The shareholders' meeting confers full powers on the bearer of a copy of or extract of the various documents submitted to the present meeting and of the minutes of the said meeting in order to carry out all formalities required by law.

Auditor's report

AUDITOR'S REPORT
ON THE ANNUAL ACCOUNTS
Fiscal year closing on 30 October 2015

MULTI UNITS FRANCE Mutual Fund (SICAV)
UCITS ESTABLISHED IN THE FORM OF A VARIABLE
CAPITAL INVESTMENT COMPANY WITH COMPARTMENTS
Governed by the [French] Monetary and Financial Code

Management Company
LYXOR INTERNATIONAL ASSET MANAGEMENT
17, cours Valmy
92800 PUTEAUX

Ladies, Gentlemen,

As part of our assignment for your board of directors, we present to you our report for the fiscal year ending 30 October 2015, on:

- the verification of the annual financial statements of the UCITS established in the form of a variable capital investment company with compartments SICAV MULTI UNITS FRANCE, as appended to this report;
- the bases of our assessments;
- the specific verifications and information required by law.

The annual accounts have been closed under the responsibility of the management company. It is our duty to express an opinion on these accounts based on our audit.

1. OPINION ON THE ANNUAL ACCOUNTS

We have conducted our audit in accordance with the generally accepted auditing standards in France; these standards require that we apply the procedures necessary to obtain reasonable assurance that the annual financial statements do not include any significant misstatements. An audit involves verifying, by sampling and other selection methods, the elements underlying the amounts and information contained in the annual financial statements. It also involves assessing the implemented accounting principles, the significant estimates that have been used, and assessing the overall presentation of the financial statements. We feel that the collected evidence is sufficient and appropriate for the basis of our opinion.

We certify that, in accordance with French accounting rules and principles, the annual financial statements are truthful and in order, and present a fair picture of the operating profits and losses for the past fiscal year, as well as the financial situation and assets of the UCITS established in the form of a variable capital investment company with compartments at the end of said fiscal year.

Without calling into the question the opinion expressed above, we draw your attention to the change of accounting regulation laid down in the accounting methods and rules of the appendix.

2. JUSTIFICATION OF THE ASSESSMENTS

In application of the provisions of article L.823-9 of the Commercial Code relative to the justification of our assessments, we bring the following information to your attention:

PricewaterhouseCoopers Audit, SA, 63, rue de Villiers, 92208 Neuilly-sur-Seine Cedex
T: +33 (0) 1 56 57 58 59, F: +33 (0) 1 56 57 58 60, www.pwc.fr

Société d'expertise comptable inscrite au tableau de l'ordre de Paris - Ile de France. Société de commissariat aux comptes membre de la compagnie régionale de Versailles. Société Anonyme au capital de 2 510 460 €. Siège social : 63, rue de Villiers 92200 Neuilly-sur- Seine. RCS Nanterre 672 006 483. TVA n° FR 76 672 006 483. Siret 672 006 483 00362. Code APE 6920 Z. Bureaux : Bordeaux, Grenoble, Lille, Lyon, Marseille, Metz, Nantes, Nice, Paris, Poitiers, Rennes, Rouen, Strasbourg, Toulouse.

MULTI UNITS FRANCE Mutual Fund (SICAV)

1. Over-the-counter financial contracts:

The over-the-counter financial contracts comprising the portfolio are assessed using the methods described in the note of the appendix relative to the accounting rules and methods. The prices are calculated by the counterparties of the contracts and approved by the management company in application of financial models. The mathematical models used are based on external data and market assumptions. On the basis of the elements that led to the determination of the used assessments we assessed the approach implemented by the management company.

2. Other financial instruments of the portfolio:

The assessments we made concerned the appropriateness of the accounting principles and the reasonable nature of the significant estimates used.

The assessments so made are in line with our approach for the audit of the annual accounts taken as a whole and therefore contributed to the formation of our opinion as it is expressed in the first part of the report.

3. SPECIFIC INFORMATION AND AUDIT PROCEDURES

We have also conducted the auditing procedures required by law, in accordance with the applicable professional standards in France.

We have no observations to report regarding the truthfulness or consistency with the annual accounts of the information included in the annual report and in the documents sent to the shareholders concerning the company's situation and annual accounts.

appendix

Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors - FCPR - FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

The aggregation of the annual accounts is presented in euros.

The Compartments in the GBP currency have been converted to euros at the rate applicable on 30 October 2015 (WMC Reuters).

The Compartments in the USD currency have been converted to euros at the rate applicable on 30 October 2015 (WMC Reuters).

On 30 October 2015, the Multi Units France mutual fund was made up of 61 Compartments:

Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities from eurozone countries.

At least 60% of the Lyxor UCITS ETF BEL 20 Compartment (hereinafter the "Compartment") is permanently exposed in one or several markets of equities that have been issued in one or several eurozone countries, possibly including the French market.

The Compartment is an UCITS ETF type index Compartment.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is to reproduce the evolution of the Bel 20 NR^{TM} index while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Bel 20 NR^{TM} index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.08%.

Benchmark indicator:

The benchmark indicator is the Bel 20^{TM} NR (Net Return) index (net dividends reinvested), listed in euros (The "Benchmark Indicator").

The Benchmark Indicator is a basket index disseminated in real-time, which monitors the continuous evolution of the prices of the 20 most liquid Belgian equities. The equities in the Benchmark Indicator are weighted according to their stock market capitalisations, adjusted by the "free float" while using the FTSE free float system. The Benchmark Indicator is continuously disseminated in real-time, but the official closing index is only in disseminated after 5:40 p.m.

The monitored performance is that of the index closing prices.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components will be available at the following Internet site: https://indices.nyx.com/en/products/indices/

Benchmark Indicator revision and composition:

The Benchmark indicator is revised annually.

The exact composition and the NYSE-Euronext's revision rules of the Benchmark indicator are available on the Internet site: https://indices.nyx.com/ The above-mentioned rebalancing frequency has no impact on the costs within the framework of the implementation of the Investment strategy.

Benchmark Indicator publication

The Benchmark Indicator is available in real time via Reuters and Bloomberg. Reuters code: .BFXP

Bloomberg code: BELPRX

The Benchmark Indicator's closing price is available on the Internet site: http://indices.nyx.com/

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the MF will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the MF's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit will be checked on each rebalancing date of the Benchmark Indicator, in application of the Benchmark Indicator's calculation method that limits the exposure to each equities of a single issuing entity to 20%, and for which the calculation is carried out by the sponsor or the calculation agent of the Benchmark Indicator. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument or of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

In the present case, the Financial manager by delegation intends to primarily use the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation of the European Community countries equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
  - Subordination to the main market indices or to the Benchmark Indicator,
  - Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
  - Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
  - Issuer (application of ratios applicable to the eligible assets of a CIU, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
  - Geographical area,
  - Sector.

For more information on the abovementioned eligibility and diversification criteria investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the MF's portfolio and (ii) the market value of the future exchange operation entered into by the MF are available on the page dedicated to the MF on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The investment on collective investment undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net assets. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

When the MF receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

The Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty.

In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.
If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the Belgian equity market.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the COB (French market regulator): 14 June 2002.*
- *Approval date of the Compartment's transformation: 3 September 2002.*
- *Compartment creation date: 31 July 2002.*

Activity report

The net asset value of the LYXOR UCITS ETF BEL 20 TR Compartment shows an evolution of 16.65%* over the fiscal year and stands at EUR 53.289 on 30/10/2015, meaning a fund performance of 134.24% since inception.

The fund replicates the performance of the BEL 20 NR index, listed in euros (EUR), representative of the large companies listed on the Euronext Brussels.

This index has shown an evolution of 17.10% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the BEL 20 NR index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the BEL 20 NR index.

The equities held as assets by the Compartment will notably be equities that make up the BEL 20 NR index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 6 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0180% for the Compartment. The level of the tracking error for the period was of 0.08%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

appendix

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.
- The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial manager by delegation.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.50% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euros.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The LYXOR UCITS ETF EUROMTS ALL-MATURITY INVESTMENT GRADE (DR) Compartment (the "Compartment") is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is to reproduce the evolution of the FTSE MTS Eurozone Government Bond IG (Mid Price) Index (Ex-CNO Etrix) (the "Benchmark Indicator") while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is listed in EUR.

The Benchmark Indicator is a "Total Return" type index (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator), weighted by country, consisting of securities issued by the governments of Member States of the eurozone.

The Benchmark Indicator, formerly known under the name CNO ETRIX Global, has been calculated in real-time by FTSE MTS since May 2003. The eligible universe of FTSE MTS indices consists of the securities with the following criteria:

- nominal and fixed coupons listed in euros which does not include option nor any convertibility with a maturity greater than or equal to 1 year;

listed on the FTSE MTS markets;

- issued by the sovereign governments of a eurozone country, selected by FTSE MTS from the following list of countries as having at least two ratings in the category "Investment Grade" issued by the rating agencies Standard & Poor's, Moody's and Fitch: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;

- with at least €2 billion of issued equities.

The bonds comprising the Benchmark Indicator are determined by subdividing the eligible Benchmark Indicator universe into six maturity bands: 1 to 3 years; 3 to 5 years; 5 to 7 years; 7 to 10 years; 10 to 15 years; and +15 years.

In a given maturity band, the weight of each sovereign issuer is determined on the basis of the size of the latter's issues within the maturity band, and is represented by at most two bonds within this maturity band. If an issuer has more than two bonds in a maturity band, the chosen bonds will be those that maximize the product of (i) their issue size and (ii) their residual time in the maturity band.

The components of the Benchmark Indicator correspond with all of the bonds selected in the six maturity bands, i.e. a theoretical maximum, on 15 January 2004, of 132 bonds.

In practice, the number of components of the Benchmark Indicator is less than that, since not all issuers have at least two bonds in all six maturity bands at the same time.

The weight of a component of the Benchmark Indicator is equal to the product (i) of its weight in the maturity band to which it belongs and (ii) the weight of this maturity band (calculated according to the size of its issues relative to the eligible universe).

The methodology of the FTSE MTS indices is supervised by an independent consulting committee consisting of bond and issuer specialists. These characteristics are such that the FTSE MTS indices are a highly liquid and representative measure of the performance of sovereign bond securities. The monitored performance is that of the 5.30 p.m. fixing (Paris time) of the Benchmark Indicator as determined by FTSE MTS.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition of the Benchmark Indicator's components will be available on the Internet site: www.ftse.com.

Benchmark Indicator publication

The Benchmark Indicator fixing price is provide daily by Reuters and Bloomberg.

The Reuters code is: FMMPIEG5= The Bloomberg code is: FMMPIEG5

The Benchmark Indicator's closing price is available on the Internet site: www.ftse.com

Benchmark Indicator revision

The Benchmark Indicator's composition is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

The exact composition and the revision rules of the Benchmark Indicator published by FTSE MTS are available on the Internet site: www.ftse.com

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a pure replication method, which means that the Compartment will invest mainly in bonds making up the Benchmark Indicator.

Information relative to the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the compartment is managed:	Between 5 and 10

Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the financial manager by delegation intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, financial instruments from France or from countries of the OECD (bonds and other debt securities). The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the financial manager by delegation, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will not have recourse to futures financial instruments, except, on an ancillary basis, and within limits set by regulations, to future contracts on indices or bonds that are listed on regulated markets.

4. Securities with integrated derivatives

None. The Compartment will not invest in securities comprising derivatives.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The Compartment will not have recourse to temporary acquisition and sale operations involving securities.

8. Financial guarantees

None. No financial guarantee will be granted / received by the Compartment within the framework of the implementation of its management objective.

Risk profile:

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected.

Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment, the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment, the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the bonds markets of the eurozone.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is greater than 2 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the COB (French market regulator): 26 November 2003.*
- *Compartment creation date: 9 December 2003.*

Activity report

The net asset value of the LYXOR UCITS ETF EUROMTS ALL-MATURITY INVESTMENT GRADE (DR) Compartment shows an evolution of 4.82%* between 31/10/2014 and 30/10/2015 and stands at EUR 173.506 on 30/10/2015, meaning a fund performance of 73.51% since inception.

The fund replicates the performance of the MTS Mid Price InvG Ex-CNO Etri AllMat index, listed in euros (EUR), representative of the sovereign bonds market of the eurozone with a capacity of investment grade.

This index has shown an evolution of 4.86% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MTS Mid Price InvG Ex-CNO Etri AllMat index, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the MTS Mid Price InvG Ex-CNO Etri AllMat index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 3 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.0060% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

appendix

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial manager by delegation.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.165% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euro.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

appendix

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by FTSE TMX Global Debt Capital Markets (collectively referred to as the "Holders").
FTSE TMX Global Debt Capital Markets cannot be held liable for the promotion or marketing of the Compartment.
FTSE MTS and the names of the FTSE MTS index (FTSE MTS Index™) and of the FTSE MTS indices (FTSE MTS Indices™) are registered trademarks of FTSE TMX Global Debt Capital Markets. The FTSE MTS indices are calculated by FTSE TMX Global Debt Capital Markets, and marketed and distributed by MTSNext, a company owned by FTSE TMX Global Debt Capital Markets.
Neither FTSE TMX Global Debt Capital Markets nor MTSNext can be held liable for any losses or damages of any nature whatsoever (including, notably, investment losses) linked to all or part of the Compartment or to the supply of the FTSE MTS Eurozone Government Bond IG (Mid Price) Index (Ex-CNO Etrix), or of sub-indices or of registered trademarks.

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency EUR	**30.10.2015**	31.10.2014	31.10.2013	31.10.2012	31.10.2011
Net assets	**884 655 518,55**	534 744 710,43	504 830 954,12	541 478 390,48	512 515 276,52
Number of outstanding equities	**5 098 700**	3 230 700	3 353 700	3 765 000	3 900 000
Net asset value	**173,506**	165,5197	150,5295	143,8189	131,4141
Distribution per unit on capital gains and losses (including advances)	**-**	-	-	-	-
Distribution per unit (including advances)	**-**	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) [(1)]	**-**	-	-	-	-
Unit capitalisation [(2)]	**7,28**	6,17	6,96	-0,14	-0,21

[(1)] In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

[(2)] The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 9 December 2003.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The LYXOR UCITS ETF EUROMTS 3-5Y INVESTMENT GRADE (DR) Compartment (the "Compartment") is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is to reproduce the evolution of the FTSE MTS Eurozone Government Bond IG 3-5Y (Mid Price) Index (Ex-CNO Etrix) (the "Benchmark Indicator").

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is listed in EUR.

The Benchmark Indicator is the sub-index, consisting of securities having a maturity between 3 and 5 years, of the FTSE MTS Eurozone Government Bond IG (Mid Price) Index (Ex-CNO Etrix), which is a "Total Return" type index (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator), weighted by country, consisting of securities issued by the governments of Member States of the eurozone. The Benchmark Indicator has been calculated in real-time by FTSE MTS.

The eligible universe of FTSE MTS indices consists of the securities with the following criteria:

(i) nominal and fixed coupons listed in euros which does not include option nor any convertibility with a maturity greater than or equal to 1 year;

(ii) issued by the sovereign governments of a eurozone country, selected by FTSE MTS from the following list of countries as having at least two ratings in the category "Investment Grade" issued by the rating agencies Standard & Poor's, Moody's and Fitch: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;

(iii) with at least €2 billion of issued equities.

(iv) listed on the FTSE MTS markets;

The methodology of the FTSE MTS indices is supervised by an independent consulting committee consisting of bond and issuer specialists. The composition of these indices is reviewed each month.

These characteristics are such that the FTSE MTS indices are a highly liquid and representative measure of the performance of sovereign bond securities. The monitored performance is that of the 5.30 p.m. fixing (Paris time) of the Benchmark Indicator as determined by FTSE MTS.

Benchmark Indicator publication

The Benchmark Indicator fixing price is provide daily by Reuters and Bloomberg.

The Reuters code of the Benchmark Indicator is: FMMPIEB5=

The Bloomberg code of the Benchmark Indicator is: EMIEB5

The Benchmark Indicator's closing price is available on the Internet site: www.ftse.com/

Benchmark Indicator revision

Should a bond no longer meet the selection criteria on a revision date, it will be removed from the Benchmark Indicator.

Changes to index constituents will be taken into account on the next monthly rebalancing date (the first business day after the 15th of the previous month) and are effectively implemented on the opening of the market on the second business day of the month following this monthly revision date.

Once selected, a bond remains in the Benchmark Indicator until its maturity becomes too short (i.e. less than one year), and the index constituents are not rebalanced during the month.

All of the coupons detached from the Benchmark Indicator bonds will be reinvested daily in the Benchmark Indicator at market close.

The Benchmark Indicator's composition is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition of the Benchmark Indicator's components will be available on the Internet site: www.ftse.com.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a pure replication method, which means that the Compartment will invest mainly in bonds making up the Benchmark Indicator.

Information relative to the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the CIU is managed:	Between 2 and 5
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets

Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the financial manager by delegation intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, financial instruments from France or from countries of the OECD (bonds and other debt securities). The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the financial manager by delegation, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will not have recourse to futures financial instruments, except, on an ancillary basis, and within limits set by regulations, to future contracts on indices or bonds that are listed on regulated markets.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The Compartment will not have recourse to temporary acquisition and sale operations involving securities.

8. Financial guarantees

None. No financial guarantee will be granted / received by the Compartment within the framework of the implementation of its management objective.

Risk profile:

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment, the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment bonds. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the bonds markets of the eurozone.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is greater than 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the COB (French market regulator): 26 November 2003.*
- *Compartment creation date: 28 January 2004.*

Activity report

The net asset value of the LYXOR UCITS ETF EUROMTS 3-5Y INVESTMENT GRADE (DR) Compartment shows an evolution of 1.80%* between 31/10/2014 and 30/10/2015 and stands at EUR 151.4223 on 30/10/2015, meaning a fund performance of 51.42% since inception.

The fund replicates the performance of the MTS Mid Price InvG Ex-CNO Etri 3-5Y index, listed in euros (EUR), representative of the most important and the most traded investment grade government bonds of the eurozone in the 3-5-year segment.

This index has shown an evolution of 1.77% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MTS Mid Price InvG Ex-CNO Etri 3-5Y, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the MTS Mid Price InvG Ex-CNO Etri 3-5Y Index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 3 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.0050% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the

day of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial manager by delegation.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.165% per year

Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euro.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by FTSE TMX Global Debt Capital Markets (collectively referred to as the "Holders").
FTSE TMX Global Debt Capital Markets cannot be held liable for the promotion or marketing of the Compartment.
FTSE MTS and the names of the FTSE MTS index (FTSE MTS Index™) and of the FTSE MTS indices (FTSE MTS Indices™) are registered trademarks of FTSE TMX Global Debt Capital Markets. The FTSE MTS indices are calculated by FTSE TMX Global Debt Capital Markets, and marketed and distributed by MTSNext, a company owned by FTSE TMX Global Debt Capital Markets.
Neither FTSE TMX Global Debt Capital Markets nor MTSNext can be held liable for any losses or damages of any nature whatsoever (including, notably, investment losses) linked to all or part of the Compartment or to the supply of the FTSE MTS Eurozone Government Bond IG 3-5Y (Mid Price) Index (Ex-CNO Etrix), or of sub-indices or of registered trademarks.

Number of outstanding equities	**4 973 400**	4 383 400	3 379 400	2 380 000	4 100 000
Net asset value	**151,4223**	148,7518	141,7312	137,2085	128,2556
Distribution per unit on capital gains and losses (including advances)	**-**	-	-	-	-
Distribution per unit (including advances)	**-**	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) [(1)]	**-**	-	-	-	-
Unit capitalisation [(2)]	**4,17**	5,34	5,14	-0,009	-0,05

[(1)] In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

[(2)] The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 28 January 2004.

Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The LYXOR UCITS ETF EUROMTS 10-15Y INVESTMENT GRADE (DR) Compartment (the "Compartment") is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is to reproduce the evolution of the FTSE MTS Eurozone Government Bond IG 10-15Y (Mid Price) Index (Ex-CNO Etrix) (the "Benchmark Indicator").

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is listed in EUR.

The Benchmark Indicator is the sub-index, consisting of securities having a maturity between 10 and 15 years, of the FTSE MTS Eurozone Government Bond IG (Mid Price) Index (Ex-CNO Etrix), which is a "Total Return" type index (i.e. all coupons detached by the components of the Index are reinvested in the Index), weighted by country, consisting of securities issued by the governments of Member States of the eurozone. The Benchmark Indicator has been calculated in real-time by FTSE MTS.

The eligible universe of FTSE MTS Investment Grade indices consists of the securities with the following criteria:

(i) nominal and fixed coupons listed in euros which does not include option nor any convertibility with a maturity greater than or equal to 1 year;

(ii) issued by the sovereign governments of a eurozone country, selected by FTSE MTS from the following list of countries as having at least two ratings in the category "Investment Grade" issued by the rating agencies Standard & Poor's, Moody's and Fitch: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;

(iii) with at least €2 billion of issued equities ; (iv) listed on the FTSE MTS markets;

The methodology of the FTSE MTS indices is supervised by an independent consulting committee consisting of bond and issuer specialists. These characteristics are such that the FTSE MTS indices are a highly liquid and representative measure of the performance of sovereign bond securities. The monitored performance is that of the 5.30 p.m. fixing (Paris time) of the Benchmark Indicator as determined by FTSE MTS.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition of the Benchmark Indicator's components will be available on the Internet site: www.ftse.com.

Benchmark Indicator publication

FTSE MTS calculates and disseminates the value of the Benchmark Indicator.

The Benchmark Indicator is published every 30 seconds from 9:00 am to 5:00 pm (Paris time). Two fixings are also published, at 11:00 am and 4:00 pm (Paris time).

The Reuters code is: FMMPIEE5= The Bloomberg code is: FMMPIEE5

The Benchmark Indicator's characteristics (including maturity, sensitivity, convexity, the accrued coupon and components) are available at the Internet site: www.ftse.com

Benchmark Indicator revision and composition

The Benchmark Indicator's composition is revised monthly.

The exact composition of the Benchmark Indicator and FTSE MTS Limited's rules for rebalancing the index are available on the Internet site: www.ftse.com. The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a pure replication method, which means that the Compartment will invest mainly in securities making up the Benchmark Indicator.

Information relative to the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the CIU is managed:	Between 9 and 15
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the financial manager by delegation intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, any kind of bonds. The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the financial manager by delegation, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will not have recourse to futures financial instruments, except, on an ancillary basis, and within limits set by regulations, to future contracts on indices or bonds that are listed on regulated markets.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The Compartment will not have recourse to temporary acquisition and sale operations involving securities.

8. Financial guarantees

None. No financial guarantee will be granted / received by the Compartment within the framework of the implementation of its management objective.

Risk profile:

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities classes on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment, the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment, the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the bonds markets of the eurozone.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is greater than 2 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the COB (French market regulator): 19 December 2003.*
- *Compartment creation date: 28 January 2004.*

Activity report

The net asset value of the LYXOR UCITS ETF EUROMTS 10-15Y INVESTMENT GRADE (DR) Compartment shows an evolution of 8.29%* between 31/10/2014 and 30/10/2015 and stands at EUR 202.5009 on 30/10/2015, meaning a fund performance of 102.50% since inception.

