will not involve leverage.

The value of the Sub-Fund's portfolio will be exchanged against the value of the Index. The net asset value of the Sub-Fund will therefore increase (or decrease) according to the valuation of the Swap.

Adjustments of the Swap contract's nominal in the event of eventual subscriptions and redemptions will be performed based on the "mark to market" valuation method.

The valuation of the swap agreements will be provided by the counterparty but the Management Company will make its own independent valuation thereof.

The valuation of the swap agreements will be checked by the auditor of the Company during their annual audit mission.

Despite all measures taken by the Company to reach its objectives, these measures are subject to independent risk factors, including but not limited to, changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

Additional information concerning i) the updated composition of the basket of the transferable securities and other liquid assets held in the investment portfolio of the Sub-Fund, ii) the mark to market value of the Swap, are available on the website, www.lyxoretf.com, on the page dedicated to the Sub-Fund. The update frequency and/or the date of the update of the aforementioned information is also specified on such same dedicated page of the aforementioned website.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any UCITS ETF share class is also available under the "factsheet" section of the website www.lyxoretf.com.

ELIGIBILITY OF THE SUB-FUND

According to the investment objective and policy described above, the Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S was appointed as Management Company of the Company.

A total fee (hereafter the "**Total Fee**") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.50% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

3) Emerging Market Risk

Exposure to emerging markets carries a greater risk of potential loss than investment in developed markets. Specifically, market operating and supervision conditions may differ from standards applicable in developed markets. Exposure to emerging markets is subject to factors such as: market's greater volatility, lower trading volumes, the risk of economic and/or political instability, an uncertain or variable tax regime and regulatory environment, market closure risks, government restrictions on foreign investments, interruption or limitation of convertibility or transferability of one of the currencies making up the benchmark index.

4) Low Diversification Risk

Investors are exposed to a benchmark index representing a region, a sector or a strategy, which may provide a lesser diversification of assets compared to a broader index which will be exposed to various regions, sectors and strategies. Hence, exposure to concentrated indices may result in higher volatility compared to diversified markets. However, UCITS IV diversification rules will still apply to the underlyings of the Sub-Fund.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Currency Risk related to the Index

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

7) Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

8) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In-line with UCITS guidelines, the counterparty risk to the Swap counterparty, cannot exceed 10% of the Sub-Fund's total

assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

9) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

10) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- (iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- (iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

- (v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- (vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

- i) the Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Index is permanently cancelled by the index provider;
- iii) the Index provider fails to calculate and announce the index level;
- iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the

index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

- v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

- vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- (vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- (viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

11) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-USD and Class C-EUR Shares. The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

APPENDIX 20

MULTI UNITS LUXEMBOURG – Lyxor SG European Quality Income NTR UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor SG European Quality Income NTR UCITS ETF** is to track the unlevered performance of the "SG European Quality Income NTR" index (the "**Index**") denominated in Euro (EUR).

For monthly hedged share classes mentioned below, the Sub-Fund would also use a monthly currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against currencies of each Index Component.

The anticipated level of the tracking error under normal market conditions is expected to be 0.05%.

THE INDEX

- **Index Objectives**

The Index is composed of companies with attractive and sustainable dividends.

The Index is designed by Société Générale Research, according to a proprietary methodology.

The Index is calculated by Solactive A.G. and published by Stuttgart Boerse A.G.

- **Index Methodology**

The Index tracks companies with attractive and sustainable dividends recognizing that in the long run, dividends have dominated equity returns while higher risk has not provided higher rewards.

In that respect, the index methodology defines an investment universe of non financial companies from developed European countries as set forth below: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

Then an algorithm is applied on the above mentioned investment universe to identify

stocks to be added to the Index composition.

This algorithm sets the following filters:

- a filter on the market capitalization above one billion Euros (times a scaling factor) and on the 130-day average daily turnover which must exceed at least four million Euros (times a scaling factor). The scaling factor insures that the entry eligibility thresholds remain consistent with the evolution of European markets. It is based on the evolution of the Factset Western Europe Index.;
- a quality score (defined as the sum of 9 criteria based on profitability, leverage and operating efficiency of the issuer, such as ROA, Cash flows, etc.) of 7 or better out of 9;
- a balance sheet risk score, measured by calculating a distance to default, that ranks within the top 40% of the universe;
- an expected dividend yield above 4%;

The above criteria may be soften for maintenance of a stock in the Index. The data source for all the criteria determination is Factset.

All securities that meet the above criteria are retained in the Index. They are equally weighted. The number of securities retained in the index is set at 50. If the application of the above method leads to less than 50 selected securities, (resp. more than 50), filtering thresholds are softened (resp. hardened) until leading to 50 securities in the basket.

The Index was set based on 1000 as of 21 March 2013.

Additional information in the Index methodology is available on Solactive's website.

The performance tracked is the closing price of the index.

The composition of the Index is reviewed and is rebalanced quarterly over five business days, starting on the 7th Business Day in January, April, July and October.

The rebalancing frequency as described above will have no impact in terms of costs

in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "Licence"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by Société Générale. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.solactive.com/>

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the world developed countries equity market.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

- Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

- Currency Risk related to the Index

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

- Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-

Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

- i) the Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Index is permanently cancelled by the index provider;
- iii) the Index provider fails to calculate and announce the index level;
- iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

Currency Hedge Risk applicable to the following share classes: Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-GBP, Monthly Hedged C-GBP, Monthly Hedged D-USD and Monthly Hedged C-USD.

In order to hedge EUR-currency risk (respectively USD, CHF and GBP currency risk) against each index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR share classes (respectively Monthly Hedged D-USD and Monthly Hedged C-USD ; Monthly Hedged D-CHF and Monthly Hedged C-CHF ; Monthly Hedged D-GBP and Monthly Hedged C-GBP), the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Index component.

However, this hedging strategy remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted

by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-GBP, Monthly Hedged C-GBP, Monthly Hedged D-USD and Monthly Hedged C-USD.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR, Class D-GBP Class D-USD and Class Monthly Hedged D-EUR Shares.

No distribution will be carried out in respect of Class C-EUR, Class C-USD, Class C-GBP and Class Monthly Hedged C-EUR Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 21

MULTI UNITS LUXEMBOURG – Lyxor IBOXX EUR Liquid High Yield BB UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – **Lyxor IBOXX EUR Liquid High Yield BB UCITS ETF** is to track both the upward and the downward evolution of the “Markit iBoxx EUR High Yield Corporates BB Top 50 Mid Price TCA” – Total Return (the “**Index**”) (Bloomberg Code: IBXXCBB1) denominated in Euro (EUR).

The anticipated level of the tracking error under normal market conditions is expected to be 0.08%.

THE INDEX

- **Index Objectives**

The Index is representative of the performance of the 50 largest and most liquid corporate bonds issued in Euro rated from BB- to BB+.

- **Index Methodology**

The Index is market-value weighted, which means that components weights are defined according to each bond outstanding amount. The index consists of Euro-denominated corporate bonds issued by both Eurozone and non Eurozone issuers:

The bonds are selected according to the following criterias:

- eligible Bonds are fixed-coupons. Floating and step-up coupons are not eligible in the index;
- to capture the most liquid bonds, bonds with time to maturity below a year are not eligible within the index;
- the minimum required outstanding amount is EUR 150 million.

All bonds in the index must be rated sub-investment grade. Sub-investment grade is

defined as BB+ or lower from Fitch and Standard & Poor's and Ba1 or lower from Moody's.

If a bond is rated by more than one of the above agencies, then the Markit iBoxx rating is the average of the provided ratings. To be eligible, the bond must have a Markit iBoxx rating of BB. In addition each security needs to be rated BB- or better by the majority of the available ratings. In detail, if ratings are available from three agencies, at least two should be BB- (Ba3) or better. If only two ratings are available, they must both be BB- (Ba3) or above. If a bond is only rated by one rating agency, it must be at least BB- or Ba3.

All ratings must be above D (default).

Upon the eligible universe defined above, the 50 bonds with the highest outstanding amount are selected to be part of the index. At each rebalancing, the index weight per issuer is capped at 10%, and the total weight of each issuer with an overall weight greater than 5% is capped at 40%.

The coupons detached by the bonds making up the index are accumulated and then reinvested each month at the money market rate. They are reinvested in the index monthly, at each rebalancing date.

The full methodology for the index is available on the following website: www.markit.com.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the “**Licence**”). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Index methodology as described in section above will not be changed by Markit. In the event it is materially modified, the Manager in agreement with the Directors may decide in

its discretion to replace the Index by a suitable index if one is then available. Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

The Index is priced at mid (i.e. the average of the current bid and ask prices of the Index constituents).

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.markit.com>.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

RISKS WARNING

1) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

2) Interest Rate Risk

Interest rate risk refers to fluctuations in the value of a fixed-income security resulting from changes in the general level of interest rates. When the general level of interest rates goes up, the prices of most fixed-income securities go down. When the general level of interest rates goes down, the prices of most fixed-income securities go up.

3) Issuer credit Risk

Being exposed to bonds and other fixed income securities, the Sub-Fund is subject to the risk that some issuers may not make timely payments of interest and/or principal on such securities, which will adversely affect its value. Furthermore, an issuer may suffer adverse changes in its financial condition that could lower the credit quality or a security, leading to greater volatility in the price of the security and in the value of the Sub-Fund. A change in the quality rating of a bond or other security can also affect the security's liquidity and make it more difficult to sell.

Because the Sub-Fund is exposed to non-investment grade bonds, it presents a higher credit risk than if it had been exposed to investment grade securities.

4) Low Diversification Risk

Investors are exposed to a benchmark index representing a region, a sector or a strategy, which may provide a lesser diversification of assets compared to a broader index which will be exposed to various regions, sectors and strategies. Hence, exposure to concentrated indices may result in higher volatility compared to diversified markets. However, UCITS diversification rules will still apply to the underlyings of the Sub-Fund.

5) Risk that the Sub-Fund's investment objective is only partially achieved

There is no guarantee that the investment objective will be achieved, as no asset or financial instrument can ensure that the Benchmark Index will be automatically and continuously replicated, particularly in the event of one or more of the following risks.

6) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

7) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

8) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

9) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

10) Specific Risk arising from Markit iBoxx rating definition

According to the index methodology, an average rating is used when considering inclusion in the index. Hence, the Index could comprise bonds that would have been non-eligible because deemed too risky for one of the rating agencies.

11) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- (i) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- (ii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- (iii) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- (iv) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- (v) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- (vi) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

12) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the

ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Classes C-EUR Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Index referred to here is the property of Markit Indices Limited (the "**Index Sponsors**") and it is used under licence for the Sub-Fund.

The parties agree that the Index Sponsor does not approve of, endorse or recommend the Sub-Fund.

Under no circumstances does the Index Sponsor provide any guarantee - whether explicit or implicit (including but not limited to the commercial value or appropriateness for any specific use or utilisation) - pertaining to the Index or any data included in or linked to the Index and, in particular, declines any guarantee relating to the quality, accuracy and/or exhaustiveness of the Index or the data included in or linked to the Index, or the results obtained from use of the Index and/or the composition of the Index at a given date or moment, likewise the financial rating of any issuing entity or any credit or similar event (irrespective of the definition of such) relating to a bond in the Index at a given date or at any other time.

The Index Sponsor cannot be held liable for any reason whatsoever in terms of an error in the Index, and the Index Sponsor is not required to inform of such an error, in the event it would occur.

Under no circumstances do the Index Sponsors issue a recommendation to buy or sell the Sub-Fund, nor do they express an opinion concerning the ability of the Index to

replicate the performance of the markets in question, or concerning the Index or any transaction or product related to it, or indeed the corresponding risks.

The Index Sponsor is under no obligation to take the needs of a third party into consideration during the determination, modification in the composition or calculation of the Index. The purchaser or a seller of the Sub-Fund and the Index Sponsors cannot be held liable in the event the Index Sponsors do not take the necessary measures in determining, adjusting or calculating the Index.

The Index Sponsors and their related companies retain the right to process any of the bonds making up the Index, and may, when permitted, accept deposits, make loans or perform any other credit activity, and more generally carry out all or any investment banking and finance service or other commercial activity with these bonds' issuers or their related companies, and they may enter into such activities as though the Index did not exist, without taking into account any consequences such action may have on the Index or the Sub-Fund.

APPENDIX 22

MULTI UNITS LUXEMBOURG – Lyxor MSCI Pacific ex Japan UCITS ETF

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor MSCI Pacific ex Japan UCITS ETF** is to track both the upward and the downward evolution of the MSCI Pacific ex Japan Index – Net Total Return (the "**Index**") (Bloomberg Code: M1PCJ) denominated in US dollars (USD).

The anticipated level of the tracking error under normal market conditions is expected to be 0.07%.

THE INDEX

- **Index Objectives**

The Index captures large and mid cap representation across 4 of 5 Developed Markets countries in the Pacific region, excluding Japan. With 147 constituents as of January 30th 2015, the Index covers approximately 85% of the free float-adjusted market capitalization in each of the following countries: Australia, Hong Kong, New Zealand and Singapore.

- **Index Methodology**

The Index is a free float market capitalisation-weighted index which measures the performance of the large and mid cap segments of the Australia, Hong Kong, New Zealand and Singapore markets.

The Index is based on the MSCI Global Investable Market Indices (GIMI) Methodology, a comprehensive and consistent approach to index construction that allows for meaningful global views and cross regional comparisons across all market capitalization size, sector and style segments and combinations.

This methodology aims to provide exhaustive coverage of the relevant investment opportunity set with a strong emphasis on index liquidity, investability and replicability. These criteria are based upon Annual Traded Value Ratio (ATVR), added to 3-month Frequency of trading.

The composition of the Index is reviewed and rebalanced on quarterly basis (in February, May, August and November).

The Index is a Net Total Return index. A Net Total Return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI web site: www.msci.com.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Index methodology as described in section above will not be changed by MSCI Inc. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on www.msci.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "Total Fee") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.30% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Currency Risk related to the Index

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

3) Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

4) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

7) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise

between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

8) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

9) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Classes C-EUR Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR.

For the other Classes of Shares (if any),

please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

APPENDIX 23

MULTI UNITS LUXEMBOURG – Lyxor Fed Funds US Dollar Cash UCITS ETF

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor Fed Funds US Dollar Cash UCITS ETF is to reflect the performance of the “Solactive Fed Funds Effective Rate Total Return index” (Bloomberg Code: SOFEDL01) denominated in USD (the “**Benchmark Index**”).

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of a cash notional deposit paying the federal funds effective rate, which is the US short term reference rate for monetary market, with daily reinvestment of interests earned in the deposit.

- **Benchmark Index Methodology**

The federal funds rate is the interest rate at which depository institutions in the United States can lend cash to each other overnight. The rate level is computed by the Federal Open Market Committee. The federal funds effective rate is the weighted average of the federal funds rate across all transactions.

The federal funds effective rate is calculated on each United States business day.

The Benchmark Index reflects the performance of a cash deposit paying the federal funds effective rate, which is the US short term reference rate for monetary market, by daily reinvesting the interests earned in the deposit.

The Benchmark Index methodology allows the reintegration of non-business days in the interest rate calculation, as per a formula based on the last federal fund effective rate available.

Since the Benchmark Index is based upon the federal funds effective rate, it won't be periodically revised.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the “**Licence**”).

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on www.solactive.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The anticipated level of the tracking error under normal market conditions is expected to be 0.02%.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the US money-market.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "Total Fee") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.15% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to

receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Interest Rate Risk

The Sub-Fund is exposed to moves in money markets following a decision from the respective central bank. As a result, a decrease in the interest rates under the level of management fees and structuring costs could lead to a decrease in the net asset value of the Sub-Fund.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Benchmark Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- Risk linked to inflation

Through the Sub-Fund, Shareholders are exposed to the risk of potential capital erosion due to a general increase of inflation as the Sub-Fund performance does not account for inflation.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus

- Currency Risk related to the listing of the Sub-Fund

The Sub-Fund is exposed to currency risk, as it may be listed on certain stock exchanges and/or multilateral trading facilities in a currency different from the Benchmark Index. As a result, due to exchange rate fluctuations, the net asset value of the Sub-Fund, when listed in a currency different from the Benchmark Index, could decrease while the Benchmark Index value increases.

- Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Benchmark Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Benchmark Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Benchmark Index Disruption Risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out.

Benchmark Index disruption notably covers situations where:

i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the Benchmark Index provider;

iii) the Benchmark Index provider fails to calculate and announce the Benchmark Index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that

formula or method to maintain the calculation of the Benchmark Index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the

ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-USD Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Sub-Fund is not sponsored, promoted, sold or supported by the Solactive (the "Licensor"). Nor does the Licensor offer any express or implicit guarantee or assurance either with regard to the results of using the Benchmark Index and/or Index trade mark or the Benchmark Index Price, at any time or in any other respect.

The Benchmark Index is calculated and published by the Licensor. The Licensor uses its best efforts to ensure that the Benchmark Index is calculated correctly. Irrespective of its obligations towards the Issuer, the Licensor has no obligation to point out errors in the Benchmark Index to third parties including, but not limited to, investors and/or financial intermediaries of the Sub-Fund. The Licensor does not guarantee the accuracy and/or the completeness of the Benchmark Index or any related data, and shall not have any liability for any errors, omissions or interruptions therein.

Neither publication of the Benchmark Index by the Licensor, nor the licensing of the Benchmark Index or Index trade mark, for the purpose of use in connection with the Sub-Fund, constitutes a recommendation by the Licensor to invest capital in said Financial instrument nor does it, in any way, represent an assurance or opinion of the Licensor with regard to any investment in this Sub-Fund. In no event shall the Licensor have any liability for any lost profits or indirect, punitive, special or consequential damages or losses, even if notified of the possibility thereof.

APPENDIX 24

MULTI UNITS LUXEMBOURG – Lyxor FTSE Emerging Minimum Variance UCITS ETF

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor FTSE Emerging Minimum Variance UCITS ETF is to track both the upward and the downward evolution of the FTSE Emerging Minimum Variance Index (the "**Index**") denominated in US dollars (USD) in order to offer an exposure to the emerging equity market and potentially offer improvements to the risk reward trade-off by reducing portfolio volatility – while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "**Tracking Error**").

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.08%.

THE INDEX

- **Index Objectives**

The Index consists of equity securities incorporated in emerging countries that meets FTSE eligibility criteria. The Index weighting has been designed to minimize the Index volatility, based on historical return information, thereby offering potential improvements to the risk/reward trade-off of the Index.

- **Index Methodology**

The eligible universe of the Index is composed of securities that meet the following criteria:

(i) country has been classified as emerging following FTSE rules which as of 2014's end comprise Brazil, Chile, Czech Republic, China, Hungary, Colombia, Malaysia, Egypt, Mexico, India, Poland, Indonesia, South Africa, Morocco, Taiwan, Pakistan, Thailand, Peru, Turkey, Philippines, Russia, United Arab Emirates;

(ii) issuing company is incorporated in one of these countries and has its sole listing in the same country, or has been allocated to

one of these countries by FTSE Nationality Advisory Committee;

(iii) security is a eligible share listed on FTSE eligible markets and sources of trading;

(iv) security passed screens for liquidity, free float and foreign ownership restrictions.

The methodology of the Index is supervised by a regional advisory committee composed of senior market practitioners.

The composition of the Index is reviewed twice a year.

A full description and the complete methodology used to construct the Index and information on the composition and respective weightings of the Index components are available on the FTSE website at www.ftse.com.

The performance monitored is that of the Index closing values computed by FTSE using the WM/Reuters Spot Rates™ at 16:00 UK time.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Index methodology as described in section above will not be changed by FTSE. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in

the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on www.ftse.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.fundsquare.net.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Emerging Market Risk

Exposure to emerging markets carries a greater risk of potential loss than investment in developed markets. Specifically, market operating and supervision conditions may differ from standards applicable in developed markets. Exposure to emerging markets is subject to factors such as:

market's greater volatility, lower trading volumes, the risk of economic and/or political instability, an uncertain or variable tax regime and regulatory environment, market closure risks, government restrictions on foreign investments, interruption or limitation of convertibility or transferability of one of the currencies making up the Index.

3) Quantitative risk

The minimum variance methodology includes a constrained variance optimization algorithm. In some cases, it might not offer the best possible variance and might have a different risk profile than the initial investment universe, the Index.

4) Currency Risk related to the Index

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

5) Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

6) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Index is subject to a negative performance over the investment period.

7) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in

line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

8) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

9) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

10) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- (i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Index treatment.

11) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-USD and C-EUR Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-USD and D-EUR Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

Payment for Shares subscribed must be received by the Depositary not later than three Business Days after the relevant Dealing Day, except that the Board of Directors may decide otherwise by circular resolution.

REDEMPTION OF SHARES ON THE PRIMARY MARKET

Requests for redemption of Shares shall be centralised by the Registrar and Transfer Agent, before 5:00 p.m. (Luxembourg time), on each Dealing Day (as defined hereunder) and processed at the net asset value calculated as of the relevant Valuation Day. Requests for redemptions forwarded after 5:00 p.m. (Luxembourg time) on a Dealing Day shall be deemed to have been received before 5:00 p.m. on the following Dealing Day.

Payment for Shares redeemed will be effected as soon as possible but not later than three Business Days after the relevant Dealing Day.

FEES CHARGED TO INVESTORS WHEN SUBSCRIBING OR REDEEMING SHARES OF THE SUB-FUND ON THE PRIMARY MARKET

- Maximum subscription charge

For any request for subscription: the higher of either (i) EUR 50,000 (or the equivalent of 50,000 EUR in the Class of Shares currency when such currency is denominated in another currency other than the EUR, being specified that the final amount will be determined by converting the subscription amount in EUR into such Class of Shares

currency (rounded down to the nearest 2 decimal places) by using the WM / Reuters exchange rate for converting EUR into such currency as of the Payment Date) per subscription request; or (ii) 5% of the Net Asset Value per Share multiplied by the number of shares subscribed.

- Maximum redemption charge

For any request for redemption: the higher of either (i) EUR 50,000 (or the equivalent of 50,000 EUR in the Class of Shares currency when such currency is denominated in another currency other than the EUR, being specified that the final amount will be determined by converting the redemption amount in EUR into such Class of Shares currency (rounded down to the nearest 2 decimal places) by using the WM / Reuters exchange rate for converting EUR into such currency as of the Payment Date) per redemption request; or (ii) 5% of the Net Asset Value per Share multiplied by the number of shares redeemed.

Subscription and redemption charges, if any, shall be payable to the Management Company.

No fees will be charged by the Company to investors buying shares on the stock exchange.

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the following exit charges will apply (in replacement of the maximum redemption charges stated above): 1% of the Net Asset Value per Share multiplied by the number of shares redeemed.

DEFINITIONS

"**Business Day**": any full working day in Luxembourg and in Paris when the banks are opened for business.

"**Dealing Day**": any week day when the Index is published and investable.

"**Valuation Day**": each Dealing Day, taking into account the closing price of the Index on such Dealing Day.

"**Subscription Deadline**" and "**Redemption Deadline**": any Dealing Day at 5:00 p.m. Luxembourg time at the latest.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the “**Total Fee**”) is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.20% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

3) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Index is subject to a negative performance over the investment period.

4) Quantitative risk

The minimum variance methodology includes a constrained variance optimization algorithm. In some cases, it might not offer the best possible variance and might have a different risk profile than the initial investment universe, the Index.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of

subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

7) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

8) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- (i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- (ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- (iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- (iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- (v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- (vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Index treatment.

9) Collateral Management Risk

Counterparty risk arising from investments in Derivatives is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, *inter alia*, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-EUR Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Sub-Fund is not in any way sponsored, endorsed, sold or promoted by FTSE International Limited ("FTSE") or the London Stock Exchange Group companies ("LSEG") (together the "Licensor Parties") and none of the Licensor Parties make any claim, prediction, warranty or representation whatsoever, expressly or impliedly, either as to (i) the results to be obtained from the use of the Index (upon which the Sub-Fund is based), (ii) the figure at which the Index is

said to stand at any particular time on any particular day or otherwise, or (iii) the suitability of the Index for the purpose to which it is being put in connection with the Sub-Fund. None of the Licensor Parties have provided or will provide any financial or investment advice or recommendation in relation to the Index to Lyxor International Asset Management or to its clients. The Index is calculated by FTSE or its agent. None of the Licensor Parties shall be (a) liable (whether in negligence or otherwise) to any person for any error in the Index or (b) under any obligation to advise any person of any error therein.

All rights in the Index vest in FTSE. "FTSE®" is a trade mark of LSEG and is used by FTSE under licence.

APPENDIX 26

MULTI UNITS LUXEMBOURG – Lyxor Euro STOXX 50 Protective Put UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor Euro STOXX 50 Protective Put UCITS ETF is to track both the upward and the downward evolution of the "EURO STOXX 50 Protective Put 80% 18m 6/3 Index" (the "**Index**") denominated in Euro in order to offer an exposure to Eurozone companies while at the same time mitigating partially the impact of a sudden decrease of the EURO STOXX 50® NET RETURN index – while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "**Tracking Error**").

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.25%.

THE INDEX

- **Index Objectives**

The Index combines an investment in the EURO STOXX 50® NET RETURN index and a systematic hedging strategy based on the purchase of EURO STOXX 50® index put option. The Index seeks to provide equity exposure to Eurozone companies while at the same time mitigating partially the impact of a sudden and significant decrease of the EURO STOXX 50® NET RETURN index.

- **Index Methodology**

The Index combines the EURO STOXX 50® NET RETURN index and a put option on the EURO STOXX 50® index.

The EURO STOXX 50® NET RETURN index is a subset of the EURO STOXX index. It is composed of the Eurozone's 50 largest stocks, which are selected on the basis of their market capitalization, high liquidity and representativeness of an economic sector. It aims for a weighting by country and by economic sector that most closely reflects the structure of the Eurozone's economy.

The hedging strategy consists in a systematic long investment in out of the money long term put options. The composition of the Index is reviewed and rebalanced on quarterly basis: on the third Friday of the last month of each calendar quarter a new put option is determined. On each rolling date, the index methodology provides for criteria determining the new options characteristics, which systematically has fifteen month remaining to maturity and, on the rolling date, is at most 20 percent out of the money.

The composition of the Index is reviewed and rebalanced on quarterly basis (in March, June, September and December).

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The Index is calculated by STOXX Limited.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the STOXX web site: <http://www.stoxx.com>.

The rebalancing frequency as described above will have an impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by licensor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.stoxx.com>.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to Eurozone companies.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the “**Total Fee**”) is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.35% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoreff.com.