The fund replicates the performance of the MTS Mid Price InvG Ex-CNO Etri 10-15Y index, listed in euros (EUR), representative of the most important and the most traded investment grade government bonds of the eurozone in the 10-15-year segment.

This index has shown an evolution of 8.32% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MTS Mid Price InvG Ex-CNO Etri 10-15Y, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the MTS Mid Price InvG Ex-CNO Etri 10-15Y Index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 4 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.0060% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the

day of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

appendix

Posting method for the Compartment trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial manager by delegation.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	**Basis**	**Schedule, rate**
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.165% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euro.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by FTSE TMX Global Debt Capital Markets (collectively referred to as the "Holders").
FTSE TMX Global Debt Capital Markets cannot be held liable for the promotion or marketing of the Compartment.
FTSE MTS and the names of the FTSE MTS index (FTSE MTS Index™) and of the FTSE MTS indices (FTSE MTS Indices™) are registered trademarks of FTSE TMX Global Debt Capital Markets. The FTSE MTS indices are calculated by FTSE TMX Global Debt Capital Markets, and marketed and distributed by MTSNext, a company owned by FTSE TMX Global Debt Capital Markets.
Neither FTSE TMX Global Debt Capital Markets nor MTSNext can be held liable for any losses or damages of any nature whatsoever (including, notably, investment losses) linked to all or part of the Compartment or to the supply of the FTSE MTS Eurozone Government Bond IG 10-15Y (Mid Price) Index (Ex-CNO Etrix), or of sub-indices or of registered trademarks.

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment
France.

Representative of the Swiss Compartment
Société Générale, Paris, Zürich Branch, has been authorised by the FINMA as the Fund's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Compartment, the KIIDs as well as the list of purchases and sales made by the Compartment during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zürich Branch, Talacker 50, P.O. Box 1928, 8021 Zürich.

Calculation of the Total Expense Ratio

Annual closing of the compartment: 31 Oct.

Compartment management commission: 0.165 % tax included

Average fortune of the compartment for the period from 01/11/14 to 30/10/15 : 234 288 766.08

Extract from the profit and loss account

Expenses in euros	Annual report	Half-yearly report	Annual report

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The LYXOR UCITS ETF EUROMTS INFLATION LINKED INVESTMENT GRADE (DR) Compartment (the "Compartment") is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund. The exposure to the equity risk does not exceed 10% of the net assets.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is to replicate the evolution, whether upward or downward, of the FTSE MTS Eurozone Inflation-Linked Bond IG (Mid Price) Index (the "Benchmark Indicator"), listed in EUR, representative of the government bonds markets indexed on the eurozone inflation with a capacity of investment grade.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is the FTSE MTS Eurozone Inflation-Linked Bond IG (Mid Price) Index, listed in EUR.

The Benchmark Indicator is an index, calculated and published in real time by FTSE MTS, which measures the performance of the sovereign debt of member states of the eurozone, indexed to inflation.

It is a "Total Return" type Benchmark Indicator (i.e. all coupons detached by the components of the index are reinvested in the index), including all bond securities indexed to inflation (country and/or European) issued by the governments of Member States of the eurozone, selected by FTSE MTS among the following list of countries as having at least two Investment Grade rating issued by the credit-rating agencies Standard & Poor's, Moody's and Fitch: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain. The securities used in the composition of the Benchmark Indicator are all listed and negotiable on the MTS markets, have more than EUR 2 billion outstanding and a minimum time to maturity of one year. The monitored performance is that of the 5.30 p.m. fixing (Paris time) of the index as determined by FTSE MTS.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components will be available on the Internet site: www.ftse.com

Benchmark Indicator publication

FTSE MTS calculates and disseminates the value of the Benchmark Indicator. The Benchmark Indicator is published every 30 seconds from 9:00 a.m. to 5:00 p.m. (Paris time). Two fixings are also published, at 11:00 am and 4:00 pm (Paris time).

The Benchmark Indicator is available in real-time via Reuters and Bloomberg. Reuters code: FMMPIIG5=

Bloomberg code: FMMPIIG5

Benchmark Indicator revision and composition

Should a bond no longer meet the selection criteria on a revision date, it will be removed from the Benchmark Indicator. Changes to index constituents will be taken into account on the next monthly rebalancing date (the first business day after the 15th of the previous month) and are effectively implemented on the opening of the market on the second business day of the month following this monthly revision date.

Once selected, a bond remains in the Benchmark Indicator until its maturity becomes too short (i.e. less than one year), and the index constituents are not rebalanced during the month.

All coupons detached from the bonds comprising the Benchmark Indicator are reinvested in the index each day, after market close.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components will be available on the Internet site: www.ftse.com

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its financial manager by delegation, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument ("FFI"). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of balance sheet assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's internet site at www.lyxoretf.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the CIU is managed:	Between 5 and 10

Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the financial manager by delegation intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, financial instruments of any kind.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may engage in transactions involving derivatives traded on a regulated market or over the counter.

With respect to derivatives traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

For this purpose the management company may appoint an intermediary (hereinafter the "Agent) to provide the following services in connection with the Compartment's temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment's behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment's annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment's overall operating expenses they have been excluded from ongoing expenses. If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;

- the identity of the counterparty(ies) involved in these transactions;

- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;

- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs or expenses.

8. Financial guarantees

When the Compartment lends or otherwise temporarily disposes of securities it must receive guarantees in the form of securities and/or cash to reduce the counterparty risk associated with these transactions.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received non-cash guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including liquidity, short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment in the event of temporary securities transactions. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

An additional discount may be applied to collateral received in another currency than the euro.

Reinvestment of received guarantees:

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

(i) Deposited in an authorised institution

(ii) Invested in high-quality government bonds

(iii) Used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the CIU is able to withdraw the total amount of its cash collateral and the accrued interest at any time.

(iv) Invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

The reinvestment of cash collateral must meet the diversification requirements that apply to non-cash collateral.

Risk profile:

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment may use FFI on an ancillary basis. In such a case, the Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter. In compliance with the UCITS regulations, the counterparty risk cannot exceed 10% of the total value of the Compartment's assets by counterparty. When Société Générale is involved as a counterparty of the FFIs and/or a temporary securities transaction, conflicts of interest can arise between the Compartment's Management Company and the counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk arising from temporary securities transactions

If a borrower of securities defaults on its obligation there could be a risk that the value of the guarantee received by the Compartment is less than the value of the securities lent. This risk could arise, for example, in the event of (i) an inaccurate valuation of the securities lent and/or (ii) unfavourable market movements and/or (iii) the lowering of the credit rating(s) of the issuer(s) of securities taken as guarantee and/or (iv) the illiquidity of the market in which the

guarantees received are listed. If cash guarantees are reinvested this could (i) result in leverage that entails a risk of loss and volatility and/or (ii) expose the Compartment to a market that is inappropriate for its investment objective, and/or (iii) generate less income than the amount of guarantees the Compartment must repay. The Compartment could also fail to receive the securities lent by the date specified, which would diminish its capacity to accommodate investor redemptions.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or its FFI's counterparty), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment bonds. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment can enter into transactions involving over-the-counter Future Financial Instrument (FFI), such as swaps, in order to secure the performance of the Benchmark Indicator. These FFI involve various risks, such as These FFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Indicator disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect an FFI and may require an adjustment of the FFI transaction or even its premature termination, which could adversely affect the Compartment's net asset value.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the performance, whether upward or downward, of inflation-indexed eurozone government bond markets.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is greater than 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the COB (French market regulator): 22 March 2005.*
- *Compartment creation date: 15 April 2005.*

Activity report

The net asset value of the LYXOR UCITS ETF EUROMTS INFLATION LINKED INVESTMENT GRADE (DR) Compartment shows an evolution of 3.84%* between 31/10/2014 and 30/10/2015 and stands at EUR 145.8157 on 30/10/2015, meaning a fund performance of 45.82% since inception.

The fund replicates the performance of the MTS Mid Price InvG Inflation-L index, listed in euros (EUR), representative of the government bonds markets indexed on the eurozone inflation with a capacity of investment grade.

This index has shown an evolution of 4.73% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MTS Mid Price InvG Inflation-L index, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the MTS Mid Price InvG Inflation-L index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 4 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.0150% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

appendix

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial manager by delegation.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	Maximum 0.20% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None
Cost of temporary purchases and disposals of securities	The amount of the transaction	Maximum 35% of the income obtained from these transactions

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

appendix

Accounting currency

The Compartment's accounting is carried out in euro.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by FTSE TMX Global Debt Capital Markets (collectively referred to as the "Holders").
FTSE TMX Global Debt Capital Markets cannot be held liable for the promotion or marketing of the Compartment.
FTSE MTS and the names of the FTSE MTS index (FTSE MTS Index™) and of the FTSE MTS indices (FTSE MTS Indices™) are registered trademarks of FTSE TMX Global Debt Capital Markets. The FTSE MTS indices are calculated by FTSE TMX Global Debt Capital Markets, and marketed and distributed by MTSNext, a company owned by FTSE TMX Global Debt Capital Markets.
Neither FTSE TMX Global Debt Capital Markets nor MTSNext can be held liable for any losses or damages of any nature whatsoever (including, notably, investment losses) linked to all or part of the Compartment or to the supply of the FTSE MTS Eurozone Inflation-Linked Bond IG (Mid Price) Index, or of sub-indices or of registered trademarks.

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency EUR	**30.10.2015**	31.10.2014	31.10.2013	31.10.2012	31.10.2011
Net assets	**529 019 602,82**	189 715 473,11	186 501 521,12	247 928 101,22	311 108 030,03
Number of outstanding equities	**3 628 000**	1 351 000	1 418 000	1 935 000	2 750 000
Net asset value	**145,8157**	140,4259	131,5243	128,1282	113,1301
Distribution per unit on capital gains and losses (including advances)	**-**	-	-	-	-
Distribution per unit (including advances)	**-**	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) [(1)]	**-**	-	-	-	-
Unit capitalisation [(2)]	**1,21**	7,33	5,98	-0,23	-0,23

[(1)] In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

[(2)] The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 15 April 2005.

Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The LYXOR UCITS ETF EUROMTS 1-3Y INVESTMENT GRADE (DR) Compartment (the "Compartment") is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year.

Management objective:

The Compartment's management objective is to reproduce the evolution of the FTSE MTS Eurozone Government Bond IG 1-3Y (Mid Price) Index (Ex-CNO Etrix) (the "Benchmark Indicator").

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is listed in EUR.

The Benchmark Indicator is the sub-index, consisting of securities having a maturity between 1 and 3 years, of the FTSE MTS Eurozone Government Bond IG (Mid Price) Index (Ex-CNO Etrix), which is a "Total Return" type index (i.e. all coupons detached by the components of the index are reinvested in the index), weighted by country, consisting of securities issued by the governments of Member States of the eurozone. The index FTSE MTS Eurozone Government Bond IG 1-3Y (Mid Price) Index (Ex-CNO Etrix) has been calculated in real-time by FTSE MTS.

The eligible universe of FTSE MTS Investment Grade indices consists of the securities with the following criteria:

(i) nominal and fixed coupons listed in euros which does not include option nor any convertibility with a maturity greater than or equal to 1 year;

(ii) listed on the FTSE MTS markets;

(iii) issued by the sovereign governments of a eurozone country, selected by FTSE MTS from the following list of countries as having at least two ratings in the category "Investment Grade" issued by the rating agencies Standard & Poor's, Moody's and Fitch: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;

(iv) with at least €2 billion of issued equities.

The methodology of the FTSE MTS indices is supervised by an independent consulting committee consisting of bond and issuer specialists. These characteristics are such that the FTSE MTS indices are a highly liquid and representative measure of the performance of sovereign bond securities.

The monitored performance is that of the 5.30 p.m. fixing (Paris time) of the Benchmark Indicator as determined by FTSE MTS.

Benchmark Indicator publication

FTSE MTS calculates and disseminates the value of the index FTSE MTS Eurozone Government Bond IG 1-3Y (Mid Price) Index (Ex-CNO Etrix).

The Benchmark Indicator is published every 30 seconds from 9:00 am to 5:00 pm (Paris time). Two fixings are also published, at 11:00 am and 4:00 (Paris time).

Reuters code: FMMPIEA5= Bloomberg code: FMMPIEA5

Benchmark Indicator revision

The Benchmark Indicator's composition is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components will be available at the latest in February 2014, at the following Internet site: www.ftse.com

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a pure replication method, which means that the Compartment will invest mainly in securities making up the Benchmark Indicator.

Information relative to the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the CIU is managed:	Between 1 and 3
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the financial manager by delegation intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, any kind of bonds. The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the financial manager by delegation, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will not have recourse to futures financial instruments, except, on an ancillary basis, and within limits set by regulations, to future contracts on indices or bonds that are listed on regulated markets.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The Compartment will not have recourse to temporary acquisition and sale operations involving securities.

8. Financial guarantees

None. No financial guarantee will be granted / received by the Compartment within the framework of the implementation of its management objective.

Risk profile:

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment, the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the Benchmark Indicator is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the Benchmark Indicator makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment, the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the market for bonds issued by the governments of Member States within the eurozone and having a maturity between 1 and 3 years.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for five years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is greater than 2 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 6 September 2005.*
- *Compartment creation date: 22 September 2005.*

Activity report

The net asset value of the LYXOR UCITS ETF EUROMTS 1-3Y INVESTMENT GRADE (DR) Compartment shows an evolution of 0.76%* between 31/10/2014 and 30/10/2015 and stands at EUR 126.2802 on 30/10/2015, meaning a fund performance of 26.28% since inception.

The fund replicates the performance of the MTS Mid Price InvG Ex-CNO Etri 1-3Y index, listed in euros (EUR), representative of the most important and the most traded investment grade government bonds of the eurozone in the 1-3-year segment.

This index has shown an evolution of 0.87% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MTS Mid Price InvG Ex-CNO Etri 1-3Y, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the MTS Mid Price InvG Ex-CNO Etri 1-3Y index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 2 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.0140% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

appendix

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial manager by delegation.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.165% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euro.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year.

appendix

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by FTSE TMX Global Debt Capital Markets (collectively referred to as the "Holders").
FTSE TMX Global Debt Capital Markets cannot be held liable for the promotion or marketing of the Compartment.
FTSE MTS and the names of the FTSE MTS index (FTSE MTS Index™) and of the FTSE MTS indices (FTSE MTS Indices™) are registered trademarks of FTSE TMX Global Debt Capital Markets. The FTSE MTS indices are calculated by FTSE TMX Global Debt Capital Markets, and marketed and distributed by MTSNext, a company owned by FTSE TMX Global Debt Capital Markets.
Neither FTSE TMX Global Debt Capital Markets nor MTSNext can be held liable for any losses or damages of any nature whatsoever (including, notably, investment losses) linked to all or part of the Compartment or to the supply of the FTSE MTS Eurozone Government Bond IG 1-3Y (Mid Price) Index (Ex-CNO Etrix), or of sub-indices or of registered trademarks.

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency EUR	**30.10.2015**	31.10.2014	31.10.2013	31.10.2012	31.10.2011
Net assets	**711 424 831,58**	486 111 879,30	367 553 675,59	333 194 376,29	461 110 626,41
Number of outstanding equities	**5 633 700**	3 878 700	2 974 700	2 750 000	3 950 000
Net asset value	**126,2802**	125,3285	123,5599	121,1615	116,7368
Distribution per unit on capital gains and losses (including advances)	**-**	-	-	-	-
Distribution per unit (including advances)	**-**	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) [(1)]	**-**	-	-	-	-
Unit capitalisation [(2)]	**2,00**	1,64	3,92	-0,17	-0,16

[(1)] In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

[(2)] The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 22 September 2005.

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment
France.

Representative of the Swiss Compartment
Société Générale, Paris, Zürich Branch, has been authorised by the FINMA as the Fund's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Compartment, the KIIDs as well as the list of purchases and sales made by the Compartment during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zürich Branch, Talacker 50, P.O. Box 1928, 8021 Zürich.

Calculation of the Total Expense Ratio

Annual closing of the compartment: 31 Oct.

Compartment management commission: 0.165 % tax included

Average fortune of the compartment for the period from 01/11/14 to 30/10/15 : 553 503 968.13

Extract from the profit and loss account

Compartments / feeder	LYXOR UCITS ETF FTSE ALL SHARE is a compartment of the MULTI UNITS FRANCE mutual fund
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities of European Union Countries.

At least 60% of the LYXOR UCITS ETF FTSE ALL SHARE Compartment ("the Compartment") is continuously exposed in one or several markets of equities issued in one or several European Union countries including any eurozone markets.

The Compartment is an UCITS ETF type index Compartment.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution.

The Board of directors will take all necessary measures to be eligible for the "Distributing Status" (section 760 ICTA) in the United Kingdom. The Compartment will distribute at least 85% of its earnings (including the "UK equivalent profits") and will ask the HMRC for "Distributing Status" (status as a distributor).

Management objective:

The Compartment's management objective is reproduce the evolution of the FTSE ALL SHARE^{TM} index (see the "Benchmark Indicator" section hereafter), regardless of its evolution, while insofar as possible minimizing the tracking error between the Compartment's performances and those of the FTSE ALL SHARE^{TM} index. The anticipated level of the ex-post tracking error under normal market conditions is 0.06%.

Benchmark indicator:

The Benchmark Indicator is the FTSE ALL SHARE^{TM} Gross Total Return index (gross dividends reinvested) listed in pounds sterling (GBP) (the "Benchmark Indicator").

The Benchmark Indicator is an equities index calculated, maintained and published by the supplier of international indices, FTSE.

The Benchmark Indicator monitors the continuous evolution of the equity prices of the main companies in the United Kingdom listed on the London Stock Exchange (LSE). The equities in the Benchmark Indicator are weighted according to their stock market capitalisations, adjusted by the "free float" while using the FTSE free float system. Consequently, the number of securities included in the composition of the basket comprising the Benchmark Indicator may change over time. No component may represent more than 15% of the Benchmark Indicator.

The composition of the Benchmark Indicator is reviewed each year, using the FTSE methodology.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components will be available on the Internet site: www.ftse.com.

The Benchmark Indicator is calculated and published in real-time by the company FTSE. The monitored performance is that of the Benchmark Indicator closing prices.

Benchmark Indicator revision and composition

The Benchmark Indicator is designed to represent over 98% of the total market capitalisation of the UK market.

The FTSE methodology and calculation method are based on a variable number of companies in the Benchmark Indicator.

The Benchmark Indicator is revised quarterly.

The exact composition and the revision rules of the Benchmark Indicator published by NYSE-Euronext are available on the Internet site: www.ftse.com. The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark Indicator publication

The Benchmark Indicator is available in real-time via Reuters and Bloomberg.

Bloomberg code: FTPTTALL Reuters code: .TFTAS

The Benchmark Indicator's closing price is available on the FTSE Internet site: www.ftse.com.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation of the international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
  - Subordination to the main market indices or to the Benchmark Indicator,
  - Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
  - Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
  - Issuer (application of ratios applicable to the eligible assets of a CIU, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
  - Geographical area,
  - Sector.

The equities basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The investment on collective investment undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net assets. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.
If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the equities markets of United Kingdom.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 23 February 2007.*
- *Compartment creation date: 3 April 2007.*

Activity report

The net asset value of the LYXOR UCITS ETF FTSE ALL SHARE unit of the LYXOR UCITS ETF FTSE ALL SHARE Compartment shows an evolution of 2.66%* over the fiscal year and stands at GBP 4.2284 on 30/10/2015, meaning a fund performance of 38.01% since inception.

The fund replicates the performance of the FTSE UK Series FTSE All Share index, listed in pounds sterling (GBP), representative of 98% of the entire market capitalisation of British companies which respond to the integration criteria in the Index.

This index has shown an evolution of 2.99% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the FTSE UK Series FTSE All Share index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the FTSE UK Series FTSE All Share index.

The equities held as assets by the Compartment will notably be equities that make up the FTSE UK Series FTSE All Share index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 5 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0330% for the Compartment. The level of the tracking error for the period was of 0.06%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

appendix

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of collective investment undertakings operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of AIF operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.
- The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.40% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in pounds sterling (GBP).

Compartments / feeder	LYXOR UCITS ETF FTSE 100 is a compartment of the MULTI UNITS FRANCE mutual fund
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities of European Union Countries.

At least 60% of the LYXOR UCITS ETF FTSE 100 Compartment ("the Compartment") is continuously exposed in one or several markets of equities issued in one or several European Union countries including any eurozone markets.

The Compartment is an UCITS ETF type index Compartment.

Terms of determination and allocation of amounts available for distribution:

Class of C-GBP equities: Capitalisation of all the amounts available for distribution.

Class of D-GBP equities: The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is an exposure to the United Kingdom equities market by reproducing the evolution of the FTSE 100 Gross Total Return index (hereafter the "Benchmark Indicator"), while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.05%.

Benchmark indicator:

The Benchmark Indicator is listed in pounds sterling (GBP).

The Benchmark Indicator is an equities index calculated, maintained and published by the supplier of international indices, FTSE.

The Benchmark Indicator monitors the continuous evolution of the equity prices of the 100 main companies in the United Kingdom listed on the London Stock Exchange (LSE).

The equities in the Benchmark Indicator are weighted according to their stock market capitalisations, adjusted by the "free float" while using the FTSE free float system. No component may represent more than 15% of the index.

The FTSE methodology and its calculation method entail the index being made up of a fixed number of companies.

The Benchmark Indicator is calculated and published in real-time by the company FTSE.

The monitored performance is that of the Benchmark Indicator closing prices.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator will be available at the Internet site of FTSE: www.ftse.com.

Benchmark Indicator revision and composition

The composition of the Benchmark Indicator is reviewed each year in accordance with the FTSE methodology. Should an equity no longer meet the selection criteria on a revision date, it will be removed from the composition of the Benchmark Indicator.

The exact composition and the revision rules of the Benchmark Indicator are published by FTSE and available on the FTSE Internet site: www.ftse.com. The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark Indicator publication

The Benchmark Indicator is calculated at the closing price each day, by using the official closing price of the listing market of the component securities. The Benchmark Indicator is also calculated in real-time on each trading day.

The Benchmark Indicator is available in real-time via Reuters and Bloomberg.

Bloomberg code: TUKXG Reuters code: .TFTSE

The Benchmark Indicator's closing price is available on the FTSE Internet site: www.ftse.com.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

In the present case, the financial manager by delegation intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation of the international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
  - Subordination to the main market indices or to the Benchmark Indicator,
  - Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
  - Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
  - Issuer (application of ratios applicable to the eligible assets of a CIU, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
  - Geographical area,
  - Sector.

The equities basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The investment on Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net assets. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The Compartment will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

• such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's financial manager by delegation and the FFI's counterparty. The financial manager by delegation manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the equities markets of United Kingdom.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 23 February 2007.*
- *Compartment creation date: 3 April 2007.*

Activity report

The net asset value of the C-GBP unit of the LYXOR UCITS ETF FTSE 100 Compartment shows an evolution of 0.72%* over the fiscal year and stands at GBP 7.8617 on 30/10/2015, meaning a fund performance of 34.22% since inception.

The net asset value of the D-GBP unit of the LYXOR UCITS ETF FTSE 100 Compartment shows an evolution of 0.71%* over the fiscal year and stands at GBP 97.0063 on 30/10/2015, meaning a fund performance of 2.74% since inception.