RISKS WARNING**1) Equity Risk**

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

3) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

4) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this Prospectus.

5) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a

credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

6) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a

modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

(ix) Risk related to the hedging strategy

The hedging strategy consists in a systematic long investment in out-of-the-money long term Put options. The objective of the hedging strategy is to partially mitigate the impact of a sudden and significant decrease of the Euro Stoxx 50® Net Return index.

In case of such sudden and significant decrease of the Euro Stoxx 50® Net Return index, the market value of the hedging strategy will tend to increase and to partially offset the decrease of the index market value. Therefore, the impact of a sharp and significant fall on the Net Asset Value per share of the Sub-Fund will often be more limited than the impact of the same

fluctuation on the Euro Stoxx 50® Net Return index.

On the contrary, in case of an increase of the Euro Stoxx 50® Net Return index, the market value of the hedging strategy will tend to decline, which will negatively affect the Net Asset Value per share of the Sub-Fund. Therefore, the impact of an increase on the Net Asset Value per share of the Sub-Fund will often be more limited than the impact of the same fluctuation on the Euro Stoxx 50® Net Return index.

Last, the hedging strategy does not incur a capital protection. Any investor may experience losses and the capital invested is neither guaranteed nor protected. There is a risk of capital loss limited to the invested amount.

7) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-EUR Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

STOXX and its licensors (the “Licensors”) have no relationship to the holder of the License, other than the licensing of the Index and the related trademarks for use in connection with the Sub-Fund.

The licensing agreement between the Lyxor International Asset Management and STOXX is solely for their benefit and not for the benefit of the owners of the Sub-Fund or any other third parties.

STOXX and its Licensors do not:

- sponsor, endorse, sell or promote the Sub-Fund;
- recommend that any person invest in the Sub-Fund or any other securities;
- have any responsibility or liability for or make any decisions about the timing, amount or pricing of the Sub-Fund;
- have any responsibility or liability for the administration, management or marketing of the Sub-Fund;
- consider the needs of the Sub-Fund or the owners of the Sub-Fund in determining, composing or calculating the Index or have any obligation to do so.

STOXX and its Licensors will not have any liability in connection with the Sub-Fund.

Specifically,

- STOXX and its Licensors do not make any warranty, express or implied and disclaim any and all warranty about:
- the results to be obtained by the Sub-Fund, the owner of the Sub-Fund or any other person in connection with the use of the Index and the data included in the Index;
- the accuracy or completeness of the Index and its data;
- The merchantability and the fitness for a particular purpose or use of the Index and its data;
- STOXX and its Licensors will have no liability for any errors, omissions or interruptions in the Index or its data;
- under no circumstances will STOXX or its Licensors be liable for any lost profits or indirect, punitive, special or consequential damages or losses, even if STOXX or its Licensors knows that they might occur.

APPENDIX 27

MULTI UNITS LUXEMBOURG – Lyxor Pan Africa UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor Pan Africa UCITS ETF** is to track both the upward and the downward evolution of the “SGI Pan Africa Net Total Return Index” (the “**Index**”) denominated in Euro in order to offer an exposure to the African equities market or to companies whose main activity is on the African continent – while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.10%.

THE INDEX

- **Index Objectives**

The Index is composed of the stocks of companies listed on African stock exchanges or which do most of their business in Africa.

- **Index Methodology**

From a geographic perspective, the Index is composed of:

- one third South African shares;
- one third shares in companies listed or having their main activity in northern Africa;
- one third shares in companies whose main activity is in sub-Saharan Africa, excluding South Africa.

In each of these three regions, the ten largest companies by market capitalization were selected for the Index, while also taking their liquidity into consideration. No region may account for less than 25% and more than 50% of the Index's total capitalization.

No stock may account for more than 10% of the Index.

The initial listing exchanges of the Index stocks are: Johannesburg (South Africa), Cairo (Egypt), Casablanca (Morocco), London (United Kingdom), Toronto (Canada) and New York (United States).

The composition of the Index is reviewed and rebalanced each quarter.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The Index is calculated by Standard & Poor's.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the following web site: <http://www.sgindex.com>.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the “**Licence**”). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by licensor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <https://www.sginindex.com>.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the **"Total Fee"**) is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.85% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Low Diversification Risk

Investors are exposed to a benchmark index representing a region, a sector or a strategy, which may provide a lesser diversification of assets compared to a broader index which will be exposed to various regions, sectors and strategies. Hence, exposure to concentrated indices may result in higher volatility compared to diversified markets. However, UCITS diversification rules will still apply to the underlyings of the Sub-Fund.

3) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the benchmark index is subject to a negative performance over the investment period.

4) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

5) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this Prospectus.

6) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-

Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

7) Emerging Market Risk

Exposure to emerging markets carries a greater risk of potential loss than investment in developed markets. Specifically, market operating and supervision conditions may differ from standards applicable in developed markets. Exposure to emerging markets is subject to factors such as: market's greater volatility, lower trading volumes, the risk of economic and/or political instability, an uncertain or variable tax regime and regulatory environment, market closure risks, government restrictions on foreign investments, interruption or limitation of convertibility or transferability of one of the currencies making up the benchmark index.

8) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- (i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI

and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

(ix) Currency Risk related to the Index

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

(x) Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

9) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-EUR and Class USD Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-USD.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Sub-Fund is not, in any way whatsoever, sponsored, supported, promoted or marketed by Société Générale Index (SGI), which is a registered trademark of the Société Générale group (hereinafter the "Licensor").

The Licensor assumes no obligation and provides no warranty, either expressed or implied, in respect of the results that may be obtained from using the Index and/or the level of said Index at any given time or day, or of any other type. The Licensor shall not be liable to anyone (whether on the grounds of negligence or for any other reason) for any error that affects the Index and shall not be obliged to inform anyone of such an error.

The Index is the exclusive property of Société Générale. Société Générale has signed a contract with Standard & Poor's (S&P) wherein S&P undertakes to calculate and maintain the Index. However, S&P cannot be held liable for an error or omission in calculating the Index.

APPENDIX 28

MULTI UNITS LUXEMBOURG – Lyxor EUROMTS 5-7Y Investment Grade (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor EUROMTS 5-7Y Investment Grade (DR) UCITS ETF is to reflect the performance of the “FTSE MTS Eurozone Government Bond IG 5-7Y (Mid Price) Index (Ex-CNO Etrix)” (the “**Benchmark Index**”) denominated in Euro.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of the bonds issued by the governments of Eurozone Member States that meet FTSE MTS eligibility criteria.

- **Benchmark Index Methodology**

The Benchmark Index is composed of bonds issued by the governments of Eurozone Member States within the 5-7 year maturity range, weighted by country.

The eligible universe of FTSE MTS indices is composed of securities that meet the following criteria:

- (i) principal and coupons must be denominated in Euro, there must be no embedded options or convertibility and maturity be at least 1 year;
- (ii) issued by a sovereign government of an Eurozone country having at least two “Investment Grade” ratings out of three from the rating agencies S&P, Moody’s and Fitch and selected by FTSE MTS from among the following countries: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;
- (iii) at least 2 billion Euros of issuance outstanding;
- (iv) listed on the FTSE MTS exchanges.

The methodology of the FTSE MTS indices is supervised by an independent advisory

committee composed of bond and issuer specialists.

These characteristics ensure that FTSE MTS indices are highly liquid and representative of the performance of the major sovereign bonds.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the following web site: <http://www.ftse.com>.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the “**Licence**”). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable benchmark index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by licensor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable benchmark index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the

Benchmark Index can be found on <http://www.ftse.com>.

INVESTMENT POLICY

- **Investment Objective:**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.02%.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 25% and is expected to represent approximately

0% of the Net Asset Value. In certain circumstances this proportion may be higher.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to bonds issued by Eurozone Member States.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoreff.com.

RISKS WARNING**1) Interest Rate Risk**

The Sub-Fund is exposed to moves in bonds markets following unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve. The bonds that make up the Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

2) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

3) Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

4) Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark

Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this Prospectus.

7) Counterparty Risk

When the Sub-Fund would engage into transactions as FDI, the Sub-Fund will be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

The Sub-Fund would be predominantly exposed to a counterparty risk resulting from the use of over-the-counter FDI. In-line with UCITS guidelines, the counterparty risk to the FDI counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the FDI could be early terminated.

Where Société Générale is the counterparty for a FDI transaction and/or a temporary security transaction, conflicts of interest may arise between it and the Management Company which has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

8) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication

of the Index, especially if one or more of the following risks occur:

9) Benchmark Index tracking risk

Reflecting the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's Manager may therefore use various optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not Benchmark Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Benchmark Index.

When the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Benchmark Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(i) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(ii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iii) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

(iv) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(v) Benchmark Index Disruption Risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark index disruption persists, the Company will determine the appropriate measures to be carried out.

Benchmark Index disruption notably covers situations where:

i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the index provider;

iii) the Benchmark Index provider fails to calculate and announce the index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated

over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vi) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(vii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the index treatment.

10) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution of income, in respect of Class C-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Sub-Fund is in no way sponsored, endorsed, sold or promoted by FTSE TMX Global Debt Capital Markets (the “**Holders**”).

The Holders shall not be construed as being responsible or liable for the promotion or marketing of the Sub-Fund.

FTSE MTS, the FTSE MTS index names (FTSE MTS Index™) and the FTSE MTS indices (FTSE MTS indices™) are trademarks registered by the Holders. The FTSE MTS indices are calculated by the Holders and are marketed and distributed by MTSNext, a subsidiary of the Holders.

APPENDIX 29

MULTI UNITS LUXEMBOURG – Lyxor EUROMTS 7-10Y Investment Grade (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor EUROMTS 7-10Y Investment Grade (DR) UCITS ETF** is to reflect the performance of the “FTSE MTS Eurozone Government Bond IG 7-10Y (Mid Price) Index (Ex-CNO Etrix)” (the “**Benchmark Index**”) denominated in Euro.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of the bonds issued by the governments of Eurozone Member States that meet FTSE MTS eligibility criteria.

- **Benchmark Index Methodology**

The Benchmark Index is composed of bonds issued by the governments of Eurozone Member States within the 7-10 year maturity range, weighted by country.

The eligible universe of FTSE MTS indices is composed of securities that meet the following criteria:

- (i) principal and coupons must be denominated in Euro, there must be no embedded options or convertibility and maturity be at least 1 year;
- (ii) issued by a sovereign government of an Eurozone country having at least two “Investment Grade” ratings out of three from the rating agencies S&P, Moody’s and Fitch and selected by FTSE MTS from among the following countries: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;
- (iii) at least 2 billion Euros of issuance outstanding;
- (iv) listed on the FTSE MTS exchanges.

The methodology of the FTSE MTS indices is supervised by an independent advisory committee composed of bond and issuer specialists.

These characteristics ensure that FTSE MTS indices are highly liquid and representative of the performance of the major sovereign bonds.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the following web site: <http://www.ftse.com>.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the “**Licence**”). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable benchmark index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by licensor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable benchmark index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules

for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on <http://www.ftse.com>.

INVESTMENT POLICY

- **Investment Objective:**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.02%.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 25% and is expected to represent approximately

0% of the Net Asset Value. In certain circumstances this proportion may be higher.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to bonds issued by Eurozone Member States.

RISKS WARNING

1) Interest Rate Risk

The Sub-Fund is exposed to moves in bonds markets following unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve. The bonds that make up the Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

2) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

3) Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

4) Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark

Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this Prospectus.

7) Counterparty Risk

When the Sub-Fund would engage into transactions as FDI, the Sub-Fund will be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

The Sub-Fund would be predominantly exposed to a counterparty risk resulting from the use of over-the-counter FDI. In-line with UCITS guidelines, the counterparty risk to the FDI counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the FDI could be early terminated.

Where Société Générale is the counterparty for a FDI transaction and/or a temporary security transaction, conflicts of interest may arise between it and the Management Company which has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

8) Benchmark Index tracking risk

Reflecting the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's Manager may therefore use various

optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not Benchmark Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Benchmark Index.

9) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

When the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty

to the FDI, the net asset value of the Sub-Fund may be affected.

- (iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- (v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- (vi) Benchmark Index Disruption Risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

- i) the Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Index is permanently cancelled by the index provider;
- iii) the Index provider fails to calculate and announce the index level;
- iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;
- v) one or several constituents of the Index become illiquid, (i) their quotation being

suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- (vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- (viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the index treatment.

10) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Sub-Fund's will not distribute income, in respect of Class C-EUR.

For the other Classes of Shares (if any),

please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

APPENDIX 30

MULTI UNITS LUXEMBOURG – Lyxor EUROMTS 15+Y Investment Grade (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor EUROMTS 15+Y Investment Grade (DR) UCITS ETF** is to reflect the performance of the “FTSE MTS Eurozone Government Bond IG 15+Y (Mid Price) Index (Ex-CNO Etrix)” (the “**Benchmark Index**”) denominated in Euro.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of the bonds issued by the governments of Eurozone Member States that meet FTSE MTS eligibility criteria.

- **Benchmark Index Methodology**

The Benchmark Index is composed of bonds issued by the governments of Eurozone Member States with a maturity range of more than 15 years, weighted by country.

The eligible universe of FTSE MTS indices is composed of securities that meet the following criteria:

- principal and coupons must be denominated in Euro, there must be no embedded options or convertibility and maturity be at least 1 year;
- issued by a sovereign government of an Eurozone country having at least two “Investment Grade” ratings out of three from the rating agencies S&P, Moody’s and Fitch and selected by FTSE MTS from among the following countries: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;
- at least 2 billion Euros of issuance outstanding;

- listed on the FTSE MTS exchanges.

The methodology of the FTSE MTS indices is supervised by an independent advisory committee composed of bond and issuer specialists.

These characteristics ensure that FTSE MTS indices are highly liquid and representative of the performance of the major sovereign bonds.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the following web site: <http://www.ftse.com>.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the “**Licence**”). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable benchmark index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by licensor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable benchmark index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on <http://www.ftse.com>.

INVESTMENT POLICY

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the “**Total Fee**”) is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.165% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Interest Rate Risk

The Sub-Fund is exposed to moves in bonds markets following unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve. The bonds that make up the Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

2) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

3) Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

4) Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this Prospectus.

7) Counterparty Risk

When the Sub-Fund would engage into transactions as FDI, the Sub-Fund will be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

The Sub-Fund would be predominantly exposed to a counterparty risk resulting from the use of over-the-counter FDI. In-line with UCITS guidelines, the counterparty risk to the FDI counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the FDI could be early terminated.

Where Société Générale is the counterparty for a FDI transaction and/or a temporary security transaction, conflicts of interest may arise between it and the Management Company which has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

8) Benchmark Index tracking risk

Reflecting the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's Manager may therefore use various optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not Benchmark Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Benchmark Index.

9) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

When the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- (iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- (iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- (v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- (vi) Benchmark Index Disruption Risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

- i) the Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Index is permanently cancelled by the index provider;
- iii) the Index provider fails to calculate and announce the index level;
- iv) the Index provider makes a material change in the formula for or method of

calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- (vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- (viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the index treatment.

10) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in

selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Sub-Fund's will not distribute income, in respect of Class C-EUR.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Sub-Fund is in no way sponsored, endorsed, sold or promoted by FTSE TMX Global Debt Capital Markets (the "**Holder**s").

The Holders shall not be construed as being responsible or liable for the promotion or marketing of the Sub-Fund.

FTSE MTS, the FTSE MTS index names (FTSE MTS IndexTM) and the FTSE MTS indices (FTSE MTS indicesTM) are trademarks registered by the Holders. The FTSE MTS indices are calculated by the Holders and are marketed and distributed by MTSNext, a subsidiary of the Holders.

Neither the Holders nor MTSNext can be held responsible or liable for any loss or damages of any type whatsoever (including, in particular, investment losses) in relation, in whole or in part, with the Sub-Fund or with the provision of the Benchmark Index, a sub-index or a registered trademark.

APPENDIX 31

MULTI UNITS LUXEMBOURG – Lyxor EuroMTS Highest Rated Macro-Weighted Govt Bond (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor EuroMTS Highest Rated Macro-Weighted Govt Bond (DR) UCITS ETF** is to reflect the performance of the “FTSE MTS Highest Rated Macro-Weighted Government Bond (Mid Price) Index” (the “**Benchmark Index**”) denominated in Euro.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of the bonds issued by the governments of Eurozone Member States that meet FTSE MTS eligibility criteria.

- **Benchmark Index Methodology**

The Benchmark Index is composed of bonds issued by the governments of Eurozone Member States that have the highest credit ratings (“AAA” or equivalent by at least two of the three ratings agencies S&P, Moody’s and Fitch). They are weighted in the Index on the basis of macroeconomic indicators.

The Benchmark Index comprises a minimum of five issuers. If an issuer is downgraded, it will be replaced with another eligible issuer country, such that at least five issuers are maintained in the Index.

Index securities are therefore among the highest rated Eurozone sovereign bonds.

The Benchmark Index eligible universe is composed of bonds that meet the following criteria:

- principal and coupons must be denominated in Euro, with no embedded options or convertibility;
- traded on the FTSE MTS platform;
- issued by the sovereign government of an Eurozone

Member State having least two AAA ratings out of three from the rating agencies S&P, Moody’s and Fitch and selected by FTSE MTS from among the following countries: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;

- at least 2 billion Euros of issuance outstanding;
- maturity be at least more than one year.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the following web site: <http://www.ftse.com>.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the “**Licence**”). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable benchmark index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by licensor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable benchmark index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on <http://www.ftse.com>.

INVESTMENT POLICY

- **Investment Objective:**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.02%.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Interest Rate Risk

The Sub-Fund is exposed to moves in bonds markets following unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve. The bonds that make up the Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

2) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

3) Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

4) Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark

Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this Prospectus.

7) Counterparty Risk

When the Sub-Fund would engage into transactions as FDI, the Sub-Fund will be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

The Sub-Fund would be predominantly exposed to a counterparty risk resulting from the use of over-the-counter FDI. In-line with UCITS guidelines, the counterparty risk to the FDI counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the FDI could be early terminated.

Where Société Générale is the counterparty for a FDI transaction and/or a temporary security transaction, conflicts of interest may arise between it and the Management Company which has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

8) Benchmark Index tracking risk

Replicating the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's Manager may therefore use various

optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not Benchmark Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Benchmark Index.

9) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

When the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty

to the FDI, the net asset value of the Sub-Fund may be affected.

- (iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- (v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- (vi) Benchmark Index Disruption Risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

- i) the Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Index is permanently cancelled by the index provider;
- iii) the Index provider fails to calculate and announce the index level;
- iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;
- v) one or several constituents of the Index become illiquid, (i) their quotation being

suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- (vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- (viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the index treatment.

10) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Sub-Fund's will not distribute income, in respect of Class C-EUR.

For the other Classes of Shares (if any),

please refer to the Distribution Policy section of the Prospectus.

APPENDIX 32

MULTI UNITS LUXEMBOURG – Lyxor BOT MTS Ex-Bank of Italy (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor BOT MTS Ex-Bank of Italy (DR) UCITS ETF** is to reflect the performance of the "FTSE MTS Ex-Bank of Italy BOT (Mid Price) Index" (the "**Benchmark Index**") denominated in Euro.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index measures the performance of the Italian Government Bond segment with maturities of less than 12 months.

- **Benchmark Index Methodology**

The initial Benchmark Index selection criteria are the same as those of the other FTSE MTS Italy Indices.

The following bonds qualify for the Benchmark Index:

- traded on the FTSE MTS platform;
- issued by the Italian government;
- BOT-type (Buoni Ordinari del Tesoro) short-term, zero-coupon bonds.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the following web site: <http://www.ftse.com>.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable benchmark index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable benchmark index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on <https://www.ftse.com>.

INVESTMENT POLICY

- **Investment Objective:**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.10%.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 25% and is expected to represent approximately 0% of the Net Asset Value. In certain circumstances this proportion may be higher.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the Italian government bonds.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Low Diversification Risk

Investors are exposed to a benchmark Index representing a region, a sector or a strategy, which may provide a lesser diversification of assets compared to a broader index which will be exposed to various regions, sectors and strategies. Hence, exposure to concentrated indices may result in higher volatility compared to diversified markets. However, UCITS diversification rules will still apply to the underlyings of the Sub-Fund.

2) Interest rate risk

The price of a bond can be affected by unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve in particular. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

3) Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

4) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

5) Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

6) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure,

the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

7) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this Prospectus.

8) Counterparty Risk

When the Sub-Fund would engage into transactions as FDI, the Sub-Fund will be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

The Sub-Fund would be predominantly exposed to a counterparty risk resulting from the use of over-the-counter FDI. In-line with UCITS guidelines, the counterparty risk to the FDI counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the FDI could be early terminated.

Where Société Générale is the counterparty for a FDI transaction and/or a temporary security transaction, conflicts of interest may arise between it and the Management Company which has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

(i) Benchmark Index tracking risk

Reflecting the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's Manager may therefore use various optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not Benchmark Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the

Sub-Fund to perform differently from that Benchmark Index.

(ii) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow to automatically and continuously reflect the performance of the Benchmark Index, especially if one or more of the following risks occur:

(iii) Risk of using financial derivative instruments

When the Sub-Fund enters into FDI which provide the performance of the Benchmark Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(iv) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(v) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(vi) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed,

the process of subscriptions, conversions and redemptions of shares may be affected.

- (vii) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- (viii) Benchmark Index Disruption Risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out.

Benchmark Index disruption notably covers situations where:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Benchmark Index is permanently cancelled by the index provider;
- iii) the Benchmark Index provider fails to calculate and announce the index level;
- iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;
- v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);
- vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific

tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

- (ix) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- (x) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the benchmark index treatment.

9) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-EUR Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Sub-Fund is in no way sponsored, endorsed, sold or promoted by FTSE TMX Global Debt Capital Markets (collectively the “**Holder**s”).

The Holders shall not be construed as being responsible or liable for the promotion or marketing of the Sub-Fund.

Neither the Holders nor MTSNext can be held responsible or liable for any loss or damages of any type whatsoever (including, in particular, investment losses) in relation, in whole or in part, with the Sub-Fund or with the provision of the Benchmark Index, a sub-index or a registered trademark.

APPENDIX 33

MULTI UNITS LUXEMBOURG – Lyxor Daily Double Short S&P 500 UCITS ETF

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor Daily Double Short S&P 500 UCITS ETF** (the “**Sub-Fund**”) is to track both the upward and the downward evolution of the “S&P 500 ® 2X Inverse Daily Index” (the “**Index**”) denominated in US dollars (USD) in order to offer an inverse exposure with daily 2x leverage, to the performance of the United States equity market – while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the “**Tracking Error**”).

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.07%.

THE INDEX

- **Index Objectives**

The Index provides two times the inverse performance of the S&P 500 ® Index (the “**Parent Index**”) and represents a short position in this Parent Index. The S&P 500 is a free-float capitalization-weighted index, published since 1957, of the prices of 500 large-cap common stocks and is designed to reflect the U.S. equity markets and, through the markets, the U.S. economy. The stocks included in the S&P 500 are those of U.S. companies that trade on one of the eligible NYSE and NASDAQ segments.

The Index includes an adjustment to reflect the interest earned on both the initial investment and the proceeds from selling short the securities in the Parent Index.

The complete construction of the index is available on www.standardandpoors.com.

- **Index Methodology**

The Parent Index includes 500 leading companies among U.S. companies. The stocks are selected on the basis of their domicile, market capitalization, public float financial viability and liquidity. The

composition of the Index is revised in conjunction with that of the Parent Index.

The S&P Index Committee follows a set of published guidelines for maintaining the index. Complete details of these guidelines, including the criteria for index additions and removals, policy statements, and research papers are available on the Web site at www.indices.standardandpoors.com.

The composition of the Index is reviewed and rebalanced on quarterly basis, or, in limited circumstances as further described in the published guidelines mentioned above, at an earlier date as decided by the Index sponsor.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

The Index’s daily performance is double the daily inverse performance of the Parent Index, including dividends and price movements plus the cumulative interest (at the overnight LIBOR rate) paid daily on three times the Parent Index’s closing value. The Index does not include the cost of short selling the securities that underlie the Parent Index. The leverage factor used in the Index calculation formula is reset daily.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the “**Licence**”). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by licensor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in

the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on www.standardandpoors.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an inverse exposure with daily 2x leverage, to the performance of the United States equity market.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Index is subject to a negative performance over the investment period.

3) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

4) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this Prospectus.

5) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total

assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- Leverage Risk

The Sub-Fund uses a leveraged investment strategy. Leverage generates specific risks. It indeed amplifies both upside and downside movements of the underlying, hence increasing the Sub-Fund volatility. A high level of leverage implies that a moderate loss on the Parent Index could lead to large capital losses for the Sub-Fund.

- Daily Reverse Leverage Risk

Investors are inversely exposed to two times the daily changes in price or level of the Parent Index. In particular any increase of the underlying market will be amplified and imply a larger decrease in the Sub-Fund's net asset value. The daily reset in the underlying 'double short' index formula implies that the Index performance will not be equivalent to two times the inverse performance of the Parent Index exposure for holding periods greater than one trading day. This effect will increase when Parent Index volatility increase.

For example, if the Parent index is subject to a decrease of 5% over two consecutive trading days, the Index will result in a total increase of 21% (before relevant fees) while the Parent Index will result in a decrease of 9.75% over the same period: the lever is higher than two. In other cases, the lever could be lower than two.

If the Parent Index is subject to an increase of 10% on day one followed by a decrease of 5% day two, the Index will be subject to a total decrease of 12% over the 2 trading days (before relevant fees) while the Parent Index will be subject to an increase of 4.5% over the same period: compared to the first example, the volatility is higher, the lever is also higher.

The Index value may even falls although the Parent index falls over this period. If the Parent Index is subject to a decrease of 10% on day one followed by an increase of 10% day two, the Index will be subject to a total decrease of 4% over the 2 trading days (before relevant fees) while the Parent Index will be subject to an decrease of 1% over the same period.

6) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- (iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- (v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- (vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

- i) the Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Index is permanently cancelled by the index provider;
- iii) the Index provider fails to calculate and announce the index level;
- iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the

constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- (vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- (viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Index treatment.

- (ix) Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

7) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at

prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-USD.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-USD.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

S&P makes no express or implied warranties, representations or conditions, and expressly disclaims all warranties or conditions of merchantability or fitness for a particular purpose or use and any other express or implied warranty or condition with respect to the Index or any data included therein. without limiting any of the foregoing, in no event shall S&P have any liability for any special, punitive, indirect, or consequential damages (including lost profits) resulting from the use of the Index or any data included therein, even if notified of the possibility of such damages.

APPENDIX 34

MULTI UNITS LUXEMBOURG – Lyxor FTSE All World Minimum Variance UCITS ETF

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor FTSE All World Minimum Variance UCITS ETF is to track both the upward and the downward evolution of the FTSE All World Minimum Variance Index (the "**Index**") denominated in US dollars (USD) in order to offer an exposure to both the developed and emerging global equity markets and potentially offer improvements to the risk reward trade-off by reducing portfolio volatility – while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "**Tracking Error**").

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.10%.

THE INDEX

- **Index Objectives**

The Index consists of equity securities incorporated in developed and emerging countries that meets FTSE eligibility criteria. The Index weighting has been designed to minimize the Index volatility, based on historical return information, thereby offering potential improvements to the risk/reward trade-off of the Index.

- **Index Methodology**

The eligible universe of the Index is composed of securities that meet the following criteria:

- (i) security country is covered by FTSE Global Equity Index Series classification;
- (ii) issuing company is incorporated in one of these countries and has its sole listing in the same country, or has been allocated to one of these countries by FTSE Nationality Advisory Committee;

- (iii) security is a eligible share listed on FTSE eligible markets and sources of trading;

- (iv) security passed screens for liquidity, free float and foreign ownership restrictions.

The methodology of the Index is supervised by a regional advisory committee composed of senior market practitioners.

The composition of the Index is reviewed twice a year.

A full description and the complete methodology used to construct the Index and information on the composition and respective weightings of the Index components are available on the FTSE website at www.ftse.com.

The performance monitored is that of the Index closing values computed by FTSE using the WM/Reuters Spot Rates™ at 16:00 UK time.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Index methodology as described in section above will not be changed by FTSE. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on www.ftse.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the developed and emerging global equity markets.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.fundsquare.net.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Emerging Market Risk

Exposure to emerging markets carries a greater risk of potential loss than investment in developed markets. Specifically, market operating and supervision conditions may differ from standards applicable in developed markets. Exposure to emerging markets is subject to factors such as: market's greater volatility, lower trading volumes, the risk of economic and/or political instability, an uncertain or variable tax regime and regulatory environment, market closure risks, government restrictions on foreign investments, interruption or limitation of convertibility or transferability of one of the currencies making up the Index.

3) Quantitative risk

The minimum variance methodology includes a constrained variance optimization algorithm. In some cases, it might not offer the best possible variance and might have a different risk profile than the initial investment universe, the Index.

4) Currency Risk related to the Index

The Sub-Fund is exposed to a currency risk, as the underlying securities composing the Index may be denominated in a currency different from the Index, or be derived from securities denominated in a currency different to that of the Index. This means that exchange rate fluctuations could have a negative impact on the Index tracked by the Sub-Fund.

Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

5) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if Index is subject to a negative performance over the investment period.

6) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

7) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

8) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third

counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

9) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the

Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Index treatment.

10) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-USD, Daily Hedged C-EUR,

Daily Hedged C-GBP and Daily Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-USD, Daily Hedged C-EUR, Daily Hedged C-GBP and Daily Hedged C-CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 35

MULTI UNITS LUXEMBOURG – Lyxor EUR 2-10Y Inflation Expectations UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor EUR 2-10Y Inflation Expectations UCITS ETF is to reflect the performance of the “Markit iBoxx EUR Breakeven Euro-Inflation France & Germany Index” (the “**Benchmark Index**”) denominated in EUR, in order to offer an exposure to a long position in inflation-linked bonds issued by France and Germany and a short position in French and German sovereign bonds with adjacent durations.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of a long position in inflation-linked bonds (the “**ILB**”) issued by France and Germany and a short position in France and Germany sovereign bonds with adjacent durations.

The difference in yield (or “spread”) between these bonds is commonly referred to as a “breakeven rate of inflation” (BEI) and is considered to be a measure of the market’s expectations for inflation over a specified period of time.

- **Benchmark Index Methodology**

The Benchmark Index is designed to provide exposure to changes in inflation expectation priced by the market by entering into a long position in ILB issued by France and Germany and a short position in French and German sovereign bonds with adjacent durations.

The combination of long and short positions removes the noise related to duration of fixed income securities, allowing for the isolation of a single factor: changes in the market’s expectations for inflation.

The bonds will have the following characteristics:

- Bonds issued in priority by France and Germany with a minimum

outstanding amount of EUR 5 billion.

- Base inflation index for the ILB is the Harmonised Index of Consumer Price.
- Bonds maturity between 2 and 10 years.

Exposure to any ILB within the inflation-linked bonds portion and to any nominal sovereign bond within the nominal sovereign bonds portion cannot exceed 30% at any rebalancing date. In addition, the Benchmark Index must contain at least six ILB and at least six nominal sovereign bonds, at any time.

The bond characteristics as described above may not enable such diversification constraints to be complied with. In such circumstances, some of these characteristics may be relaxed, as further detailed in the complete methodology for the Benchmark Index, which can be found on the following website: www.markit.com/product/indices.

The daily Benchmark Index performance will not be the daily change of the breakeven inflation (“BEI”), nor a multiplier of the daily change but the daily over performance of the long inflation linked basket versus the short nominal basket, which is in theory correlated to the changes in the inflation expected by the market at the bonds maturity, represented by the breakeven inflation for such maturity.

In theory, an increase in the x years inflation expectation shall lead to a relative decrease of the price of the nominal bond with x years maturity versus the price of the equivalent inflation-linked bond and thus an increase in the performance of a long position in the inflation linked bond and a short position in the nominal bond. The Benchmark Index being composed of a long position in several inflation linked bonds and a short position in several nominal bonds with several maturities, the Benchmark Index performance will be linked to the weighted average inflation expectations at the maturities corresponding to the bonds comprising the basket. In addition, (i) price movements due to supply and demand discrepancies between inflation linked bonds and corresponding nominal bonds, (ii) transactions costs applicable to the Benchmark Index components, and (iii) seasonality cycles and potential negative carry positions due to seasonality (see the specific risk factor hereafter) will lead to

deviations between the Benchmark Index performance and inflation expectations.

Please also note that the Benchmark Index is not designed to measure the realized rate of inflation, nor does it seek to replicate the returns of any index or measure of actual consumer price levels. However, on short periods realized inflation will have an impact on the performance of the Benchmark Index, typically when realized inflation over a period of time differs from market expectation during the same period.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any coupons or distributions are included in the index returns.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the following web site: www.markit.com/product/indices.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the "Licence").

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on www.markit.com/product/indices.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading

facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING**- Breakeven Inflation Investing Risk :**

The Sub-Fund is exposed to a long/short strategy which is sensitive to changes in inflation expectations, which may go down as well as up, and reflect the market’s macroeconomic view at a given date. Thus, the Benchmark Index is not designed to measure or predict the realized rate of inflation, nor does it seek to replicate the returns of any price index or measure of actual consumer price levels.

The “breakeven rate of inflation” (BEI), which is the difference in yield between a nominal bond and its equivalent inflation-linked bond at a given maturity, and can be captured by a long investment in the inflation-linked bond associated with a short position in the nominal bond, is considered to be a measure of the market’s expectations for inflation over the relevant period. For the avoidance of doubt, the daily Benchmark Index performance will not be the daily change of the BEI, nor a multiplier of the daily change, but the daily overperformance of the long inflation-linked basket versus the short nominal basket, which is in theory correlated to the changes in the inflation expected by the market at the bonds maturity, represented by the BEI for such maturity.

Nevertheless, there is no guarantee that the Benchmark Index would be correlated to the BEI as the strategy underlying the Benchmark Index is also sensitive to additional factors and risks including (but not limited to) price movements due to supply and demand discrepancies between inflation-linked bonds and corresponding nominal bonds, interest rates, credit risk,

inflation seasonality effects, and transactions costs applicable to the Benchmark Index components. These additional factors will lead to deviations between the Benchmark Index performance and inflation expectations variations. As a result, an investment in the Sub-Fund may not serve as an effective hedge against inflation.

- **Specific Risk due to Seasonality and Carry on Inflation**

Inflation may be subject to seasonal fluctuations which may have an impact on inflation linked bonds return and may generate either positive or negative carry (where the carry of any asset is the cost or benefit of owning that asset).

There is positive carry when the monthly inflation accretion earned is higher than the cost of financing the trade through the repurchase market; there is negative carry otherwise. Inflation accretion can be negative and amplify the negative carry.

- **Capital at risk**

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- **Interest Rate Risk**

The Sub-Fund's duration-neutral strategy is designed to provide returns linked to inflation in an effort to minimize the influence of interest rate risk. However, the Sub-Fund could be exposed to moves in interest rates due to imperfect matching between bond's maturities in both legs.

- **Credit risk**

The Sub-Fund could be exposed to a change in the quality rating of a bond in the Benchmark Index due to imperfect matching between bonds in both the short and long leg. Such change is linked to the ability, or perceived ability, of an issuer of a debt security to make timely payments of interest and principal on the bond. An actual or perceived deterioration in the ability of an issuer to meet its obligations will likely have an adverse effect on the Sub-Fund.

- **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Counterparty Risk**

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Benchmark Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Currency Risk related to the listing of the Sub-Fund**

The Sub-Fund is exposed to currency risk, as it may be listed on certain stock exchanges and/or multilateral trading facilities in a currency different from the Benchmark Index. As a result, due to exchange rate fluctuations, the net asset value of the Sub-Fund, when listed in a currency different from the Benchmark Index, could decrease while the Benchmark Index value increases.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Benchmark Index, especially if one or more of the following risks occur:

- **Risk of using financial derivative instruments**

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Benchmark Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty

to the FDI, the net asset value of the Sub-Fund may be affected.

- **Regulatory Risk affecting the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

- **Regulatory Risk affecting the underlyings of the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- **Benchmark Index Disruption Risk**

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out.

Benchmark Index disruption notably covers situations where:

i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the Benchmark Index provider;

iii) the Benchmark Index provider fails to calculate and announce the Benchmark Index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the Benchmark Index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

- **Operational Risk**

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- **Collateral Management Risk**

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

- **Currency Hedge Risk applicable to the following share classes : Monthly Hedged C-USD, Monthly Hedged D-USD, Monthly Hedged C-GBP, Monthly Hedged D-GBP, Monthly Hedged C- CHF, Monthly Hedged D-CHF**

In order to hedge USD currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-USD and Monthly Hedged C-USD shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies

and the currencies of each Benchmark Index component.

In order to hedge GBP currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-GBP and Monthly Hedged C-GBP shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

In order to hedge CHF currency Risk against each Benchmark index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-USD, Monthly Hedged C-USD, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-GBP, and Monthly Hedged C-GBP.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-EUR, Class Monthly Hedged C-USD Shares, Class Monthly Hedged C-GBP Shares, Class Monthly Hedged C- CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR Shares, Class Monthly Hedged D-USD Shares, Class Monthly Hedged D-GBP Shares, Class Monthly Hedged D- CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

DISCLAIMER

The Benchmark Index referred to here is the property of Markit Indices Limited (the "Index Sponsor") and it is used under license for the Sub-Fund.

The parties agree that the Index Sponsor does not approve, endorse or recommend the Sub-Fund.

Under no circumstances does the Index Sponsor provide any guarantee - whether explicit or implicit (including but not limited to the commercial value or appropriateness for any specific use or utilisation) - pertaining to the Benchmark Index or any data included in or linked to the Benchmark Index and, in particular, declines any guarantee relating to the quality, accuracy and/or exhaustiveness of the Benchmark Index or the data included in or linked to the Benchmark Index, or the results obtained from use of the Benchmark Index and/or the composition of the Benchmark Index at a given date or moment, likewise the financial rating of any issuing entity or any credit or similar event (irrespective of the definition of such) relating to a bond in the Benchmark Index at a given date or at any other time.

The Index Sponsor cannot be held liable for any reason whatsoever in terms of an error in the Benchmark Index, and the Index Sponsor is not required to inform of such an error, in the event it would occur.

Under no circumstances does the Index Sponsor issue a recommendation to buy or sell the Sub-Fund nor does it express an opinion concerning the ability of the Benchmark Index to replicate the performance of the markets in question, or concerning the Index or any transaction or product related to it, or indeed the corresponding risks.

The Index Sponsor is under no obligation to take the needs of a third party into consideration during the determination, modification in the composition or calculation of the Benchmark Index. The purchaser or a seller of the Sub-Fund and the Index Sponsor cannot be held liable in the event the Index Sponsor does not take the necessary measures in determining, adjusting or calculating the Benchmark Index.

The Index Sponsor and its related companies retain the right to process any of the bonds making up the benchmark Index, and may, when permitted, accept deposits, make loans or perform any other credit activity, and more generally carry out all or any investment banking and finance service or other commercial activity with these bonds' issuers or their related companies, and they may enter into such activities as though the Benchmark Index did not exist, without taking into account any consequences such action may have on the Benchmark Index or the Sub-Fund.

APPENDIX 36

MULTI UNITS LUXEMBOURG – Lyxor US\$ 10Y Inflation Expectations UCITS ETF

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor US\$ 10Y Inflation Expectations UCITS ETF** is to reflect the performance of the “Markit iBoxx USD Breakeven 10-Year Inflation Index” (the “**Benchmark Index**”) denominated in USD, in order to offer an exposure to a long position in U.S. 10-year Treasury Inflation-Protected securities (TIPS) and a short position in U.S. Treasury bonds with adjacent durations.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of a long position in the 6 last issuances of U.S. 10-year Treasury Inflation-Protected securities (the “**TIPS**”) and a short position in U.S. Treasury bonds with adjacent durations without any issuance exceeding 30% at any rebalancing date.

The difference in yield (or “spread”) between these bonds is commonly referred to as a “breakeven rate of inflation” (BEI) and is considered to be a measure of the market’s expectations for inflation over a specified period of time.

- **Benchmark Index Methodology**

The Benchmark Index is designed to provide exposure to changes in inflation expectation priced by the market by entering into:

- a long position in the last 6 U.S. 10-year TIPS issued;
- a short position in U.S. Treasury bonds with adjacent durations.

U.S. 10-year TIPS are indexed to the US Consumer Price Index.

The combination of long and short positions removes the noise related to duration of fixed income securities, allowing for the

isolation of a single factor: changes in the market’s expectations for 10Y inflation.

The daily Benchmark Index performance will not be the daily change of the breakeven inflation (“**BEI**”), nor a multiplier of the daily change, but the daily over performance of the long inflation-linked basket versus the short nominal basket, which is in theory correlated to the changes in the inflation expected by the market at the bonds maturity, represented by the breakeven inflation for such maturity.

In theory, an increase in the x years inflation expectation shall lead to a relative decrease of the price of the nominal bond with x years maturity versus the price of the equivalent inflation-linked bond and thus an increase in the performance of a long position in the inflation-linked bond and a short position in the nominal bond. The Benchmark Index being composed of a long position in several inflation-linked bonds and a short position in several nominal bonds with several maturities, the Benchmark Index performance will not be linked to the sole 10 year inflation expectation but will be linked to the weighted average inflation expectations at the maturities corresponding to the bonds comprising the basket. In addition, (i) price movements due to supply and demand discrepancies between inflation-linked bonds and corresponding nominal bonds, (ii) transactions costs applicable to the Benchmark Index components, and (iii) seasonality cycles and potential negative carry positions due to seasonality (see the specific risk factor hereafter) will lead to deviations between the Benchmark Index performance and inflation expectations.

Please also note that the Benchmark Index is not designed to measure the realized rate of inflation, nor does it seek to replicate the returns of any index or measure of actual consumer price levels. However, on short periods realized inflation will have an impact on the performance of the Benchmark Index, typically when realized inflation over a period of time differs from market expectation during the same period.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any coupons or distributions are included in the index returns.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the following website: www.markit.com/product/indices.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the "Licence").

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on www.markit.com/product/indices.

INVESTMENT POLICY

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- Breakeven Inflation Investing Risk :

The Sub-Fund is exposed to a long/short strategy which is sensitive to changes in inflation expectations, which may go down as well as up, and reflect the market's macroeconomic view at a given date. Thus, the Benchmark Index is not designed to measure or predict the realized rate of inflation, nor does it seek to replicate the returns of any price index or measure of actual consumer price levels.

The "breakeven rate of inflation" (BEI), which is the difference in yield between a nominal bond and its equivalent inflation-linked bond at a given maturity, and can be captured by a long investment in the inflation-linked bond associated with a short position in the nominal bond, is considered to be a measure of the market's expectations for inflation over the relevant period. For the avoidance of doubt, the daily Benchmark Index performance will not be the daily change of the BEI, nor a multiplier of the daily change, but the daily overperformance of the long inflation-linked basket versus the short nominal basket, which is in theory correlated to the changes in the inflation expected by the market at the bonds maturity, represented by the BEI for such maturity. Nevertheless, there is no guarantee that the Benchmark Index would be correlated to the BEI as the strategy underlying the Benchmark Index is also sensitive to additional factors and risks including (but not limited to) price movements due to supply and demand discrepancies between inflation-linked bonds and corresponding nominal bonds, interest rates, credit risk, inflation seasonality effects, and transactions costs applicable to the Benchmark Index components. These additional factors will lead to deviations between the Benchmark Index performance and inflation expectations variations. As a result, an investment in the Sub-Fund may not serve as an effective hedge against inflation.

- Specific Risk due to Seasonality and Carry on Inflation

Inflation may be subject to seasonal fluctuations which may have an impact on TIPS return and may generate either positive or negative carry (where the carry of any asset is the cost or benefit of owning that asset.)

There is positive carry when the monthly inflation accretion earned is higher than the cost of financing the trade through the repurchase market; there is negative carry otherwise. Inflation accretion can be negative and amplify the negative carry.

- **Capital at risk**

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- **Interest Rate Risk**

The Sub-Fund's duration-neutral strategy is designed to provide returns linked to inflation in an effort to minimize the influence of interest rate risk. However, the Sub-Fund could be exposed to moves in interest rates due to imperfect matching between bond's maturities in both legs.

- **Credit risk**

The Sub-Fund could be exposed to a change in the quality rating of a bond in the Benchmark Index due to imperfect matching between bonds in both the short and long leg. Such change is linked to the ability, or perceived ability, of an issuer of a debt security to make timely payments of interest and principal on the bond. An actual or perceived deterioration in the ability of an issuer to meet its obligations will likely have an adverse effect on the Sub-Fund.

• **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Counterparty Risk**

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-

Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Benchmark Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Currency Risk related to the listing of the Sub-Fund**

The Sub-Fund is exposed to currency risk, as it may be listed on certain stock exchanges and/or multilateral trading facilities in a currency different from the Benchmark Index. As a result, due to exchange rate fluctuations, the net asset value of the Sub-Fund, when listed in a currency different from the Benchmark Index, could decrease while the Benchmark Index value increases.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Benchmark Index, especially if one or more of the following risks occur:

- **Risk of using financial derivative instruments**

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Benchmark Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- **Regulatory Risk affecting the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

- **Regulatory Risk affecting the underlyings of the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- **Benchmark Index Disruption Risk**

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out.

Benchmark Index disruption notably covers situations where:

i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the Benchmark Index provider;

iii) the Benchmark Index provider fails to calculate and announce the Benchmark Index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the Benchmark Index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

- **Operational Risk**

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- **Collateral Management Risk**

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

- **Currency Hedge Risk applicable to the following share classes : Monthly Hedged C-EUR, Monthly Hedged D-EUR, Monthly Hedged C-GBP, Monthly Hedged D-GBP, Monthly Hedged C- CHF, Monthly Hedged D-CHF**

In order to hedge EUR currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

In order to hedge GBP currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-GBP and Monthly Hedged C-GBP shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

In order to hedge CHF currency Risk against each Benchmark index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-GBP, and Monthly Hedged C-GBP.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-USD Shares, Class Monthly Hedged C-EUR Shares, Class Monthly Hedged C-GBP Shares, Class Monthly Hedged C- CHF.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-USD Shares, Class Monthly Hedged D-EUR Shares, Class Monthly Hedged D-GBP Shares, Class Monthly Hedged D- CHF.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The parties agree that the Index Sponsor does not approve, endorse or recommend the Sub-Fund.

Under no circumstances does the Index Sponsor provide any guarantee - whether explicit or implicit (including but not limited to the commercial value or appropriateness for any specific use or utilisation) - pertaining to the Benchmark Index or any data included in or linked to the Benchmark Index and, in particular, declines any guarantee relating to the quality, accuracy and/or exhaustiveness of the Benchmark Index or the data included in or linked to the Benchmark Index, or the results obtained

from use of the Benchmark Index and/or the composition of the Benchmark Index at a given date or moment, likewise the financial rating of any issuing entity or any credit or similar event (irrespective of the definition of such) relating to a bond in the Index at a given date or at any other time.

The Index Sponsor cannot be held liable for any reason whatsoever in terms of an error in the Benchmark Index, and the Index Sponsor is not required to inform of such an error, in the event it would occur.

Under no circumstances does the Index Sponsor issue a recommendation to buy or sell the Sub-Fund nor does it express an opinion concerning the ability of the Benchmark Index to replicate the performance of the markets in question, or concerning the Benchmark Index or any transaction or product related to it, or indeed the corresponding risks.

The Index Sponsor is under no obligation to take the needs of a third party into consideration during the determination, modification in the composition or calculation of the Benchmark Index. The purchaser or a seller of the Sub-Fund and the Index Sponsor cannot be held liable in the event the Index Sponsor does not take the necessary measures in determining, adjusting or calculating the Benchmark Index.

The Index Sponsor and its related companies retain the right to process any of the bonds making up the Index, and may, when permitted, accept deposits, make loans or perform any other credit activity, and more generally carry out all or any investment banking and finance service or other commercial activity with these bonds' issuers or their related companies, and they may enter into such activities as though the Index did not exist, without taking into account any consequences such action may have on the Benchmark Index or the Sub-Fund.

APPENDIX 37

MULTI UNITS LUXEMBOURG – Lyxor iBoxx \$ Treasuries 1-3Y (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – Lyxor iBoxx \$ Treasuries 1-3Y (DR) UCITS ETF is to reflect the performance of the Markit iBoxx USD Treasuries 1-3 Mid Price TCA index (the "Benchmark Index"), denominated in USD and representative of United States "Treasury bonds" with maturities of 1 to 3 years.

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index represents US Treasury bonds with a maturity of between 1 and 3 years, from the Markit iBoxx USD Index family of indices, the indicator of the main segments of the USD denominated bond market.

The performance tracked is that of the Benchmark Index's closing price.

- **Benchmark Index Methodology**

To be eligible for inclusion in the Benchmark Index, a bond must meet specific criteria pertaining to its residual maturity, issue size (at least USD 1 billion) and issuer (US government). Each bond is weighted using the amount outstanding.

The composition of the Benchmark Index is re-balanced monthly on the first day of each month.

The Benchmark Index is calculated at the end of each index trading day, at 3 pm New York time.

The Sub-Fund's Benchmark Index is a "total return" type of index (i.e. all coupons detached by the components of the index are reinvested in the Benchmark Index) and is "trading cost adjusted" (i.e. that cost of

buying and selling securities at rebalancing dates are included in the index return).

The Benchmark Index is based, in particular, on Markit Reference Data - Evaluated Bond Pricing Service. Prices are sourced by Markit from, among others, books of record contributions, parsed dealer runs, reported trade prices and executed levels.

The Benchmark Index is compiled, administered and managed by Markit.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.markit.com.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "Licence").

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the

Benchmark Index can be found on www.markit.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange are also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 25% and is expected to represent approximately 0% of the Net Asset Value. In certain circumstances this proportion may be higher.

TARGETED INVESTORS

The Sub-Fund is available to all investors.

Investors in this Sub-Fund are seeking exposure to the performance of the main segments of the short-term bond market denominated in USD, and in particular the US Treasuries market.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

"Subscription Deadline" and "Redemption Deadline": any Dealing Day at 5. pm Luxembourg time at the latest.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "Total Fee") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and to cover Structural Cost. For C-USD/D-USD Share classes, such fee is set at a maximum of 0.07% per year (inclusive of VAT) of the Net Asset Value per Share.

For Monthly Hedged C-EUR/D-EUR, Monthly Hedged C-GBP/D-GBP and Monthly Hedged C-CHF/D-CHF share classes, such fee is set at a maximum of 0.20% per year (inclusive of VAT) of the Net Asset Value per Share

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the

Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive fees for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

Investors in the Sub-Fund will mainly be exposed to the following risks:

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Interest Rate Risk

The price of a bond can be affected by unexpected changes in the level of interest

rates, which in particular may modify the shape of the yield curve in particular. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Benchmark Index

Share Classes denominated in a currency other than the reference currency of the Benchmark Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Benchmark Index value increases.

- Benchmark Index tracking risk

Reflecting the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's

manager may therefore use various optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not Benchmark Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Benchmark Index.

- **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Counterparty Risk**

The Sub-Fund may be exposed to a counterparty risk resulting from the use of OTC FDI or efficient portfolio management techniques. The Sub-Fund may be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

In case of default of the counterparty, the relevant transaction or agreement can be early terminated. With respect to OTC FDI and/or efficient portfolio management techniques, the Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another equivalent transaction or agreement, in the market conditions which will prevail during the occurrence of such event. The realisation of this risk could in particular have impacts on the capacity of the Sub-Fund to reach its investment objective.

When Société Générale is used as counterparty of a FDI by the Sub-Fund,

conflicts of interests may arise between the Management Company and the counterparty. The Management Company supervises these risks of conflicts of interests by the implementation of procedures intended to identify them, to limit them and to assure their fair resolution if necessary.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow to automatically and continuously reflect the performance of the Benchmark Index, especially if one or more of the following risks occur:

(i) **Risk of using financial derivative instruments**

The Sub-Fund can enter into financial derivative instruments ("FDI") traded over the counter or on a regulated exchange, such as swaps or future contracts. Those FDI may imply a range of risks including counterparty risk, hedging disruption risk, Benchmark Index disruption risk, taxation risk, regulatory risk, operational risk, and liquidity risk.

These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty

to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions or redemptions of shares may be affected.