The fund replicates the performance of the FTSE 100 TOTAL RETURN index, listed in pounds sterling (GBP), representative of the 100 largest market capitalisation of London Stock Exchange.

This index has shown an evolution of 0.82% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the FTSE 100 TOTAL RETURN index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the FTSE 100 TOTAL RETURN index.

The equities held as assets by the Compartment will notably be equities that make up the FTSE 100 TOTAL RETURN index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 5 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0040% for the Compartment. The level of the tracking error for the period was of 0.05%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

appendix

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty.

They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.
- The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial manager by delegation.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.15% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in pounds sterling (GBP).

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Class of C-GBP equities: Capitalisation of all the amounts available for distribution.

Class of D-GBP equities: The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year.

The realised net capital gain will be capitalised.

Compartments / feeder	LYXOR UCITS ETF FTSE 250 is a compartment of the MULTI UNITS FRANCE mutual fund
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities of European Union Countries.

At least 60% of the LYXOR UCITS ETF FTSE 250 Compartment ("the Compartment") is continuously exposed in one or several markets of equities issued in one or several European Union countries including any eurozone markets.

The Compartment is an UCITS ETF type index Compartment.

Terms of determination and allocation of amounts available for distribution:

The management company reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is an exposure to the United Kingdom equities market by reproducing the evolution of the FTSE 250™ index (see the "Benchmark Indicator" section hereafter), while insofar as possible minimizing the tracking error between the Compartment's performances and those of the FTSE 250™ index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.05%.

Benchmark indicator:

The Benchmark Indicator is the FTSE 250™ Gross Total Return index (gross dividends reinvested) listed in pounds sterling (GBP) (the "Benchmark Indicator"). The Benchmark Indicator is an equities index calculated, maintained and published by the supplier of international indices, FTSE.

The Benchmark Indicator monitors the continuous evolution of the equity prices of the main companies in the United Kingdom listed on the London Stock Exchange (LSE) which are not already included in the FTSE 100™ index.

The equities in the Benchmark Indicator are weighted according to their stock market capitalisations, adjusted by the "free float" while using the FTSE free float system. No component may represent more than 15% of the index.

The FTSE methodology and its calculation method entail the index being made up of a fixed number of companies.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components will be available on the Internet site: www.ftse.com.

The monitored performance is that of the Benchmark Indicator closing prices in GBP.

Benchmark Indicator revision and composition

The composition of the Benchmark Indicator is reviewed quarterly.

The exact composition and the revision rules of the Benchmark Indicator are published by FTSE and available on the Internet site: www.ftse.com.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark Indicator publication

The Benchmark Indicator is available in real-time via Reuters and Bloomberg.

Reuters code: .TFTMC

Bloomberg code: FTPTT250

The Benchmark Indicator's closing price is available on the Internet site: www.ftse.com.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation of the European equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
  - Subordination to the main market indices or to the Benchmark Indicator,
  - Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
  - Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
  - Issuer (application of ratios applicable to the eligible assets of a CIU, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
  - Geographical area,
  - Sector.

The equities basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The investment on collective investment undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net assets. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations.

The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The bearer's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.
If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the equities markets of United Kingdom.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 23 February 2007.*
- *Compartment creation date: 3 April 2007.*

Activity report

The net asset value of the LYXOR UCITS ETF FTSE 250 Compartment shows an evolution of 12.97%* over the fiscal year and stands at GBP 19.8554 on 30/10/2015, meaning a fund performance of 78.59% since inception.

The fund replicates the performance of the FTSE UK Series FTSE 250 Total index, listed in pounds sterling (GBP), representative of the 250 largest British companies in terms of market capitalisation, excluding the 100 first market capitalisations.

This index has shown an evolution of 13.34% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the FTSE UK Series FTSE 250 Total index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the FTSE UK Series FTSE 250 Total index.

The equities held as assets by the Compartment will notably be equities that make up the FTSE UK Series FTSE 250 Total index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 5 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0180% for the Compartment. The level of the tracking error for the period was of 0.05%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

appendix

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value.

appendix

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of collective investment undertakings operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of AIF operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.
- The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.35% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in pounds sterling (GBP).

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	
Future currency exchange operations:	**856 053,15**
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Account receivable	856 053,15
-	-
-	-
-	-
-	-
Other operations	-
Debts	
Future currency exchange operations	**858 965,06**
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlement purchases	856 053,15
Accrued expenses	2 911,91
-	-
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	588 900	11 361 412,67	606 300	11 657 502,32
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	**0,35**
Performance commissions (variable fees): amount of costs for the fiscal year	**-**
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	**-**
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees ..... **None**
3.8.2 Description of the other commitments received and/or given ..... **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	**-**
- Other temporary operations	**-**
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	**-**
- bonds	**-**
- debt securities	**-**
- other financial instruments	**-**
Financial estimates given as guarantees and maintained in their original item:	
- equities	**-**
- bonds	**-**
- debt securities	**-**
- other financial instruments	**-**
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (mutual fund) and UCITS managed by these entities:	
- CIU securities	**-**
- Swaps	**1 182,23**

Compartments / feeder	LYXOR UCITS ETF KUWAIT (FTSE COAST KUWAIT 40) is a compartment of the MULTI UNITS FRANCE mutual fund
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the LYXOR UCITS ETF KUWAIT (FTSE COAST KUWAIT 40) (the "Compartment") is continuously exposed in one or several markets of equities issued in one or several European Union countries including any eurozone markets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

The Board of directors will take all necessary measures to be eligible for the "Distributing Status" (section 760 ICTA) in the United Kingdom. The fund will distribute at least 85% of its earnings (including the "UK equivalent profits") and will ask the HMRC for "Distributing Status" (status as a distributor).

Management objective:

The Compartment's management objective is an exposure to the Kuwaiti equities market by reproducing the evolution of the FTSE COAST KUWAIT 40™ index (the "Benchmark Indicator), while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.1%.

Benchmark indicator:

The Benchmark indicator is the FTSE COAST KUWAIT 40™ index, listed in Kuwaiti Dinar (KWD), increased by the dividends possibly collected by the Compartment pursuant to the holding of the equities comprising the Benchmark Indicator.

The Benchmark Indicator is an index that monitors the continuous evolution of the 40 main companies listed in the Kuwait Stock Exchange, after having taken account of their liquidity. The equities in the Benchmark Indicator are weighted according to their stock market capitalisations, adjusted by their free float.

The Benchmark Indicator is an equities index calculated, maintained and published by the supplier of international indices, FTSE.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as informations on the composition and the respective weights of components of the Benchmark Indicator will be available at the following Internet site: www.ftse.com

The monitored performance is that of the index closing prices.

Benchmark Indicator revision and composition

The composition of the Benchmark Indicator is reviewed twice a year, based on data from the last Trading Day of March and September. Modifications take effect on the third Wednesday in April and October. The Benchmark Indicator is revised in accordance with FTSE's rules.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark Indicator publication

The Benchmark Indicator is calculated at the closing price on Monday, Tuesday, Wednesday and Thursday, by using the official closing price of the listing market of the component securities.

The Benchmark Indicator is available via Reuters and Bloomberg. Reuters code: .FTGPCST001

Bloomberg code: GPCST001

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit will be checked on each rebalancing date of the Benchmark Indicator, in application of the Benchmark Indicator's calculation method that limits the exposure to each equities of a single issuing entity to 20%, and for which the calculation is carried out by the sponsor or the calculation agent of the Benchmark Indicator. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument or of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

In the present case, the financial manager by delegation intends to primarily use the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation of the international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
  - Subordination to the main market indices or to the Benchmark Indicator,
  - Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
  - Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
  - Issuer (application of ratios applicable to the eligible assets of a CIU, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
  - Geographical area,
  - Sector.

The equities basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The investment on collective investment undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net assets. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Risk related to low diversification of the index

The Benchmark Indicator to which the investors are exposed covers a given region, area or strategy and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty.

In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss than would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the Benchmark Indicator.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the reference index.

- Exchange risk linked to the Compartment (KWD/USD)

The abovementioned Compartment is exposed to an exchange risk to the extent that it is listed in a currency other than that of the Benchmark Indicator. The net asset value of the abovementioned Compartment can therefore decrease due to fluctuating exchange rates even though the value of the Benchmark Indicator has increased.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the equities market of Kuwait.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the COB (French market regulator): 13 May 2008.*
- *Compartment creation date: 18 June 2008.*

Activity report

The net asset value of the LYXOR UCITS ETF KUWAIT (FTSE COAST KUWAIT 40) Compartment shows an evolution of -26.86%* over the fiscal year and stands at USD 17.4717 on 30/10/2015, meaning a fund performance of -66.68% since inception.

The fund replicates the performance of the FTSE Coast Kuwait 40 Idx index, listed in Kuwaiti Dinar (KWD), representative of the Kuwaiti stock market.

This index has shown an evolution of -25.03% over the fiscal year. The class of C-EUR, Daily Hedged C-CHF, Daily Hedged C-EUR, Daily Hedged C-GBP, Daily Hedged C-USD, not being valued to the index currency, the evolution of their net asset value is subject to the exchange risk. During the fiscal year, the EUR decreased by 5.09% compared to the JPY, the CHF decreased by 5.40% compared to the JPY, the GBP increased by 5.63% compared to the JPY, USD increased by 2.73% compared to the JPY.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,
- The costs for accessing the local markets of the securities of the replicated indexing,
- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the FTSE Coast Kuwait 40 Idx index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the FTSE Coast Kuwait 40 Idx index.

The equities held as assets by the Compartment will notably be equities that make up the FTSE Coast Kuwait 40 Idx index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 5 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0680% for the Compartment. The level of the tracking error for the period was of 0.1%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

appendix

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market

value on the day before the day of calculation of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.
- The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial manager by delegation.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.65% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in United States Dollar (USD).

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Diversified.

The LYXOR UCITS ETF EUROSTOXX50 DIVIDENDS Compartment (the "Compartment") is a strategy index fund, of the UCITS ETF type.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The management objective of the CIU is to be exposed summarily to the value of the implicit dividends of the Eurostoxx50 index, and insofar as possible to minimize the tracking error between the Compartment's performances and those of the Eurostoxx50 Dividend points futures strategy index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.15%.

Benchmark indicator:

The Benchmark Indicator is the Eurostoxx50 Dividend point futures strategy index, listed in Euro (EUR) (the "Benchmark Indicator").

The Benchmark Indicator is a strategy index defined and calculated by Stoxx.

The Benchmark Indicator provides an exposure to the increase or decrease of the market evolution for the implicit dividends of the Eurostoxx50 index. The strategy index also offers an exposure to the money market because of the absence of financing for the strategy's implementation.

The Benchmark Indicator is calculated in real-time and is available on the following Stoxx website: www.stoxx.com.

Methodology

The Benchmark Indicator's performance is equal to the EONIA interest rate, plus or minus the daily average performance of the five largest annual futures contracts on the dividends index.

The monitored performance is that of the fixing of the Benchmark Indicator at 5:35 p.m., in euros.

Since the methodology used to calculate the Benchmark Indicator is not based on direct investment in Eurostoxx 50 index but on indirect investment in futures, the Compartment's performance will be affected by the cost of 'rolling over' positions on these futures contracts every year.

This phenomenon could negatively and progressively impact, potentially in a significant manner, the gap between the Compartment's performance and the gross performance on the underlyings of the aforesaid futures, notably in case of long-term investment in the Compartment's equities.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.stoxx.com.

Benchmark Indicator revision and composition

The Benchmark Indicator is rebalanced annually.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark Indicator publication

The Benchmark Indicator is calculated daily at the 5:35 p.m. fixing price.

The Benchmark Indicator is available via Reuters and Bloomberg.

Reuters code: .SX5EDFT. Bloomberg code: SX5EDFT

The Benchmark Indicator's closing price is available on the Internet site: www.stoxx.com

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international securities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
  - Subordination to the main market indices or to the Benchmark Indicator,
  - Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
  - Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
  - Issuer (application of ratios applicable to the eligible assets of a CIU, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
  - Geographical area,
  - Sector.

The equities basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The investment on collective investment undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net assets. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. If the counterparty defaults, in order to pay the counterparty's debt to the Compartment arising from the secured transaction, the Compartment may sell the assets the counterparty provided as collateral.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's classes of equities or equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty.

In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.
If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the market of the implicit dividends of the eurostoxx50 equities.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92987 Paris La Défense Cedex - France.*
- *Compartment approval date by the AMF (Financial Markets Authority): 29 March 2010.*
- *Compartment creation date: 9 April 2010.*

Activity report

The net asset value of the LYXOR UCITS ETF EUROSTOXX50 DIVIDENDS Compartment shows an evolution of 3.37%* over the fiscal year and stands at EUR 115.304 on 30/10/2015, meaning a fund performance of 16.53% since inception.

The fund replicates the performance of the ES50 DVP Fut index, listed in euro (EUR), representative of a strategy aiming to expose itself to gross yields of EURO STOXX Dividend Points (DVP) futures contracts, for 5 different maturity dates.

This index has shown an evolution of 3.82% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the ES50 DVP Fut index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the ES50 DVP Fut index.

The equities held as assets by the Compartment will notably be equities that make up the ES50 DVP Fut index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 5 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0220% for the Compartment. The level of the tracking error for the period was of 0.15%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

appendix

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;

NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;

NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.

Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value.

appendix

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

Deposits are assessed at their nominal value, plus any related interest that has accrued.

Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.

Temporary acquisitions and sales of securities are assessed at the market price.

Units and equities of undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.

Units and equities of AIF operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.70% per year including tax

Off-balance sheet				
Hedging operations	-	-	-	-
Other operations	-	-	-	-

3.3 Breakdown by residual maturity of the asset, liability and off-balance sheet items

	0-3 months	3 months - 1 year	1-3 years	3-5 years	>5 years
Assets					
Deposits	-	-	-	-	-
Bonds and similar securities	-	-	-	-	-
Debt securities	-	-	-	-	-
Temporary financial securities operations	-	-	-	-	-
Financial accounts	0,02	-	-	-	-
Liabilities					
Temporary financial securities operations	-	-	-	-	-
Financial accounts	-	-	-	-	-
Off-balance sheet					
Hedging operations	-	-	-	-	-
Other operations	-	-	-	7 906 105,00	-

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items

This breakdown is given for the main listing or assessment currencies, with the exception of the currency in which the accounting is maintained.

By main currency	CHF	-	-	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	263 820,61	-	-	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	4 509,61	-	-	-
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet	-	-	-	-
Hedging				
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	
Future currency exchange operations:	-
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
-	-
-	-
-	-
-	-
-	-
Other operations	-
Debts	
Future currency exchange operations	**1 869,51**
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Accrued expenses	1 869,51
-	-
-	-
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	25 900	3 019 425,29	9 000	1 025 807,40
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	**0,25**
Performance commissions (variable fees): amount of costs for the fiscal year	**-**
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	**-**
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees ..... **None**
3.8.2 Description of the other commitments received and/or given ..... **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	**-**
- Other temporary operations	**9 214 660,82**
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	**-**
- bonds	**-**
- debt securities	**-**
- other financial instruments	**-**
Financial estimates given as guarantees and maintained in their original item:	
- equities	**-**
- bonds	**-**
- debt securities	**-**
- other financial instruments	**-**
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (mutual fund) and UCITS managed by these entities:	
- CIU securities	**-**
- Swaps	**9 214 660,82**

3.10 Allocation of the earnings table *(in the Compartment's currency of account)*

Advances paid during the fiscal year

Date	Overall amount	Unit amount	Total tax credits	Unit tax credits
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
Total advances	**-**	**-**	**-**	**-**

	30.10.2015	**31.10.2014**
Allocation of the earnings	EUR	EUR
Sums still to be allocated		
Carried forward	-	-
Earnings	-27 707,69	-50 259,41
Total	**-27 707,69**	**-50 259,41**
Allocation		
Distribution	-	-
Carried forward for the fiscal year	-	-
Capitalisation	-27 707,69	-50 259,41
Total	**-27 707,69**	**-50 259,41**
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Distribution per unit	-	-
Tax credits linked to the allocation of the profit and loss	**-**	**-**

3.11. Allocation table of the amounts available for distribution related to the net capital gains and losses
(in the Compartment's currency of account)

Advances on net capital gains and losses paid for the fiscal year

Date	Overall amount	Unit amount
-	-	-
-	-	-
-	-	-
-	-	-
Total advances	**-**	**-**

	30.10.2015	**31.10.2014**
Allocation of the net capital gains and losses	EUR	EUR
Sums still to be appropriated		
Non-distributed prior net capital gains and losses	-	-
Net capital gains and losses of the fiscal year	-11 146 231,61	568 115,35
Advances paid on net capital gains and losses of the fiscal year	-	-
Total	**-11 146 231,61**	**568 115,35**
Allocation		
Distribution	-	-
Non-distributed net capital gains and losses	-	-
Capitalisation	-11 146 231,61	568 115,35
Total	**-11 146 231,61**	**568 115,35**

Number of equities	-	-
Distribution per unit	-	-

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

currency EUR	**30.10.2015**	31.10.2014	31.10.2013	31.10.2012	31.10.2011
Net assets	**9 212 791,33**	7 027 109,96	14 065 048,41	14 179 135,75	31 265 809,01
Number of outstanding equities	**79 900**	63 000	127 000	147 000	343 000
Net asset value	**115,304**	111,5414	110,7484	96,4567	91,1539
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) [(1)]	-	-	-	-	-
Unit capitalisation [(2)]	**-139,84**	8,21	12,78	-0,65	-0,69

[(1)] In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

[(2)] The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of units in circulation. This calculation method is applied from 1 January 2013.

Compartment creation date: 9 April 2010.

Compartments / feeder	LYXOR UCITS ETF MSCI AC ASIA EX JAPAN CONSUMER STAPLES TR is a compartment of the MULTI UNITS FRANCE mutual fund
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the LYXOR UCITS ETF MSCI AC ASIA EX JAPAN CONSUMER STAPLES TR Compartment (the "Compartment") is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type strategy index fund.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment's management objective is an exposure to the increase or decrease of the equity market for companies in countries in the Asian zone excluding Japan that are active in the field of consumer staples, by reproducing the evolution of the MSCI AC Asia Ex Japan Consumer Staples Total Net Return index (see section "Benchmark Indicator" hereafter), while insofar as possible minimizing the tracking error between the Compartment's performances and those of the MSCI AC Asia Ex Japan Consumer Staples Total Net Return index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.10%.

Benchmark indicator:

The Benchmark indicator is the MSCI AC Asia Ex Japan Consumer Staples Total Net Return index, (net dividends reinvested), listed in US dollars (USD) (the "Benchmark Indicator").

The Benchmark Indicator is an "equities" index that is calculated and published by the international supplier of indices, MSCI Inc. ("MSCI"). The equities included in the composition of the Benchmark Indicator are included amongst the most important securities on the equity markets of the Asian zone countries, excluding Japan, that are active in the consumer staples sector.

The Benchmark Indicator retains the fundamental characteristics of the MSCI indices, namely:

a) Inclusion in the range of MSCI equity indices said to be "investable", segmented by size, style and industry type;

b) Adjustment of the securities included in the index on the basis of the free-float;

c) Sector-based classification according to the GICS (Global Industry Classification Standard) classification.

The MSCI methodology and its calculation method require the Benchmark Indicator to be made up of a variable number of companies.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.msci.com

The monitored performance is that of the Benchmark Indicator, listed in US dollar.

Benchmark Indicator revision and composition

The MSCI indices seek to track equity markets as closely as possible. Accordingly they are regularly revised to account for changes in market capitalisation (number of stocks and free float) or sector classification.

The composition of the Benchmark Indicator is reviewed quarterly.

The exact composition and the revision rules of the Benchmark Indicator are published by MSCI and available on the Internet site: www.msci.com

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark Indicator publication

The Benchmark Indicator is available through Reuters and Bloomberg.

Reuters code: .MIASJCS00NUS Bloomberg code: M1ASJCS

The Benchmark Indicator's closing price is available on the Internet site: www.msci.com

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets).

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
  - Subordination to the main market indices or to the Benchmark Indicator,
  - Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
  - Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
  - Issuer (application of ratios applicable to the eligible assets of a CIU, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
  - Geographical area,
  - Sector.

The equities basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty.

In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.
If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the C-EUR equity classes

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator. Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing for this Compartment wishes to be exposed to the equity market of companies in countries of the Asian zone excluding Japan that are active in the field of consumer staples.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 19 August 2010.*
- *Compartment creation date: 1 September 2010.*

Activity report

The net asset value of the unit LYXOR UCITS ETF MSCI AC ASIA EX JAPAN CONSUMER STAPLES TR - C-EUR of the LYXOR UCITS ETF MSCI AC Asia Ex Japan Consumer Staples TR Compartment shows an evolution of 6.80%* between the 30/09/2014 and 20/10/2015 and stands at EUR 51.4083 on 20/10/2015, resulting in the fund's performance being equal to 38.94% since inception.

The net asset value of the unit LYXOR UCITS ETF MSCI AC ASIA EX JAPAN CONSUMER STAPLES TR - C-USD of the LYXOR UCITS ETF MSCI AC Asia Ex Japan Consumer Staples TR Compartment shows an evolution of -4.30%* over the fiscal year and stands at USD 58.6304 on 30/10/2015, resulting in the fund's performance being equal to 23.60% since inception.

The fund replicates the performance of the MSCI AC ASIA exJP/CS NR index, listed in US dollars (USD), representative of equities of listed companies in the consumer staples sector in the 10 developed and emerging countries of the MSCI All Country Asia ex-Japan region.

This index has shown an evolution of -2.00% over the fiscal year. As the class of LYXOR UCITS ETF MSCI AC ASIA EX JAPAN CONSUMER STAPLES TR - C-EUR is not valued in the index currency, the evolution of their net asset value is subject to an exchange risk. Over the fiscal year, the EUR decreased by 8.39% compared to the USD.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MSCI AC ASIA exJP/CS NR index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the MSCI AC ASIA exJP/CS NR index.

The equities held as assets by the Compartment will notably be equities that make up the MSCI AC ASIA exJP/CS NR index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 5 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0340% for the Compartment. The level of the tracking error for the period was of 0.1%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

appendix

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value.

appendix

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.65% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euros.

appendix

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the LYXOR UCITS ETF MSCI AC ASIA EX JAPAN INFORMATION TECHNOLOGY TR Compartment (the "Compartment") is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment's management objective is an exposure to the increase or decrease of the equity market for companies in countries in the Asian zone excluding Japan that are active in the field of information technologies, by reproducing the evolution of the MSCI AC Asia Ex Japan Information Technology Total Net Return index (see section "Benchmark Indicator" hereafter), while insofar as possible minimizing the tracking error between the Compartment's performances and those of the MSCI AC Asia Ex Japan Information Technology Total Net Return index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.10%.

Benchmark indicator:

The Benchmark indicator is the MSCI AC Asia Ex Japan Information Technology Total Net Return index, (net dividends reinvested), listed in US dollars (USD) (the "Benchmark Indicator").