(v) Regulatory risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Benchmark Index disruption risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out. Benchmark Index disruption notably covers situations where:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Benchmark Index is permanently cancelled by the index provider;
- iii) the Benchmark Index provider fails to calculate and announce the index level;
- iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;
- v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated

stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate action risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

(ix) Currency Hedge Risk applicable to the following share classes : Monthly Hedged C-EUR, Monthly Hedged D-EUR, Monthly Hedged C-GBP, Monthly Hedged D-GBP, Monthly Hedged C-CHF, Monthly Hedged D-CHF

In order to hedge EUR currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

In order to hedge GBP currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-GBP and Monthly Hedged C-GBP shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies

and the currencies of each Benchmark Index component.

In order to hedge CHF currency Risk against each Benchmark index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-GBP, and Monthly Hedged C-GBP.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-USD, Class Monthly Hedged C-EUR, Class Monthly Hedged C-GBP and Class Monthly Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-USD, Class Monthly Hedged D-EUR, Class Monthly Hedged D-GBP and Class Monthly Hedged D-CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

APPENDIX 38**MULTI UNITS LUXEMBOURG – Lyxor iBoxx \$ Treasuries 5-7Y (DR) UCITS ETF**

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – Lyxor iBoxx \$ Treasuries 5-7Y (DR) UCITS ETF is to reflect the performance of the Markit iBoxx USD Treasuries 5-7 Mid Price TCA index (hereinafter the “Benchmark Index”) denominated in USD and representative of United States “Treasury bonds” with maturities of 5 to 7 years.

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index represents US Treasury bonds with a maturity of between 5 and 7 years, selected from the Markit iBoxx USD Index family of indices, the index for the main segments of the USD denominated bond market.

The performance tracked is that of the Benchmark Index's closing price.

- **Benchmark Index Methodology**

To be eligible for inclusion in the Benchmark Index, a bond must meet specific criteria pertaining to its residual maturity, issue size (at least USD 1 billion) and issuer (US government). Each bond is weighted using the amount outstanding.

The composition of the Benchmark Index is re-balanced monthly on the first day of each month.

The Benchmark Index is calculated at the end of each index trading day, at 3 pm New York time.

The Sub-Fund's Benchmark Index is a “total return” type of index (i.e. all coupons detached by the components of the index are reinvested in the Benchmark Index) and is “trading cost adjusted” (i.e. that cost of

buying and selling securities at rebalancing dates are included in the index return).

The Benchmark Index is based, in particular, on Markit Reference Data - Evaluated Bond Pricing Service. Prices are sourced by Markit from, among others, books of record contributions, parsed dealer runs, reported trade prices and executed levels.

The Benchmark Index is compiled, administered and managed by Markit.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.markit.com.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the “Licence”).

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the

Benchmark Index can be found on www.markit.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange are also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 25% and is expected to represent approximately 0% of the Net Asset Value. In certain circumstances this proportion may be higher.

TARGETED INVESTORS

The Sub-Fund is available to all investors.

Investors in this Sub-Fund are seeking exposure to the performance of the main segments of the USD-denominated bond market, and in particular the US Treasuries market.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

Investors in the Sub-Fund will mainly be exposed to the following risks:

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Interest Rate Risk

The price of a bond can be affected by unexpected changes in the level of interest

rates, which in particular may modify the shape of the yield curve in particular. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Benchmark Index

Share Classes denominated in a currency other than the reference currency of the Benchmark Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Benchmark Index value increases.

- Benchmark Index tracking risk

Reflecting the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's

manager may therefore use various optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not Benchmark Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Benchmark Index.

- **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Counterparty Risk**

The Sub-Fund may be exposed to a counterparty risk resulting from the use of OTC FDI or efficient portfolio management techniques. The Sub-Fund may be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

In case of default of the counterparty, the relevant transaction or agreement can be early terminated. With respect to OTC FDI and/or efficient portfolio management techniques, the Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another equivalent transaction or agreement, in the market conditions which will prevail during the occurrence of such event. The realisation of this risk could in particular have impacts on the capacity of the Sub-Fund to reach its investment objective.

When Société Générale is used as counterparty of a FDI by the Sub-Fund, conflicts of interests may arise between the

Management Company and the counterparty. The Management Company supervises these risks of conflicts of interests by the implementation of procedures intended to identify them, to limit them and to assure their fair resolution if necessary.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow to automatically and continuously reflect the performance of the Benchmark Index, especially if one or more of the following risks occur:

- (i) **Risk of using financial derivative instruments**

The Sub-Fund can enter into financial derivative instruments ("FDI") traded over the counter or on a regulated exchange, such as swaps or future contracts. Those FDI may imply a range of risks including counterparty risk, hedging disruption risk, Benchmark Index disruption risk, taxation risk, regulatory risk, operational risk, and liquidity risk.

These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- (ii) **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- (iii) **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions or redemptions of shares may be affected.

(v) Regulatory risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Benchmark Index disruption risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out. Benchmark Index disruption notably covers situations where:

i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the index provider;

iii) the Benchmark Index provider fails to calculate and announce the index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate action risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

(ix) Currency Hedge Risk applicable to the following share classes : Monthly Hedged C-EUR, Monthly Hedged D-EUR, Monthly Hedged C-GBP, Monthly Hedged D-GBP, Monthly Hedged C-CHF, Monthly Hedged D-CHF

In order to hedge EUR currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

In order to hedge GBP currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-GBP and Monthly Hedged C-GBP shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

In order to hedge CHF currency Risk against each Benchmark index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-GBP, and Monthly Hedged C-GBP.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-USD, Class Monthly Hedged C-EUR, Class Monthly Hedged C-GBP and Class Monthly Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-USD, Class Monthly Hedged D-EUR, Class Monthly Hedged D-GBP and Class Monthly Hedged D-CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 39

MULTI UNITS LUXEMBOURG – Lyxor iBoxx \$ Treasuries 10Y+ (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – Lyxor iBoxx \$ Treasuries 10Y (DR) UCITS ETF is to reflect the performance of the Markit iBoxx USD Treasuries 10+ Mid Price TCA index (hereinafter the “**Benchmark Index**”) denominated in USD and representative of United States “Treasury bonds” with maturities exceeding 10 years.

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index represents US Treasury bonds with a maturity above 10 years, from the Markit iBoxx USD Index family of indices, the index for the main segments of the USD denominated bond market.

The performance tracked is that of the Benchmark Index's closing price.

- **Benchmark Index Methodology**

To be eligible for inclusion in the Benchmark Index, a bond must meet specific criteria pertaining to its residual maturity, issue size (at least USD 1 billion) and issuer (US government). Each bond is weighted using the amount outstanding.

The composition of the Benchmark Index is re-balanced monthly on the first day of each month.

The Benchmark Index is calculated at the end of each index trading day, at 3 pm New York time.

The Sub-Fund's Benchmark Index is a “total return” type of index (i.e. all coupons detached by the components of the index are reinvested in the Benchmark Index) and is “trading cost adjusted” (i.e. that cost of

buying and selling securities at rebalancing dates are included in the index return).

The Benchmark Index is based, in particular, on Markit Reference Data - Evaluated Bond Pricing Service. Prices are sourced by Markit from, among others, books of record contributions, parsed dealer runs, reported trade prices and executed levels.

The Benchmark Index is compiled, administered and managed by Markit.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.markit.com.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the “**Licence**”).

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the

Benchmark Index can be found on www.markit.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange are also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 25% and is expected to represent approximately 0% of the Net Asset Value. In certain circumstances this proportion may be higher.

TARGETED INVESTORS

The Sub-Fund is available to all investors.

Investors in this Sub-Fund are seeking exposure to the performance of the main segments of the long-term bond market denominated in USD, and in particular the US Treasuries market.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

Investors in the Sub-Fund will mainly be exposed to the following risks:

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Interest Rate Risk

The price of a bond can be affected by unexpected changes in the level of interest rates, which in particular may modify the

shape of the yield curve in particular. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Benchmark Index

Share Classes denominated in a currency other than the reference currency of the Benchmark Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Benchmark Index value increases.

- Benchmark Index tracking risk

Reflecting the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's manager may therefore use various

optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not Benchmark Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Benchmark Index.

- **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Counterparty Risk**

The Sub-Fund may be exposed to a counterparty risk resulting from the use of OTC FDI or efficient portfolio management techniques. The Sub-Fund may be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

In case of default of the counterparty, the relevant transaction or agreement can be early terminated. With respect to OTC FDI and/or efficient portfolio management techniques, the Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another equivalent transaction or agreement, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk could in particular have impacts on the capacity of the Sub-Fund to reach its investment objective.

When Société Générale is used as counterparty of a FDI by the Sub-Fund,

conflicts of interests may arise between the Management Company and the counterparty. The Management Company supervises these risks of conflicts of interests by the implementation of procedures intended to identify them, to limit them and to assure their fair resolution if necessary.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow to automatically and continuously reflect the performance of the Benchmark Index, especially if one or more of the following risks occur:

- (i) **Risk of using financial derivative instruments**

The Sub-Fund can enter into financial derivative instruments ("FDI") traded over the counter or on a regulated exchange, such as swaps or future contracts. Those FDI may imply a range of risks including counterparty risk, hedging disruption risk, Benchmark Index disruption risk, taxation risk, regulatory risk, operational risk, and liquidity risk.

These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- (ii) **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- (iii) **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions or redemptions of shares may be affected.

(v) Regulatory risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Benchmark Index disruption risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out. Benchmark Index disruption notably covers situations where:

i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the index provider;

iii) the Benchmark Index provider fails to calculate and announce the index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate action risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

(ix) Currency Hedge Risk applicable to the following share classes : Monthly Hedged C-EUR, Monthly Hedged D-EUR, Monthly Hedged C-GBP, Monthly Hedged D-GBP, Monthly Hedged C-CHF, Monthly Hedged D-CHF

In order to hedge EUR currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

In order to hedge GBP currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-GBP and Monthly Hedged C-GBP shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

In order to hedge CHF currency Risk against each Benchmark index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-GBP, and Monthly Hedged C-GBP.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-USD, Class Monthly Hedged C-EUR, Class Monthly Hedged C-GBP and Class Monthly Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-USD, Class Monthly Hedged D-EUR, Class Monthly Hedged D-GBP and Class Monthly Hedged D-CHF Shares. For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

on the Benchmark Index or on the Sub-Fund.

APPENDIX 40

MULTI UNITS LUXEMBOURG – Lyxor iBoxx £ Liquid Corporates Long Dated UCITS ETF

The Reference Currency of the Sub-Fund is the GBP.

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – Lyxor iBoxx £ Liquid Corporates Long Dated UCITS ETF is to provide exposure to increases and decreases in the main segments of the corporate bond market, denominated in GBP, by replicating the movement of the Markit iBoxx GBP Liquid Corporates Long Dated Mid Price TCA index (the "**Benchmark Index**"), while minimizing the tracking error between the Sub-fund's performance and that of the Benchmark Index.

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.02%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index belongs to the Markit iBoxx GBP Liquid family of indices representing the main segments of the GBP denominated bond market and which meet specific liquidity criteria. The Markit iBoxx GBP Liquid indices are the easiest replicable sub-sets of the Markit iBoxx GBP family of indices. The Benchmark Index represents in particular the GBP denominated liquid non-government bond market.

- **Benchmark Index Methodology**

To be eligible for inclusion in the Benchmark Index, a bond must meet specific criteria pertaining to its residual maturity (1.5 years at re-balancing date) and issue size (at least GBP 250 millions). The number of issuers comprised in the Benchmark Index has to be between 25 and 40. Each bond is weighted using the amount outstanding as notional; the weight is determined by the bond capitalization in relation to the index capitalization and is capped at 4%.

Index is re-balanced every quarter at the end of February, May, August and November, on the last day of the month.

The Sub-Fund's Benchmark Index, denominated in GBP, is a "total return" index (i.e. all coupons detached from the components of the Benchmark Index are reinvested in the Benchmark Index) and is "trading cost adjusted" (i.e. that cost of buying and selling securities at rebalancing dates are included in the index return).

The Benchmark Index is based, in particular, on Markit Reference Data - Evaluated Bond Pricing Service. Prices are sourced by Markit from, among others, books of record contributions, parsed dealer runs, reported trade prices and executed levels.

The Benchmark Index is compiled, administered and managed by Markit.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.markit.com.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**").

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in

the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on www.markit.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Benchmark Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange are also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is available to all investors.

Investors in this Sub-Fund are seeking exposure to main segments of the corporate bond market denominated in GBP.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such

fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive fees for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

Investors in the Sub-Fund will mainly be exposed to the following risks:

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Interest Rate Risk

The price of a bond can be affected by unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve in particular. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Benchmark Index

Share Classes denominated in a currency other than the reference currency of the Benchmark Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Benchmark Index value increases.

• Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- Counterparty Risk

The Sub-Fund may be exposed to a counterparty risk resulting from the use of OTC FDI or efficient portfolio management techniques. The Sub-Fund may be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

In case of default of the counterparty, the relevant transaction or agreement can be early terminated. With respect to OTC FDI and/or efficient portfolio management techniques, the Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another equivalent transaction

or agreement, in the market conditions which will prevail during the occurrence of such event. The realisation of this risk could in particular have impacts on the capacity of the Sub-Fund to reach its investment objective.

When Société Générale is used as counterparty of a FDI by the Sub-Fund, conflicts of interests may arise between the Management Company and the counterparty. The Management Company supervises these risks of conflicts of interests by the implementation of procedures intended to identify them, to limit them and to assure their fair resolution if necessary.

- Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Benchmark Index especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its investment objective the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the benchmark index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-

Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions or redemptions of shares may be affected.

(v) Regulatory risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Benchmark Index disruption risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out. Benchmark Index disruption notably covers situations where:

i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the index provider;

iii) the Benchmark Index provider fails to calculate and announce the index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which

cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate action risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

(ix) Currency Hedge Risk applicable to the following share classes : Monthly Hedged C-EUR, Monthly Hedged D-EUR, Monthly Hedged C-USD, Monthly Hedged D-USD, Monthly Hedged C- CHF, Monthly Hedged D-CHF

In order to hedge EUR currency Risk against each Benchmark index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

In order to hedge USD-currency Risk against each Benchmark index component's currency, specific to Monthly Hedged D-USD and Monthly Hedged C-USD shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

In order to hedge CHF-currency Risk against each Benchmark index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-USD, and Monthly Hedged C-USD.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-GBP, Class Monthly Hedged C-EUR, Class Monthly Hedged C-USD and Class Monthly Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-GBP, Class Monthly Hedged D-EUR, Class Monthly Hedged D-USD and Class Monthly Hedged D-CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 41

MULTI UNITS LUXEMBOURG – Lyxor FTSE Actuaries UK Gilts (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the GBP.

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – Lyxor FTSE Actuaries UK Gilts (DR) UCITS ETF is to reflect the performance, of the FTSE Actuaries UK Conventional Gilts All Stocks index (the “**Benchmark Index**”) denominated in GBP and representative of UK government bonds (“Gilts”) denominated in GBP.

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is part of the FTSE Actuaries UK Gilts Index Series, which represents the UK Government bond market. The Benchmark Index comprises conventional Gilts with all outstanding terms.

The performance tracked is that of the Benchmark Index's closing price.

- **Benchmark Index Methodology**

Except for certain categories (e.g. rump stocks), all Gilts denominated in GBP and quoted on the Stock Exchange are eligible for inclusion in the Benchmark Index. In particular, there is no time to maturity constraint: new issues are added on the business day following the auction, syndication or placement; Gilts are removed on their redemption date.

Rump Gilts are relatively small Gilts (in terms of nominal outstanding) as declared by the Debt Management Office (“DMO”).

Each bond's weight in the Benchmark Index is determined by its nominal amount outstanding relative to the total nominal outstanding of the selected universe.

The composition of the Benchmark Index is re-balanced each time a relevant event

takes place (e.g. new issuance or redemption of an issuance).

The bond prices source used to determine the Benchmark Index closing price is indicated in the index methodology available at www.ftse.com.

The Sub-Fund's Benchmark Index is the FTSE Actuaries UK Conventional Gilts All Stocks index denominated in GBP. The Benchmark Index is a “total return” index (i.e. all coupons detached from the Benchmark Index constituents are reinvested in the Benchmark Index).

The Benchmark Index is administered and managed by FTSE Russell.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.ftse.com.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the “**Licence**”).

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on www.ftse.com.

INVESTMENT POLICY

- **Investment Objective**

As Depository, Société Générale Bank & Trust S.A. is entitled to receive fees for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

Investors in the Sub-Fund will mainly be exposed to the following risks:

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Interest Rate Risk

The price of a bond can be affected by unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve in particular. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Benchmark Index

Share Classes denominated in a currency other than the reference currency of the Benchmark Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Benchmark Index value increases.

- **Benchmark Index tracking risk**

Reflecting the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's manager may therefore use various optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not Benchmark Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Benchmark Index.

- **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Counterparty Risk**

The Sub-Fund may be exposed to a counterparty risk resulting from the use of OTC FDI or efficient portfolio management techniques. The Sub-Fund may be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

In case of default of the counterparty, the relevant transaction or agreement can be early terminated. With respect to OTC FDI and/or efficient portfolio management techniques, the Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another equivalent transaction or agreement, in the market conditions which will prevail during the occurrence of

such event. The realisation of this risk could in particular have impacts on the capacity of the Sub-Fund to reach its investment objective.

When Société Générale is used as counterparty of a FDI by the Sub-Fund, conflicts of interests may arise between the Management Company and the counterparty. The Management Company supervises these risks of conflicts of interests by the implementation of procedures intended to identify them, to limit them and to assure their fair resolution if necessary.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow to automatically and continuously reflect the performance of the Benchmark Index, especially if one or more of the following risks occur:

(i) **Risk of using financial derivative instruments**

The Sub-Fund can enter into financial derivative instruments ("FDI") traded over the counter or on a regulated exchange, such as swaps or future contracts. Those FDI may imply a range of risks including counterparty risk, hedging disruption risk, Benchmark Index disruption risk, taxation risk, regulatory risk, operational risk, and liquidity risk.

These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-

Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions or redemptions of shares may be affected.

(v) Regulatory risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Benchmark Index disruption risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out. Benchmark Index disruption notably covers situations where:

i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the index provider;

iii) the Benchmark Index provider fails to calculate and announce the index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate action risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

(ix) Currency Hedge Risk applicable to the following share classes:

Monthly Hedged C-EUR,	Monthly Hedged D-EUR,	Monthly Hedged C-USD,	Monthly Hedged D-USD,	Monthly Hedged C-CHF,	Monthly Hedged D-CHF
-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	----------------------

In order to hedge EUR-currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

In order to hedge USD-currency Risk against each Benchmark Index component's currency, specific to

Monthly Hedged D-USD and Monthly Hedged C-USD shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

In order to hedge CHF-currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-USD, and Monthly Hedged C-USD.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-GBP, Class Monthly Hedged C-EUR, Class Monthly Hedged C-USD and Class Monthly Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of

Class D-GBP, Class Monthly Hedged D-EUR, Class Monthly Hedged D-USD and Class Monthly Hedged D-CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Sub-Fund is not in any way sponsored, endorsed, sold or promoted by FTSE International Limited ("FTSE") or the London Stock Exchange Group companies ("LSEG") (together the "Licensor Parties") and none of the Licensor Parties make any claim, prediction, warranty or representation whatsoever, expressly or impliedly, either as to (i) the results to be obtained from the use of the Benchmark Index (upon which the Sub-Fund is based), (ii) the figure at which the Benchmark Index is said to stand at any particular time on any particular day or otherwise, or (iii) the suitability of the Benchmark Index for the purpose to which it is being put in connection with the Sub-Fund. None of the Licensor Parties have provided or will provide any financial or investment advice or recommendation in relation to the Benchmark Index to Management Company or to its clients.

The Benchmark Index is calculated by FTSE or its agent. None of the Licensor Parties shall be (a) liable (whether in negligence or otherwise) to any person for any error in the Benchmark Index or (b) under any obligation to advise any person of any error therein.

APPENDIX 42

MULTI UNITS LUXEMBOURG – Lyxor FTSE Actuaries UK Gilts Inflation-Linked (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the GBP.

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – Lyxor FTSE Actuaries UK Gilts Inflation-Linked (DR) UCITS ETF is to reflect the performance of the FTSE Actuaries UK Index-Linked Gilts All Stocks index (the “**Benchmark Index**”) denominated in GBP and representative of inflation linked UK government bonds (“Index-Linked Gilts”) denominated in GBP.

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.25%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is part of the FTSE Actuaries UK Gilts Index Series, which represents the UK Government bond market.

Index-linked Gilts signifies that the coupon payments and the principal payment on redemption are adjusted to take account of accrued inflation, in line with the UK Retail prices Index (“RPI”), since the Gilt’s issue.

The performance tracked is that of the Benchmark Index's closing price.

- **Benchmark Index Methodology**

Except for certain categories (e.g. convertible index-linked Gilts with outstanding conversion options and rump stocks), all index-linked Gilts denominated in GBP and quoted on the Stock Exchange are eligible for inclusion in the Benchmark Index. In particular, there is no time to maturity constraint: new issues are added on the business day following the auction, syndication or placement; index-linked Gilts are removed on their redemption date.

Rump Gilts are relatively small Gilts (in terms of nominal outstanding) as declared by the Debt Management Office (“DMO”).

The bond prices source used to determine the Benchmark Index closing price is indicated in the index methodology available at www.ftse.com.

The Sub-Fund's Benchmark Index is the FTSE Actuaries UK Index-Linked Gilts All Stocks index denominated in GBP. The Benchmark Index is a “total return” index (i.e. all coupons detached from the Benchmark Index constituents are reinvested in the Benchmark Index).

The Benchmark Index is administered and managed by FTSE Russell.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.ftse.com.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the “**Licence**”).

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on

the general methodology behind the Benchmark Index can be found on www.ftse.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange are also available under the "factsheet" section of the website www.lyxoretf.com

THE SHARES (ISSUE AND FORM)

The Shares may be issued in registered form.

The Shares will not be fractioned.

SUBSCRIPTION OF SHARES ON THE PRIMARY MARKET

Requests for subscription of Shares shall be centralised by the Registrar and Transfer Agent, before 4.45 p.m. (Luxembourg time), on each Dealing Day (as defined hereunder) and processed at the net asset value calculated as of the relevant Valuation Day. Requests for subscriptions forwarded after 4.45 p.m. (Luxembourg time) on a Dealing Day shall be deemed to have been before 4.45 p.m. on the following Dealing Day.

Payment for Shares subscribed must be received by the Depositary not later than five Business Days after the relevant Dealing Day, except that the Board of Directors may decide otherwise by circular resolution.

REDEMPTION OF SHARES ON THE PRIMARY MARKET

Requests for redemption of Shares shall be centralised by the Registrar and Transfer Agent, before 4.45 p.m. (Luxembourg time), on each Dealing Day (as defined hereunder) and processed at the net asset value calculated as of the relevant Valuation Day. Requests for redemptions forwarded after 4.45 p.m. (Luxembourg time) on a Dealing Day shall be deemed to have been received before 4.45 p.m. on the following Dealing Day.

Payment for Shares redeemed will be effected as soon as possible but not later than five Business Days after the relevant Dealing Day.

FEES CHARGED TO INVESTORS WHEN SUBSCRIBING OR REDEEMING SHARES OF THE SUB-FUND ON THE PRIMARY MARKET

- Maximum subscription charge

For any request for subscription: the higher of either (i) EUR 50,000 (or the equivalent of 50 000 EUR in the Reference Currency of the Class of Shares when such Reference Currency is denominated in another currency other than the EUR, being specified that the final amount will be determined by converting the subscription amount in EUR into such Reference Currency (rounded down to the nearest 2 decimal places) by using the WM / Reuters exchange rate for converting EUR into such Reference Currency as of the Payment Date) per subscription request; or (ii) 5% of the Net Asset Value per Share multiplied by the number of Shares subscribed.

Maximum Entry fee: 0.15%

Entry fees are for the benefit of the Sub-Fund in order to cover transaction costs including taxes and stamp duties.

- Maximum redemption charge

For any request for redemption: the higher of either (i) EUR 50,000 (or the equivalent of 50 000 EUR in the Reference Currency of the Class of Shares when such Reference Currency is denominated in another currency other than the EUR, being specified that the final amount will be determined by converting the redemption amount in EUR into such Reference Currency (rounded down to the nearest 2 decimal places) by using the WM / Reuters exchange rate for converting EUR into such Reference Currency as of the Payment Date) per redemption request; or (ii) 5% of the Net Asset Value per Share multiplied by the number of Shares redeemed.

- Maximum Exit fee: 0.15%

Exit fees are for the benefit of the Sub-Fund in order to cover transaction costs including taxes and stamp duties.

Subscription and redemption charges, if any, shall be payable to the Management Company.

No fees will be charged by the Company to investors buying shares on the stock exchange.

In the event of Suspension of the Secondary Market (as defined above in the Prospectus) the redemption charge will not apply, but the Exit fee will apply and be calculated on the Net Asset Value per Share multiplied by the number of Shares redeemed.

DEFINITIONS

"Business Day": any full working day in Luxembourg and in Paris when the banks are opened for business.

"Dealing Day": any week day when the Benchmark Index is published and investable.

"Valuation Day": each Dealing Day, taking into account the closing price of the Benchmark Index on such Dealing Day.

"Subscription Deadline" and "Redemption Deadline": any Dealing Day at 4.45 p.m. Luxembourg time at the latest.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "Total Fee") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and to cover Structural Cost. Such fee is set at a maximum of 0.07% per year (inclusive of VAT) of the Net Asset Value per Share. For Monthly Hedged C-EUR/D-EUR, Monthly Hedged C-USD/D-USD and Monthly Hedged C-CHF/D-CHF share classes, such fee is set at a maximum of 0.20% per year (inclusive of VAT) of the Net Asset Value per share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the

Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depository, Société Générale Bank & Trust S.A. is entitled to receive fees for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

Investors in the Sub-Fund will mainly be exposed to the following risks:

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Interest Rate Risk

The price of a bond can be affected by unexpected changes in the level of interest rates, which in particular may modify the

shape of the yield curve in particular. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Benchmark Index

Share Classes denominated in a currency other than the reference currency of the Benchmark Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Benchmark Index value increases.

- Benchmark Index tracking risk

Reflecting the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's manager may therefore use various

optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Benchmark Index.

- **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Counterparty Risk**

The Sub-Fund may be exposed to a counterparty risk resulting from the use of OTC FDI or efficient portfolio management techniques. The Sub-Fund may be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

In case of default of the counterparty, the relevant transaction or agreement can be early terminated. With respect to OTC FDI and/or efficient portfolio management techniques, the Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another equivalent transaction or agreement, in the market conditions which will prevail during the occurrence of such event. The realisation of this risk could in particular have impacts on the capacity of the Sub-Fund to reach its investment objective.