The Benchmark Indicator is an "equities" index that is calculated and published by the international supplier of indices, MSCI Inc. ("MSCI"). The equities included in the composition of the Benchmark Indicator are included amongst the most important securities on the equity markets of the Asian zone countries, excluding Japan, that are active in the information technologies sector.

The Benchmark Indicator retains the fundamental characteristics of the MSCI indices, namely:

a) Inclusion in the range of MSCI equity indices said to be "investable", segmented by size, style and industry type;

b) Adjustment of the securities included in the index on the basis of the free-float;

c) Sector-based classification according to the GICS (Global Industry Classification Standard) classification.

The MSCI methodology and its calculation method require the Benchmark Indicator to be made up of a variable number of companies.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.mscibarra.com

The monitored performance is that of the Benchmark Indicator, listed in US dollar.

Benchmark Indicator revision and composition

The MSCI indices seek to track equity markets as closely as possible. Accordingly they are regularly revised to account for changes in market capitalisation (number of stocks and free float) or sector classification. The composition of the Benchmark Indicator is reviewed quarterly.

The exact composition and the revision rules of the Benchmark Indicator are published by MSCI and available on the Internet site: www.msci.com

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark Indicator publication

The Benchmark Indicator is available through Reuters and Bloomberg.

Reuters code: .MIASJIT00NUS Bloomberg code: M1ASJIT

The Benchmark Indicator's closing price is available on the Internet site: www.msci.com

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

Investment in the assets of Undertakings for Collective Investment in Transferable Securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
  - Subordination to the main market indices or to the Benchmark Indicator,
  - Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
  - Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
  - Issuer (application of ratios applicable to the eligible assets of a CIU, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
  - Geographical area,
  - Sector.

The equities basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.
If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the C-EUR equity classes

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator. Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing for this Compartment wishes to be exposed to the equity market of companies in countries of the Asian zone excluding Japan that are active in the field of information technologies.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

Activity report

The net asset value of the unit LYXOR UCITS ETF MSCI AC ASIA EX JAPAN INFORMATION TECHNOLOGY TR - C-EUR of the LYXOR UCITS ETF MSCI AC Asia Ex Japan Information Technology TR Compartment shows an evolution of 13.95%* between the 30/09/2014 and 20/01/2015 and stands at EUR 32.9109 on 20/01/2015, resulting in the fund's performance being equal to 89.00% since inception.

The net asset value of the unit LYXOR UCITS ETF MSCI AC ASIA EX JAPAN INFORMATION TECHNOLOGY TR - C-USD of the LYXOR UCITS ETF MSCI AC Asia Ex Japan Consumer Staples TR Compartment shows an evolution of -5.29%* over the fiscal year and stands at USD 35.5525 on 30/10/2015, resulting in the fund's performance being equal to 59.26% since inception.

The fund replicates the performance of the MSCI AC ASIA exJP/IT NR index, listed in US dollars (USD), representative of equities of listed companies in the information technologies sector in the 10 developed and emerging countries of the MSCI All Country Asia ex-Japan region.

This index has shown an evolution of 4.55% over the fiscal year. As the class of LYXOR UCITS ETF MSCI AC ASIA EX JAPAN INFORMATION TECHNOLOGY TR - C-EUR is not valued in the index currency, the evolution of their net asset value is subject to an exchange risk. Over the fiscal year, the EUR decreased by 8.39% compared to the USD.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MSCI AC ASIA exJP/IT NR index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the MSCI AC ASIA exJP/IT NR index.

The equities held as assets by the Compartment will notably be equities that make up the MSCI AC ASIA exJP/IT NR index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 6 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0370% for the Compartment. The level of the tracking error for the period was of 0.1%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

appendix

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.65% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euros.

Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International bonds and other debt securities.

The LYXOR UCITS ETF IBOXX $ TREASURIES 1-3Y (DR) Compartment (hereafter the "Compartment") is continuously exposed to rate securities listed in currencies other than euros (and possibly to rate securities listed in euros).

The Compartment is an UCITS ETF type index fund. The exposure to the equity risk does not exceed 10% of the net assets.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is to replicate, downwards and upwards, the evolution of the Markit Iboxx USD Treasuries 1-3 Mid Price TCA index (the "Benchmark Indicator"), listed in USD and representative of American government bonds ("Treasury bonds") whose maturities are comprised between 1 and 3 years.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator of the Compartment is the Markit Iboxx USD Treasuries 1-3 Mid Price TCA index, listed in US Dollar (USD).

The Benchmark Indicator is a "Total Return" type index (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator).

The Benchmark Indicator represents American treasury bills with a maturity of between 1 and 3 years, within the Markit iBoxx USD Index family of indices, an indicator of the main segments of the bond market listed in USD.

The Benchmark Indicator is compiled, administered and managed by Markit.

On 31 August 2010, the price of each bond included in the Benchmark Indicator is provided by 10 major financial institutions: Barclays Capital, BNP Paribas, Deutsche Bank, Dresdner Kleinwort, Goldman Sachs, HSBC, JP Morgan, Morgan Stanley, the Royal Bank of Scotland and UBS.

The Markit methodology and its calculation method require the Benchmark Indicator to be made up of a variable number of companies. The monitored performance is that of the closing prices of the Benchmark Indicator.

Methodology

The Benchmark Indicator is calculated at the end of each index trading day, at 3 pm New York time, and it is reviewed at the end of each month.

The Benchmark Indicator is calculated on the basis of iBoxx prices consolidated on each Benchmark Indicator trading day, as defined in the calendar for iBoxx USD indices calculation, which is compliant with the recommendations of the Bond Market Association (BMA).

The Benchmark Indicator is calculated every trading day in line with the recommendations of the BMA, as well as on the last calendar day of each month.

On each day of price consolidation, the end-of-day buy and sell prices are received by the banks which participate in the Markit iBoxx USD indices, then the calculation of the Benchmark Indicator takes place. The Benchmark Indicator data is published and distributed approximately 2 hours after the contributed prices are received.

Benchmark Indicator publication

The Benchmark Indicator price is fixed daily and available through Reuters and Bloomberg.

Reuters code: .IBXXABXL

Bloomberg code: IBXXABXL

The Benchmark Indicator's closing price is available on the Internet site: www.markit.com

Benchmark Indicator revision

The Benchmark Indicator's composition is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.markit.com

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's website at www.lyxoretf.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the Compartment is managed:	Between 0 and 5
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 10% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: United States of America : from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the manager intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, financial instruments of any kind.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may engage in transactions involving derivatives traded on a regulated market or over the counter.

With respect to derivatives traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

For this purpose the management company may appoint an intermediary (hereinafter the "Agent) to provide the following services in connection with the Compartment's temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment's behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment's annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment's overall operating expenses they have been excluded from ongoing expenses.

If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;

- the identity of the counterparty(ies) involved in these transactions;

- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;

- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs or expenses.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions: any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(a) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(b) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(c) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(d) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

- Liquidity risk (primary market)

Should the Compartment (or, if relevant, one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the bond classes of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment may use Future Financial Instrument (FFI) on an ancillary basis.

In such a case, the Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter. In compliance with the UCITS regulations, the counterparty risk cannot exceed 10% of the total value of the Compartment's assets by counterparty.

When Société Générale is involved as a counterparty of the FFIs and/or a temporary securities transaction, conflicts of interest can arise between the Compartment's management company and the counterparty. The management company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk arising from temporary securities transactions

If a borrower of securities defaults on its obligation there could be a risk that the value of the guarantee received by the Compartment is less than the value of the securities lent. This risk could arise, for example, in the event of (i) an inaccurate valuation of the securities lent and/or (ii) unfavourable market movements and/or (iii) the lowering of the credit rating(s) of the issuer(s) of securities taken as guarantee and/or (iv) the illiquidity of the market in which the guarantees received are listed. If cash guarantees are reinvested this could (i) result in leverage that entails a risk of loss and volatility and/or (ii) expose the Compartment to a market that is inappropriate for its investment objective, and/or (iii) generate less income than the amount of guarantees the Compartment must repay. The Compartment could also fail to receive the securities lent by the date specified, which would diminish its capacity to accommodate investor redemptions.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or its FFI's counterparty), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a FFI), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment can enter into transactions involving over-the-counter Future Financial Instrument (FFI), such as swaps, in order to secure the performance of the Benchmark Indicator. These FFI involve various risks, such as These FFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Indicator disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect an FFI and may require an adjustment of the FFI transaction or even its premature termination, which could adversely affect the Compartment's net asset value.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure, whether upward or downward, to the main sections of the market for short-term bonds listed in USD, and in particular to the market for American treasury bills.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is greater than 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 5 November 2010.*
- *Compartment creation date: 10 November 2010.*

Activity report

The net asset value of the LYXOR UCITS ETF IBOXX $ TREASURIES 1-3Y (DR) Compartment shows an evolution of 0.66%* between 31/10/2014 and 30/10/2015 and stands at USD 102.7928 on 30/10/2015, meaning a fund performance of 2.79% since inception.

The fund replicates the performance of the Markit iBoxx USD Treasuries 1- index, listed in US dollars (USD), representative of American government bonds ("Treasury bonds") whose maturities are comprised between 1 and 3 years.

This index has shown an evolution of 0.80% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the Markit iBoxx USD Treasuries 1- index, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Markit iBoxx USD Treasuries 1- index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 2 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.0300% for the Compartment. The level of the tracking error for the period was of 0.10%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	Maximum 0.165% per year

Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None
Cost of temporary purchases and disposals of securities	The amount of the transaction	Maximum 35% of the income obtained from these transactions

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in US Dollars.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.

Financial accounts	-	-	-	-	-
Off-balance sheet					
Hedging operations	-	-	-	-	-
Other operations	-	-	-	-	-

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items

This breakdown is given for the main listing or assessment currencies, with the exception of the currency in which the accounting is maintained.

By main currency	-	-	-	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	-	-	-	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	-	-	-	-
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet	-	-	-	-
Hedging				
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	
Future currency exchange operations:	**5 196 268,92**
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Deferred settlement sales	5 099 815,11
Coupons receivable	96 453,81
-	-
-	-
-	-
Other operations	-
Debts	
Future currency exchange operations:	**5 239 466,74**
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlement purchases	5 222 720,94
Accrued expenses	16 745,80
-	-
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	3 305 000	338 268 062,70	3 300 000	337 533 130,00
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	**0,165**
Performance commissions (variable fees): amount of costs for the fiscal year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees ..... **None**
3.8.2 Description of the other commitments received and/or given ..... **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (mutual fund) and CIU managed by these entities:	
- CIU securities	-
- Swaps	-

3.10 Allocation of the earnings table *(in the Compartment's currency of account)*

Advances paid during the fiscal year

Date	Overall amount	Unit amount	Total tax credits	Unit tax credits
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
Total advances	**-**	**-**	**-**	**-**

	30.10.2015	**31.10.2014**
Allocation of the earnings	USD	USD
Sums still to be allocated		
Carried forward	-	-
Earnings	1 468 748,03	-92 502,10
Total	**1 468 748,03**	**-92 502,10**
Allocation		
Distribution	-	-
Carried forward for the fiscal year	-	-
Capitalisation	1 468 748,03	-92 502,10
Total	**1 468 748,03**	**-92 502,10**
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Distribution per unit	-	-
Tax credits linked to the allocation of the profit and loss	**-**	**-**

3.11. Allocation table of the amounts available for distribution related to the net capital gains and losses
(in the Compartment's currency of account)

Advances on net capital gains and losses paid for the fiscal year

Date	Overall amount	Unit amount
-	-	-
-	-	-
-	-	-
-	-	-
Total advances	**-**	**-**

	30.10.2015	**31.10.2014**
Allocation of the net capital gains and losses	USD	USD
Sums still to be appropriated		
Non-distributed prior net capital gains and losses	-	-
Net capital gains and losses of the fiscal year	-2 632 072,34	-3 258 179,51
Advances paid on net capital gains and losses of the fiscal year	-	-
Total	**-2 632 072,34**	**-3 258 179,51**
Allocation		
Distribution	-	-
Non-distributed net capital gains and losses	-	-
Capitalisation	-2 632 072,34	-3 258 179,51
Total	**-2 632 072,34**	**-3 258 179,51**
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Distribution per unit	-	-

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency USD	**30.10.2015**	31.10.2014	31.10.2013	31.10.2012	31.10.2011
Net assets	**118 725 814,93**	117 441 304,90	21 847 039,77	22 790 095,12	12 129 318,16
Number of outstanding equities	**1 155 001**	1 150 001	215 001	225 001	120 001
Net asset value	**102,7928**	102,1227	101,6136	101,2888	101,0768
Distribution per unit on capital gains and losses (including advances)	**-**	-	-	-	-
Distribution per unit (including advances)	**-**	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) [(1)]	**-**	-	-	-	-
Unit capitalisation [(2)]	**-1,00**	-2,91	-0,19	-0,16	-0,02

[(1)] In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

[(2)] The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 10 November 2010.

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment
France.

Representative of the Swiss Compartment
Société Générale, Paris, Zürich Branch, has been authorised by the FINMA as the Fund's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Compartment, the KIIDs as well as the list of purchases and sales made by the Compartment during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zürich Branch, Talacker 50, P.O. Box 1928, 8021 Zürich.

Calculation of the Total Expense Ratio

Annual closing of the compartment: 31 Oct.

Average fortune of the compartment for the period from 01/11/14 to 30/10/15 : 118 355 634.51

Compartment management commission: 0.165 % tax included

Extract from the profit and loss account

Expenses in euros	Annual report	Half-yearly report	Annual report
	31/10/2014	30/04/2015	30/10/2015

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International bonds and other debt securities.

The LYXOR UCITS ETF IBOXX $ TREASURIES 5-7Y (DR) Compartment (hereafter the "Compartment") is continuously exposed to rate securities listed in currencies other than euros (and possibly to rate securities listed in euros).

The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year.

Management objective:

The Compartment's management objective is to replicate, downwards and upwards, the evolution of the Markit Iboxx USD Treasuries 5-7 Mid Price TCA index (the "Benchmark Indicator"), listed in US dollar (USD) and representative of the performance of the American government bonds ("American Treasury bonds") whose maturities are comprised between 5 and 7 years.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator of the Compartment is the Markit Iboxx USD Treasuries 5-7 Mid Price TCA index, listed in US Dollar (USD).

The Benchmark Indicator is a "Total Return" type index (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator).

The Benchmark Indicator represents American treasury bills with a maturity of between 5 and 7 years, within the Markit iBoxx USD Index family of indices, an indicator of the main segments of the bond market listed in USD.

The Benchmark Indicator is compiled, administered and managed by Markit.

On 31 August 2010, the price of each bond included in the Benchmark Indicator is provided by 10 major financial institutions: Barclays Capital, BNP Paribas, Deutsche Bank, Dresdner Kleinwort, Goldman Sachs, HSBC, JP Morgan, Morgan Stanley, the Royal Bank of Scotland and UBS.

The Markit methodology and its calculation method involve a variable number of companies cooperating for the determination of the Benchmark Indicator. The monitored performance is that of the closing prices of the Benchmark Indicator.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components will be available at the latest in February 2014, at the following Internet site: www.markit.com/.

Methodology

The Benchmark Indicator is calculated at the end of each trading day, at 3 p.m. New York time.

The Benchmark Indicator is calculated on the basis of iBoxx prices consolidated on each Benchmark Indicator trading day, as defined in the calendar for iBoxx USD indices calculation, which is compliant with the recommendations of the Bond Market Association (BMA).

The Benchmark Indicator is calculated every trading day in line with the recommendations of the BMA, as well as on the last calendar day of each month.

On each day of price consolidation, the end-of-day buy and sell prices are received by the banks which participate in the Markit iBoxx USD indices, then the calculation of the Benchmark Indicator takes place. The Benchmark Indicator data is published and distributed approximately 2 hours after the contributed prices are received.

Benchmark Indicator publication

The Benchmark Indicator price is fixed daily and available through Reuters and Bloomberg.

Reuters code: .IBXXABXN Bloomberg code: IBXXABXN

Benchmark Indicator revision

The Benchmark Indicator's composition is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's website at www.lyxoretf.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the Compartment is managed:	Between 4 and 10
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 10% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets

Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: United States of America : from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the manager intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, financial instruments of any kind.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may engage in transactions involving derivatives traded on a regulated market or over the counter.

With respect to derivatives traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

For this purpose the management company may appoint an intermediary (hereinafter the "Agent) to provide the following services in connection with the Compartment's temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment's behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment's annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment's overall operating expenses they have been excluded from ongoing expenses.

If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;

- the identity of the counterparty(ies) involved in these transactions;

- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;

- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct

and indirect operating costs or expenses.

8. Financial guarantees

When the Compartment lends or otherwise temporarily disposes of securities it must receive guarantees in the form of securities and/or cash to reduce the counterparty risk associated with these transactions. .

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) any non-cash guarantee received must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

The Compartment's Management Company must be able to fully realise them at any time, without consultation with the (e) counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including liquidity, short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment in the event of temporary securities transactions.. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

An additional discount may be applied to guarantees received in another currency than the euro.

Reinvestment of received guarantees:

The non-cash financial guarantees received will not be sold, reinvested or pledged.

At the manager's discretion, cash guarantees may either be:

(i) Deposited in an authorised institution

(ii) Invested in high-quality government bonds

(iii) Used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the compartment is able to withdraw the total amount of its cash guarantees and the accrued interest at any time.

(iv) Invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

The reinvestment of cash guarantees must meet the diversification requirements that apply to non-cash guarantees.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

- Liquidity risk (primary market)

Should the Compartment (or, if relevant, one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the equities classes of the Compartment on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment may use FFI on an ancillary basis. In such a case, the Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter. In compliance with the UCITS regulations, the counterparty risk cannot exceed 10% of the total value of the Compartment's assets by counterparty.

When Société Générale is involved as a counterparty of the FFIs and/or a temporary securities transaction, conflicts of interest can arise between the Compartment's Management Company and the counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk arising from temporary securities transactions

If a borrower of securities defaults on its obligation there could be a risk that the value of the guarantee received by the Compartment is less than the value of the securities lent. This risk could arise, for example, in the event of (i) an inaccurate valuation of the securities lent and/or (ii) unfavourable market movements and/or (iii) the lowering of the credit rating(s) of the issuer(s) of securities taken as guarantee and/or (iv) the illiquidity of the market in which the guarantees received are listed. If cash guarantees are reinvested this could (i) result in leverage that entails a risk of loss and volatility and/or (ii) expose the Compartment to a market that is inappropriate for its investment objective, and/or (iii) generate less income than the amount of guarantees the Compartment must repay. The Compartment could also fail

to receive the securities lent by the date specified, which would diminish its capacity to accommodate investor redemptions.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or its FFI's counterparty), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the Benchmark Indicator is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the Benchmark Indicator makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a FFI), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment can enter into transactions involving over-the-counter Future Financial Instrument (FFI), such as swaps, in order to secure the performance of the Benchmark Indicator. These FFI involve various risks, such as These FFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Indicator disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect an FFI and may require an adjustment of the FFI transaction or even its premature termination, which could adversely affect the Compartment's net asset value.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure, whether upward or downward, to the main sections of the market for bonds listed in USD.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is greater than 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 5 November 2010.*
- *Compartment creation date: 10 November 2010.*

Activity report

The net asset value of the LYXOR UCITS ETF IBOXX $ TREASURIES 5-7Y (DR) Compartment shows an evolution of 3.19%* between 31/10/2014 and 30/10/2015 and stands at USD 112.7878 on 30/10/2015, meaning a fund performance of 12.79% since inception.

The fund replicates the performance of the Markit iBoxx USD Treasuries 5- index, listed in US dollars (USD), representative of American government bonds ("Treasury bonds") whose maturities are comprised between 5 and 7 years.

This index has shown an evolution of 3.31% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the Markit iBoxx USD Treasuries 5- index, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Markit iBoxx USD Treasuries 5- index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 3 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.0550% for the Compartment. The level of the tracking error for the period was of 0.10%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the UCITS that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

appendix

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial manager by delegation.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	Maximum 0.165% per year

Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None
Cost of temporary purchases and disposals of securities	The amount of the transaction	Maximum 35% of the income obtained from these transactions

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in US Dollars.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.

Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	-	-	-	-
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet	-	-	-	-
Hedging				
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	
Future currency exchange operations:	**4 810 195,38**
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Subscriptions receivable	2 815 872,50
Deferred settlement sales	1 960 683,13
Coupons receivable	33 639,75
-	-
-	-
Other operations	-
Debts	
Future currency exchange operations:	**2 002 408,89**
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlement purchases	1 996 679,49
Accrued expenses	5 729,40
-	-
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	705 000	78 615 422,50	515 000	57 073 679,50
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	**0,17**
Performance commissions (variable fees): amount of costs for the fiscal year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees ..... **None**
3.8.2 Description of the other commitments received and/or given ..... **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (mutual fund) and CIU managed by these entities:	
- CIU securities	-
- Swaps	-

3.10 Allocation of the earnings table *(in the Compartment's currency of account)*

Advances paid during the fiscal year

Date	Overall amount	Unit amount	Total tax credits	Unit tax credits
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
Total advances	**-**	**-**	**-**	**-**

	30.10.2015	**31.10.2014**
Allocation of the earnings	USD	USD
Sums still to be allocated		
Carried forward	-	-
Earnings	800 956,74	918,53
Total	**800 956,74**	**918,53**
Allocation		
Distribution	-	-
Carried forward for the fiscal year	-	-
Capitalisation	800 956,74	918,53
Total	**800 956,74**	**918,53**
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Distribution per unit	-	-
Tax credits linked to the allocation of the profit and loss	**-**	**-**

3.11. Allocation table of the amounts available for distribution related to the net capital gains and losses
(in the Compartment's currency of account)

Advances on net capital gains and losses paid for the fiscal year

Date	Overall amount	Unit amount
-	-	-
-	-	-
-	-	-
-	-	-
Total advances	**-**	**-**

	30.10.2015	**31.10.2014**
Allocation of the net capital gains and losses	USD	USD
Sums still to be appropriated		
Non-distributed prior net capital gains and losses	-	-
Net capital gains and losses of the fiscal year	-433 140,33	1 233 125,90
Advances paid on net capital gains and losses of the fiscal year	-	-
Total	**-433 140,33**	**1 233 125,90**
Allocation		
Distribution	-	-
Non-distributed net capital gains and losses	-	-
Capitalisation	-433 140,33	1 233 125,90
Total	**-433 140,33**	**1 233 125,90**
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Distribution per unit	-	-

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency USD	**30.10.2015**	31.10.2014	31.10.2013	31.10.2012	31.10.2011
Net assets	**42 408 330,16**	20 329 369,16	7 515 191,98	8 171 513,77	12 566 113,58
Number of outstanding equities	**376 001**	186 001	70 001	75 001	120 001
Net asset value	**112,7878**	109,297	107,3583	108,952	104,7167
Distribution per unit on capital gains and losses (including advances)	**-**	-	-	-	-
Distribution per unit (including advances)	**-**	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) [(1)]	**-**	-	-	-	-
Unit capitalisation [(2)]	**0,97**	6,63	-1,62	-0,17	-0,02

[(1)] In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

[(2)] The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 10 November 2010.

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment
France.