When Société Générale is used as counterparty of a FDI by the Sub-Fund,

conflicts of interests may arise between the Management Company and the counterparty. The Management Company supervises these risks of conflicts of interests by the implementation of procedures intended to identify them, to limit them and to assure their fair resolution if necessary.

- **Specific Risk due to Seasonality and Carry on Inflation**

Inflation may be subject to seasonal fluctuations which may have an impact on Inflation-Linked Bonds return and may generate either positive or negative carry (where the carry of any asset is the cost or benefit of owning that asset). There is positive carry when the monthly inflation accretion earned is higher than the cost of financing the trade through the repurchase market; there is negative carry otherwise. The Inflation figures are generated retrospectively, which results in a time lag of several months between the collection of prices data and the indexation application.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow to automatically and continuously reflect the performance of the Benchmark Index, especially if one or more of the following risks occur:

- (i) **Risk of using financial derivative instruments**

The Sub-Fund can enter into financial derivative instruments ("FDI") traded over the counter or on a regulated exchange, such as swaps or future contracts. Those FDI may imply a range of risks including counterparty risk, hedging disruption risk, Benchmark Index disruption risk, taxation risk, regulatory risk, operational risk, and liquidity risk.

These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- (ii) **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders

of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscription, conversion or redemption of share or units may be affected.

(v) Regulatory risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Benchmark Index disruption risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out. Benchmark Index disruption notably covers situations where:

i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the index provider;

iii) the Benchmark Index provider fails to calculate and announce the index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate action risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

(ix) Currency Hedge Risk applicable to the following share classes: Monthly

Hedged C-EUR, Monthly
Hedged D-EUR, Monthly
Hedged C-USD, Monthly
Hedged D-USD, Monthly
Hedged C- CHF, Monthly
Hedged D-CHF

In order to hedge EUR-currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

In order to hedge USD-currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-USD and Monthly Hedged C-USD shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

In order to hedge CHF-currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-USD, and Monthly Hedged C-USD.

- **Collateral Management Risk**

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may

need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-GBP, Class Monthly Hedged C-EUR, Class Monthly Hedged C-USD and Class Monthly Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-GBP, Class Monthly Hedged D-EUR, Class Monthly Hedged D-USD and Class Monthly Hedged D-CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Sub-Fund is not in any way sponsored, endorsed, sold or promoted by FTSE International Limited ("FTSE") or the London Stock Exchange Group companies ("LSEG") (together the "Licensor Parties") and none of the Licensor Parties make any claim, prediction, warranty or representation whatsoever, expressly or impliedly, either as to (i) the results to be obtained from the use of the Benchmark Index (upon which the Sub-Fund is based), (ii) the figure at which the Benchmark Index is said to stand at any particular time on any particular day or otherwise, or (iii) the suitability of the Benchmark Index for the purpose to which it is being put in connection with the Sub-Fund. None of the Licensor Parties have provided or will provide any financial or investment advice or recommendation in relation to the Benchmark Index to Management Company or to its clients.

The Benchmark Index is calculated by FTSE or its agent. None of the Licensor

Parties shall be (a) liable (whether in negligence or otherwise) to any person for any error in the Benchmark Index or (b) under any obligation to advise any person of any error therein.

All rights in the Benchmark Index vest in FTSE. "FTSE®" is a trade mark of LSEG and is used by FTSE under licence.

APPENDIX 43

MULTI UNITS LUXEMBOURG – Lyxor iBoxx \$ Treasuries 3-5Y (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – Lyxor iBoxx \$ Treasuries 3-5Y (DR) UCITS ETF is to reflect the performance of the Markit iBoxx USD Treasuries 3-5 Mid Price TCA TRI index (the "Benchmark Index"), denominated in USD and representative of United States "Treasury bonds" with maturities of 3 to 5 years.

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index represents US Treasury bonds with a maturity of between 3 and 5 years, from the Markit iBoxx USD Index family of indices, the indicator of the main segments of the USD denominated bond market.

The performance tracked is that of the Benchmark Index's closing price.

- **Benchmark Index Methodology**

To be eligible for inclusion in the Benchmark Index, a bond must meet specific criteria pertaining to its residual maturity, issue size (at least USD 1 billion) and issuer (US government). Each bond is weighted using the amount outstanding.

The composition of the Benchmark Index is re-balanced monthly on the first day of each month.

The Benchmark Index is calculated at the end of each index trading day, at 3 pm New York time.

The Benchmark Index is a "total return" type of index (i.e. all coupons detached by the components of the index are reinvested in the Benchmark Index) and is "trading cost adjusted" (i.e. that cost of buying and selling

securities at rebalancing dates are included in the Benchmark Index return).

The Benchmark Index is based, in particular, on Markit Reference Data - Evaluated Bond Pricing Service. Prices are sourced by Markit from, among others, books of record contributions, parsed dealer runs, reported trade prices and executed levels.

The Benchmark Index is compiled, administered and managed by Markit.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.markit.com.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the "Licence").

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the

Benchmark Index can be found on www.markit.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange are also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 25% and is expected to represent approximately 0% of the Net Asset Value. In certain circumstances this proportion may be higher.

TARGETED INVESTORS

The Sub-Fund is available to all investors.

Investors in this Sub-Fund are seeking exposure to the performance of the main segments of the USD-denominated bond market, and in particular the US Treasuries market.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

RISKS WARNING

Investors in the Sub-Fund will mainly be exposed to the following risks:

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Interest Rate Risk

The price of a bond can be affected by unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve in particular. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if

the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Benchmark Index

Share Classes denominated in a currency other than the reference currency of the Benchmark Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Benchmark Index value increases.

- Benchmark Index tracking risk

Reflecting the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's manager may therefore use various optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not Benchmark Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the

Sub-Fund to perform differently from that Benchmark Index.

- **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Counterparty Risk**

The Sub-Fund may be exposed to a counterparty risk resulting from the use of OTC FDI or efficient portfolio management techniques. The Sub-Fund may be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

In case of default of the counterparty, the relevant transaction or agreement can be early terminated. With respect to OTC FDI and/or efficient portfolio management techniques, the Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another equivalent transaction or agreement, in the market conditions which will prevail during the occurrence of such event. The realisation of this risk could in particular have impacts on the capacity of the Sub-Fund to reach its investment objective.

When Société Générale is used as counterparty of a FDI by the Sub-Fund, conflicts of interests may arise between the Management Company and the counterparty. The Management Company supervises these risks of conflicts of interests by the implementation of procedures intended to identify them, to limit them and to assure their fair resolution if necessary.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow to automatically and continuously reflect the performance of the Benchmark Index, especially if one or more of the following risks occur:

- (i) **Risk of using financial derivative instruments**

The Sub-Fund can enter into financial derivative instruments ("FDI") traded over the counter or on a regulated exchange, such as swaps or future contracts. Those FDI may imply a range of risks including counterparty risk, hedging disruption risk, Benchmark Index disruption risk, taxation risk, regulatory risk, operational risk, and liquidity risk.

These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- (ii) **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- (iii) **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- (iv) **Regulatory risk affecting the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed,

the process of subscriptions, conversions or redemptions of shares may be affected.

(v) Regulatory risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Benchmark Index disruption risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out. Benchmark Index disruption notably covers situations where:

i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the index provider;

iii) the Benchmark Index provider fails to calculate and announce the index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax

constraints are reflected in the performance of the Benchmark Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate action risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

(ix) Currency Hedge Risk applicable to the following share classes : Monthly Hedged C-EUR, Monthly Hedged D-EUR, Monthly Hedged C-GBP, Monthly Hedged D-GBP, Monthly Hedged C-CHF, Monthly Hedged D-CHF

In order to hedge EUR currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

In order to hedge GBP currency Risk against each Benchmark index component's currency, specific to Monthly Hedged D-GBP and Monthly Hedged C-GBP shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

In order to hedge CHF currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of

the respective share classes 'currencies and the currencies of each Benchmark Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-GBP, and Monthly Hedged C-GBP.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-USD, Class Monthly Hedged C-EUR, Class Monthly Hedged C-GBP and Class Monthly Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-USD, Class Monthly Hedged D-EUR, Class Monthly Hedged D-GBP and Class Monthly Hedged D-CHF Shares. For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

APPENDIX 44

MULTI UNITS LUXEMBOURG – Lyxor iBoxx \$ Treasuries 7-10Y (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG – Lyxor iBoxx \$ Treasuries 7-10Y (DR) UCITS ETF is to reflect the performance of the Markit iBoxx USD Treasuries 7-10 Mid Price TCA TRI index (the "**Benchmark Index**"), denominated in USD and representative of United States "Treasury bonds" with maturities of 7 to 10 years.

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index represents US treasury bonds with a maturity of between 7 and 10 years, from the Markit iBoxx USD Index family of indices, the indicator of the main segments of the USD denominated bond market.

The performance tracked is that of the Benchmark Index's closing price.

- **Benchmark Index Methodology**

To be eligible for inclusion in the Benchmark Index, a bond must meet specific criteria pertaining to its residual maturity, issue size (at least USD 1 billion) and issuer (US government). Each bond is weighted using the amount outstanding.

The composition of the Benchmark Index is re-balanced monthly on the first day of each month.

The Benchmark Index is calculated at the end of each index trading day, at 3 pm New York time.

The Benchmark Index is a "total return" type of index (i.e. all coupons detached by the components of the index are reinvested in the Benchmark Index) and is "trading cost adjusted" (i.e. that cost of buying and selling

securities at rebalancing dates are included in the index return).

The Benchmark Index is based, in particular, on Markit Reference Data - Evaluated Bond Pricing Service. Prices are sourced by Markit from, among others, books of record contributions, parsed dealer runs, reported trade prices and executed levels.

The Benchmark Index is compiled, administered and managed by Markit.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.markit.com.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the "**Licence**").

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the

Benchmark Index can be found on www.markit.com.

INVESTMENT POLICY

• Investment Objective

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

Investors in the Sub-Fund will mainly be exposed to the following risks:

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Interest Rate Risk

The price of a bond can be affected by unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve in particular. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Benchmark Index

Share Classes denominated in a currency other than the reference currency of the Benchmark Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Benchmark Index value increases.

- Benchmark Index tracking risk

Reflecting the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's manager may therefore use various optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in

securities that are not Benchmark Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Benchmark Index.

- **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Counterparty Risk**

The Sub-Fund may be exposed to a counterparty risk resulting from the use of OTC FDI or efficient portfolio management techniques. The Sub-Fund may be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

In case of default of the counterparty, the relevant transaction or agreement can be early terminated. With respect to OTC FDI and/or efficient portfolio management techniques, the Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another equivalent transaction or agreement, in the market conditions which will prevail during the occurrence of such event. The realisation of this risk could in particular have impacts on the capacity of the Sub-Fund to reach its investment objective.

When Société Générale is used as counterparty of a FDI by the Sub-Fund, conflicts of interests may arise between the Management Company and the counterparty. The Management Company supervises these risks of conflicts of interests by the implementation of procedures intended to identify them, to limit

them and to assure their fair resolution if necessary.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow to automatically and continuously reflect the performance of the Benchmark Index, especially if one or more of the following risks occur:

- **Risk of using financial derivative instruments**

The Sub-Fund can enter into financial derivative instruments ("FDI") traded over the counter or on a regulated exchange, such as swaps or future contracts. Those FDI may imply a range of risks including counterparty risk, hedging disruption risk, Benchmark Index disruption risk, taxation risk, regulatory risk, operational risk, and liquidity risk.

These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- **Regulatory risk affecting the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction where the Sub-

Fund is registered for sale or cross-listed, the process of subscriptions, conversions or redemptions of shares may be affected.

- **Regulatory risk affecting the underlyings of the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- **Benchmark Index disruption risk**

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out. Benchmark Index disruption notably covers situations where:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Benchmark Index is permanently cancelled by the index provider;
- iii) the Benchmark Index provider fails to calculate and announce the index level;
- iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;
- v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);
- vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific

tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

- **Operational Risk**

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- **Corporate action risk**

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

- **Currency Hedge Risk applicable to the following share classes : Monthly Hedged C-EUR, Monthly Hedged D-EUR, Monthly Hedged C-GBP, Monthly Hedged D-GBP, Monthly Hedged C-CHF, Monthly Hedged D-CHF**

In order to hedge EUR currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

In order to hedge GBP currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-GBP and Monthly Hedged C-GBP shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

In order to hedge CHF currency Risk against each Benchmark index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of

the respective share classes' currencies and the currencies of each Benchmark Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-GBP, and Monthly Hedged C-GBP.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-USD, Class Monthly Hedged C-EUR, Class Monthly Hedged C-GBP and Class Monthly Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-USD, Class Monthly Hedged D-EUR, Class Monthly Hedged D-GBP and Class Monthly Hedged D-CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

consequence that such activities may have on the Benchmark Index or on the Sub-Fund.

APPENDIX 45

**MULTI UNITS LUXEMBOURG – Lyxor
Commodities Thomson
Reuters/CoreCommodity CRB EX-
Agriculture TR UCITS ETF**

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor Commodities Thomson Reuters/CoreCommodity CRB EX-Agriculture TR UCITS ETF** is to track both the upward and the downward evolution of the “Thomson Reuters/CoreCommodity CRB Non-Agriculture and Livestock Total Return Index” (the “**Index**”) denominated in USD, in order to offer an exposure to international commodity markets and more specifically to metals and energy.

The anticipated level of the tracking error under normal market conditions is expected to be 0.08%.

THE INDEX

• **Index Objectives**

The Index is an index of commodity futures on metals and energy, excluding agriculture and livestock, which is calculated and published by Reuters.

The Index is a “Total Return” index, which means that its performance includes the interest paid on remaining cash (at the 91-day Treasury Bill rate).

• **Index Methodology**

The Index reflects the changes in the prices of the futures contracts on a basket of commodities and more specifically metals and energy. These futures contracts are listed on exchanges in New York (COMEX, NYMEX) and London (LME).

A monthly mechanism of sell/buy (“**Roll**”) allows changing the contracts included in the Index.

Exchange	Commodity	Commodity weight on Roll dates
NYMEX	WTI Crude Oil	23%

Exchange	Commodity	Commodity weight on Roll dates
	Heating Oil	5%
NYMEX	RBOB Gasoline	5%
	Natural Gas	15%
LME	Nickel	3.5%
COMEX	Silver	3.5%
COMEX	Gold	15%
LME	Aluminium	15%
COMEX	Copper	15%

The weighting of the performance of each component is predetermined by the Index calculating agent in accordance with each commodity’s reference price and importance in the world production, while maintaining sufficient diversification.

On each Roll, each constituent’s weight is also readjusted to maintain uniform exposure to each constituent and preserve the above level of diversification.

The performance tracked is that of the Index’s closing price.

The composition of the Index is reviewed and rebalanced each month.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the following website: <http://online.thomsonreuters.com/indices>.

• **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the “**Licence**”).

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

• **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Index methodology as described in section above will not be changed by the Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors

may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://online.thomsonreuters.com/indices>.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. RISKS WARNING

- Commodities risk

The commodity markets generally are subject to greater risks than other markets. It is a feature of commodities generally that they are subject to rapid change and the risks involved may change relatively quickly. Commodity prices may hence be highly volatile. They are determined by forces of supply and demand in the commodity

markets and these forces are themselves influenced by, without limitation, consumption patterns, macro economic factors, weather conditions, natural disasters, trade, fiscal, monetary and exchange policies and controls of governments and other unforeseeable events. In addition, the geographical distribution (commodities are often produced in emerging market countries) and concentration of commodities may expose the Sub-Fund to issues such as heightened political risks, sovereign intervention and the potential for sovereign claims to output, acts of war, or increase in resources-related rents and taxes. There is also the risk that industrial production may fluctuate widely, decline sharply, or be subject to waning secular consumption trends, adversely affecting the performance of the Sub-Fund.

- **Futures roll-over risk**

The Index is comprised of future contracts on commodities. The Sub-Fund is therefore exposed to a liquidity risk specific to trading in such instruments, whose daily trading volume may be limited. The exposure to the index is maintained by rolling positions on such future contracts. Such a roll consists in transferring a position on contracts close to their expiry (in any case, before the expiry date) to contracts with a longer maturity. Due to transaction costs and a potential lack of liquidity, investors are exposed to a risk of loss arising from the roll operation on the future contracts. Moreover, in certain market situations, the Fund may suffer a systematic loss when rolling these contracts. The spread between the Sub-Fund's performance and the index performance could therefore increase progressively and negatively and have a significant impact on the Sub-Fund's performance, notably in case of long term investment made in the Sub-Fund.

- **Capital at risk**

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Index is subject to a negative performance over the investment period.

- **Interest Rate Risk**

The Sub-Fund is exposed to moves in money markets following a decision from the respective central bank. As a result, a

decrease in the monetary interest rates under the level of management fees and structuring costs of the Sub-Fund could lead to a decrease in the net asset value of the Sub-Fund.

- **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Concentration Risk**

Investors are exposed to the Index representing two sectors (energy and metal), which provides a lesser diversification of assets compared to a broader index which will be exposed to various sectors. The Sub-Fund replicates the performance of the Index which is concentrated in a limited number of commodities. Exposure to such concentrated Index may result in higher volatility compared to a diversified index and in amplified liquidity risk in case of impaired liquidity or suspension of one or several Index constituents.

- **Counterparty Risk**

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Currency Risk related to the listing of the Sub-Fund**

The Sub-Fund is exposed to currency risk, as it may be listed on certain stock exchanges and/or multilateral trading facilities in a currency different from the Index. As a result, due to exchange rate fluctuations, the net asset value of the Sub-Fund, when listed in a currency different from the Index, could decrease while the Index value increases.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- **Risk of using financial derivative instruments**

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could

affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- **Regulatory Risk affecting the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

- **Regulatory Risk affecting the underlyings of the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- **Index Disruption Risk**

In the event of a Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the Index provider;

iii) the Index provider fails to calculate and announce the Index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the Index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- **Operational Risk**

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- **Currency Hedge Risk applicable to the following share classes: Daily Hedged C-EUR, Daily Hedged C-GBP, Daily Hedged C- CHF**

In order to hedge EUR- currency Risk against each Index component's currency, specific to Daily Hedged C-EUR shares class, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Index component.

In order to hedge GBP- currency Risk against each Index component's currency, specific to Daily Hedged C-GBP shares class, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Index component.

In order to hedge CHF- currency Risk against each Index component's currency,

specific to Daily Hedged C-CHF shares class, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the daily rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Daily Hedged C-EUR, Daily Hedged C-GBP and Daily Hedged C-CHF.

- **Collateral Management Risk**

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C - EUR and C - USD Shares.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

APPENDIX 46

MULTI UNITS LUXEMBOURG – Lyxor FTSE Actuaries UK Gilts 0-5Y (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the GBP.

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor FTSE Actuaries UK Gilts 0-5Y (DR) UCITS ETF is to reflect the performance of the FTSE Actuaries UK Conventional Gilts Up To 5 Years index (hereinafter the "Benchmark Index") denominated in GBP and representative of UK government bonds ("Gilts") with remaining maturities up to 5 years.

The expected ex-post tracking error under normal market conditions is 0.10%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Sub-fund's Benchmark Index is the FTSE Actuaries UK Conventional Gilts Up To 5 Years index denominated in GBP. The Benchmark Index is a "total return" index (i.e. all coupons detached from the Benchmark Index constituents are reinvested in the Benchmark Index).

The Benchmark Index consists of securities with up-to-5-years maturity from the conventional index family of the FTSE Actuaries UK Gilts Index Series, which includes all British Government Securities quoted on the London Stock Exchange.

The performance tracked is that of the Benchmark Index's closing price.

- **Benchmark Index Methodology**

Except for certain categories (e.g. convertible Gilts and rump stocks), all Gilts denominated in GBP with up-to-5-year remaining maturities and quoted on the London Stock Exchange are eligible for inclusion in the Benchmark Index.

A Gilt is included in the Benchmark Index either on the business day following the auction if it has a maturity at issuance up to 5 years, or after the close of the business day when its redemption date is exactly 5 years from the calculation date. Gilts are

removed from the Benchmark Index on their redemption dates at the closing price on the previous day.

Rump Gilts are relatively small Gilts (in terms of nominal outstanding) as declared by the Debt Management Office ("DMO"). Each bond's weight in the Benchmark Index is determined by its nominal amount outstanding relative to the total nominal outstanding of the selected universe. The Benchmark Index is re-balanced each time a relevant event takes place (e.g. new issuance or redemption of an issuance).

The bond prices source used to determine the Benchmark Index closing price is indicated in the index methodology available at www.ftse.com.

The Benchmark Index is administered and managed by FTSE Russell.

A full description of the Benchmark Index and its construction methodology and information on the composition and respective weightings of the Benchmark Index components are available on the Internet at www.ftse.com.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the "Licence").

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on www.ftse.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange are also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 25%

and is expected to represent approximately 0% of the Net Asset Value. In certain circumstances this proportion may be higher.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "Total Fee") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and to cover Structural Cost. Such fee is set at a maximum of 0.07% per year (inclusive of VAT) of the Net Asset Value per Share.

For Monthly Hedged C-EUR/D-EUR, Monthly Hedged C-CHF/D-CHF, and Monthly Hedged C-USD/D-USD share classes, such fee is set at a maximum of 0.20% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the

Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depository, Société Générale Bank & Trust S.A. is entitled to receive fees for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

Investors in the Sub-Fund will mainly be exposed to the following risks:

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Interest Rate Risk

The price of a bond can be affected by unexpected changes in the level of interest rates, which in particular may modify the

shape of the yield curve in particular. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Currency Risk related to the listing of the Sub-Fund

The Sub-Fund is exposed to currency risk, as it may be listed on certain stock exchanges and/or multilateral trading facilities in a currency different from the Benchmark Index. As a result, due to exchange rate fluctuations, the net asset value of the Sub-Fund, when listed in a currency different from the Benchmark Index, could decrease while the Benchmark Index value increases.

- Benchmark Index tracking risk

Reflecting the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's manager may therefore use various

optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Benchmark Index.

- **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Counterparty Risk**

The Sub-Fund may be exposed to a counterparty risk resulting from the use of OTC FDI or efficient portfolio management techniques. The Sub-Fund may be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

In case of default of the counterparty, the relevant transaction or agreement can be early terminated. With respect to OTC FDI and/or efficient portfolio management techniques, the Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another equivalent transaction or agreement, in the market conditions which will prevail during the occurrence of such event. The realisation of this risk could in particular have impacts on the capacity of the Sub-Fund to reach its investment objective.

When Société Générale is used as counterparty of a FDI by the Sub-Fund,

conflicts of interests may arise between the Management Company and the counterparty. The Management Company supervises these risks of conflicts of interests by the implementation of procedures intended to identify them, to limit them and to assure their fair resolution if necessary.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow to automatically and continuously reflect the performance of the Benchmark Index, especially if one or more of the following risks occur:

- **Risk of using financial derivative instruments**

The Sub-Fund can enter into financial derivative instruments ("FDI") traded over the counter or on a regulated exchange, such as swaps or future contracts. Those FDI may imply a range of risks including counterparty risk, hedging disruption risk, Benchmark Index disruption risk, taxation risk, regulatory risk, operational risk, and liquidity risk.

These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- **Regulatory risk affecting the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscription, conversion or redemption of shares or units may be affected.

- **Regulatory risk affecting the underlyings of the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- **Benchmark Index disruption risk**

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out. Benchmark Index disruption notably covers situations where:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Benchmark Index is permanently cancelled by the index provider;
- iii) the Benchmark Index provider fails to calculate and announce the index level;
- iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;
- v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated

over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

- **Operational Risk**

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- **Corporate action risk**

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

- **Currency Hedge Risk applicable to the following share classes: Monthly Hedged C-EUR, Monthly Hedged D-EUR, Monthly Hedged C-USD, Monthly Hedged D-USD, Monthly Hedged C-CHF, Monthly Hedged D-CHF**

In order to hedge EUR-currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

In order to hedge USD-currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-USD and Monthly Hedged C-USD shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

In order to hedge CHF-currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-USD, and Monthly Hedged C-USD.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-GBP, Class Monthly Hedged C-EUR, Class Monthly Hedged C-USD and Class Monthly Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-GBP, Class Monthly Hedged D-EUR, Class Monthly Hedged D-USD and Class Monthly Hedged D-CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

APPENDIX 47

MULTI UNITS LUXEMBOURG – Lyxor US TIPS (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor US TIPS (DR) UCITS ETF is to reflect the performance of the Barclays US Government Inflation-Linked Bond Index (the “**Benchmark Index**”) denominated in USD, in order to offer an exposure to the US Treasury Inflation Protected Securities (TIPS) market.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of US Treasury Inflation Protected Securities with at least one year until final maturity.

The performance tracked is that of the Benchmark Index’s closing price.

- **Benchmark Index Methodology**

To be eligible for inclusion in the Benchmark Index, a bond must meet specific criteria pertaining to its type (principal and interest must be inflation-linked and denominated in USD), residual maturity (at least one year until final maturity), amount outstanding (at least USD 500 millions minimum par amount outstanding not adjusted for inflation indexation), coupons (only fixed rate), and issuer (US Treasury).

The Benchmark Index is market value weighted.

The Benchmark Index is based on prices provided by Barclays’ market makers and third-party pricing sources.

The Benchmark Index is calculated daily.

The Benchmark Index is compiled, administered and managed by Barclays.

The composition of the Benchmark Index is reviewed and rebalanced on the last calendar day of each month.

The Benchmark Index is a “total return index” (i.e. all coupons detached by the components of the index are reinvested in the Benchmark Index).

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the following website: <https://index.barcap.com>.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the “**Licence**”).

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on <https://index.barcap.com>.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index. The Sub-Fund will carry out its investment objective via a Direct Replication as

described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The expected ex-post tracking error under normal market conditions is 0.10%.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com

INVESTMENT TECHNIQUES

classes, such fee is set at a maximum of 0.25% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the fee it receives to cover Structural Costs.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the fee it receives to cover Structural Costs.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the fee it receives to cover Structural Costs.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- **Capital at risk**

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally

invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- **Interest Rate Risk**

The price of a bond can be affected by unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve in particular. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- **Securities Lending**

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- **Credit risk**

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- **Benchmark Index tracking risk**

Reflecting the performance of the Benchmark Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's manager may therefore use various optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark

Index, in proportions that differ from those of the Benchmark Index or even investing in securities that are not Benchmark Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Benchmark Index.