Representative of the Swiss Compartment
Société Générale, Paris, Zürich Branch, has been authorised by the FINMA as the Fund's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Compartment, the KIIDs as well as the list of purchases and sales made by the Compartment during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zürich Branch, Talacker 50, P.O. Box 1928, 8021 Zürich.

Calculation of the Total Expense Ratio

Annual closing of the compartment: 31 Oct.

Average fortune of the compartment for the period from 01/11/14 to: 29 006 163.72

Compartment management commission: 0.165 % tax included

Extract from the profit and loss account

Expenses in euros	Annual report	Half-yearly report	Annual report
	31/10/2014	30/04/2015	30/10/2015
Compartment management commission	18 094.37	19 545.61	47 852.63

Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International bonds and other debt securities.

The LYXOR UCITS ETF IBOXX $ TREASURIES 10Y + (DR) Compartment (hereafter the "Compartment") is continuously exposed to rate securities listed in currencies other than euros (and possibly to rate securities listed in euros).

The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year.

Management objective:

The Compartment's management objective is to replicate, downwards and upwards, the evolution of the Markit Iboxx USD Treasuries 10+ Mid Price TCA index (the "Benchmark Indicator"), listed in USD and representative of the American government bonds ("Treasury bonds") with maturities of more than 10 years.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator of the Compartment is the Markit Iboxx USD Treasuries 10+ Mid Price TCA index, listed in US Dollar (USD).

The Benchmark Indicator is a "Total Return" type index (i.e. all coupons detached by the components of the index are reinvested in the Benchmark Indicator).

The Benchmark Indicator represents American treasury bills with a maturity of more than 10 years, within the Markit iBoxx USD family of indices, an indicator of the main segments of the bond market listed in USD.

The Benchmark Indicator is compiled, administered and managed by Markit.

On 31 August 2010, the price of each bond included in the index is provided by 10 major financial institutions: Barclays Capital, BNP Paribas, Deutsche Bank, Dresdner Kleinwort, Goldman Sachs, HSBC, JP Morgan, Morgan Stanley, the Royal Bank of Scotland and UBS.

The Markit methodology and its calculation method require the Benchmark Indicator to be made up of a variable number of companies. On 24/08/2010 the Benchmark Indicator included 35 constituents.

The complete methodology for the Benchmark Indicator is available on the site www.markit.com.

The monitored performance is that of the closing prices of the Benchmark Indicator.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.markit.com/.

Methodology

The Benchmark Indicator is calculated at the end of each trading day, at 3 p.m. New York time.

The Benchmark Indicator is calculated on the basis of iBoxx prices consolidated on each Benchmark Indicator trading day, as defined in the calendar for iBoxx USD indices calculation, which is compliant with the recommendations of the Bond Market Association (BMA).

The Benchmark Indicator is calculated every trading day in line with the recommendations of the BMA, as well as on the last calendar day of each month.

On each day of price consolidation, the end-of-day buy and sell prices are received by the banks which participate in the Markit iBoxx USD indices, then the calculation of the Benchmark Indicator takes place. The Benchmark Indicator data is published and distributed approximately 2 hours after the contributed prices are received.

Benchmark Indicator publication

The Benchmark Indicator price is fixed daily and available through Reuters and Bloomberg.

Reuters code: .IBXXABXJ Bloomberg code: IBXXABXJ

The Benchmark Indicator's closing price is available on the Internet site: www.markit.com/indices

Benchmark Indicator revision

The Benchmark Indicator's composition is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available on the Markit iBoxx Limited Internet site: www.markit.com/indices.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's website at www.lyxoretf.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the Compartment is managed:	Between 9 and 25
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 10% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: United States of America : from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the manager intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, financial instruments of any kind.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may engage in transactions involving derivatives traded on a regulated market or over the counter.

With respect to derivatives traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

For this purpose the management company may appoint an intermediary (hereinafter the "Agent) to provide the following services in connection with the Compartment's temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment's behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment's annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment's overall operating expenses they have been excluded from ongoing expenses.

If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;

- the identity of the counterparty(ies) involved in these transactions;

- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;

- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs or expenses.

8. Financial guarantees

When the Compartment lends or otherwise temporarily disposes of securities it must receive guarantees in the form of securities and/or cash to reduce the counterparty risk associated with these transactions. .

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) any non-cash guarantee received must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

The Compartment's Management Company must be able to fully realise them at any time, without consultation with the (e) counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including liquidity, short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment in the event of temporary securities transactions.. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

An additional discount may be applied to guarantees received in another currency than the euro.

Reinvestment of received guarantees:

The non-cash financial guarantees received will not be sold, reinvested or pledged.

At the manager's discretion, cash guarantees may either be:

(i) Deposited in an authorised institution

(ii) Invested in high-quality government bonds

(iii) Used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the compartment is able to withdraw the total amount of its cash guarantees and the accrued interest at any time.

(iv) Invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

The reinvestment of cash guarantees must meet the diversification requirements that apply to non-cash guarantees.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

- Liquidity risk (primary market)

Should the Compartment (or, if relevant, one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the equities classes of the Compartment on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment may use FFI on an ancillary basis. In such a case, the Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter. In compliance with the UCITS regulations, the counterparty risk cannot exceed 10% of the total value of the Compartment's assets by counterparty.

When Société Générale is involved as a counterparty of the FFIs and/or a temporary securities transaction, conflicts of interest can arise between the Compartment's Management Company and the counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk arising from temporary securities transactions

If a borrower of securities defaults on its obligation there could be a risk that the value of the guarantee received by the Compartment is less than the value of the securities lent. This risk could arise, for example, in the event of (i) an inaccurate valuation of the securities lent and/or (ii) unfavourable market movements and/or (iii) the lowering of the credit rating(s) of the issuer(s) of securities taken as guarantee and/or (iv) the illiquidity of the market in which the guarantees received are listed. If cash guarantees are reinvested this could (i) result in leverage that entails a risk of loss and volatility and/or (ii) expose the Compartment to a market that is inappropriate for its investment objective, and/or (iii) generate less income than the amount of guarantees the Compartment must repay. The Compartment could also fail to receive the securities lent by the date specified, which would diminish its capacity to accommodate investor redemptions.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or its FFI's counterparty), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the Benchmark Indicator is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the Benchmark Indicator makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the

Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a FFI), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment can enter into transactions involving over-the-counter Future Financial Instrument (FFI), such as swaps, in order to secure the performance of the Benchmark Indicator. These FFI involve various risks, such as These FFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Indicator disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect an FFI and may require an adjustment of the FFI transaction or even its premature termination, which could adversely affect the Compartment's net asset value.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure, whether upward or downward, to the main sections of the market for long-term bonds listed in USD.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is greater than 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 22 November 2010.*
- *Compartment creation date: 10 November 2010.*

Activity report

The net asset value of the LYXOR UCITS ETF IBOXX $ TREASURIES 10Y + (DR) Compartment shows an evolution of 5.17%* between 31/10/2014 and 30/10/2015 and stands at USD 140.2447 on 30/10/2015, meaning a fund performance of 40.24% since inception.

The fund replicates the performance of the Markit iBoxx USD Treasuries 10- index, listed in US dollars (USD), representative of American government bonds ("Treasury bonds") whose maturities are greater than 10 years.

This index has shown an evolution of 5.32% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the Markit iBoxx USD Treasuries 10- index, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Markit iBoxx USD Treasuries 10- index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 5 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.0520% for the Compartment. The level of the tracking error for the period was of 0.10%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial manager by delegation.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	Maximum 0.165% per year

Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None
Cost of temporary purchases and disposals of securities	The amount of the transaction	Maximum 35% of the income obtained from these transactions

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in US Dollars.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year.

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment
France.

Representative of the Swiss Compartment
Société Générale, Paris, Zürich Branch, has been authorised by the FINMA as the Fund's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Compartment, the KIIDs as well as the list of purchases and sales made by the Compartment during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zürich Branch, Talacker 50, P.O. Box 1928, 8021 Zürich.

Calculation of the Total Expense Ratio

Annual closing of the compartment: 31 Oct.

Average fortune of the compartment for the period from 01/11/14 to 30/10/15: 123 696 911.01

Compartment management commission: 0.165 % tax included

Extract from the profit and loss account

Expenses in euros	Annual report	Half-yearly report	Annual report

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International bonds and other debt securities.

The LYXOR UCITS ETF IBOXX £ LIQUID CORPORATES LONG DATED Compartment (hereafter the "Compartment") is continuously exposed to rate securities listed in currencies other than euros (and possibly to rate securities listed in euros).

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is to obtain an exposure, upward or downward, to the main sections of the bond market of the corporate type (i.e. issued by companies), listed in GBP by reproducing the evolution of the Markit iBoxx GBP Liquid Corporates Long Dated Mid Price TCA index (see section "Benchmark Indicator") while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator of the fund is the Markit iBoxx GBP Liquid Corporates Long Dated Mid Price TCA index, listed in GBP.

The Benchmark Indicator is a "Total Return" type index (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator).

The Benchmark Indicator is part of the Markit iBoxx GBP Liquid family of indices that represent the main segments of the market for bonds listed in GBP and that comply with predefined liquidity criteria. The Markit iBoxx GBP Liquid indices are more easily replicable sub-assemblies of the Markit iBoxx GBP family of indices.

In particular, the Benchmark Indicator represents the market of liquid non-government bonds issued in GBP.

The bonds must adhere to a certain number of criteria relative to their type, rating, residual maturity, issue size as well as other liquidity criteria, in order to be eligible for inclusion in the Benchmark Indicator. In particular, bonds with an issue size of under GBP 250 million are not eligible.

Each bond's weight in the Benchmark Indicator is determined by its issue face value relative to the total issue face value of the selected universe.

The coupons detached by the bonds comprising the Benchmark Indicator are accumulated and then reinvested on a monthly frequency, on each rebalancing date.

The Benchmark Indicator is compiled, administered and managed by Markit.

On 31 August 2010, the price of each bond included in the Benchmark Indicator is provided by 10 major financial institutions: Barclays Capital, BNP Paribas, Deutsche Bank, Dresdner Kleinwort, Goldman Sachs, HSBC, JP Morgan, Morgan Stanley, the Royal Bank of Scotland and UBS.

Markit Indices Limited, Markit Group calculates and disseminates these indices.

The Benchmark Indicator is calculated and disseminated once every minute between 8 a.m. and 4:15 p.m. GMT (i.e. between 9 a.m. and 5:15 p.m. Paris time).

The securities leading to an analysis of the bonds comprising the Benchmark Indicator, as well as the Benchmark Indicator itself, are calculated each market day for the Benchmark Indicator, and key statistics are published at the end of each business day for the Benchmark Indicator by IIC at www.indexco.com, which also lists information and current events regarding the iBoxx indices. The real-time quotations of the Benchmark Indicator and of the bonds comprising it are published by Markit Indices Limited, Markit GroupDeutsche Boerse.

The Benchmark Indicator is calculated using real-time prices on each business day. Moreover, the Benchmark Indicator is calculated with the previous day's closing prices on the last calendar day of each month, if this date is not a market day for the Benchmark Indicator. The data regarding the Benchmark Indicator, as well as information relative to the prices of the bonds, are available through the main information suppliers (Bloomberg, Reuters …).

The monitored performance is that of the closing prices of the Benchmark Indicator.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.markit.com

Benchmark Indicator publication

The Benchmark Indicator is calculated daily at the official closing price of the exchanges where the index constituents are listed.

The Benchmark Indicator is also calculated in real-time on each trading day.

The Benchmark Indicator is available in real-time via Reuters and Bloomberg.

Reuters code: .IBXXGBMT

Bloomberg code: IBXXGBMT

Benchmark Indicator revision

The Benchmark Indicator is reviewed every month to take into account changes that affect each of the securities in the Benchmark Indicator universe. All costs with respect to this are taken into account when valuing the Benchmark Indicator.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the Compartment will notably be securities that make up the Benchmark Indicator, as well as bonds issued by an OECD member State or bonds issued by non-governmental issuers in one of the currency of an OECD member State.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by a non-sovereign issuing entity. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing debt and/or that could affect an issuing credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Interest rate sensitivity range within which the Compartment is managed:	Between 2 and 12

Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: Up to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international bond securities. The aforementioned equities will be bonds chosen on the basis of criteria:

- Of eligibility, in particular:

o Senior debt,

o Fixed maturity,

o Maximum residual maturity,

o Minimum issuing amount,

o Requirement of a minimal threshold in S&P rating or equivalent.

- Of diversification, in particular:

o Issuer (application of ratios applicable to the eligible assets of an UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),

o Geographical area,

o Sector.

The bonds basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

For more information on the abovementioned eligibility and diversification criteria investors can visit the following Internet site: www.lyxoretf.com.

Information relative to the (i) updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the forward exchange operation entered into by the Compartment, are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None.

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument ("FFI")) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the bond classes of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator by counterparty.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's management company and the FFI's counterparty. The management company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the bonds.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.
If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile: The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the main sections of the corporate bond market listed in GBP.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 5 November 2010.*
- *Compartment creation date: 10 November 2010.*

Activity report

The net asset value of the LYXOR UCITS ETF IBOXX £ LIQUID CORPORATES LONG DATED Compartment shows an evolution of 2.67%* between 31/10/2014 and 30/10/2015 and stands at GBP 132.445 on 30/10/2015, meaning a fund performance of 32.45% since inception.

The fund replicates the performance of the Markit iBoxx GBP Liquid Corpor index, listed in pound sterling (GBP), representative of the market of liquid non-government bonds issued in GBP in particular.

This index has shown an evolution of 2.84% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the Markit iBoxx GBP Liquid Corpor index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Markit iBoxx GBP Liquid Corpor index.

The equities held as assets by the Compartment will notably be equities that make up the Markit iBoxx GBP Liquid Corpor index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 4 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0020% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	Maximum 0.20% per year

Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in pound sterling (GBP).

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International bonds and other debt securities.

The LYXOR UCITS ETF iBoxx £ GILTS (DR) Compartment (hereafter the "Compartment") is continuously exposed to rate securities listed in currencies other than euros (and possibly to rate securities listed in euros).

The exposure to the equity risk does not exceed 10% of the net assets. The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year.

Management objective:

The Compartment's management objective is to replicate, downwards and upwards, the evolution of the Markit Iboxx GBP Gilts Mid Price TCA index (hereafter the "Benchmark Indicator"), listed in GBP and representative of the market of British government bonds listed in GBP.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator of the Compartment is the Markit Iboxx GBP Gilts Mid Price TCA index, listed in GBP.

The Benchmark Indicator is a "Total Return" type index (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator).

The Benchmark Indicator is part of the Markit iBoxx GBP Index family of indices that represent the main segments of the market for bonds listed in GBP. In particular, the Benchmark Indicator represents the market of British government bonds issued in GBP.

The bonds must adhere to a certain number of criteria relative to their type, rating, residual maturity as well as issue size, in order to be eligible for inclusion in the Benchmark Indicator. In particular, bonds with an issue size of under GBP 2 billion are not eligible.

Each bond's weight in the index is determined, among others, by its issue size.

Each bond's weight in the Benchmark Indicator is determined by its issue face value relative to the total issue face value of the selected universe.

The coupons detached by the bonds comprising the Benchmark Indicator are accumulated and then reinvested on a monthly frequency, on each rebalancing date.

The Markit methodology and its calculation method require the Benchmark Indicator to be made up of a variable number of companies. As at 24/08/2010 the Markit iBoxx £ Gilts comprised 34 constituents.

The Benchmark Indicator is compiled, administered and managed by Markit.

On 31 August 2010, the price of each bond included in the Benchmark Indicator is provided by 10 major financial institutions: Barclays Capital, BNP Paribas, Deutsche Bank, Dresdner Kleinwort, Goldman Sachs, HSBC, JP Morgan, Morgan Stanley, the Royal Bank of Scotland and UBS.

Markit Indices Limited, Markit Group calculates and disseminates these indices.

The Benchmark Indicator is calculated and disseminated once every minute between 8 a.m. and 4:15 p.m. GMT (i.e. between 9 a.m. and 5:15 p.m. Paris time).

The securities leading to an analysis of the bonds comprising the Benchmark Indicator, as well as the Benchmark Indicator itself, are calculated each market day for the Benchmark Indicator, and key statistics are published at the end of each business day for the Benchmark Indicator by IIC at www.indexco.com, which also lists information and current events regarding the iBoxx indices. The real-time quotations of the Benchmark Indicator and of the bonds comprising it are published by Markit Indices Limited, Markit Group.

The Benchmark Indicator is calculated using real-time prices on each business day. Moreover, the Benchmark Indicator is calculated with the previous day's closing prices on the last calendar day of each month, if this date is not a market day for the Benchmark Indicator. The Benchmark Indicator is constructed on a basis established as at 31 December 1997. The data regarding the Benchmark Indicator, as well as information relative to the prices of the bonds, are available through the main information suppliers (Bloomberg, Reuters …).

The monitored performance is that of the closing prices of the Benchmark Indicator.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.markit.com

Benchmark Indicator publication

The Benchmark Indicator is calculated daily at the official closing price of the exchanges where the index constituents are listed.

The Benchmark Indicator is available in real-time via Reuters and Bloomberg.

Reuters code: .IBXXABXF

Bloomberg code: IBXXABXF

Benchmark Indicator revision

The Benchmark Indicator is reviewed every month to take into account changes that affect each of the securities in the Benchmark Indicator universe. All costs with respect to this are taken into account when valuing the Benchmark Indicator.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's website at www.lyxoretf.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the Compartment is managed:	Between 2 and 12
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 10% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: United Kingdom: from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the manager intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, financial instruments of any kind.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may engage in transactions involving derivatives traded on a regulated market or over the counter.

With respect to derivatives traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

For this purpose the management company may appoint an intermediary (hereinafter the "Agent) to provide the following services in connection with the Compartment's temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment's behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment's annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment's overall operating expenses they have been excluded from ongoing expenses.

If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;

- the identity of the counterparty(ies) involved in these transactions;

- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;

- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs or expenses.

8. Financial guarantees

When the Compartment lends or otherwise temporarily disposes of securities it must receive guarantees in the form of securities and/or cash to reduce the counterparty risk associated with these transactions.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) any received non-cash guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

• such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

• such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including liquidity, short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment in the event of temporary securities transactions. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

An additional discount may be applied to collateral received in another currency than the euro.

Reinvestment of received guarantees:

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

(i) Deposited in an authorised institution

(ii) Invested in high-quality government bonds

(iii) Used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the compartment is able to withdraw the total amount of its cash collateral and the accrued interest at any time.

(iv) Invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

(v) The reinvestment of cash collateral must meet the diversification requirements that apply to non-cash collateral.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

- Liquidity risk (primary market)

Should the Compartment (or, if relevant, one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the equity classes of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment may use Future Financial Instrument (FFI) on an ancillary basis.

In such a case, the Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter. In compliance with the UCITS regulations, the counterparty risk cannot exceed 10% of the total value of the Compartment's assets by counterparty.

When Société Générale is involved as a counterparty of the FFIs and/or a temporary securities transaction, conflicts of interest can arise between the Compartment's management company and the counterparty. The management company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk arising from temporary securities transactions

If a borrower of securities defaults on its obligation there could be a risk that the value of the guarantee received by the Compartment is less than the value of the securities lent. This risk could arise, for example, in the event of (i) an inaccurate valuation of the securities lent and/or (ii) unfavourable market movements and/or (iii) the lowering of the credit rating(s) of the issuer(s) of securities taken as guarantee and/or (iv) the illiquidity of the market in which the guarantees received are listed. If cash guarantees are reinvested this could (i) result in leverage that entails a risk of loss and volatility and/or (ii) expose the Compartment to a market that is inappropriate for its investment objective, and/or (iii) generate less income than the amount of guarantees the Compartment must repay. The Compartment could also fail to receive the securities lent by the date specified, which would diminish its capacity to accommodate investor redemptions.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or its FFI's counterparty), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment can enter into transactions involving over-the-counter Future Financial Instrument (FFI), such as swaps, in order to secure the performance of the Benchmark Indicator. These FFI involve various risks, such as These FFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Indicator disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect an FFI and may require an adjustment of the FFI transaction or even its premature termination, which could adversely affect the Compartment's net asset value.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure, whether upward or downward, to the main sections of the British government bond market listed in GBP.

An investor subscribing to this Compartment wishes to obtain an exposure to the performance, whether upward or downward, of inflation-indexed eurozone government bond markets.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is greater than 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 5 November 2010.*
- *Compartment creation date: 10 November 2010.*

Activity report

The net asset value of the LYXOR UCITS ETF IBOXX £ GILTS (DR) Compartment shows an evolution of 5.62%* between 31/10/2014 and 30/10/2015 and stands at GBP 131.243 on 30/10/2015, meaning a fund performance of 31.24% since inception.

The fund replicates the performance of the Markit iBoxx GBP Gilts Mid Pri index, listed in Pound Sterling (GBP), and is part of the range of indexes Markit iBoxx GBP Index representing the main sectors of the bond market listed in GBP. The index iBoxx £ Gilts represents, in particular, the British Government bond market, issued in GBP. The bonds must respect a certain number of criteria relating to their type, their rating, their residual maturity as well as their issue amount in order to be eligible for inclusion in the index.

This index has shown an evolution of 5.77% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the Markit iBoxx GBP Gilts Mid Pri index, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Markit iBoxx GBP Gilts Mid Pri index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 4 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.0460% for the Compartment. The level of the tracking error for the period was of 0.10%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the

day of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	Maximum 0.18% per year

Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None
Cost of temporary purchases and disposals of securities	The amount of the transaction	Maximum 35% of the income obtained from these transactions

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in in Pound Sterling (GBP).

Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International bonds and other debt securities.

The LYXOR UCITS ETF IBOXX £ GILTS INFLATION LINKED (DR) Compartment (hereafter the "Compartment") is continuously exposed to rate securities listed in currencies other than euros (and possibly to rate securities listed in euros).

The exposure to the equity risk does not exceed 10% of the net assets. The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is to replicate, downwards and upwards, the evolution of the Markit Iboxx UK Gilt Inflation Linked Mid Price TCA index (hereafter the "Benchmark Indicator"), listed in GBP and representative of the market of British government bonds indexed on the inflation.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator of the Compartment is the Markit Iboxx UK Gilt Inflation Linked Mid Price TCA index, listed in GBP.

The Benchmark Indicator is a "Total Return" type index (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the index).

The Benchmark Indicator represents the market for British government inflation-linked bonds, and is part of the Markit iBoxx Inflation-linked family of indices that covers the main issues of inflation-linked sovereigns and sub-sovereigns. These indices are based on transparent and objective construction rules, and in keeping with the usual specifications for the iBoxx family of indices.

They notably rely on a price determination by a multi-contributor platform. On 31 August 2010, the prices of each bond included in the Benchmark Indicator are provided by 5 major financial institutions.

The Markit methodology and its calculation method require the Benchmark Indicator to be made up of a variable number of companies. As at 24/08/2010 the Benchmark Indicator comprised 17 constituents.

In order to be eligible for inclusion in the Benchmark Indicator, a bond must adhere to a certain number of criteria relative to their residual maturity and issue size (at least GBP 1 billion).

Each bond's weight in the Benchmark Indicator is determined by its issue face value relative to the total issue face value of the selected universe.

These face values are adjusted by the inflation levels that are used to determine the prices of the bonds comprising the Benchmark Indicator.

The Benchmark Indicator is rebalanced on a monthly frequency.

The prices are supplied by a series of counterparties at 11 a.m. GMT and then at 4:15 p.m. GMT (i.e. 12 p.m. and 5:15 p.m., Paris time) in order to determine a closing price.

The monitored performance is that of the closing prices of the Benchmark Indicator.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.markit.com

Benchmark Indicator publication

The index levels published reflect the daily fixing price (at 4.15 p.m. GMT) and are provided by Bloomberg and Reuters and on the Internet at www.indexco.com

Reuters code: .IBXXABXH Bloomberg code: IBXXABXH

Benchmark Indicator revision and composition

The Benchmark Indicator is reviewed every month to take into account changes that affect each of the securities in the Benchmark Indicator universe. All costs with respect to this are taken into account when valuing the Benchmark Indicator.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's website at www.lyxoretf.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the Compartment is managed:	Between 2 and 25
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 10% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: United Kingdom: from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the manager intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, financial instruments of any kind.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may engage in transactions involving derivatives traded on a regulated market or over the counter.

With respect to derivatives traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

For this purpose the management company may appoint an intermediary (hereinafter the "Agent) to provide the following services in connection with the Compartment's temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment's behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment's annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment's overall operating expenses they have been excluded from ongoing expenses.

If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;

- the identity of the counterparty(ies) involved in these transactions;

- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;

- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs or expenses.

8. Financial guarantees

When the Compartment lends or otherwise temporarily disposes of securities it must receive guarantees in the form of securities and/or cash to reduce the counterparty risk associated with these transactions.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) any received non-cash guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

• such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

• such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including liquidity, short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment in the event of temporary securities transactions. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

An additional discount may be applied to collateral received in another currency than the euro.

Reinvestment of received guarantees:

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

(i) Deposited in an authorised institution

(ii) Invested in high-quality government bonds

(iii) Used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the CIU is able to withdraw the total amount of its cash collateral and the accrued interest at any time.

(iv) Invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

The reinvestment of cash collateral must meet the diversification requirements that apply to non-cash collateral.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management

delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

- Liquidity risk (primary market)

Should the Compartment (or, if relevant, one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the equity classes of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment may use Future Financial Instrument (FFI) on an ancillary basis.

In such a case, the Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter. In compliance with the UCITS regulations, the counterparty risk cannot exceed 10% of the total value of the Compartment's assets by counterparty.

When Société Générale is involved as a counterparty of the FFIs and/or a temporary securities transaction, conflicts of interest can arise between the Compartment's management company and the counterparty. The management company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk arising from temporary securities transactions

If a borrower of securities defaults on its obligation there could be a risk that the value of the guarantee received by the Compartment is less than the value of the securities lent. This risk could arise, for example, in the event of (i) an inaccurate valuation of the securities lent and/or (ii) unfavourable market movements and/or (iii) the lowering of the credit rating(s) of the issuer(s) of securities taken as guarantee and/or (iv) the illiquidity of the market in which the guarantees received are listed. If cash guarantees are reinvested this could (i) result in leverage that entails a risk of loss and volatility and/or (ii) expose the Compartment to a market that is inappropriate for its investment objective, and/or (iii) generate less income than the amount of guarantees the Compartment must repay. The Compartment could also fail to receive the securities lent by the date specified, which would diminish its capacity to accommodate investor redemptions.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or its FFI's counterparty), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment bonds. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment can enter into transactions involving over-the-counter Future Financial Instrument (FFI), such as swaps, in order to secure the performance of the Benchmark Indicator. These FFI involve various risks, such as These FFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Indicator disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect an FFI and may require an adjustment of the FFI transaction or even its premature termination, which could adversely affect the Compartment's net asset value.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure, whether upward or downward, to the main sovereign inflation issues listed in GBP.

An investor subscribing to this Compartment wishes to obtain an exposure to the performance, whether upward or downward, of inflation-indexed eurozone government bond markets.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is greater than 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 5 November 2010.*
- *Compartment creation date: 10 November 2010.*

Activity report

The net asset value of the LYXOR UCITS ETF IBOXX £ GILT INFLATION-LINKED (DR) Compartment shows an evolution of 7.58%* between 31/10/2014 and 30/10/2015 and stands at GBP 149.2359 on 30/10/2015, meaning a fund performance of 49.24% since inception.

The fund replicates the performance of the Markit iBoxx UK Gilt Inflation index, listed in Pound Sterling (GBP), represents the bond market of the British State indexed to inflation and is part of the range of indexes Markit iBoxx Inflation-linked which cover the main inflation-linked sovereign and sub-sovereign debt issues.

This index has shown an evolution of 19.44% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the Markit iBoxx UK Gilt Inflation, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Markit iBoxx UK Gilt Inflation index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 4 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.1980% for the Compartment. The level of the tracking error for the period was of 0.20%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The financial manager by delegation nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The financial manager by delegation nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future

financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The financial manager by delegation independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the financial manager by delegation's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Equities classes and equities of Collective Investment Undertakings operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Equities classes and equities of AIF operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the financial management delegatee's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of the closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate

Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	Maximum 0.22% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None
Cost of temporary purchases and disposals of securities	The amount of the transaction	Maximum 35% of the income obtained from these transactions

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in in Pound Sterling (GBP).

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

appendix

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency GBP	**30.10.2015**	31.10.2014	31.10.2013	31.10.2012	31.10.2011
Net assets	**11 640 554,27**	11 791 141,71	8 922 179,00	2 381 335,86	11 383 765,35
Number of outstanding equities	**78 001**	85 001	70 001	20 001	100 001
Net asset value	**149,2359**	138,7176	127,4578	119,0608	113,8365
Distribution per unit on capital gains and losses (including advances)	**-**	-	-	-	-
Distribution per unit (including advances)	**-**	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) [(1)]	**-**	-	-	-	-
Unit capitalisation [(2)]	**3,09**	6,74	8,65	-0,26	-0,18

[(1)] In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

[(2)] The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 10 November 2010.

Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International bonds and other debt securities.

The LYXOR UCITS ETF IBOXX $ LIQUID EMERGING MARKETS SOVEREIGNS Compartment (hereafter the "Compartment") is continuously exposed to rate securities listed in currencies other than euros (and possibly to rate securities listed in euros). The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is to obtain an exposure, upward or downward, to the bonds listed in USD and issued by the sovereign states of low or middle income countries by reproducing the evolution of the Markit iBoxx USD Liquid Emerging Markets Sovereigns Mid Price TCA index ("Benchmark Indicator") while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator includes some of the most liquid bonds within the Markit iBoxx USD Liquid Emerging Markets Sovereigns Mid Price TCA index. It contains bonds listed in USD and that have been issued by the sovereign states of low income or middle income countries as determined by the World Bank (this classification is available from the site www.worldbank.org). The index represents 20 countries.

The Benchmark Indicator is a "Total Return" type index (i.e. all coupons detached by the components of the index are reinvested in the index).

The Benchmark Indicator is based on transparent and objective construction rules, and in keeping with the usual specifications for the iBoxx family of indices.

It notably relies on a price determination by a multi-contributor platform.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.markit.com

Benchmark Indicator revision and composition

The Benchmark Indicator is calculated at the end of each trading day, at 3 p.m. New York time.

The Benchmark Indicator is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark Indicator publication

The Benchmark Indicator fixing price is provide daily by Reuters and Bloomberg.

Reuters code: .IBXXLES1

Bloomberg code: IBXXLES1

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the MF will notably be equities that make up the Benchmark Indicator, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The securities held as assets by the Compartment will notably be bonds that make up the Benchmark Indicator, as well as bonds issued by governmental or non-governmental issuers, listed in one of the currencies of an OECD member State.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an emerging OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Interest rate sensitivity range within which the Compartment is managed:	Between 2 and 12
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: Up to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : Up to 0% of net assets Emerging countries: 0% of net assets

In the present case, the manager intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international bond securities, including the small capitalisation markets.

The aforementioned equities will be bonds chosen on the basis of criteria:

- Of eligibility, in particular:

o Senior debt,

o Fixed maturity,

o Maximum residual maturity,

o Minimum issuing amount,

o Requirement of a minimal threshold in S&P rating or equivalent.

- Of diversification, in particular:

o Issuer (application of ratios applicable to the eligible assets of an UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),

o Geographical area,

o Sector.

The bonds basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The investment on collective investment undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net assets. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected.

This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for future financial instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the equity classes of the Compartment on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's management company and the FFI's counterparty. The management company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss than would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the Benchmark Indicator.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the bonds.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the main sections of the market for bonds listed in USD issued by sovereign states of low or middle income countries according to the World Bank classification.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

Activity report

The net asset value of the LYXOR UCITS ETF IBOXX $ LIQUID EMERGING MARKETS SOVEREIGNS Compartment shows an evolution of -1.73%* between the 31/10/2014 and 30/10/2015 and stands at USD 100.5194 on 30/10/2015, meaning a fund performance of 21.36% since inception.

The fund replicates the performance of the Markit iBoxx USD Liquid Emergi index, listed in US dollars (USD), representative of the emerging States public debt, listed in USD.

This index has shown an evolution of -1.88% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the Markit iBoxx USD Liquid Emergi index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Markit iBoxx USD Liquid Emergi index.

The equities held as assets by the Compartment will notably be equities that make up the Markit iBoxx USD Liquid Emergi index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 4 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0020% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

appendix

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market

value on the day before the day of calculation of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CUI operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.
- The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.30% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in US Dollars.

Other operations	74 100 000,00	-	-	-	-

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items

This breakdown is given for the main listing or assessment currencies, with the exception of the currency in which the accounting is maintained.

By main currency	-	-	-	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	-	-	-	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	-	-	-	-
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet	-	-	-	-
Hedging				
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	
Future currency exchange operations:	**4 777 779,46**
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Account receivable	2 445 479,63
Deferred settlement sales	2 332 299,83
-	-
-	-
-	-
Other operations	-
Debts	
Future currency exchange operations	**4 796 675,59**
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlement purchases	2 445 479,63
Account payable	2 332 299,83
Accrued expenses	18 896,13
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	793 000	82 684 461,30	1 460 000	151 292 290,50
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	**0,30**
Performance commissions (variable fees): amount of costs for the fiscal year	**-**
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	**-**
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees ..... **None**
3.8.2 Description of the other commitments received and/or given ..... **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (mutual fund) and UCITS managed by these entities:	
- CIU securities	-
- Swaps	**-169 746,49**

3.10 Allocation of the earnings table *(in the Compartment's currency of account)*

Advances paid during the fiscal year

Date	Overall amount	Unit amount	Total tax credits	Unit tax credits
08/07/15	7 312 800,00	6,60	-	-

-	-	-	-	-
-	-	-	-	-
Total advances	**7 312 800,00**	**6,60**	**-**	**-**

	30.10.2015	31.10.2014
Allocation of the earnings	USD	USD
Sums still to be allocated		
Carried forward	-	-
Earnings	1 340 542,29	3 376 754,87
Total	**1 340 542,29**	**3 376 754,87**
Allocation		
Distribution	-	-
Carried forward for the fiscal year	-	-
Capitalisation	1 340 542,29	3 376 754,87
Total	**1 340 542,29**	**3 376 754,87**
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Distribution per unit	-	-
Tax credits linked to the allocation of the profit and loss	**-**	**-**

3.11. Allocation table of the amounts available for distribution related to the net capital gains and losses
(in the Compartment's currency of account)

Advances on net capital gains and losses paid for the fiscal year

Date	Overall amount	Unit amount
-	-	-
-	-	-
-	-	-
-	-	-
Total advances	**-**	**-**

	30.10.2015	**31.10.2014**
Allocation of the net capital gains and losses	USD	USD
Sums still to be appropriated		
Non-distributed prior net capital gains and losses	-	-
Net capital gains and losses of the fiscal year	-8 106 030,69	-6 503 916,77
Advances paid on net capital gains and losses of the fiscal year	-	-
Total	**-8 106 030,69**	**-6 503 916,77**
Allocation		
Distribution	-	-
Non-distributed net capital gains and losses	-	-
Capitalisation	-8 106 030,69	-6 503 916,77
Total	**-8 106 030,69**	**-6 503 916,77**
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Distribution per unit	-	-

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency USD	**30.10.2015**	31.10.2014	31.10.2013	31.10.2012	31.10.2011
Net assets	**74 484 879,23**	153 639 275,27	80 935 396,04	62 423 919,09	50 569 092,60
Number of outstanding equities	**741 000**	1 408 000	752 000	510 000	480 000
Net asset value	**100,5194**	109,1188	107,6268	122,3998	105,3522
Distribution per unit on capital gains and losses (including advances)	**-**	-	-	-	-
Distribution per unit (including advances)	**6,60**	6,10	7,4	-	-
Unit tax credit transferred to unit holders (natural persons) [(1)]	**-**	-	-	-	-
Unit capitalisation [(2)]	**-9,13**	-2,22	-12,9	-0,17	-0,23

[(1)] In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

[(2)] The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of units in circulation. This calculation method is applied from 1 January 2013.

Compartment creation date: 6 December 2010.

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment
France.

Representative of the Swiss Compartment
Société Générale, Paris, Zürich Branch, has been authorised by the FINMA as the Compartment's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Compartment, the KIIDs as well as the list of purchases and sales made by the Compartment during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zürich Branch, Talacker 50, P.O. Box 1928, 8021 Zürich.

Calculation of the Total Expense Ratio

Annual closing of the compartment: 31 Oct.

Average fortune of the compartment for the period from 01/11/14 to 30/10/15 : 119 672 987.07

Compartment management commission: 0.30 % tax included

Extract from the profit and loss account

Expenses in euros	Annual report	Half-yearly report	Annual report
	31/10/2014	30/04/2015	30/10/2015
Compartment management commission	341 293.04	208 167.69	358 063.54

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International bonds and other debt securities.

The LYXOR UCITS ETF IBOXX € LIQUID HIGH YIELD 30 EX-FINANCIAL Compartment (the "Compartment") is continuously exposed to rate securities listed in currencies other than euros (and possibly to rate securities listed in euros).

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year.

Management objective:

The Compartment's management objective is to obtain an exposure to the most liquid sections of the market for high yield corporate-type bonds (i.e. issued by companies) listed in EUR by reproducing the evolution of the Markit iBoxx EUR Liquid High Yield 30 Ex-financial index (see section "Benchmark Indicator") while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator includes 30 of the most liquid bonds within the Markit iBoxx EUR High Yield Core Cum Crossover index representing the universe of high yield non-government bonds listed in euro.

The Benchmark Indicator is a "Total Return" type index (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator).

The bonds must adhere to a certain number of criteria relative to their type, rating, residual maturity, issue size as well as other liquidity criteria, in order to be eligible for inclusion in the Benchmark Indicator. In particular, bonds with an issue size of under EUR 500 million and a residual maturity of less than 15 months are not eligible.

The Benchmark Indicator is rebalanced at the closing of the market each last calendar day of February, May, August and November.

These indices are based on transparent and objective construction rules, and in keeping with the usual specifications for the iBoxx family of indices.

They notably rely on a price determination by a multi-contributor platform.

The Benchmark Indicator comprises liquid bonds from the Markit iBoxx Core EUR High Yield index. The bonds making up the Benchmark Indicator are selected according to the following criteria: type, types of issuers, rating of issuers' country, bonds' rating, ages and residual maturities, and size of issue.

Only bonds issued by non-financial issuers are included in the Benchmark Indicator.

To be eligible, a bond must be rated "sub-investment grade" according to the methodology used by the Markit iBoxx EUR Investment Grade indices, which is based on the average ratings awarded by Fitch, Moody's and S&P, provided that none of these agencies rates this bond CC or lower. Distressed bonds are not eligible.

The coupons from the Benchmark Indicator bonds are accumulated and then reinvested each month at the money market rate and are reinvested in the Benchmark Indicator quarterly, at each rebalancing date.

The Benchmark Indicator targets diversification and representativeness, in terms of both rating and business sectors. The Benchmark Indicator is compiled, administered and managed by Markit.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available on the Internet site: www.markit.com

The performance tracked is the index's daily fixing at 5.15 p.m. CET.

Benchmark Indicator publication

The Benchmark Indicator fixing price is provided daily by Reuters and Bloomberg.

Reuters code: .IBOXLH3T Bloomberg code: IBOXLH3T

Benchmark Indicator revision and composition

The Benchmark Indicator is reviewed monthly to account for changes that may affect the securities in the Benchmark Indicator universe. All costs with respect to this are taken into account when valuing the Benchmark Indicator.

Index Company Limited rules for Benchmark Indicator revision are available on its website at: www.indexco.com

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the Compartment will notably be securities that make up the Benchmark Indicator, as well as bonds issued by an OECD member State or bonds issued by non-governmental issuers in one of the currency of an OECD member State.

The bonds basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by a non-sovereign issuing entity. This 20% limit will be checked at each rebalancing date of the Benchmark Indicator, in compliance with the calculation method of the Benchmark Indicator that limits the exposure of each of components by 20% and whose calculation is ensured by the sponsor or the calculation agent of the benchmark Indicator. This 20% limit may be increased to 35% for a single non-sovereign issuing entity when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant, in case of high volatility of a debt issue, and/or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing entity debt and/or that could affect the credit rating of said issuer, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Interest rate sensitivity range within which the Compartment is managed:	Between 1 and 11
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: Up to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0% to 100% of net assets Emerging countries: 0% of net assets

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international bond securities.

The aforementioned equities will be bonds chosen on the basis of criteria:

- Of eligibility, in particular:

o Senior debt,

o Fixed maturity,

o Maximum residual maturity,

o Minimum issuing amount,

o Requirement of a minimal threshold in S&P rating or equivalent.

- Of diversification, in particular:

o Issuer (application of ratios applicable to the eligible assets of an UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),

o Geographical area,

o Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The investment on collective investment undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net assets. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None.

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected.

This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for future financial instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's management company and the FFI's counterparty. The management company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Index. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the bonds may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the bonds.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.
If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to 30 of the most liquid bonds within the Markit iBoxx EUR High Yield Core Cum Crossover index.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 9 December 2010.*
- *Compartment creation date: 6 January 2011.*

Activity report

The net asset value of the LYXOR UCITS ETF IBOXX EUR LIQUID HIGH YIELD 30 EX-FINANCIAL Compartment shows an evolution of -0.06%* over the fiscal year and stands at EUR 114.9403 on 30/10/2015, meaning a fund performance of 32.43% since inception.

The fund replicates the performance of the Markit iBoxx EUR Liquid High Y index, listed in euro (EUR), representative of the high yield corporate bond market, listed in euro.

This index has shown an evolution of 0.47% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the Markit iBoxx EUR Liquid High Y index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Markit iBoxx EUR Liquid High Y index.

The equities held as assets by the Compartment will notably be equities that make up the Markit iBoxx EUR Liquid High Y index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 4 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0110% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

appendix

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The financial manager by delegation nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The financial manager by delegation nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value.

appendix

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The financial management delegatee independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the responsibility of the financial management delegatee.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Classes of equities in undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Classes of equities and equities of AIF operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the responsibility of the financial management delegatee.
- The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.45% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euro.

appendix

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year.

appendix

The Markit iBoxx EUR Liquid High Yield 30 Ex-Financial index ("the index") referred herein is the property of Markit Indices Limited (the "index sponsor") and is used under licence for the LYXOR UCITS ETF iBoxx € Liquid High Yield 30 Ex-Financial.

The parties agree on the fact that the index sponsor does not approve, propose or recommend the LYXOR UCITS ETF iBoxx € Liquid High Yield 30 Ex-Financial.

The index sponsor provides no explicit or implicit guarantee and explicitly declines all liability (including, without limitation, regarding the commercial value or suitability for a particular use) regarding the index or any data included in or linked to the index, and in particular declines all liability regarding the quality, accuracy and/or exhaustiveness of the index or of the data included in or linked to the index, or the results obtained from the use of the index and/or of its composition at any particular date or moment, or the financial rating of any issuing entity, or any credit event or similar event (however defined) with regard to a bond, in the Index at any particular date or other moment.

The index sponsor cannot be held liable for any reason whatsoever relative to an error involving the index, and the index sponsor is not required to communicate such an error, in the event that it should occur.

Under no circumstance does the index sponsor issue any purchase or sale recommendation regarding the LYXOR UCITS ETF iBoxx € Liquid High Yield 30 Ex-Financial or any opinion with regard to the ability of the index to replicate the performance of the markets in question or to the index or any operation or product related thereto or to the risks pertaining thereto.

The index sponsor is under no circumstances required to consider the needs of a third party when determining or modifying the composition or calculation of the index. Neither a buyer nor seller of the LYXOR UCITS ETF iBoxx € Liquid High Yield 30 Ex-Financial, nor the index sponsor can be held liable in the event that the index sponsor fails to take the necessary measures for the determination, adjustment or calculation of the index.

The index sponsor or its affiliated companies retain the possibility of handling any of the bonds comprising the index, as well as the ability, provided it is allowed, to accept deposits, to make loans or to carry out any other credit activity, and more generally to perform any service of an investment and financing bank, or other commercial activity with the issuers of these bonds or affiliated companies and they can carry out such activities as if the index did not exist without considering the potential consequences that might arise therefrom for the index of the LYXOR UCITS ETF iBoxx € Liquid High Yield 30 Ex-Financial.

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment
France.

Representative of the Swiss Compartment
Société Générale, Paris, Zürich Branch, has been authorised by the FINMA as the Compartment's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Compartment, the KIIDs as well as the list of purchases and sales made by the Compartment during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zürich Branch, Talacker 50, P.O. Box 1928, 8021 Zürich.

Calculation of the Total Expense Ratio

Annual closing of the compartment: 31 Oct.

Average fortune of the compartment for the period from 01/11/14 to 30/10/15 : 315 709 249.39

Compartment management commission: 0.45 % tax included

Extract from the profit and loss account

Expenses in euros	Annual report	Half-yearly report	Annual report
	31/10/2014	30/04/2015	30/10/2015

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The LYXOR UCITS ETF DAILY LEVERAGED BTP Compartment (hereafter the "Compartment") is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution. The realised net capital gain will be capitalised.

Management objective:

The management objective of the Compartment is to be exposed, upward or downward, with a daily x2 leverage, to the performance of the Italian government bonds market while reproducing the evolution of the SGI daily leveraged BTP strategy index (hereafter the "Benchmark Indicator") while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is a strategy index prepared by the Société Générale research teams, using a proprietary methodology. The Benchmark Indicator is calculated and maintained by Standard & Poor's.

The Benchmark Indicator provides an exposure to the increase or decrease of the market evolution for Italian government bonds, for which the Long-Term Euro-BTP futures are a representative indicator, with a daily x2 leverage. As such, should the Long-Term Euro-BTP futures rise on a given market day, the Compartment's net asset value will increase twofold on that same market day and, should the Long-Term Euro-BTP futures fall on a given market day, the Compartment's net asset value will decrease twofold on that same market day.