- **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Counterparty Risk**

The Sub-Fund may be exposed to a counterparty risk resulting from the use of OTC FDI or efficient portfolio management techniques. The Sub-Fund may be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

In case of default of the counterparty, the relevant transaction or agreement can be early terminated. With respect to OTC FDI and/or efficient portfolio management techniques, the Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another equivalent transaction or agreement, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk could in particular have impacts on the capacity of the Sub-Fund to reach its investment objective.

When Société Générale is used as counterparty of a FDI by the Sub-Fund, conflicts of interests may arise between the Management Company and the counterparty. The Management Company supervises these risks of conflicts of interests by the implementation of procedures intended to identify them, to limit them and to assure their fair resolution if necessary.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Currency Risk related to the listing of the Sub-Fund**

The Sub-Fund is exposed to currency risk, as it may be listed on certain stock exchanges and/or multilateral trading facilities in a currency different from the Benchmark Index. As a result, due to exchange rate fluctuations, the net asset value of the Sub-Fund, when listed in a currency different from the Benchmark Index, could decrease while the Benchmark Index value increases.

- **Inflation-linked instruments Risk**

An inflation-linked bond offers a return guaranteed at a fixed real interest rate and all its cash flows (coupons and principal) are indexed on the inflation rate of the country or the zone of issue. Besides the interest rate risk presented above (applied to the real interest rates, i.e. net of the inflation rate), this bond is thus exposed to the variations in the realized inflation and in the inflation anticipated up to the maturity date of the security. A decrease of the inflation rate will result in a decrease of the value of the inflation-linked bond. The variation in the inflation rate can thus have an impact on the net asset value of the Sub-Fund.

The inflation rate to which the bonds are indexed is generally associated to a consumer price index in the country or the zone of issue and thus linked to the economic situation of this country or this zone.

- **Specific Risk due to Seasonality and Carry on Inflation**

Inflation may be subject to seasonal fluctuations which may have an impact on Inflation-Linked Bonds return and may generate either positive or negative carry (where the carry of any asset is the cost or benefit of owning that asset). There is positive carry when the monthly inflation accretion earned is higher than the cost of financing the trade through the repurchase market; there is negative carry otherwise.

The Inflation figures are generated retrospectively, which results in a time lag of

several months between the collection of prices data and the indexation application.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Benchmark Index, especially if one or more of the following risks occur:

- **Risk of using financial derivative instruments**

The Sub-Fund can enter into financial derivative instruments ("FDI") traded over the counter or on a regulated exchange, such as swaps or future contracts. Those FDI may imply a range of risks including counterparty risk, hedging disruption risk, Benchmark Index disruption risk, taxation risk, regulatory risk, operational risk, and liquidity risk.

These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- **Regulatory Risk affecting the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed,

the process of subscriptions, conversions and redemptions of Shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Benchmark Index Disruption Risk

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out.

Benchmark Index disruption notably covers situations where:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Benchmark Index is permanently cancelled by the Benchmark Index provider;
- iii) the Benchmark Index provider fails to calculate and announce the Benchmark Index level;
- iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the Benchmark Index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;
- v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);
- vi) the constituents of the Benchmark Index are impacted by transaction costs in relation

to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate action risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

- Currency Hedge Risk applicable to the following share classes: Monthly Hedged C-EUR, Monthly Hedged D-EUR, Monthly Hedged C-GBP, Monthly Hedged D-GBP, Monthly Hedged C-CHF, Monthly Hedged D-CHF

In order to hedge EUR currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

In order to hedge GBP currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-GBP and Monthly Hedged C-GBP shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Benchmark Index component.

In order to hedge CHF currency Risk against each Benchmark index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of

the respective share classes' currencies and the currencies of each Benchmark Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-GBP, and Monthly Hedged C-GBP.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-USD Shares, Class Monthly Hedged C-EUR Shares, Class Monthly Hedged C-GBP Shares, Class Monthly Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-USD Shares, Class Monthly Hedged D-EUR, Class Monthly Hedged D-GBP Shares, Class Monthly Hedged D-CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 48

MULTI UNITS LUXEMBOURG – Lyxor UK£ 10Y Inflation Expectations UCITS ETF

The Reference Currency of the Sub-Fund is the British Pound (GBP).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor UK£ 10Y Inflation Expectations UCITS ETF** is to reflect the performance of the “Markit iBoxx GBP Breakeven 10-year Inflation Index” (the “**Benchmark Index**”) denominated in GBP, in order to offer an exposure to a long position in 6 issuances of UK Index-Linked Gilts having durations closest to 10 years and a short position in UK Gilts with adjacent durations.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index is representative of the performance of a long position in 6 issuances of UK Index-Linked Gilts having durations closest to 10 years and a short position in UK Gilts with adjacent durations without any issuance exceeding 30% at any rebalancing date.

The difference in yield (or “spread”) between these bonds is commonly referred to as a “breakeven rate of inflation” (“**BEI**”) and is considered to be a measure of the market’s expectations for inflation over a specified period of time.

- **Benchmark Index Methodology**

The Benchmark Index is designed to provide exposure to changes in inflation expectation priced by the market by entering into:

- a long position in 6 issuances of UK Index-Linked Gilts having durations closest to 10 years;
- a short position in UK Gilts with adjacent durations.

UK Index-Linked Gilts are indexed to the UK Retail Price Index.

The combination of long and short positions removes the noise related to duration of fixed income securities, allowing for the

isolation of a single factor: changes in the market’s expectations for 10Y inflation.

The daily Benchmark Index performance will not be the daily change of the BEI, nor a multiplier of the daily change of the BEI, but the daily over performance of the long inflation-linked basket versus the short nominal basket, which is in theory correlated to the changes in the inflation expected by the market at the bonds maturity, represented by the breakeven inflation for such maturity.

In theory, an increase in the x years inflation expectation shall lead to a relative decrease of the price of the nominal bond with x years maturity versus the price of the equivalent inflation-linked bond and thus an increase in the performance of a long position in the inflation-linked bond and a short position in the nominal bond. The Benchmark Index being composed of a long position in several inflation-linked bonds and a short position in several nominal bonds with several maturities, the Benchmark Index performance will not be linked to the sole 10 year inflation expectation but will be linked to the weighted average inflation expectations at the maturities corresponding to the bonds comprising the basket. In addition, (i) price movements due to supply and demand discrepancies between inflation-linked bonds and corresponding nominal bonds, (ii) transactions costs applicable to the Benchmark Index components, and (iii) seasonality cycles and potential negative carry positions due to seasonality (see the specific risk factor hereafter) will lead to deviations between the Benchmark Index performance and inflation expectations.

Please also note that the Benchmark Index is not designed to measure the realized rate of inflation, nor does it seek to replicate the returns of any index or measure of actual consumer price levels. However, on short periods realized inflation will have an impact on the performance of the Benchmark Index, typically when realized inflation over a period of time differs from market expectation during the same period.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The Benchmark Index is a total return index. A total return index calculates the performance of the index constituents on the basis that any coupons or distributions are included in the index returns.

The complete methodology for the Benchmark Index (including maintenance and rebalancing of the Benchmark Index) is available for consultation on the following website: www.markit.com/product/indices.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the "Licence").

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by the Benchmark Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on www.markit.com/product/indices.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The anticipated level of the tracking error under normal market conditions is expected to be 0.02%.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "Total Fee") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost.

Such fee is set at a maximum of 0.25% per year (inclusive of VAT) of the Net Asset

Value per Share for the Class C-GBP, D-GBP and Class GBP.

Such fee is set at a maximum of 0.35% per year (inclusive of VAT) of the Net Asset Value per Share for the Class Monthly Hedged C-EUR, Monthly Hedged D-EUR, Monthly Hedged C-USD, Monthly Hedged D-USD, Monthly Hedged C-CHF, Monthly Hedged D-CHF.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- Breakeven Inflation Investing Risk

The Sub-Fund is exposed to a long/short strategy which is sensitive to changes in inflation expectations, which may go down as well as up, and reflect the market's macroeconomic view at a given date. Thus, the Benchmark Index is not designed to measure or predict the realized rate of inflation, nor does it seek to replicate the returns of any price index or measure of actual consumer price levels.

The "breakeven rate of inflation" (BEI), which is the difference in yield between a nominal bond and its equivalent inflation-linked bond at a given maturity, and can be captured by a long investment in the inflation-linked bond associated with a short position in the nominal bond, is considered to be a measure of the market's expectations for inflation over the relevant period. For the avoidance of doubt, the daily Benchmark Index performance will not be the daily change of the BEI, nor a multiplier of the daily change of the BEI, but the daily overperformance of the long inflation-linked basket versus the short nominal basket, which is in theory correlated to the changes in the inflation expected by the market at the bonds maturity, represented by the BEI for such maturity. Nevertheless, there is no guarantee that the Benchmark Index would be correlated to the BEI as the strategy underlying the Benchmark Index is also sensitive to additional factors and risks including (but not limited to) price movements due to supply and demand discrepancies between inflation-linked bonds and corresponding nominal bonds, interest rates, credit risk, inflation seasonality effects, and transactions costs applicable to the Benchmark Index components. These additional factors will lead to deviations between the Benchmark Index performance and inflation expectations variations. As a result, an investment in the Sub-Fund may not serve as an effective hedge against inflation, nor an accurate tracker of the BEI.

- Specific Risk due to Seasonality and Carry on Inflation

Inflation may be subject to seasonal fluctuations which may have an impact on inflation linked bonds return and may generate either positive or negative carry (where the carry of any asset is the cost or benefit of owning that asset.)

There is positive carry when the monthly inflation accretion earned is higher than the cost of financing the trade through the repurchase market; there is negative carry otherwise. Inflation accretion can be negative and amplify the negative carry.

- **Capital at risk**

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- **Interest Rate Risk**

The Sub-Fund's duration-neutral strategy is designed to provide returns linked to inflation in an effort to minimize the influence of interest rate risk. However, the Sub-Fund could be exposed to moves in interest rates due to imperfect matching between bond's maturities in both legs.

- **Credit risk**

The Sub-Fund could be exposed to a change in the quality rating of a bond in the Benchmark Index due to imperfect matching between bonds in both the short and long leg. Such change is linked to the ability, or perceived ability, of an issuer of a debt security to make timely payments of interest and principal on the bond. An actual or perceived deterioration in the ability of an issuer to meet its obligations will likely have an adverse effect on the Sub-Fund.

• **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Counterparty Risk**

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-

Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Benchmark Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Currency Risk related to the listing of the Sub-Fund**

The Sub-Fund is exposed to currency risk, as it may be listed on certain stock exchanges and/or multilateral trading facilities in a currency different from the Benchmark Index. As a result, due to exchange rate fluctuations, the net asset value of the Sub-Fund, when listed in a currency different from the Benchmark Index, could decrease while the Benchmark Index value increases.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Benchmark Index, especially if one or more of the following risks occur:

- **Risk of using financial derivative instruments**

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Benchmark Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- **Regulatory Risk affecting the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

- **Regulatory Risk affecting the underlyings of the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- **Benchmark Index Disruption Risk**

In the event of a Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out.

Benchmark Index disruption notably covers situations where:

i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the Benchmark Index provider;

iii) the Benchmark Index provider fails to calculate and announce the Benchmark Index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the Benchmark Index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

- **Operational Risk**

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- **Currency Hedge Risk applicable to the following share classes : Monthly Hedged C-EUR, Monthly Hedged D-EUR, Monthly Hedged C-USD, Monthly Hedged D-USD, Monthly Hedged C-CHF, Monthly Hedged D-CHF**

In order to hedge EUR currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

In order to hedge USD currency Risk against each Benchmark Index component's currency, specific to Monthly Hedged D-USD and Monthly Hedged C-USD shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

In order to hedge CHF currency Risk against each Benchmark index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Benchmark Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-EUR, Monthly Hedged C-EUR, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-USD, and Monthly Hedged C-USD.

- **Collateral Management Risk**

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a

counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-GBP Shares, class Monthly Hedged C-GBP Shares, class Monthly Hedged C-USD, class Monthly Hedged C-CHF.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of class D-GBP Shares, class Monthly Hedged D-EUR Shares, class Monthly Hedged D-USD Shares, class Monthly Hedged D-CHF Shares, class GBP Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Benchmark Index referred to here is the property of Markit Indices Limited (the "Index Sponsor") and it is used under license for the Sub-Fund.

The parties agree that the Index Sponsor does not approve, endorse or recommend the Sub-Fund.

Under no circumstances does the Index Sponsor provide any guarantee - whether explicit or implicit (including but not limited to the commercial value or appropriateness for any specific use or utilisation) - pertaining to the Benchmark Index or any data included in or linked to the Benchmark Index and, in particular, declines any guarantee relating to the quality, accuracy and/or exhaustiveness of the Benchmark Index or the data included in or linked to the Benchmark Index, or the results obtained

from use of the Benchmark Index and/or the composition of the Benchmark Index at a given date or moment, likewise the financial rating of any issuing entity or any credit or similar event (irrespective of the definition of such) relating to a bond in the Index at a given date or at any other time.

The Index Sponsor cannot be held liable for any reason whatsoever in terms of an error in the Benchmark Index, and the Index Sponsor is not required to inform of such an error, in the event it would occur.

Under no circumstances does the Index Sponsor issue a recommendation to buy or sell the Sub-Fund nor does it express an opinion concerning the ability of the Benchmark Index to replicate the performance of the markets in question, or concerning the Benchmark Index or any transaction or product related to it, or indeed the corresponding risks.

The Index Sponsor is under no obligation to take the needs of a third party into consideration during the determination, modification in the composition or calculation of the Benchmark Index. The purchaser or a seller of the Sub-Fund and the Index Sponsor cannot be held liable in the event the Index Sponsor does not take the necessary measures in determining, adjusting or calculating the Benchmark Index.

The Index Sponsor and its related companies retain the right to process any of the bonds making up the Index, and may, when permitted, accept deposits, make loans or perform any other credit activity, and more generally carry out all or any investment banking and finance service or other commercial activity with these bonds' issuers or their related companies, and they may enter into such activities as though the Index did not exist, without taking into account any consequences such action may have on the Benchmark Index or the Sub-Fund.

APPENDIX 49

MULTI UNITS LUXEMBOURG – Lyxor Green Bond (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - **Lyxor Green Bond (DR) UCITS ETF** is to track both the upward and the downward evolution of the “Solactive Green Bond EUR USD IG Index” (the “**Index**”) denominated in EUR, in order to offer an exposure to the Green Bonds market.

The anticipated level of the tracking error under normal market conditions is expected to be 0.40%

THE INDEX

- **Index Objectives**

The Index is representative of the performance of Green Bonds issued by investment grade entities and denominated in Euros and US Dollars. Green Bonds are issued in order to fund projects that have positive environmental outcomes.

- **Index Methodology**

To be eligible for inclusion in the Index, a bond must be considered as a “Green Bond” by the Climate Bonds Initiative and meet specific criteria pertaining, in particular, to its issue size (at least 300 million outstanding amount), maturity (at least one year until maturity), ratings (only investment grade bonds are eligible) and denomination currency (only EUR and USD denominated bonds are eligible).

Climate Bonds Initiative is an investor-focused- not-for-profit organization promoting large-scale investments that will deliver a global low carbon and climate resilient economy (more information is available on the website: <http://www.climatebonds.net/>). Climate Bonds Initiative has developed and implemented a clear set of criteria to define Green Bonds which are eligible for the Index. A four-step process to classify a Green Bond as eligible includes: identification of environmentally themed bonds, reviewing eligible bond structures,

evaluating the use of proceeds and screening eligible green projects or assets for adherence with the Climate Bonds Taxonomy. More information can be found on the website: <http://www.climatebonds.net/>

The Index is market-value weighted, which means that components weights are defined according to each bond outstanding amount.

The Index is based, in particular, on prices provided by Solactive and third-party pricing sources.

The Index is calculated daily.

The Index is compiled, administered and managed by Solactive.

The composition of the Index is reviewed and rebalanced on the last business day of each month.

The rebalancing frequency as described above will have an impact in terms of costs in the context of the performance of the investment objective. Particular costs incurred as a result of such rebalancing of the Index include additional transaction costs.

The Index is a “total return index” (i.e. all coupons detached by the components of the Index are reinvested in the Index).

The complete methodology for the Index (including maintenance, rebalancing of the Index and its effects on the costs within the strategy) is available for consultation on the following website: <https://www.solactive.com>.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the “**Licence**”).

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Index methodology as described in section above will not be changed by the Index sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <https://www.solactive.com>

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to reflect the performance of the Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg

page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange is also available under the "factsheet" section of the website www.lyxoretf.com

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 25% and is expected to represent approximately 0% of the Net Asset Value. In certain circumstances this proportion may be higher.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the Green Bonds market

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the fee it receives to cover Structural Costs.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the fee it receives to cover Structural Costs.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker

which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Index is subject to a negative performance over the investment period.

- Interest Rate Risk

The price of a bond can be affected by unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve in particular. The bonds that make up the Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-

Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Index tracking risk

Reflecting the performance of the Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's manager may therefore use various optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Index, in proportions that differ from those of the Index or even investing in securities that are not Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Index.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Counterparty Risk

The Sub-Fund may be exposed to a counterparty risk resulting from the use of OTC FDI or efficient portfolio management techniques. The Sub-Fund may be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

In case of default of the counterparty, the relevant transaction or agreement can be early terminated. With respect to OTC FDI and/or efficient portfolio management techniques, the Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if

necessary, another equivalent transaction or agreement, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk could in particular have impacts on the capacity of the Sub-Fund to reach its investment objective.

When Société Générale is used as counterparty of a FDI by the Sub-Fund, conflicts of interests may arise between the Management Company and the counterparty. The Management Company supervises these risks of conflicts of interests by the implementation of procedures intended to identify them, to limit them and to assure their fair resolution if necessary.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Currency Risk related to Classes denominated in a currency other than the currencies of the constituents of the Index**

Classes denominated in a currency other than some or all of the currencies of the constituents of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the value of the constituents denominated in another currency than the Currency of the Class increases.

- **Currency Risk related to Classes denominated in a currency other than the reference currency of the Index**

When Share Classes are denominated in a currency other than the reference currency of the Index, the performance of the aforementioned Share Classes will differ from the performance of the Index, due to exchange rate fluctuations.

- **Low Diversification Risk**

Investors are exposed to an index representing a region, a sector or a strategy, which may provide a lesser diversification of assets compared to a broader index which will be exposed to various regions, sectors and strategies. Hence, exposure to concentrated indices may result in higher volatility compared to diversified markets. However, UCITS diversification rules will

still apply to the underlyings of the Sub-Fund.

- **Currency Risk related to the listing of the Sub-Fund**

The Sub-Fund is exposed to currency risk, as it may be listed on certain stock exchanges and/or multilateral trading facilities in a currency different from the Index. As a result, due to exchange rate fluctuations, the net asset value of the Sub-Fund, when listed in a currency different from the Index, could decrease while the Index value increases.

- **Emerging and Developing Markets Risk**

The Sub-Fund's exposure to emerging markets carries a greater risk of potential loss than an investment in traditional developed markets. Specifically, market operating and supervision rules for an emerging market may differ from standards applicable in developed markets. In particular, exposure to emerging markets can entail: increased market volatility, lower trading volumes, a risk of economic and/or political instability, an uncertain or unstable tax regime and/or regulatory environment, market closure risks, government restrictions on foreign investments, an interruption or limitation of convertibility or transferability of one of the currencies

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- **Risk of using financial derivative instruments**

The Sub-Fund can enter into financial derivative instruments ("FDI") traded over the counter or on a regulated exchange, such as swaps or future contracts. Those FDI may imply a range of risks including counterparty risk, hedging disruption risk, Index disruption risk, taxation risk, regulatory risk, operational risk, and liquidity risk.

These risks can materially affect a FDI and

could lead to an adjustment or even the early termination of the FDI transaction.

- **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- **Regulatory Risk affecting the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of Shares may be affected.

- **Regulatory Risk affecting the underlyings of the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- **Index Disruption Risk**

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the Index provider;

iii) the Index provider fails to calculate and announce the Index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the Index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- **Operational Risk**

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- **Corporate action risk**

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Index treatment.

- **Currency Hedge Risk applicable to the following share classes: Monthly Hedged C-EUR, Monthly**

Hedged D-EUR, Monthly Hedged C-USD, Monthly Hedged D-USD, Monthly Hedged C-GBP, Monthly Hedged D-GBP, Monthly Hedged C-CHF, Monthly Hedged D-CHF

In order to hedge EUR currency Risk against each index component's currency, specific to Monthly Hedged D-EUR and Monthly Hedged C-EUR shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Index component.

In order to hedge USD currency Risk against each Index component's currency, specific to Monthly Hedged D-USD and Monthly Hedged C-USD shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Index component.

In order to hedge GBP currency Risk against each Index component's currency, specific to Monthly Hedged D-GBP and Monthly Hedged C-GBP shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Index component.

In order to hedge CHF currency Risk against each index component's currency, specific to Monthly Hedged D-CHF and Monthly Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Index component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the monthly rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Monthly Hedged D-USD, Monthly Hedged C-USD, Monthly Hedged D-CHF, Monthly Hedged C-CHF, Monthly Hedged D-GBP, and Monthly Hedged C-GBP.

- **Collateral Management Risk**

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-EUR Shares, Class C-USD Shares, Class Monthly Hedged C-EUR Shares, Class Monthly Hedged C-USD Shares, Class Monthly Hedged C-GBP Shares, Class Monthly Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR Shares, Class D-USD Shares, Class Monthly Hedged D-EUR, Class Monthly Hedged D-USD Shares, Class Monthly Hedged D-GBP Shares, Class Monthly Hedged D-CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 50

MULTI UNITS LUXEMBOURG – Lyxor Italia Equity PIR UCITS ETF

The Reference Currency of the Sub-Fund is the EUR.

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG - Lyxor Italia Equity PIR UCITS ETF** is to offer an exposure to the performance of the Italian equity market by investing mainly in Italian large cap and mid cap companies, typically included in the FTSE MIB index and the FTSE Italia Mid Cap Index (the “**Indexes**”).

The Sub-Fund is benchmarked against the following basket of Indexes (the “**Reference Portfolio**”):

- 75% of the FTSE MIB Index
- 25% of the FTSE Italia Mid Cap Index

The Sub-Fund is actively managed by investing in a diversified portfolio of stocks which is eligible to the “Piano Individuale di Risparmio a lungo termine” (PIR) under the Italian 2017 Budget Law, while getting correlated to the Reference Portfolio.

This active management may lead to a discrepancy between the Sub-Fund’s exposure and the Reference Portfolio exposure, and therefore, may lead to a performance which is uncorrelated to the Reference Portfolio.

THE REFERENCE PORTFOLIO

- **Reference Portfolio used as benchmark**

The Sub-fund is benchmarked with the Reference Portfolio which is composed by 75% of the FTSE MIB Index and by 25% of the FTSE Italia Mid Cap Index.

1. The FTSE MIB Index

The FTSE MIB Index measures the performance of 40 stocks listed on the Borsa Italiana and aims to replicate the sector breakdown of the Italian stock market.

2. The FTSE Italia Mid Cap Index

The FTSE Italia Mid Cap Index is representative of the performance of the medium-capitalization equities listed on the Borsa Italiana and is composed of the 60 stocks with the highest ratings in terms of market capitalization and liquidity.

- **Indexes’ Methodology**

1. The FTSE MIB Index

The composition of the FTSE MIB Index is based on three criteria: free float, liquidity based on traded volumes, and the representativeness of the market’s main sectors as defined under the Industry Classification Benchmark (ICB).

Each FTSE MIB Index component is capped at 15% at each quarterly rebalancing. The weight of any component that exceeds 15% will be reduced to 15%.

2. The FTSE Italia Mid Cap Index

The FTSE Italia Mid Cap Index is a free float-adjusted capitalization-weighted index designed to measure the stock-market performance of the mid-cap equities listed on the Borsa Italiana, excluding foreign securities and secondary trading lines. The universe of eligible stocks is determined on the basis of their free float-adjusted market capitalization and a liquidity criterion based on traded volumes

Each FTSE Italia Mid Cap Index component is capped at 10% at each quarterly rebalancing. The weight of any component that exceeds 10% will be reduced to 10%.

The Indexes are administered and managed by FTSE Russell.

A full description and the complete methodology used to construct the Indexes and information on the composition and respective weightings of the Indexes components are available on the Internet at: www.ftse.com

- **Licence**

The use of the Indexes by the Company is covered by contractual licensing arrangements (the “**Licence**”).

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Reference Portfolio Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Indexes by other suitable indexes though there is no certainty that one will be available.

There is no guarantee that the Indexes methodology as described in section above will not be changed by the Indexes' sponsor. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Indexes by suitable indexes if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Indexes are substituted.

- **Additional Information on the Indexes**

Additional information on the Indexes, their composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Indexes can be found on www.ftse.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to offer an exposure to the performance of the Italian equity market by investing mainly in Italian large cap and mid cap companies, typically included in the FTSE MIB index and the FTSE Italia Mid Cap Index.

In order to achieve the investment objective, the management strategies that will be implemented consist, depending on the opportunities of the markets in:

1. Mainly investing in stocks comprised in the Reference Portfolio or in a representative selection of European large cap and mid cap stocks
2. On an ancillary basis investing in the derivative markets (such as index or stock futures, performance swaps, etc)

The Management Company may combine the 2 strategies in order to achieve its objective. In addition to that, the Management Company will monitor a set of liquidity indicators that may lead to a discrepancy with the exposure of the

Reference Portfolio, thus leading the performance of the Sub-Fund to drift potentially significantly from the Reference Portfolio performance.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

The Sub-Fund's units are included among eligible investment that shall be held in a "Piano Individuale di Risparmio a lungo termine" (PIR) under the Italian 2017 Budget Law (Law N°232 of 11 December 2016).

The Sub-Fund shall invest at least 70% of the portfolio in financial instruments, whether or not negotiated on a regulated market or on a multilateral trading facility, issued by, or entered into companies not engaged in real estate business, which are resident in Italy, or in an EU or EEA Member State and have a permanent establishment in Italy.

At least 30% of these financial instruments, which corresponds to 21% of the Sub-Fund's portfolio, shall be issued by companies which are not listed in the FTSE MIB index or in any equivalent indices.

The Sub-Fund cannot invest more than 10% of the portfolio in financial instruments issued by, or entered into with the same company, or companies belonging to the same group, or in cash deposits.

The Sub-Fund cannot invest in financial instruments issued by companies which are not resident in countries that allow an adequate exchange of information with Italy"

These investment restrictions shall be fulfilled for at least two third of each calendar year during which the Sub-Fund has been in existence.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange are also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is available to all investors.

Investors in this Sub-Fund are seeking exposure to the performance of the Italian equity market.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "Total Fee") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and to cover Structural Cost. Such fee is set at a maximum of 0.45% per year (inclusive of VAT) of the Net Asset Value per Share.

Within the Total Fee, the Structural Cost will not exceed 0.10% p.a.

For Daily Hedged C-GBP/D-GBP, Daily Hedged C-CHF/D-CHF, and Daily Hedged C-USD/D-USD share classes, such fee is set at a maximum of 0.55% per year (inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the

Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive fees for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its NAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

Investors in the Sub-Fund will mainly be exposed to the following risks:

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Indexes are subject to a negative performance over the investment period.

- Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk

factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

- **Risk of investment in Medium Capitalization Stocks**

The Sub-Fund is exposed to stocks of medium-capitalization companies, which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply than those of large-capitalization stocks. The Sub-Fund's net asset value could behave similarly and therefore fall more sharply than a similar investment in large-capitalization equities.

- **Currency Risk related to the listing of the Sub-Fund**

The Sub-Fund is exposed to currency risk, as it may be listed on certain stock exchanges and/or multilateral trading facilities in a currency different from the Indexes. As a result, due to exchange rate fluctuations, the net asset value of the Sub-Fund, when listed in a currency different from the Indexes, could decrease while the Indexes value increases.

- **Sub-Fund Liquidity Risk**

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Indexes due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- **Liquidity on Secondary Market Risk**

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- **Counterparty Risk**

The Sub-Fund may be exposed to a counterparty risk resulting from the use of OTC FDI or efficient portfolio management techniques. The Sub-Fund may be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

In case of default of the counterparty, the relevant transaction or agreement can be early terminated. With respect to OTC FDI and/or efficient portfolio management techniques, the Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another equivalent transaction or agreement, in the market conditions which will prevail during the occurrence of such event. The realisation of this risk could in particular have impacts on the capacity of the Sub-Fund to reach its investment objective.

When Société Générale is used as counterparty of a FDI by the Sub-Fund, conflicts of interests may arise between the Management Company and the counterparty. The Management Company supervises these risks of conflicts of interests by the implementation of procedures intended to identify them, to limit them and to assure their fair resolution if necessary.

- **Risk that the investment objective is only partially achieved**

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow to automatically and continuously reflect the performance of the Indexes, especially if one or more of the following risks occur:

- **Risk of using financial derivative instruments**

The Sub-Fund can enter into financial derivative instruments ("FDI") traded over the counter or on a regulated exchange, such as swaps or future contracts. Those FDI may imply a range of risks including counterparty risk, hedging disruption risk, Indexes disruption risk, taxation risk, regulatory risk, operational risk, and liquidity risk.

These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- **Risk due to a shift in tax policy**

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an

event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- **Risk due to a shift in the underlyings' tax policy**

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- **Regulatory risk affecting the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscription, conversion or redemption of shares or units may be affected.

- **Regulatory risk affecting the underlyings of the Sub-Fund**

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- **Indexes disruption risk**

In the event of a persistent Indexes disruption, the Company will determine the appropriate measures to be carried out. Indexes disruption notably covers situations where:

i) any of the Indexes is deemed to be inaccurate or does not reflect actual market developments;

ii) any of the Indexes is permanently cancelled by the index provider;

iii) any of the Indexes provider fails to calculate and announce the indexes level;

iv) the Indexes provider makes a material change in the formula for or method of calculating any of the Indexes (other than a modification prescribed in that formula or method to maintain the calculation of the

indexes level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Indexes become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Indexes are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Indexes.

- **Operational Risk**

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- **Corporate action risk**

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Index treatment.

- **Currency Hedge Risk applicable to the following share classes: Daily Hedged C-GBP, Daily Hedged D-GBP, Daily Hedged C-USD, Daily Hedged D-USD, Daily Hedged C-CHF, Daily Hedged D-CHF**

In order to hedge GBP-currency Risk against each Indexes component's currency, specific to Daily Hedged D-GBP and Daily Hedged C-GBP shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes' currencies and the currencies of each Indexes component.

In order to hedge USD-currency Risk against each Indexes component's currency, specific to Daily Hedged D-USD and Daily Hedged C-USD shares classes, the Sub-Fund uses a hedging strategy

which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Indexes component.

In order to hedge CHF-currency Risk against each Indexes component's currency, specific to Daily Hedged D-CHF and Daily Hedged C-CHF shares classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the respective share classes 'currencies and the currencies of each Indexes component.

However, the hedging strategy used by the Sub-Fund remains imperfect due to the daily rebalancing frequency and instruments used; the Sub-Fund Net Asset Value can also be impacted by market upwards and downwards. Moreover, the hedging cost would negatively impact the Net Asset Value of the share classes Daily Hedged D-GBP, Daily Hedged C-GBP, Daily Hedged D-CHF, Daily Hedged C-CHF, Daily Hedged D-USD, and Daily Hedged C-USD.

- **Collateral Management Risk**

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-EUR, Class Daily Hedged C-GBP, Class Daily Hedged C-USD and Class Daily Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR, Class Daily Hedged D-GBP, Class Daily Hedged D-USD and Class Daily Hedged D-CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 51

MULTI UNITS LUXEMBOURG – Lyxor MSCI Europe UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG - Lyxor MSCI Europe UCITS ETF** is to track both the upward and the downward evolution of the MSCI Europe Net Return Index (the "**Index**") denominated in EUR and representative of large-cap and mid-cap companies listed on developed markets in Europe, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "**Tracking Error**").

The anticipated level of the tracking error under normal market conditions is expected to be 0.10%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the large and mid cap segments across the developed market countries in Europe.

The Index's aim is to represent 85% of the free float-adjusted market capitalisation and industry groups in Europe.

- **Index Methodology**

The Index is an equity index calculated and published by international index provider MSCI

The Index is based on the MSCI Global Investable Market Indices methodology taking into account the size, liquidity and minimum free float criteria of the investable universe.

The Index is comprised solely of European equity stocks and captures large and mid cap representation across developed market countries in Europe (which are composed, as of February 2017, of the following countries: Austria, Belgium,

Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom).

By targeting 85% of each country and of each industry group, the Index will reflect 85% of the total market capitalisation of the European markets, while also reflecting their economic diversity.

The MSCI methodology and calculation method are based on a variable number of companies in the Index.

The reference Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI website: <http://www.msci.com>.

The composition of the Index is reviewed and rebalanced every 6 months (on May and November) with quarterly reviews in February, May, August and November.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by MSCI Inc. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

INVESTMENT POLICY

- **Investment objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

According to the investment objective and policy described above, the Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be

provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange are also available under the "factsheet" section of the website www.lyxoretf.com.

ELIGIBILITY OF THE SUB-FUND

The Sub-Fund is eligible to the French equity savings plans (PEA) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "Total Fee") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost.

Such fee is set at a maximum of 0.30% per year (inclusive of VAT) of the Net Asset

Value per Share for Class C-EUR, Class D-EUR Shares, Class USD Shares.

Such fee is set at a maximum of 0.40% per year (inclusive of VAT) of the Net Asset Value per Share for Class Monthly Hedged C-USD, Class Monthly Hedged D-USD, Class Monthly Hedged C-CHF, Class Monthly Hedged D-CHF, Class Monthly Hedged C-GBP and Class Monthly Hedged D-GBP Shares.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Index is subject to a negative performance over the investment period.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

- Currency Hedge Risk applicable to the share class Monthly Hedged C-USD, Monthly Hedged C-GBP, Monthly Hedged C-CHF, Monthly Hedged D-USD, Monthly Hedged D-GBP and Monthly Hedged D-CHF

In order to hedge the currency risk for the Monthly Hedged share classes, the Sub-Fund uses a hedging strategy which

attempts to minimize the impact of changes in value of the Index's currency against the share class currency. As the hedging exposure is reset monthly and at the same time could not be successful, the hedging strategy could imply costs and exchange rates movements which would affect the share class net asset value.

- Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- Risk of Investing in mid-cap companies

The Sub-Fund is exposed to medium-capitalization companies and more specifically to the equity securities of medium and intermediate sized enterprises, which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply than those of large-cap stocks. The Sub-Fund's net asset value could behave similarly and therefore fall more sharply than that of a similar investment in large-capitalization equities.

- Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its

representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Index treatment.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-EUR, Class Monthly Hedged C-USD, Class Monthly Hedged C-GBP, Class Monthly Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR, Class USD, Class Monthly Hedged D-USD, Class Monthly Hedged D-GBP, Class Monthly Hedged D-CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 52

MULTI UNITS LUXEMBOURG – Lyxor MSCI EMU (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG - Lyxor MSCI EMU (DR) UCITS ETF** is to track both the upward and the downward evolution of the MSCI EMU Net Return Index (the "**Index**") denominated in EUR and representative of large-cap and mid-cap companies listed on developed markets in the European Economic and Monetary Union (EMU), while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "**Tracking Error**").

The anticipated level of the tracking error under normal market conditions is expected to be 0.20%.

THE INDEX

- **Index Objectives**

The Index is a free float-adjusted market capitalization index that is designed to measure the performance of the large and mid cap segments across the developed market countries in the EMU.

The Index's aim is to represent 85% of the free float-adjusted market capitalisation and industry groups within the EMU.

- **Index Methodology**

The Index is an equity index calculated and published by international index provider MSCI.

The Index is based on the MSCI Global Investable Market Indices methodology taking into account the size, liquidity and minimum free float criteria of the investable universe.

The Index captures large and mid-cap representation across developed markets countries in the EMU (which are composed, as of February 2017, of the following countries: Austria, Belgium, Finland, France, Germany, Ireland, Italy, the Netherlands, Portugal and Spain).

By targeting 85% of each country and of each industry group, the Index will reflect 85% of the total market capitalisation of the EMU markets, while also reflecting their economic diversity.

The MSCI methodology and calculation method are based on a variable number of companies in the Index.

The reference Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the MSCI website: <http://www.msci.com>.

The composition of the Index is reviewed and rebalanced every 6 months (on May and November) with quarterly reviews in February, May, August and November. The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**").

There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the index methodology as described in section above will not be changed by MSCI Inc. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Subject to any applicable transitional or grandfathering provision of the ESMA Guidelines ref 2012/832 regarding the Index, additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on <http://www.msci.com>.

INVESTMENT POLICY

- **Investment objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

- **Specific investment restrictions**

According to the investment objective and policy described above, the Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange are also available under the "factsheet" section of the website www.lyxoretf.com.

ELIGIBILITY OF THE SUB-FUND

The Sub-Fund is eligible to the French equity savings plans (**PEA**) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area.

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 25% and is expected to represent approximately 25% of the Net Asset Value. In certain circumstances this proportion may be higher.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the performance of leading industry groups within the EMU.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the "**Total Fee**") is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost. Such fee is set at a maximum of 0.25% per year

(inclusive of VAT) of the Net Asset Value per Share.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are

predictable over a certain period of time under the same macro risk conditions.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Index is subject to a negative performance over the investment period.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- Index tracking risk

Reflecting the performance of the Index by investing in all of its constituents may prove

to be very difficult to implement and costly. The Sub-Fund's manager may therefore use various optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Index, in proportions that differ from those of the Index or even investing in securities that are not Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Index.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

- Currency Hedge Risk applicable to the share class Monthly Hedged C-USD, Monthly Hedged C-GBP, Monthly Hedged C-CHF, Monthly Hedged D-USD, Monthly Hedged D-GBP and Monthly Hedged D-CHF

In order to hedge the currency risk for the Monthly Hedged share classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the Index's currency against the share class currency. As the hedging exposure is reset monthly and at the same time could not be successful, the hedging strategy could imply costs and exchange rates movements which would affect the share class net asset value.

- Counterparty Risk

When the Sub-Fund would engage into transactions as FDI, the Sub-Fund will be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

The Sub-Fund would be predominantly exposed to a counterparty risk resulting from the use of over-the-counter FDI. In-line with UCITS guidelines, the counterparty risk to the FDI counterparty, cannot exceed 10% of the Sub-Fund's total assets, provided such counterparty is a credit institution

within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the FDI could be early terminated.

Where Société Générale is the counterparty for a FDI transaction and/or a temporary security transaction, conflicts of interest may arise between it and the Management Company which has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- Risk of Investing in mid-cap companies

The Sub-Fund is exposed to medium-capitalization companies and more specifically to the equity securities of medium and intermediate sized enterprises, which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply than those of large-cap stocks. The Sub-Fund's net asset value could behave similarly and therefore fall more sharply than that of a similar investment in large-capitalization equities.

- Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be

liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

- i) the Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Index is permanently cancelled by the index provider;
- iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Index treatment.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the

ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-EUR, Class Monthly Hedged C-USD, Class Monthly Hedged C-GBP and Class Monthly Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR, Class Monthly Hedged D-USD, Class Monthly Hedged D-GBP and Class Monthly Hedged D-CHF Shares. For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 53

MULTI UNITS LUXEMBOURG – Lyxor JPX-Nikkei 400 (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the Yen (JPY).

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG - Lyxor JPX-Nikkei 400 (DR) UCITS ETF** is to track both the upward and the downward evolution of the JPX-Nikkei 400 Net Total Return Index (the "Index") denominated in Yen (JPY) in order to offer an exposure to the performance of 400 companies listed on the Tokyo Stock Exchange, with a high appeal to investors and meeting special requirements in terms of efficient use of capital - while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "Tracking Error").

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.35%.

THE INDEX

- **Index Objectives**

The Index represents the performance of the 400 companies listed on the Tokyo Stock Exchange whose efficient use of capital and management in accordance with shareholders' interests makes them most attractive to investors.

Each Index component is weighted by its float-adjusted market capitalization, with a maximum weight of 1.5% for each component.

- **Index Methodology**

The securities eligible for the Index are the companies listed on the Tokyo Stock Exchange (1st Section, 2nd section, Mothers and JASDAQ) that meet the following criteria:

- they have been in business for at least three years and their liabilities do not exceed their assets;
- they are among the 1,000 most liquid stocks over the past three years and the largest by market capitalization.

The index companies are selected on the basis of quantitative and qualitative rating criteria:

- the quantitative rating criterion is the weighted aggregate of three indicators: i) the average ROE over the past three years (40% weight), ii) the total operating income over the past three years (40%) and iii) market capitalization (20%);
- the qualitative rating criterion is determined using three measures: i) the number of outside members on the board of directors, ii) the adoption of IFRS accounting standards and iii) the publication of information on the company's revenue and earnings in English.

The Index components are reviewed on an annual basis, components weights are rebalanced on a monthly basis.

The Index is a Net Dividends Reinvested Index, which means that the net amount of the dividends from the Index's underlying shares are reinvested in the Index.

A full description of the Index and its construction methodology and information on the composition and respective weightings of the Index components are available on the Internet at www.jpx.co.jp/english

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "Licence"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Index methodology as described in section above will not be changed by FTSE. In the event it

is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on www.jpex.co.jp/english

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class

quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 100% and is expected to represent approximately 10% of the Net Asset Value. In certain circumstances this proportion may be higher.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the Japanese equity market.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Index is subject to a negative performance over the investment period.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- Index tracking risk

Reflecting the performance of the Index by investing in all of its constituents may prove to be very difficult to implement and costly. The Sub-Fund's manager may therefore use various optimization techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Index, in proportions that differ from those of the Index or even investing in securities that are not Index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Sub-Fund to perform differently from that Index.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

- Currency Hedge Risk applicable to the share class Daily Hedged C-EUR, Daily Hedged C-USD, Daily Hedged C-GBP, Daily Hedged C-CHF, Daily Hedged D-EUR, Daily Hedged D-USD, Daily Hedged D-GBP and Daily Hedged D-CHF

In order to hedge the currency risk for the Daily Hedged share classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the Index's currency against the share class currency. As the hedging exposure is reset daily and at the same time could not be successful, the hedging strategy could imply costs and exchange rates movements which would affect the share class net asset value.

- Counterparty Risk

When the Sub-Fund would engage into transactions as FDI, the Sub-Fund will be exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund.

The Sub-Fund would be predominantly exposed to a counterparty risk resulting from the use of over-the-counter FDI. In-line with UCITS guidelines, the counterparty risk to the FDI counterparty, cannot exceed 10%

of the Sub-Fund's total assets, provided such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the FDI could be early terminated.

Where Société Générale is the counterparty for a FDI transaction and/or a temporary security transaction, conflicts of interest may arise between it and the Management Company which has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- Risk of Investing in small and mid-cap companies

The Sub-Fund is exposed to small and medium-capitalization companies and more specifically to the equity securities of small, medium and intermediate sized enterprises, which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply than those of large-cap stocks. The Sub-Fund's net asset value could behave similarly and therefore fall more sharply than that of a similar investment in large-capitalization equities.

- Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could

affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

- i) the Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Index treatment.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of

the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-EUR, Class Daily Hedged C-EUR, Class Daily Hedged C-USD, Daily Hedged C-CHF and Daily Hedged C-GBP Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR, Class Daily Hedged D-EUR, Class Daily Hedged D-USD, Class Daily Hedged D-CHF and Daily Hedged D-GBP Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

APPENDIX 54

MULTI UNITS LUXEMBOURG – Lyxor FTSE USA Minimum Variance UCITS ETF

The Reference Currency of the Sub-Fund is the US Dollar (USD).

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG - Lyxor FTSE USA Minimum Variance UCITS ETF** is to track both the upward and the downward evolution of the FTSE USA Minimum Variance Index (the "**Index**") denominated in US dollars (USD) in order to offer an exposure to public companies listed in the United States of America while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "**Tracking Error**").

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.08%.

THE INDEX

- **Index Objectives**

The Index consists of equities of public companies listed in the United States that meet FTSE eligibility criteria. The Index weighting, which is based on historical share price performance, was designed to minimize the Index volatility. Volatility is optimized by selecting the least volatile and least correlated of the Index stocks, as determined by applying quantitative criteria to historical data.

- **Index Methodology**

The eligible universe of the Index is composed of securities that meet the following criteria:

- (i) the issuer must be incorporated in the U.S.A. and the issuer's stock must be listed exclusively in that country, or the FTSE Nationality Advisory Committee must consider the security to be a U.S.A. stock.
- (ii) only common stock / ordinary shares listed on an eligible exchange can be included in the Index.
- (iii) liquidity, free float and foreign ownership restrictions criteria.

The composition of the Index is reviewed twice a year, components weights are rebalanced on a quarterly basis.

A full description and the complete methodology used to construct the Index and information on the composition and respective weightings of the Index components are available on the FTSE website at www.ftse.com.

The performance monitored is that of the Index closing values computed by FTSE using the WM/Reuters Spot Rates™ at 16:00 UK time.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Index methodology as described in section above will not be changed by FTSE. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on www.ftse.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com

ELIGIBILITY OF THE SUB-FUND

The Sub-Fund is eligible to the French equity savings plans (**PEA**) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the USA equity market.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.fundsquare.net.

RISKS WARNING

- Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

- Currency Risk related to Classes denominated in a currency other than the reference currency of the Index

Share Classes denominated in a currency other than the reference currency of the Index are exposed to a currency risk. As a result, due to exchange rate fluctuations, the net asset value of such Classes could decrease while the Index value increases.

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially

recovered, notably if the Index is subject to a negative performance over the investment period.

- Quantitative risk

The minimum variance methodology includes a constrained variance optimization algorithm. In some cases, it might not offer the best possible variance and might have a different risk profile than the initial investment universe, the Index.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Index treatment.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-USD, Class Daily Hedged C-EUR, Daily Hedged C-CHF and Daily Hedged C-GBP Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-USD, Class Daily Hedged D-EUR, Class Daily Hedged D-CHF and Daily Hedged D-GBP Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG - Lyxor EUROMTS 1-3Y Investment Grade (DR) UCITS ETF** is to reflect the performance of the FTSE MTS Eurozone Government Bond IG 1-3Y (Mid Price) Index (Ex-CNO Etrix) (the "**Benchmark Index**") denominated in EUR while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "**Tracking Error**").

The expected ex-post Tracking Error under normal market conditions is 0.02%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index offers an exposure to the performance of the Eurozone's largest and most widely traded government bonds which have at least two investment grade ratings from the three main rating agencies.

- **Benchmark Index Methodology**

The Benchmark Index is composed of bonds issued by the governments of certain Eurozone Members States (as from May 2017, Austria, Belgium, Finland, France, Germany, Ireland, Italy, the Netherlands, Portugal and Spain), weighted by country, and within the maturity range of 1-3 years.

The Benchmark Index components are selected using the same criteria as those used for the other FTSE MTS Government indexes, described below.

To qualify for the Benchmark Index bonds must meet the following criteria:

(i) principal and coupons must be denominated in Euro, there must be no embedded options or convertibility and maturity must be at least 1 year;

(ii) bonds must be issued by certain sovereign governments of the Eurozone (as

from May 2017, Austria, Belgium, Finland, France, Germany, Ireland, Italy, the Netherlands, Portugal and Spain) and selected by FTSE MTS among a list of countries having at least two Investment Grade ratings issued by the credit-rating agencies Standard & Poor's, Moody's and Fitch;

(iii) bonds must be quoted on the MTS Platform;

(iv) bonds must have minimum outstanding amount of €2 billion.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The performance tracked is that of the Benchmark Index's closing price at 5:15 pm (CET).

The Benchmark Index is a total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The complete methodology (including maintenance and rebalancing of the Benchmark Index) is available at <http://www.ftse.com/products/indices/ftsemis>.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by licensor. In the event it is materially modified, the Manager in agreement with the Directors may decide

in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on the Internet at <http://www.ftse.com/products/indices/ftsemts> (composition of the Benchmark Index: Index Resources/UCITS - Monthly Index Constituents).

INVESTMENT POLICY

- **Investment Objective:**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- Interest Rate Risk

The Sub-Fund is exposed to moves in bonds markets following unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument

counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this Prospectus.

Currency Hedge Risk applicable to the share class Monthly Hedged C-USD, Monthly Hedged D-USD, Monthly Hedged C-CHF, Monthly Hedged D-CHF, Monthly Hedged C-GBP and Monthly Hedged D-GBP

In order to hedge the currency risk for the Monthly Hedged share classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the Benchmark Index's currency against the share class currency. As the hedging exposure is reset Monthly and at the same time could not be successful, the hedging strategy could imply costs and exchange rates movements which would affect the share class net asset value.

- Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Benchmark Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Benchmark Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Benchmark Index Disruption Risk

In the event of the Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out.

Benchmark Index disruption notably covers situations where:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the Benchmark Index provider;

iii) the Benchmark Index provider fails to calculate and announce the Benchmark Index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the Benchmark Index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Sub-Fund's will not distribute income, in respect of Class C-EUR, Monthly Hedged C-USD, Monthly Hedged C-CHF and Monthly Hedged C-GBP.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR, Class Monthly Hedged D-USD, Class Monthly Hedged D-CHF and Monthly Hedged D-GBP Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

CONVERSION OF SHARES ON THE PRIMARY MARKET

Conversions of Shares in this particular Sub-Fund are not possible.

THE MANAGEMENT COMPANY

Following a Main Delegation Agreement, Lyxor International Asset Management S.A.S. was appointed as Management Company of the Company.

A total fee (hereafter the **"Total Fee"**) is payable monthly in arrears to the Management Company in compensation for its services in relation to the Sub-Fund and in order to cover Structural Cost.

Such fee is set at a maximum of 0.165 % per year (inclusive of VAT) of the Net Asset

Value per Share for Class C-EUR and Class D-EUR Shares.

Such fee is set at a maximum of 0.265% per year (inclusive of VAT) of the Net Asset Value per Share for Class Monthly Hedged C-USD, Class Monthly Hedged D-USD, Class Monthly Hedged C-CHF, Class Monthly Hedged D-CHF, Class Monthly Hedged C-GBP and Class Monthly Hedged D-GBP Shares.

THE ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT AND DEPOSITARY FEES

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- Interest Rate Risk

The Sub-Fund is exposed to moves in bonds markets following unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this Prospectus.

Currency Hedge Risk applicable to the share class Monthly Hedged C-USD, Monthly Hedged D-USD, Monthly Hedged C-CHF, Monthly Hedged D-CHF, Monthly Hedged C-GBP and Monthly Hedged D-GBP

In order to hedge the currency risk for the Monthly Hedged share classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the Benchmark Index's currency against the share class currency. As the hedging exposure is reset Monthly and at the same time could not be successful, the hedging strategy could imply costs and exchange rates movements which would affect the share class net asset value.

- Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Benchmark Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Benchmark Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Benchmark Index Disruption Risk

In the event of an Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out.

Benchmark Index disruption notably covers situations where:

i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the Benchmark Index provider;

iii) the Benchmark Index provider fails to calculate and announce the Benchmark Index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the Benchmark Index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Sub-Fund's will not distribute income, in respect of Class C-EUR, Monthly Hedged C-USD, Monthly Hedged C-CHF and Monthly Hedged C-GBP.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR, Class Monthly Hedged D-USD, Class Monthly Hedged D-CHF and Monthly Hedged D-GBP Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Sub-fund is in no way sponsored, endorsed, sold or promoted by FTSE TMX Global Debt Capital Markets (hereinafter collectively referred to as the “**Holders**”).

FTSE TMX Global Debt Capital Markets cannot be held liable for the promotion or marketing of the Sub-fund.

FTSE MTS and the FTSE MTS index names (FTSE MTS IndexTM) and FTSE MTS indices (FTSE MTS IndicesTM) are registered trademarks of FTSE TMX Global Debt Capital Markets. The FTSE MTS indices are calculated by FTSE TMX Global Debt Capital Markets and are marketed and distributed by MTSNext, a subsidiary of FTSE TMX Global Debt Capital Markets.

Neither FTSE TMX Global Debt Capital Markets nor MTSNext can be held responsible or liable for any loss or damages of any type whatsoever (including, in particular, investment losses) in connection, in whole or in part, with the Sub-fund or with the provision of the FTSE MTS Eurozone Government Bond IG 3-5Y (Mid Price) Index (Ex-CNO Etrix), sub-indices or registered trademarks.