The Long-Term Euro-BTP futures are a representative indicator of the market for Italian government bonds with the residual maturity of between 8.5 and 11 years, and initial maturities of less than 16 years. They are listed on Eurex, and their methodology is available at www.eurexchange.com

The daily performance of the Benchmark Indicator is equal to twice the daily performance of the Long-Term Euro-BTP futures, plus interest (EONIA) collected each day on the valuation of the previous evening's 5:40 p.m. fixing of the Long-Term Euro-BTP futures.

It is therefore an index that represents a long selling strategy with an amplifying x2 leverage on the Long-Term Euro-BTP futures, with daily rebalancing. An additional rebalancing may be carried out during the session if the Benchmark Indicator drops by more than 40% during a market day (i.e. if the intraday decline of the Long-Term Euro-BTP futures, in absolute value, is greater than 20%).

The monitored performance is that of the fixing of the Benchmark Indicator at 5:40 p.m., in euros.

As the Benchmark Indicator's calculation methodology is not based on a direct investment to the BTP obligations, but is rather based on an indirect investment via futures contracts, the Compartment's performance will be impacted by the cost related to the roll of the aforesaid futures on a quarterly basis.

This phenomenon could negatively and progressively impact, potentially in a significant manner, the gap between the Compartment's performance and the gross performance on the underlyings of the aforesaid futures, notably in case of long-term investment in the Compartment's equities.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition of the Benchmark Indicator are available at the following Internet site: www.sgindex.fr

Benchmark Indicator revision and composition

The Benchmark Indicator is calculated each day, using the official closing fixing of the Long-Term Euro-BTP future at 5:40 pm.

The Benchmark Indicator is also calculated in real-time on each trading day.

The Benchmark Indicator is available via Reuters and Bloomberg. Reuters code: .SGIXDLBT

Bloomberg code: SGIXDLBT

The Benchmark Indicator is revised each day.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

An investor subscribing to this Compartment is exposed with a daily amplifying x2 leverage, upward or downward, to the performance of the Italian government bonds market for which the Benchmark Indicator is a representative indicator.

The securities held as assets by the Compartment will mainly be bonds issued by a Member State of the OECD or issued by non-government issuers residing in one of the Member States of the OECD.

The bonds basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the Compartment is managed:	Between 14 and 22
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international securities (equities, bonds), listed in one of the currencies of an OECD country.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset.

The aforementioned securities will be bonds chosen on the basis of criteria:

- Of eligibility, in particular:

o Senior debt,

o Fixed maturity,

o Maximum residual maturity,

o Minimum issuing amount,

o Requirement of a minimal threshold in S&P rating or equivalent.

- Of diversification, in particular:

o Issuer (application of ratios applicable to the eligible assets of an UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),

o Geographical area,

o Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to the (i) updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the forward exchange operation entered into by the Compartment, are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None.

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Risk of daily readjustment of the leverage

Investors are doubly exposed to the fluctuations affecting the price or level of the underlying BTP futures at the Benchmark Indicator on a daily basis. In particular, any depreciation of the underlying market will be amplified and will entail an even higher depreciation of the Compartment's net asset value.

The daily readjustment shown in the formula of the underlying Benchmark Indicator implies that, over a period of more than one banking day, the Compartment's performance will not be equal to the double of the performance of the underlying BTP futures at the Benchmark Indicator.

For example, if the underlying BTP futures at the Benchmark Indicator appreciate by 10% on one banking day and then depreciate by 5% on the next banking day, the Compartment will have appreciated in all, after these two days (and before deduction of the applicable fees), by 8%, while the underlying BTP futures at the Benchmark Indicator will have appreciated by 4.5% over the same period.

If the underlying BTP futures at the Benchmark Indicator depreciate by 5% per day for 2 consecutive banking days, they will have depreciated by a total of 9.75%, while the ETF will have depreciated (before deduction of the applicable fees) by 19% over the same period.

Negative scenario 1: Case in which the resulting negative leverage is greater than 1 within the scenario of an increase of the Benchmark Indicator's underlying.

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	10%	110	20%	120	x2
day 2	-11%	97.9	-22%	93.6	x2
Whole period	**-2.10%**		**-6.40%**		**x3.05**

Negative scenario 2: Case in which the resulting leverage is less than 2 within the scenario of an increase of the Benchmark Indicator's underlying.

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	-5%	95	-10%	90	x2
day 2	6%	100.7	12%	100.8	x2
Whole period	**0.70%**		**0.80%**		**x1.14**

Moreover, it is possible that over an observation period of more than one day, and in case of strong volatility of the Benchmark Indicator's underlyings over this period, the Compartment's net asset value will decline even if the Benchmark Indicator's underlyings also show an increase over this same period.

Inverted leverage scenario 3: Case in which the resulting leverage is negative over the period:

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	20%	120	40%	140	x2
day 2	-16%	100.8	-32%	95.2	x2
Whole period	**0.80%**		**-4.80%**		**x-6**

- Risk that the Compartment's management objective may only be partially reached:

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses future financial instruments ("FFI") negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of bonds may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of bonds.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment bonds. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator. When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's bonds on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Risk related to low diversification

The Benchmark Indicator to which the investors are exposed only covers the market for bonds issued by the Italian State and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Credit risk

It represents the potential risk of deterioration of the rating assigned by rating agencies to the issuer, which would have a negative impact on the price of the issuer's bonds as well as the risk of default on the part of an issuer. The Compartment is exposed to the credit risk of the Italian State.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure with a daily amplifying x2 leverage, upward or downward, to the Italian government bonds market while reproducing the evolution of the Benchmark Indicator. The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

Activity report

The net asset value of the LYXOR UCITS ETF DAILY LEVERAGED BTP Compartment shows an evolution of 18.78%* over the fiscal year and stands at EUR 255.9338 on 30/10/2015, meaning a fund performance of 155.93% since inception.

The fund replicates the performance of the SGI Daily Leveraged BTP index, listed in euros (EUR), representative of the 2-leverage strategy on a future BTP contract, listed on Eurex, representative of Italian government bonds having a maturity between 8 and 10.5 years with a daily rebalancing.

This index has shown an evolution of 19.35% over the fiscal year. The classes of C-EUR, C-USD, not being valued to the index currency, the evolution of their net asset value is subject to the exchange risk. During the fiscal year, the EUR decreased by 8.89% compared to the CNY, the USD increased by 3.34% compared to the CNY.

This index has shown an evolution of 2.84% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the SGI Daily Leveraged BTP index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the SGI Daily Leveraged BTP index.

The equities held as assets by the Compartment will notably be equities that make up SGI Daily Leveraged BTP index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 6 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0040% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

appendix

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	Maximum 0.40% per year

Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euros.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

appendix

The LYXOR ETF DAILY LEVERAGED BTP Compartment in no way benefits from any sponsorship, support or promotion, and is not sold by Société Générale Index (SGI), a registered trademark of the Société Générale Group (designated as the "Holder"). The Holder grants no guarantee and undertakes no commitment, whether explicitly or implicitly, relative to the results to be obtained through the use of the SGI DAILY LEVERAGED BTP strategy index and/or relative to the level at which the said strategy index may be at any given moment or day, or of any other type. The Holder will not be liable for any error affecting the strategy index with regard to any party, and it will have no obligation to inform anyone of any possible error affecting the strategy index. The SGI DAILY LEVERAGED BTP strategy index is the exclusive property of the Société Générale. Société Générale has signed a contract with Standard & Poor's whereby S&P undertakes to calculate and maintain the strategy index. However, S&P cannot be held liable in the event of any error or omission involving the strategy index calculation.

Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging operations	-	-	-	-
Other operations	-	-	-	-

3.3 Breakdown by residual maturity of the asset, liability and off-balance sheet items

	0-3 months	3 months - 1 year	1-3 years	3-5 years	>5 years
Assets					
Deposits	-	-	-	-	-
Bonds and similar securities	-	217 194,63	4 066 476,52	8 997 493,58	5 274 228,83
Debt securities	-	-	-	-	-
Temporary financial securities operations	-	-	-	-	-
Financial accounts	0,01	-	-	-	-
Liabilities					
Temporary financial securities operations	-	-	-	-	-
Financial accounts	-	-	-	-	-
Off-balance sheet					
Hedging operations	-	-	-	-	-
Other operations	7 190 000,00	-	-	-	-

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items
This breakdown is given for the main listing or assessment currencies, with the exception of the currency in which the accounting is maintained.

By main currency	-	-	-	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	-	-	-	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	-	-	-	-
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet	-	-	-	-
Hedging				
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type
Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	
Future currency exchange operations:	**11 527 255,68**
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Deferred settlements sales	11 492 089,98
Account receivable	35 165,70
-	-
-	-
-	-
Other operations	-
Debts	
Future currency exchange operations:	**11 542 463,85**
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlements purchases	10 521 298,93
Account payable	1 005 956,75
Accrued expenses	15 208,17
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	568 600	137 186 110,88	552 000	133 935 552,80
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	**0,40**
Performance commissions (variable fees): amount of costs for the fiscal year	**-**
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	**-**
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees ..... **None**
3.8.2 Description of the other commitments received and/or given ..... **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	**-**
- Other temporary operations	**-**
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	**-**
- bonds	**-**
- debt securities	**-**
- other financial instruments	**-**
Financial estimates given as guarantees and maintained in their original item:	
- equities	**-**
- bonds	**-**
- debt securities	**-**
- other financial instruments	**-**
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (mutual fund) and CIU managed by these entities:	
- CIU securities	**-**
- Swaps	**-138 540,95**

3.10 Allocation of the earnings table *(in the Compartment's currency of account)*

Advances paid during the fiscal year

Date	Overall amount	Unit amount	Total tax credits	Unit tax credits
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
Total advances	**-**	**-**	**-**	**-**

	30.10.2015	**31.10.2014**
Allocation of the earnings	EUR	EUR
Sums still to be allocated		
Carried forward	-	-
Earnings	-67 611,13	-41 036,92
Total	**-67 611,13**	**-41 036,92**
Allocation		
Distribution	-	-
Carried forward for the fiscal year	-	-
Capitalisation	-67 611,13	-41 036,92
Total	**-67 611,13**	**-41 036,92**
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Distribution per unit	-	-
Tax credits linked to the allocation of the profit and loss	**-**	**-**

3.11. Allocation table of the amounts available for distribution related to the net capital gains and losses
(in the Compartment's currency of account)

Advances on net capital gains and losses paid for the fiscal year

Date	Overall amount	Unit amount
-	-	-
-	-	-
-	-	-
-	-	-
Total advances	**-**	**-**

	30.10.2015	**31.10.2014**
Allocation of the net capital gains and losses	EUR	EUR
Sums still to be appropriated		
Non-distributed prior net capital gains and losses	-	-
Net capital gains and losses of the fiscal year	3 180 955,13	3 291 620,03
Advances paid on net capital gains and losses of the fiscal year	-	-
Total	**3 180 955,13**	**3 291 620,03**
Allocation		
Distribution	-	-
Non-distributed net capital gains and losses	-	-
Capitalisation	3 180 955,13	3 291 620,03
Total	**3 180 955,13**	**3 291 620,03**
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Distribution per unit	-	-

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency EUR	**30.10.2015**	31.10.2014	31.10.2013	31.10.2012	31.10.2011
Net assets	**18 401 644,45**	11 915 550,23	10 913 363,36	18 057 614,60	13 369 469,24
Number of outstanding equities	**71 900**	55 300	70 000	145 000	150 000
Net asset value	**255,9338**	215,471	155,9051	124,5352	89,1297
Distribution per unit on capital gains and losses (including advances)	**-**	-	-	-	-
Distribution per unit (including advances)	**-**	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) [(1)]	**-**	-	-	-	-
Unit capitalisation [(2)]	**43,30**	58,78	33,96	-0,40	-0,19

[(1)] *In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.*

[(2)] *The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.*

Compartment creation date: 27 April 2011.

Compartments / feeder	LYXOR UCITS ETF DAILY LEVERAGED BUND is a compartment of the MULTI UNITS FRANCE mutual fund
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The LYXOR UCITS ETF DAILY LEVERAGED BUND Compartment (hereafter the "Compartment") is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type strategy index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution. The realised net capital gain will be capitalised.

Management objective:

The management objective of the Compartment is to be exposed with a daily x2 leverage, upward or downward, to the performance of the German government bonds market with an average maturity of 10 years while reproducing the evolution of the SGI Daily Leveraged Bund strategy index (hereafter the "Benchmark Indicator") while insofar as possible minimizing the tracking error between the Compartment's performances and those of the SGI Daily Leveraged Bund index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator of the Compartment is the SGI Daily Leveraged Bund index, listed in euros (EUR).

The Benchmark Indicator is a strategy index prepared by the Société Générale research teams, using a proprietary methodology. The Benchmark Indicator is calculated and maintained by Standard & Poor's.

The Benchmark Indicator provides an exposure to the increase or decrease of the market evolution for German government bonds with an average maturity of 10 years, for which the Bund future are a representative indicator, with a daily x2 leverage. As such, should the Bund future rise on a given market day, the Compartment's net asset value will increase twofold on that same market day and, should the Bund future fall on a given market day, the Compartment's net asset value will decrease twofold on that same market day.

The Bund future is a representative indicator of the market for German government bonds, with the average maturity of 10 years. The Bund futures are listed on Eurex, and their methodology is available at www.eurexchange.com

The daily performance of the Benchmark Indicator is equal to twice the daily performance of the Bund future, plus interest (EONIA) collected each day on the valuation of the previous evening's 5:40 p.m. fixing of the Bund future.

It is therefore an index that represents a long selling strategy with an amplifying x2 leverage on the Bund future, with daily rebalancing. An additional rebalancing may be carried out during the session if the strategy index drops by more than 40% during a market day (i.e. if the intraday decline of the Bund future, in absolute value, is greater than 20%).

The monitored performance is that of the fixing of the Benchmark Indicator at 5:40 p.m., in euros.

As the Benchmark Indicator's calculation methodology is not based on a direct investment to the Bund obligations, but is rather based on an indirect investment via futures contracts, the Compartment's performance will be impacted by the cost related to the roll of the aforesaid futures on a quarterly basis.

This phenomenon could negatively and progressively impact, potentially in a significant manner, the gap between the Compartment's performance and the gross performance on the underlyings of the aforesaid futures, notably in case of long-term investment in the Compartment's equities.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition of the Benchmark Indicator are available at the following Internet site: www.sgindex.fr

Benchmark Indicator revision and composition

The Benchmark Indicator's revision depends on that of the Bund.

More information on the index's construction methodology is available on the Internet at: www.sgindex.fr

Benchmark Indicator publication

The Benchmark Indicator is calculated each day, using the official closing fixing of the Bund future at 5:40 pm.

The Benchmark Indicator is also calculated in real-time on each trading day. The Benchmark Indicator is available via Reuters and Bloomberg.

Reuters code: .SGIXDLBU Bloomberg code: SGIXDLBU

The Benchmark Indicator is revised each day.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

An investor subscribing to this Compartment is exposed with a daily amplifying x2 leverage, upward or downward, to the performance of the German government bonds market with an average maturity of 10 years for which the Benchmark Indicator is a representative indicator.

The financial securities held as assets by the Compartment will mainly be securities that made up the Benchmark Indicator as well as other international equities of all economic sectors, listed on all markets, including small capitalisation markets.

The bonds basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by a non-member State of the OECD. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The aforementioned securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the Compartment is managed:	Between 14 and 22
Currencies in which securities held by the Compartment are listed:	Euro: up to 100% of net assets Others: up to 100% of net assets

Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : up to 100% of net assets Emerging countries: 0% of net assets

In the present case, the manager intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international securities (equities, bonds), listed in one of the currencies of an OECD country.

The aforementioned securities will be bonds chosen on the basis of criteria:

- Of eligibility, in particular:

o Senior debt,

o Fixed maturity,

o Maximum residual maturity,

o Minimum issuing amount,

o Requirement of a minimal threshold in S&P rating or equivalent.

- Of diversification, in particular:

o Issuer (application of ratios applicable to the eligible assets of an UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),

o Geographical area,

o Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to the (i) updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the forward exchange operation entered into by the Compartment, are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the securities held as assets by the Compartment (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The Compartment will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Risk of daily readjustment of the leverage

Investors are doubly exposed to the fluctuations affecting the price or level of the underlying Bund futures at the Benchmark Indicator on a daily basis. In particular, any depreciation of the underlying market will be amplified and will entail an even higher depreciation of the Compartment's net asset value. The daily readjustment shown in the formula of the underlying Benchmark Indicator implies that, over a period of more than one banking day, the Compartment's performance will not be equal to the double of the performance of the underlying Bund futures at the Benchmark Indicator.

For example, if the underlying Bund futures at the Benchmark Indicator appreciate by 10% on one banking day and then depreciate by 5% on the next banking day, the ETF will have appreciated in all, after these two days (and before deduction of the applicable fees), by 8%, while the underlying Bund futures at the Benchmark Indicator will have appreciated by 4.5% over the same period.

If the underlying Bund futures at the Benchmark Indicator depreciate by 5% per day for 2 consecutive banking days, they will have depreciated by a total of 9.75%, while the ETF will have depreciated (before deduction of the applicable fees) by 19% over the same period.

Negative scenario 1:

Case in which the resulting negative leverage is greater than 1 within the scenario of an increase of the Benchmark Indicator's underlying.

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	10%	110	20%	120	x2
day 2	-11%	97.9	-22%	93.6	x2
Whole period	**-2.10%**		**-6.40%**		**x3.05**

Negative scenario 2:

Case in which the resulting leverage is less than 2 within the scenario of an increase of the Benchmark Indicator's underlying.

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	-5%	95	-10%	90	x2
day 2	6%	100.7	12%	100.8	x2
Whole period	**0.70%**		**0.80%**		**x1.14**

Moreover, it is possible that over an observation period of more than one day, and in case of strong volatility of the Benchmark Indicator's underlyings over this period, the Compartment's net asset value will decline even if the Benchmark Indicator's underlyings also show an increase over this same period.

Inverted leverage scenario 3:

Case in which the resulting leverage is negative over the period:

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	20%	120	40%	140	x2
day 2	-16%	100.8	-32%	95.2	x2
Whole period	**0.80%**		**-4.80%**		**x-6**

- Risk that the management objective may only be partially reached:

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses future financial instruments ("FFI") negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the financial manager by delegation and the FFI's counterparty. The financial manager by delegation manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the index, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's bonds on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the index, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Risk related to low diversification

The Benchmark Indicator to which the investors are exposed only covers the market for bonds issued by the German State and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Credit risk

It represents the potential risk of deterioration of the rating assigned by rating agencies to the issuer, which would have a negative impact on the price of the issuer's bonds as well as the risk of default on the part of an issuer. The Compartment is exposed to the credit risk of the German State.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure with an amplifying x2 leverage, upward or downward, to the German state bonds market with an average maturity of 10 years.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 6 April 2011.*
- *Compartment creation date: 27 April 2011.*

Activity report

The net asset value of the LYXOR UCITS ETF DAILY LEVERAGED BUND Compartment shows an evolution of 10.65%* over the fiscal year and stands at EUR 203.3137 on 30/10/2015, meaning a fund performance of 103.31% since inception.

The fund replicates the performance of the SGI Daily Leveraged Bund index, listed in euros (EUR), representative of the 2-leverage strategy on a future BUND contract, listed on Eurex, representative of German government bonds having a maturity at 10 years with a daily rebalancing.

This index has shown an evolution of 10.96% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the SGI Daily Leveraged Bund index, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the SGI Daily Leveraged Bund index.

The equities held as assets by the Compartment will notably be equities that make up SGI Daily Leveraged Bund index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 5 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0020% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the

day of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	Maximum 0.20% per year

Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euros.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

appendix

LYXOR UCITS ETF DAILY LEVERAGED BUND in no way benefits from any sponsorship, support or promotion, and is not sold by Société Générale Index (SGI), a registered trademark of the Société Générale Group (designated as the "Holder"). The Holder grants no guarantee and undertakes no commitment, whether explicitly or implicitly, relative to the results to be obtained through the use of the SGI DAILY LEVERAGED BUND strategy index and/or relative to the level at which the said strategy index may be at any given moment or day, or of any other type. Currency EUR	**30.10.2015**	31.10.2014	31.10.2013	31.10.2012	31.10.2011
Net assets	**19 111 493,96**	8 084 978,26	7 138 439,84	19 132 790,59	19 088 134,81
Number of outstanding equities	**94 000**	44 000	47 000	130 000	150 000
Net asset value	**203,3137**	183,7495	151,8816	147,1753	127,2542
Distribution per unit on capital gains and losses (including advances)	**-**	-	-	-	-
Distribution per unit (including advances)	**-**	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) [(1)]	**-**	-	-	-	-
Unit capitalisation [(2)]	**22,33**	29,91	18,01	-0,27	-0,11

[(1)] In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

[(2)] The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 27 April 2011.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Diversified.

The Lyxor UCITS ETF Daily Double Short BTP Compartment (hereafter the "Compartment") is a strategy index-based fund. The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution. The realised net capital gain will be capitalised.

Management objective:

The management objective of the Compartment is to be inversely exposed with a daily x2 leverage, upward or downward, to the daily performance of the Italian government bonds market while reproducing the evolution of the SGI daily double short BTP strategy index (see the "Benchmark Indicator") while insofar as possible minimizing the tracking error between the Compartment's performances and those of the SGI daily double short BTP strategy index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is the SGI Daily Double Short BTP strategy index, listed in euros (EUR) (the "Benchmark Indicator").

The Benchmark Indicator is a strategy index prepared by the Société Générale research teams, using a proprietary methodology. The Benchmark Indicator is calculated and maintained by Standard & Poor's.

The Benchmark Indicator provides an inverse exposure to the increase or decrease of the market evolution for Italian government bonds, for which the Long-Term Euro-BTP futures are a representative indicator, with a daily x2 leverage. As such, should the Long-Term Euro-BTP futures fall on a given market day, the Compartment's net asset value will increase twofold on that same market day and, should the Long-Term Euro-BTP futures rise on a given market day, the Compartment's net asset value will decrease twofold on that same market day and shareholders will not benefit from any increase of the Benchmark Indicator.

The Long-Term Euro-BTP futures are a representative indicator of the market for Italian government bonds with the residual maturity of between 8.5 and 11 years, and initial maturities of less than 16 years. They are listed on Eurex, and their methodology is available at www.eurexchange.com

The daily performance of the Benchmark Indicator is equal to twice the inverse daily performance of the Long-Term Euro-BTP futures, plus interest (EONIA) collected each day on the valuation of the previous evening's 5:40 p.m. fixing of the Long-Term Euro-BTP futures.

The Benchmark Indicator represents a long selling strategy with an amplifying x2 leverage on the Long-Term Euro-BTP futures, with daily rebalancing. An additional rebalancing may be carried out during the session if the strategy index drops by more than 40% during a market day (i.e. if the intraday decline of the Long-Term Euro-BTP futures, in absolute value, is greater than 20%).

The monitored performance is that of the fixing of the Benchmark Indicator at 5:40 p.m., in euros.

As the Benchmark Indicator's calculation methodology is not based on a direct exposure to the BTP bonds, but is rather based on an indirect exposure via futures contracts, the Compartment's performance will be impacted by the cost related to the roll of the aforesaid futures on a quarterly basis.