APPENDIX 57

MULTI UNITS LUXEMBOURG – Lyxor EUROMTS 10-15Y Investment Grade (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG - Lyxor EUROMTS 10-15Y Investment Grade (DR) UCITS ETF** is to reflect the performance of the FTSE MTS Eurozone Government Bond IG 10-15Y (Mid Price) Index (Ex-CNO Etrix) (the “**Benchmark Index**”) denominated in EUR, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “**Tracking Error**”).

The expected ex-post Tracking Error under normal market conditions is 0.02%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index offers an exposure to the performance of the Eurozone’s largest and most widely traded government bonds which have at least two investment grade ratings from the three main rating agencies.

- **Benchmark Index Methodology**

The Benchmark Index is composed of bonds issued by the governments of certain Eurozone Members States (as from May 2017, Austria, Belgium, Finland, France, Germany, Ireland, Italy, the Netherlands, Portugal and Spain), weighted by country, and within the maturity range of 10-15 years.

The Benchmark Index components are selected using the same criteria as those used for the other FTSE MTS Government indexes, described below.

To qualify for the Benchmark Index bonds must meet the following criteria:

- (i) principal and coupons must be denominated in Euro, there must be no embedded options or convertibility and maturity must be at least 10 years;
- (ii) bonds must be issued by certain

sovereign governments of the Eurozone (as from May 2017, Austria, Belgium, Finland, France, Germany, Ireland, Italy, the Netherlands, Portugal and Spain) and selected by FTSE MTS among a list of countries having at least two Investment Grade ratings issued by the credit-rating agencies Standard & Poor's, Moody's and Fitch;

(iii) bonds must be quoted on the MTS Platform;

(iv) bonds must have minimum outstanding amount of €2 billion.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The performance tracked is that of the Benchmark Index’s closing price at 5:15 pm (CET).

The Benchmark Index is a total return index. A total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The complete methodology (including maintenance and rebalancing of the Benchmark Index) is available at <http://www.ftse.com/products/indices/ftsemts>

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the “**Licence**”). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by licensor. In the event it is materially modified, the Manager

in agreement with the Directors may decide in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on the Internet at <http://www.ftse.com/products/indices/ftsems> (composition of the Benchmark Index: Index Resources/UCITS - Monthly Index Constituents).

INVESTMENT POLICY

- **Investment Objective:**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated

market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 25% and is expected to represent approximately 0% of the Net Asset Value. In certain circumstances this proportion may be higher.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to bonds issued by Eurozone Member States and within the maturity range of 10-15 years.

RISK MANAGEMENT

RISKS WARNING

- Interest Rate Risk

The Sub-Fund is exposed to moves in bonds markets following unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-

Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this Prospectus.

Currency Hedge Risk applicable to the share class Monthly Hedged C-USD, Monthly Hedged D-USD, Monthly Hedged C-CHF, Monthly Hedged D-CHF, Monthly Hedged C-GBP and Monthly Hedged D-GBP

In order to hedge the currency risk for the Monthly Hedged share classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the Benchmark Index's currency against the share class currency. There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Benchmark Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Benchmark Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Benchmark Index Disruption Risk

In the event of the Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out.

Benchmark Index disruption notably covers situations where:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market

developments;

ii) the Benchmark Index is permanently cancelled by the Benchmark Index provider;

iii) the Benchmark Index provider fails to calculate and announce the Benchmark Index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the Benchmark Index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Sub-Fund's will not distribute income, in respect of Class C-EUR, Monthly Hedged C-USD, Monthly Hedged C-CHF and Monthly Hedged C-GBP.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR, Class Monthly Hedged D-USD, Class Monthly Hedged D-CHF and Monthly Hedged D-GBP Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

APPENDIX 58

MULTI UNITS LUXEMBOURG – Lyxor EUROMTS All-Maturity Investment Grade (DR) UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG - Lyxor EUROMTS All-Maturity Investment Grade (DR) UCITS ETF** is to reflect the performance of the FTSE MTS Eurozone Government Bond IG (Mid Price) Index (Ex-CNO Etrix) (the “**Benchmark Index**”) denominated in Euro, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the “**Tracking Error**”).

The expected ex-post Tracking Error under normal market conditions is 0.02%.

THE BENCHMARK INDEX

- **Benchmark Index Objectives**

The Benchmark Index offers an exposure to the performance of the Eurozone’s largest and most widely traded government bonds which have at least two investment grade ratings from the three main rating agencies.

- **Benchmark Index Methodology**

The Benchmark Index is composed of bonds issued by the governments of certain Eurozone Members States (as from May 2017, Austria, Belgium, Finland, France, Germany, Ireland, Italy, the Netherlands, Portugal and Spain), weighted by country, and with a full range of maturities.

The Benchmark Index components are selected using the same criteria as those used for the other FTSE MTS Government indexes, described below.

To qualify for the Benchmark Index bonds must meet the following criteria:

(i) principal and coupons must be denominated in Euro, there must be no embedded options or convertibility and maturity must be at least 1 year;

(ii) bonds must be issued by certain sovereign governments of the Eurozone (as

from May 2017, Austria, Belgium, Finland, France, Germany, Ireland, Italy, the Netherlands, Portugal and Spain) and selected by FTSE MTS among a list of countries having at least two Investment Grade ratings issued by the credit-rating agencies Standard & Poor’s, Moody’s and Fitch;

(iii) bonds must be quoted on the MTS Platform;

(iv) bonds must have minimum outstanding amount of €2 billion.

The composition of the Benchmark Index is reviewed and rebalanced each month.

The performance tracked is that of the Benchmark Index’s closing price at 5:15 pm (CET).

The Benchmark Index is a total return index. A total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns.

The complete methodology (including maintenance and rebalancing of the Benchmark Index) is available at <http://www.ftse.com/products/indices/ftsemts>

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Benchmark Index by the Company is covered by contractual licensing arrangements (the “**Licence**”). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Benchmark Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Benchmark Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Benchmark Index methodology as described in section above will not be changed by licensor. In the event it is materially modified, the Manager in agreement with the Directors may decide

in its discretion to replace the Benchmark Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Benchmark Index is substituted.

- **Additional Information on Benchmark Index**

Additional information on the Benchmark Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Benchmark Index can be found on the Internet at <http://www.ftse.com/products/indices/ftsems> (composition of the Benchmark Index: Index Resources/UCITS - Monthly Index Constituents).

INVESTMENT POLICY

- **Investment Objective:**

The objective of the Sub-Fund is to reflect the performance of the Benchmark Index.

The Sub-Fund will carry out its investment objective via a Direct Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered.

Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

The Sub-Fund's exposure to securities lending transactions will not exceed 25% and is expected to represent approximately 0% of the Net Asset Value. In certain circumstances this proportion may be higher.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to bonds issued by Eurozone Member States with a full range of maturities.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- Interest Rate Risk

The Sub-Fund is exposed to moves in bonds markets following unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure,

the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this Prospectus.

Currency Hedge Risk applicable to the share class Monthly Hedged C-USD, Monthly Hedged D-USD, Monthly Hedged C-CHF, Monthly Hedged D-CHF, Monthly Hedged C-GBP and Monthly Hedged D-GBP

In order to hedge the currency risk for the Monthly Hedged share classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the Benchmark Index's currency against the share class currency. As the hedging exposure is reset Monthly and at the same time could not be successful, the hedging strategy could imply costs and exchange rates movements which would affect the share class net asset value.

- Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Benchmark Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Benchmark Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is

registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Benchmark Index Disruption Risk

In the event of an Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out.

Benchmark Index disruption notably covers situations where:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;
- ii) the Benchmark Index is permanently cancelled by the Benchmark Index provider;

iii) the Benchmark Index provider fails to calculate and announce the Benchmark Index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the Benchmark Index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a

counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Sub-Fund's will not distribute income, in respect of Class C-EUR, Monthly Hedged C-USD, Monthly Hedged C-CHF and Monthly Hedged C-GBP.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR, Class Monthly Hedged D-USD, Class Monthly Hedged D-CHF and Monthly Hedged D-GBP Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

- Interest Rate Risk

The Sub-Fund is exposed to moves in bonds markets following unexpected changes in the level of interest rates, which in particular may modify the shape of the yield curve. The bonds that make up the Benchmark Index are exposed to changes in interest rates. In general, the price of a bond rises when interest rates fall, and falls when interest rates rise.

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Benchmark Index is subject to a negative performance over the investment period.

- Securities Lending

In relation to securities lending transactions, investors must notably be aware that (A) if the borrower of securities lent by the Sub-Fund fail to return these, there is a risk that the collateral received may be realised less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Sub-Fund to meet delivery obligations under security sales.

- Credit risk

The Sub-Fund could be adversely affected by a decrease in the credit rating of one or more issuers of a bond in the Benchmark Index. This could mean a higher risk that such an issuer might default and could decrease the bond's value.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-

Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Benchmark Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this Prospectus.

Currency Hedge Risk applicable to the share class Monthly Hedged C-USD, Monthly Hedged D-USD, Monthly Hedged C-CHF, Monthly Hedged D-CHF, Monthly Hedged C-GBP and Monthly Hedged D-GBP

In order to hedge the currency risk for the Monthly Hedged share classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the Benchmark Index's currency against the share class currency. As the hedging exposure is reset Monthly and at the same time could not be successful, the hedging strategy could imply costs and exchange rates movements which would affect the share class net asset value.

- Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Benchmark Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Benchmark Index, and may imply a range of risks including counterparty risk, hedging disruption, Benchmark Index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Benchmark Index Disruption Risk

In the event of an Benchmark Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the Benchmark Index disruption persists, the Company will determine the appropriate measures to be carried out.

Benchmark Index disruption notably covers situations where:

- i) the Benchmark Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Benchmark Index is permanently cancelled by the Benchmark Index provider;

iii) the Benchmark Index provider fails to calculate and announce the Benchmark Index level;

iv) the Benchmark Index provider makes a material change in the formula for or method of calculating the Benchmark Index (other than a modification prescribed in that formula or method to maintain the calculation of the Benchmark Index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Benchmark Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Benchmark Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Benchmark Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Benchmark Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Benchmark Index treatment.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

The Sub-Fund's will not distribute income, in respect of Class C-EUR, Monthly Hedged C-USD, Monthly Hedged C-CHF and Monthly Hedged C-GBP.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR, Class Monthly Hedged D-USD, Class Monthly Hedged D-CHF and Monthly Hedged D-GBP Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

The Sub-fund is in no way sponsored, endorsed, sold or promoted by FTSE TMX Global Debt Capital Markets (hereinafter collectively referred to as the "**Holders**"). FTSE TMX Global Debt Capital Markets cannot be held liable for the promotion or marketing of the Sub-fund.

APPENDIX 60

MULTI UNITS LUXEMBOURG – Lyxor FTSE 100 UCITS ETF

The Reference Currency of the Sub-Fund is the British Pound (GBP).

INVESTMENT OBJECTIVE

The investment objective of **MULTI UNITS LUXEMBOURG - Lyxor FTSE 100 UCITS ETF** is to track both the upward and the downward evolution of the FTSE 100 Total Return Index (the "**Index**") denominated in British Pound (GBP) in order to offer an exposure to the performance of the 100 largest companies traded on the London Stock Exchange that pass screening for size and liquidity - while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index ("**Tracking Error**").

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.05%.

THE INDEX

- **Index Objectives**

The Index consists of equities of 100 largest public companies listed on the London Stock Exchange that meet FTSE's eligibility criteria. The Index is a market-capitalisation weighted index of UK-listed blue chip companies.

- **Index Methodology**

The eligible universe of the Index is composed of securities that meet the following criteria:

- (i) Only premium Listed Equity Shares which have been admitted to trading on the London Stock Exchange with a Sterling denominated price on SETS.
- (ii) Eligible securities are required to pass screens for liquidity and free float as described in the FTSE Methodology.
- (iii) Companies are assigned UK nationality according to FTSE methodology.

The composition of the Index is reviewed and rebalanced on a quarterly basis in March, June, September and December.

A full description and the complete methodology used to construct the Index and information on the composition and respective weightings of the Index components are available on the FTSE website at www.ftse.com.

The performance monitored is that of the Index closing values computed by FTSE using the WM/Reuters Spot Rates™ at 16:00 UK time.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "**Licence**"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Index methodology as described in section above will not be changed by FTSE. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on www.ftse.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the large cap companies in the United Kingdom.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

As Administrative, Corporate and Domiciliary Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Registrar and Transfer Agent, Société Générale Bank & Trust S.A. is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Company.

As Depositary, Société Générale Bank & Trust S.A. is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Company.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated market or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not

significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.fundsquare.net.

RISKS WARNING

- Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

- Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Index is subject to a negative performance over the investment period.

- Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

- Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

- Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement

entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1st of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

- Currency Hedge Risk applicable to the share class Monthly Hedged C-USD, Monthly Hedged D-USD, Monthly Hedged C-CHF, Monthly Hedged D-CHF, Monthly Hedged C-EUR and Monthly Hedged D-EUR

In order to hedge the currency risk for the Monthly Hedged share classes, the Sub-Fund uses a hedging strategy which attempts to minimize the impact of changes in value of the Index's currency against the share class currency. As the hedging exposure is reset monthly and at the same time could not be successful, the hedging strategy could imply costs and exchange rates movements which would affect the share class net asset value.

- Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

- Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

- Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

- Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

- Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

- Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

- Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

- Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

- Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Index treatment.

- Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-GBP, Class Monthly Hedged C-EUR, Monthly Hedged C-CHF and Monthly Hedged C-USD Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-GBP, Class Monthly Hedged D-EUR, Class Monthly Hedged D-CHF and Monthly Hedged D-USD Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.

HISTORICAL PERFORMANCE

The historical performance analysis is available in the Key Investor Information Document.

DISCLAIMER

Lyxor FTSE 100 UCITS ETF is in no way sponsored, endorsed, sold or promoted by FTSE International Limited (hereinafter "**FTSE**"), or any company of the London Stock Exchange Group ("**LSEG**"),

APPENDIX 61

MULTI UNITS LUXEMBOURG – Lyxor FTSE EMU Minimum Variance UCITS ETF

The Reference Currency of the Sub-Fund is the Euro (EUR).

INVESTMENT OBJECTIVE

The investment objective of MULTI UNITS LUXEMBOURG - Lyxor FTSE EMU Minimum Variance UCITS ETF is to track both the upward and the downward evolution of the FTSE Developed Eurozone Minimum Variance Net Tax Index (the "Index") denominated in Euro (EUR) in order to offer an exposure to the developed Eurozone equity market and potentially offer improvements to the risk reward trade-off by reducing portfolio volatility – while minimising the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "Tracking Error").

The anticipated level of the Tracking Error under normal market conditions is expected to be 0.15%.

THE INDEX

- **Index Objectives**

The Index consists of equity securities incorporated in developed Eurozone countries, which meet FTSE eligibility criteria. The Index weighting has been designed to minimize the Index volatility, based on historical return information, thereby offering potential improvements to the risk reward trade-off of the Index whilst maintaining full allocation to the relevant equity market.

- **Index Methodology**

The eligible universe of the Index is composed of securities that meet the following criteria:

(i) country has been classified as developed Eurozone following FTSE rules;

(ii) issuing company is incorporated in one of these countries and has its sole listing in the same country, or has been allocated to one of these countries by FTSE Nationality Advisory Committee;

(iii) security is an eligible share listed on FTSE eligible markets and sources of trading;

(iv) security passed screens for liquidity, free float and foreign ownership restrictions.

The composition of the Index is rebalanced twice a year in March and September.

The rebalancing frequency as described above will have no impact in terms of costs in the context of the performance of the investment objective.

A full description and the complete methodology used to construct the Index and information on the composition and respective weightings of the Index components are available on the FTSE website at www.ftserussell.com.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of any withholding tax applicable.

The performance monitored is that of the Index closing values computed by FTSE using the WM/Reuters Spot Rates™ at 16:00 UK time.

- **Licence**

The use of the Index by the Company is covered by contractual licensing arrangements (the "Licence"). There is no guarantee that the Licence will be extended beyond its initial term or that the Licence will not be terminated.

- **Index Substitution**

In the event that the Licence is not extended or is terminated, the Manager may seek in agreement with the Directors to replace the Index by another suitable index though there is no certainty that one will be available.

There is no guarantee that the Index methodology as described in section above will not be changed by FTSE. In the event it is materially modified, the Manager in agreement with the Directors may decide in its discretion to replace the Index by a suitable index if one is then available.

Shareholders will be promptly informed in the event that the Licence is terminated and/or the Index is substituted.

- **Additional Information on Index**

Additional information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Index can be found on www.ftserussell.com.

INVESTMENT POLICY

- **Investment Objective**

The objective of the Sub-Fund is to track both the upward and the downward evolution of the Index.

The Sub-Fund will carry out its investment objective via an Indirect Replication as described and in compliance with the section INVESTMENT OBJECTIVES of the part I/ Investment Objectives/ Investment Powers and Restrictions of this Prospectus.

Within the limits set forth in this Prospectus and on an ancillary basis, the Sub-Fund may hold cash and cash equivalents.

- **Specific investment restrictions**

The Sub-Fund will not invest more than 10% of its assets in units or shares of other UCITS. No investment will be made in any UCIs.

Further information relevant to the Sub-Fund's Investment Policy is contained in the section E. INVESTMENT TECHNIQUES of the part I/ Investment Objectives/ Investment Powers and Restrictions under paragraph "Investment Restrictions" of this Prospectus.

Additional information on the indicative net asset value of an exchange-traded share may, subject to the conditions and limits of the considered market operator, be provided on the website of the regulated market that lists the share. This information is also available on Reuters or Bloomberg page dedicated to the share considered. Additional information on the Bloomberg and Reuters codes corresponding to the indicative net asset value of any share class quoted on a stock exchange also available under the "factsheet" section of the website www.lyxoretf.com.

ELIGIBILITY OF THE SUB-FUND

The Sub-Fund is eligible to the French equity savings plans (PEA) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area.

INVESTMENT TECHNIQUES

Sub-Fund's exposure to TRS will not exceed 100% and is expected to represent approximately 100% of the Net Asset Value.

TARGETED INVESTORS

The Sub-Fund is dedicated to both retail and institutional investors wishing to have an exposure to the developed Eurozone equity market.

RISK MANAGEMENT

The global exposure of this Sub-Fund is calculated using the commitment approach as detailed in applicable laws and regulations, including but not limited to CSSF Circular 11/512.

LISTING

The Sub-Fund is a UCITS ETF. As a consequence all its Shares shall be traded throughout the day on one or several regulated markets or multilateral trading facilities with at least one market maker which takes action to ensure that the stock exchange value of the Shares does not significantly vary from its iNAV (as defined above).

A list of these stock exchanges and/or multilateral trading facilities can be obtained from the registered office of the Company.

PUBLICATION OF THE NET ASSET VALUE

The Net Asset Value per Share will be available at the registered office of the Company and will be published on www.lyxoretf.com.

RISKS WARNING

1) Equity Risk

The price of equities may go down as well as up, and reflect company and macro risk factors. Equities are more volatile than fixed income markets where revenues are predictable over a certain period of time under the same macro risk conditions.

2) Risks linked to the investment in Small and Mid Capitalization Stocks

The Sub-Fund may be exposed to stocks of small and mid capitalization companies, which may increase market and liquidity risks. The prices of these securities can therefore increase and decrease more sharply than those of large-cap stocks. The Sub-Fund's net asset value could behave similarly and therefore fall more sharply than that of a similar investment in large-capitalization equities.

3) Capital at risk

The initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be wholly or partially recovered, notably if the Index is subject to a negative performance over the investment period.

4) Quantitative risk

The minimum variance methodology includes a constrained variance optimization algorithm. In some cases, it might not offer the lowest or the most optimal variance and might have a different risk profile than the initial investment universe, the FTSE Developed Eurozone index.

5) Sub-Fund Liquidity Risk

The Sub-Fund's liquidity and/or value may be negatively affected if, when the Sub-Fund (or its financial derivatives instrument counterparty) is rebalancing its exposure, the trading markets of such exposure are limited, closed, or subject to wide bid-offer spreads. An inability to execute trades in line with the Index due to low trading volumes may also affect the process of subscriptions, conversions and redemptions of Shares.

6) Liquidity on Secondary Market Risk

Investors should consult section V. "Secondary Market for UCITS ETF" of the main part of this prospectus.

7) Currency Risk related to the listing of the Sub-Fund

The Sub-Fund is exposed to currency risk, as it may be listed on certain stock exchanges and/or multilateral trading facilities in a currency different from the Index. As a result, due to exchange rate fluctuations, the net asset value of the Sub-Fund, when listed in a currency different from the Index, could decrease while the Index value increases.

8) Class Currency Hedge Risk

In order to hedge the currency risk for hedged currency classes, the Sub-Fund may use a hedging strategy which attempts to minimize the impact of fluctuations of the relevant class currency against each currency of the Index components.

However, the hedging strategy used by the Sub-Fund may remain imperfect due to the rebalancing frequency and instruments used. The Net Asset Value of the relevant class can then be impacted by foreign exchange market upwards and downwards. Moreover, the hedging costs can negatively impact the Net Asset Value of the concerned class. The adoption of a currency hedging strategy for a class may substantially limit the ability of holders of such class to benefit from an upward of one or several currencies of Index components against the currency of such class.

9) Counterparty Risk

The Sub-Fund is exposed to the risk of bankruptcy, settlement default or any other type of default of the counterparty related to any trading transaction or agreement entered into by the Sub-Fund. The Sub-Fund is predominantly exposed to a counterparty risk resulting from the use of the Swap. In line with UCITS guidelines, the counterparty risk to the Swap counterparty cannot exceed 10% of the Sub-Fund's total assets, provided that such counterparty is a credit institution within the meaning of 1f of the investment restrictions.

In case of default of the counterparty, the Swap can be early terminated. The Sub-Fund will then endeavour its best efforts to reach its investment objective by entering into, if necessary, another swap with a third counterparty, in the market conditions which will prevail during the occurrence of such event.

The realisation of this risk can in particular have impacts on the capacity of the Sub-Fund to reach its investment objective meaning the replication of the Index.

Where Société Générale acts as the FDI counterparty, conflicts of interest may arise between the Management Company and the FDI counterparty. The Management Company has procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

10) Risk that the investment objective is only partially achieved

There is no guarantee that the Sub-Fund's Investment Objective will be achieved. Indeed, no asset or financial instrument will allow automatic and continuous replication of the Index, especially if one or more of the following risks occur:

(i) Risk of using financial derivative instruments

In order to reach its investment objective, the Sub-Fund enters into over-the-counter financial derivative instruments ("FDI") which provide the performance of the Index, and may imply a range of risks including counterparty risk, hedging disruption, index disruption, taxation risk, regulatory risk, operational risk, and liquidity risk. These risks can materially affect a FDI and could lead to an adjustment or even the early termination of the FDI transaction.

(ii) Risk due to a shift in tax policy

Any change in the taxation legislation in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, could affect the tax treatment of the Shareholders of the Sub-Fund. In the case of such an event, the Sub-Fund's Manager shall not be liable to any investor for any payment required to be made by the Company or the corresponding Sub-Fund to a fiscal authority.

(iii) Risk due to a shift in the underlyings' tax policy

Any change in the taxation legislation in any jurisdiction of the underlyings of the Sub-Fund could affect the tax treatment of the Sub-Fund. As a result, in case of a discrepancy between the estimated and effective tax treatment applied to the Sub-Fund and/or to the Sub-Fund's counterparty to the FDI, the net asset value of the Sub-Fund may be affected.

(iv) Regulatory Risk affecting the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction where the Sub-Fund is registered for sale or cross-listed, the process of subscriptions, conversions and redemptions of shares may be affected.

(v) Regulatory Risk affecting the underlyings of the Sub-Fund

In the event of a change in the regulatory regime in any jurisdiction of the underlyings of the Sub-Fund, the net asset value of the Sub-Fund as well as the process of subscriptions, conversions and redemptions of Shares may be affected.

(vi) Index Disruption Risk

In the event of an Index disruption, the Company acting in accordance with applicable laws and regulations may have to suspend the calculation of the net asset value of the Sub-Fund.

If the index disruption persists, the Company will determine the appropriate measures to be carried out.

Index disruption notably covers situations where:

i) the Index is deemed to be inaccurate or does not reflect actual market developments;

ii) the Index is permanently cancelled by the index provider;

iii) the Index provider fails to calculate and announce the index level;

iv) the Index provider makes a material change in the formula for or method of calculating the Index (other than a modification prescribed in that formula or method to maintain the calculation of the index level in the event of changes in the constituent components and weightings and other routine events) which cannot be efficiently replicated with reasonable costs by the Sub-Fund;

v) one or several constituents of the Index become illiquid, (i) their quotation being suspended on a regulated stock exchange, or (ii) becoming illiquid constituents for the securities negotiated over the counter (such as, for example, the bonds);

vi) the constituents of the Index are impacted by transaction costs in relation to the execution, the settlement, or specific tax constraints, except if those costs or tax constraints are reflected in the performance of the Index.

(vii) Operational Risk

In the event of an operational failure within the Management Company, or one of its representatives, investors could experience delays in the processing of subscriptions, conversions and redemptions of Shares, or other disruptions.

(viii) Corporate Action Risk

An unforeseen review of the corporate action policy affecting a component of the Index, after an official announcement was made and priced into the Sub-Fund or into the financial derivatives entered into by the Sub-Fund, could lead to a discrepancy between the realised corporate action and the Index treatment.

11) Collateral Management Risk

Counterparty risk arising from investments in FDI is generally mitigated by the transfer or pledge of collateral in favour of the Sub-Fund. However, transactions may not be fully collateralised. Fees and returns due to the Fund may not be collateralised. If a counterparty defaults, the Sub-Fund may need to sell non-cash collateral received at prevailing market prices. In such a case the Sub-Fund could realise a loss due, inter alia, to inaccurate pricing or monitoring of the collateral, adverse market movements, deterioration in the credit rating of issuers of the collateral or illiquidity of the market on which the collateral is traded. Difficulties in selling collateral may delay or restrict the ability of the Sub-Fund to meet redemption requests.

DISTRIBUTION OF INCOME

No distribution will be carried out in respect of Class C-EUR, Class Daily Hedged C-USD, Class Daily Hedged C-GBP, Class Daily Hedged C-CHF Shares.

The Company reserves the right to distribute once or several times a year all or part of the Sub-Fund's income, in respect of Class D-EUR, Class Daily Hedged D-USD, Class Daily Hedged D-GBP, Class Daily Hedged D-CHF Shares.

For the other Classes of Shares (if any), please refer to the Distribution Policy section of the Prospectus.