This phenomenon could negatively and progressively impact, potentially in a significant manner, the gap between the Compartment's performance and the gross performance of the short positions on the underlyings of the aforesaid futures, notably in case of long-term investment in the Compartment's equities.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition of the Benchmark Indicator are available at the following Internet site: www.sgindex.fr

Benchmark Indicator publication

The Benchmark Indicator is calculated each day, using the official closing fixing of the Long-Term Euro-BTP future at 5:40 pm.

The Benchmark Indicator is also calculated in real-time on each trading day. The Benchmark Indicator is available via Reuters and Bloomberg.

Reuters code: .SGIXDSBT Bloomberg code: SGIXDSBT

Benchmark Indicator revision and composition

The Benchmark Indicator is revised each day.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

The revision of the Benchmark Indicator depends on the revision of the Long-Term Euro-BTP futures.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

An investor subscribing to this Compartment is inversely exposed with a daily amplifying x2 leverage, upward or downward, to the daily performance of the Italian government bonds market for which the Benchmark Indicator is a representative indicator.

The securities held as assets by the Compartment will mainly be bonds issued by a Member State of the OECD or issued by non-government issuers residing in one of the Member States of the OECD.

The bonds basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

The Compartment's sensitivity to the interest rate is between 14 and 22.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international securities (equities, bonds), listed in one of the currencies of an OECD country.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset.

The aforementioned securities will be bonds chosen on the basis of criteria:

- Of eligibility, in particular:

o Senior debt,

o Fixed maturity,

o Maximum residual maturity,

o Minimum issuing amount,

o Requirement of a minimal threshold in S&P rating or equivalent.

- Of diversification, in particular:

o Issuer (application of ratios applicable to the eligible assets of an UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),

o Geographical area,

o Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to the (i) updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the forward exchange operation entered into by the Compartment, are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

When the Compartment receives guarantee in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None.

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Risk of daily readjustment of the leverage

Investors are doubly inversely exposed to the fluctuations affecting the price or level of the underlying BTP futures at the Benchmark Indicator on a daily basis. In particular, any appreciation of the underlying market will be inversely amplified and will entail an even higher depreciation of the Compartment's net asset value. The daily readjustment of the exposure shown in the formula of the underlying "double short" Benchmark Indicator implies that, over a period of more than one banking day, the Compartment's performance will not be equal to the double of the opposite of the performance of the underlying BTP futures at the Benchmark Indicator. For example, if the underlying BTP futures of the Benchmark Indicator appreciate by 10% on one banking day and then depreciate by 5% on the next banking day, the Compartment will have depreciated in all, after these two days (and before deduction of the applicable fees), by 12%, while the underlying BTP futures of the Benchmark Indicator will have appreciated by 4.5% over the same period.

If the underlying BTP futures of the Benchmark Indicator depreciate by 10% a given banking day then is appreciate by 6% the next banking day, they will have depreciated by a total of 4.6%, while the Compartment will be appreciated (before deduction of the applicable fees) by 5.6% over the same period.

Negative scenario 1:

Case in which the resulting negative leverage is greater than 2 within the scenario of an increase of the Benchmark Indicator's underlying

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	10%	110	-20%	80	x2
day 2	-5%	104.5	10%	88	x2
Whole period	**4.50%**		**-12.00%**		**x-2.67**

Negative scenario 2:

Case in which the resulting negative leverage is less than 2 within the scenario of a decrease of the Benchmark Indicator's underlying

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	-10%	90	20%	120	x2
day 2	6%	95.4	-12%	105.6	x-2
Whole period	**-4.60%**		**5.60%**		**x-1.22**

Moreover, it is possible that over an observation period of more than one day, and in case of strong volatility of the Benchmark Indicator's underlyings over this period, the Compartment's net asset value will decline even if the Benchmark Indicator's underlyings also show a decrease over this same period.

Inverted leverage scenario 3:

Case in which the resulting leverage is positive over the period

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	5%	105	-10%	90	x-2
day 2	-5%	99.75	10%	99	x2
Whole period	**-0.25%**		**-1.00%**		**x 4**

- Risk that the Compartment's management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses future financial instruments ("FFI") negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator.

These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator. When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

Risk related to low diversification

The Benchmark Indicator to which the investors are exposed only covers the market for bonds issued by the Italian State and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

Credit risk

It represents the potential risk of improvement of the issuer credit quality that could notably led to an improvement of the rating assigned by rating agencies to the issuer, which would have a positive impact on the price of the issuer's bonds and thus have a negative impact on the net asset value of the Compartment. The Compartment is exposed to the credit risk of the Italian State.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure with a daily amplifying x2 leverage, upward or downward, to the Italian government bonds market while reproducing the evolution of the Benchmark Indicator.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

As this product is an arbitration product, this Compartment could not be suitable for investors that wish to make a medium or long-term investment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 12 April 2011.*
- *Compartment creation date: 27 April 2011.*

Activity report

The net asset value of the LYXOR UCITS ETF DAILY DOUBLE SHORT BTP Compartment shows an evolution of -18.65%* over the fiscal year and stands at EUR 30.7121 on 30/10/2015, meaning a fund performance of -69.29% since inception.

The fund replicates the performance of the SGI Daily Dble Short BTP index, listed in euros (EUR), representative of the investment strategy aiming to obtain twice the inverse daily performance of an Italian government bond portfolio having a maturity between 8 and 10.5 years.

This index has shown an evolution of -18.26% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the SGI Daily Dble Short BTP index, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the SGI Daily Dble Short BTP index.

The equities held as assets by the Compartment will notably be equities that make up SGI Daily Dble Short BTP index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 6 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0040% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

appendix

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	**Basis**	**Schedule, rate**
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	Maximum 0.40% per year

Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euros.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

appendix

The LYXOR ETF DAILY DOUBLE SHORT BTP Compartment in no way benefits from any sponsorship, support or promotion, and is not sold by Société Générale Index (SGI), a registered trademark of the Société Générale Group (designated as the "Holder"). The Holder grants no guarantee and undertakes no commitment, whether explicitly or implicitly, relative to the results to be obtained through the use of the SGI DAILY DOUBLE SHORT BTP strategy index and/or relative to the level at which the said strategy index may be at any given moment or day, or of any other type. The Holder will not be liable for any error affecting the strategy index with regard to any party, and it will have no obligation to inform anyone of any possible error affecting the strategy index. The SGI DAILY DOUBLE SHORT BTP strategy index is the exclusive property of the Société Générale. Société Générale has signed a contract with Standard & Poor's whereby S&P undertakes to calculate and maintain the strategy index. However, S&P cannot be held liable in the event of any error or omission involving the strategy index calculation.

3.5 Receivables and Debts: breakdown by type
Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	
Future currency exchange operations:	**6 903 243,71**
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Coupons receivable	-
Deferred settlements sales	5 942 568,11
Account receivable	960 675,60
-	-
-	-
Other operations	-
Debts	
Future currency exchange operations:	**6 960 748,65**
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlements purchases	6 781 530,80
Account payable	121 712,91
Accrued expenses	57 504,94
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	4 800 000	165 302 067,30	3 994 000	138 127 441,90
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	**0,40**
Performance commissions (variable fees): amount of costs for the fiscal year	**-**
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	**-**
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees ..... **None**
3.8.2 Description of the other commitments received and/or given ..... **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	**-**
- Other temporary operations	**-**
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	**-**
- bonds	**-**
- debt securities	**-**
- other financial instruments	**-**
Financial estimates given as guarantees and maintained in their original item:	
- equities	**-**
- bonds	**-**
- debt securities	**-**
- other financial instruments	**-**
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (mutual fund) and CIU managed by these entities:	
- CIU securities	**-**
- Swaps	**-971 478,37**

3.10 Allocation of the earnings table *(in the Compartment's currency of account)*

Advances paid during the fiscal year

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency EUR	**30.10.2015**	31.10.2014	31.10.2013	31.10.2012	31.10.2011
Net assets	**169 930 349,45**	178 466 656,96	155 298 611,56	16 345 195,68	43 467 796,65
Number of outstanding equities	**5 533 000**	4 727 000	2 915 000	235 000	400 000
Net asset value	**30,7121**	37,7547	53,2756	69,554	108,6694
Distribution per unit on capital gains and losses (including advances)	**-**	-	-	-	-
Distribution per unit (including advances)	**-**	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) [(1)]	**-**	-	-	-	-
Unit capitalisation [(2)]	**-7,54**	-15,70	-14,85	-0,31	-0,20

[(1)] In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

[(2)] The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 27 April 2011.

Compartments / feeder	LYXOR UCITS ETF MSCI INDONESIA is a compartment of the MULTI UNITS FRANCE mutual fund
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification: International equities.

At least 60% of the LYXOR UCITS ETF MSCI INDONESIA Compartment ("the Compartment) is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

For the equities classes C-EUR and C-USD: Capitalisation of all the amounts available for distribution.

For the equities classes D-EUR and D-USD: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is reproduce the evolution of the MSCI Indonesia Net Total Return index (see the "Benchmark Indicator" section hereafter), regardless of its evolution, while insofar as possible minimizing the tracking error between the Compartment's performances and those of the MSCI Indonesia Net Total Return index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.1%.

Benchmark indicator:

The Benchmark Indicator is the MSCI Indonesia Net Total Return index (net dividends reinvested), listed in USD ("the Benchmark Indicator"). The Benchmark Indicator is an equities index that is calculated and published by the supplier of international indices, MSCI.

The Benchmark Indicator is comprised exclusively of Indonesian securities (Indonesia) and retains the fundamental characteristics of the MSCI indices, namely: adjustment of the market capitalisation of the securities included in the Benchmark Indicator on the basis of the free-float and sector-based classification according to the GICS (Global Industry Classification Standard) classification.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.msci.com

The monitored performance is that of the Benchmark Indicator in USD.

Benchmark Indicator revision and composition

The objective of the Benchmark Indicator is to represent 85% of the capitalization adjusted on the basis of the float, of each group of industries of the Indonesian market.

By targeting 85% of the representativeness of each industry group, the Benchmark Indicator measures 85% of the market capitalization of the Indonesian market, while also reflecting the market's economic diversity.

The MSCI indices are also reviewed quarterly in order to take into account the changes that impact the capitalisation of a value (number of securities and float) or its sectorial classification. The main changes in the capital structure of a company may be implemented in real time (merger and acquisition, large rights issues or initial public offerings, etc.).

The exact composition and the revision rules of the Benchmark Indicator are published by NYSE-Euronext and available on the Internet site: www.msci.com

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark Indicator publication

The Benchmark Indicator is available through Reuters and Bloomberg.

Reuters code: .MIID00000NUS

Bloomberg code: M0ID

The Benchmark Indicator's closing price is available on the Internet site: www.mscibarra.com

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The equities basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
- Subordination to the main market indices or to the Benchmark Indicator,
- Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
- Issuer (application of ratios applicable to the eligible assets of a CIU, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The investment on collective investment undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net assets. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss than would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the reference index.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of Future Financial Instrument ("FFI") traded over-the-counter with Société Générale or with any other counterparty.

In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Risk related to low diversification of the Benchmark Indicator

The Benchmark Indicator to which the investors are exposed covers a given region, area or strategy and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to a Benchmark Indicator with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached, indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Risk linked to a transaction involving securities comprising the Benchmark Indicator

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the Benchmark Indicator

The compartment is exposed to the exchange risk insofar as the underlying securities comprising the Benchmark Indicator may be listed in a currency other than the currency of the Benchmark Indicator or be derived from securities listed in a currency other than the currency of the Benchmark Indicator. The fluctuations of exchange rates could therefore negatively affect the Benchmark Indicator followed by the compartment.

- Exchange risk linked to the D EUR and C EUR equity classes

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator. Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the Indonesian equity market.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *Compartment creation date: 4 July 2011.*

Activity report

The net asset value of the unit C-EUR of the LYXOR UCITS ETF MSCI INDONESIA Compartment shows an evolution of -12.77%* over the fiscal year and stands at EUR 91.5341 on 30/10/2015, resulting in the fund's performance being equal to -8.47% since inception.

The net asset value of the unit C-USD of the LYXOR UCITS ETF MSCI INDONESIA Compartment shows an evolution of -23.09%* over the fiscal year and stands at USD 69.6767 on 30/10/2015, resulting in the fund's performance being equal to -30.32% since inception.

The fund replicates the performance of the MSCI INDONESIA Net USD index, listed in US dollars (USD), representative of the performance of the market of large and mid-capitalisations, listed in Indonesia.

This index has shown an evolution of -22.61% over the fiscal year. As the C-EUR class is not valued in the index currency, the evolution of their net asset value is subject to an exchange risk. Over the fiscal year, the EUR decreased by 11.83% compared to the USD.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,
- The costs for accessing the local markets of the securities of the replicated indexing,
- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MSCI INDONESIA Net USD index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the MSCI INDONESIA Net USD index.

The equities held as assets by the Compartment will notably be equities that make up the MSCI INDONESIA Net USD index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 6 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0630% for the Compartment. The level of the tracking error for the period was of 0.1%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

appendix

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

Equities classes D-EUR, C-EUR, D-USD and C-USD

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.55% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euros.

appendix

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

For the equities classes C-EUR and C-USD: Capitalisation of all the amounts available for distribution.

For the equities classes D-EUR and D-USD: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Compartments / feeder	LYXOR UCITS ETF THAILAND (SET50 NET TR) is a compartment of the MULTI UNITS FRANCE mutual fund
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the LYXOR UCITS ETF THAILAND (SET50 NET TR) Compartment (hereafter the "Compartment") is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

For the equities C-EUR and C-USD: Capitalisation of all the amounts available for distribution.

For the equities D-EUR and D-USD: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is an exposure to the Thai equities market by reproducing the evolution of the SET50 NET Total Return index, while insofar as possible minimizing the tracking error between the Compartment's performances and those of the SET50 NET Total Return index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.10%.

Benchmark indicator:

The Benchmark Indicator is the SET50 NET Total Return index, (net dividends reinvested) listed in Thai Baht (THB) (the "Benchmark Indicator "). The Benchmark Indicator is the benchmark index of the Stock Exchange of Thailand. It is comprised of the 50 main securities listed in the Stock Exchange of Thailand, in terms of market capitalisation adjusted on the basis of the free-float and the liquidity.

The SET50 NET Total Return index was initially created in 1950 to serve as an underlying asset for derivative instruments. It is maintained by the Stock Exchange of Thailand. The SET's Index Committee is responsible for specifying the index's selection criteria, its components and methodology.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.set.or.th

The monitored performance is that of the Benchmark Indicator.

Benchmark Indicator revision and composition

The Benchmark Indicator is reviewed twice a year in June and in December with effective date on the first business day of the following day.

The exact composition and the revision rules of the Benchmark Indicator are published by MSCI and available on the Internet site: www.set.or.th

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark Indicator publication

SET50 NET Total Return index publication:

The SET50 Net Total Return index is calculated daily using the index's closing price. The SET50 NET Total Return index is available:

Reuters code: .SET50NETRI Bloomberg code: SET50NTR

The Benchmark Indicator's closing price is available on the Internet site: www.set.or.th

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The equities basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
- Subordination to the main market indices or to the Benchmark Indicator,
- Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
- Issuer (application of ratios applicable to the eligible assets of a CIU, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The investment on collective investment undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net assets. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial manager. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss than would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the reference index.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of Future Financial Instrument ("FFI") traded over-the-counter with Société Générale or with any other counterparty.

In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Risk related to low diversification of the Benchmark Indicator

The Benchmark Indicator to which the investors are exposed covers a given region, area or strategy and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to such index with low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached, indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Risk linked to a transaction involving securities comprising the Benchmark Indicator

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the equity class

For C-USD and D-USD equity classes:

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator.

Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

The exchange rate use for the valuation of the equity classes is the USD/THO (Baht onshore) exchange rate applicable to local investors, which can vary from the USD/THB (Baht offshore) exchange rate applicable to foreign investors.

For C-EUR and D-EUR equity classes:

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator.

Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

The exchange rate use for the valuation of the equity classes is the EUR/THO (Baht onshore) exchange rate applicable to local investors, which can vary from the EUR/THB (Baht offshore) exchange rate applicable to foreign investors.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber wishing to be exposed to the Thai equities market.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 23 June 2011.*
- *Compartment creation date: 4 July 2011.*

Activity report

The net asset value of the unit C-EUR of the LYXOR UCITS ETF THAILAND (SET50 NET TR) Compartment shows an evolution of -9.04%* between the 31/10/2014 and 30/10/2015 and stands at EUR 148.0234 on 30/10/2015, resulting in the fund's performance being equal to 48.02% since inception.

The net asset value of the unit C-USD of the LYXOR UCITS ETF THAILAND (SET50 NET TR) Compartment shows an evolution of -19.80%* between the 31/10/2014 and 30/10/2015 and stands at USD 112.6751 on 30/10/2015, resulting in the fund's performance being equal to 12.68% since inception.

The fund replicates the performance of the SET50 net TRI index, listed in Thai Baht (THB), representative of equities of the 50 more important companies, listed on the Thai stock exchange.

This index has shown an evolution of -12.06% over the fiscal year. As the C-EUR and C-USD classes are not valued in the index currency, the evolution of their net asset value is subject to an exchange risk. Over the fiscal year, the EUR decreased by 3.72% compared to the THB, the USD increased by 9.20% compared to the THB.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,
- The costs for accessing the local markets of the securities of the replicated indexing,
- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the SET50 Net TRI index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the SET50 Net TRI index.

The equities held as assets by the Compartment will notably be equities that make up the SET50 Net TRI index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 6 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0290% for the Compartment. The level of the tracking error for the period was of 0.1%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

appendix

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of UCITS (1st part).

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the calculation date of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The financial manager nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The financial manager nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the net asset value calculation date. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the net asset value calculation date. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal

value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The financial manager independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.

Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the financial manager's responsibility.

Temporary acquisitions and sales of securities are assessed at the market price.

Units and equities in Undertakings for Collective Investment in Transferable Securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.

Units and equities of AIF operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the financial manager's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM/Reuters fixing the day of the closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

Equities classes D-EUR, C-EUR, D-USD and C-USD

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial manager.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.45% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euros.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

For the equities C-EUR and C-USD: Capitalisation of all the amounts available for distribution.

For the equities D-EUR and D-USD: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the LYXOR UCITS ETF MSCI ALL COUNTRY WORLD Compartment ("the Compartment) is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Equities classes C-EUR and C-USD: Capitalisation of all the amounts available for distribution.

Equities classes D-EUR and D-USD: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is an exposure to the equity markets of emerging and developed countries, while insofar as possible minimizing the tracking error between the Compartment's performances and those of the MSCI ACWI Net Total Return index (All Country World Index).

The anticipated level of the ex-post tracking error under normal market conditions is 0.07%.

Benchmark indicator:

The Benchmark indicator is the MSCI AC World Index Net Total Return index, (net dividends reinvested), listed in US dollars (USD) (the "Benchmark Indicator").

The Benchmark Indicator is an equities index that is calculated and published by the international supplier of indices, MSCI.

The Benchmark Indicator is a free float-adjusted market capitalization weighted index created to measure the investable universe and the performance of the companies of the developed and emerging markets. The Benchmark Indicator was created to cover large and mid-capitalisations and is constructed using the MSCI Global Investable Market Index (GIMI) methodology in order to meet criteria in terms of size, liquidity and free-float adjusted market capitalisation.

The MSCI methodology and its calculation method entail the Benchmark Indicator being made up of a variable number of companies.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.msci.com

The monitored performance is that of the Benchmark Indicator in USD.

Benchmark Indicator revision and composition

The composition of the Benchmark Indicator is reviewed quarterly.

The exact composition and the revision rules of the Benchmark Indicator are published by MSCI and available on the Internet site: www.msci.com

Benchmark Indicator publication

The Benchmark Indicator is available through Reuters and Bloomberg. Reuters code: .MIWD00000NUS

Bloomberg code: M1WD

The Benchmark Indicator's closing price is available on the Internet site:

www.msci.com

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The equities basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. Where necessary, the aim of this adjustment will be that the market value of future exchange contract described hereinafter be lower or equal to nil, what will lead to the neutralisation of the counterparty risk resulting from the exchange contract.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
- Subordination to the main market indices or to the Benchmark Indicator,
- Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
- Issuer (application of ratios applicable to the eligible assets of a CIU, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The investment on collective investment undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net assets. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None.

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss than would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the reference index.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of Future Financial Instrument ("FFI") traded over-the-counter with Société Générale or with any other counterparty.

In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the C-EUR and D-EUR equity classes

The value of the aforesaid equity classes is calculated in euro (EUR) and the Benchmark Indicator is an index denominated in US dollars (USD). Consequently, the value of the C-EUR and D-EUR equities may vary from one day to the next as a result of exchange rate fluctuations (EUR/USD). At the time of subscriptions/redemptions, the bearer's yield/capital would thus increase or decrease due to the fact that it is converted back into euro given its exposure to the risk linked to the increase as well as decrease of the euro against the US Dollar.

- Exchange risk linked to the Benchmark Indicator

The Compartment is exposed to the exchange risk insofar as the underlying securities comprising the Benchmark Indicator may be listed in a currency other than the currency of the Benchmark Indicator or be derived from securities listed in a currency other than the currency of the Benchmark Indicator. The fluctuations of exchange rates could therefore negatively affect the Benchmark Indicator followed by the Compartment.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing for this Compartment wishes to be exposed to the markets of developed and emerging countries.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *Compartment creation date: 5 September 2011.*

Activity report

The net asset value of the unit C-EUR of the LYXOR UCITS ETF MSCI ALL COUNTRY WORLD Compartment shows an evolution of 13.17%* over the fiscal year and stands at EUR 193.0015 on 30/10/2015, resulting in the fund's performance being equal to 93.00% since inception.

The net asset value of the unit C-USD of the LYXOR UCITS ETF MSCI ALL COUNTRY WORLD Compartment shows an evolution of 0.22%* over the fiscal year and stands at USD 151.0765 on 30/10/2015, resulting in the fund's performance being equal to 51.08% since inception.

The fund replicates the performance of the MSCI AC WORLD NR index, listed in US dollars (USD), representative of performance of the market of large and mid-capitalisations, listed in 45 industrialised and emerging countries.

This index has shown an evolution of -0.03% over the fiscal year. As the C-EUR class is not valued in the index currency, the evolution of their net asset value is subject to an exchange risk. Over the fiscal year, the EUR decreased by 11.83% compared to the USD.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,
- The costs for accessing the local markets of the securities of the replicated indexing,
- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MSCI AC WORLD NR index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the MSCI AC WORLD NR index.

The equities held as assets by the Compartment will notably be equities that make up the MSCI AC WORLD NR index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 5 given its exposure to the Benchmark Index.

On 30/10/2015, the tracking error reached the level of 0.0260% for the Compartment. The level of the tracking error for the period was of 0.07%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

appendix

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.45% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euros.

("MSCI"), or by any MSCI subsidiary, or by any of the entities involved in the establishment of the MSCI indices. The MSCI indices are the exclusive property of MSCI and the MSCI indices are trademarks of MSCI or of its subsidiaries and have been the subject of a licence granted, for certain requirements, to Lyxor Asset Management.

Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the establishment and calculation of the MSCI indices makes any declaration or issues any express or implicit guarantee relative to bearers of the Compartment's equities or more generally to the public, with regard to the timeliness of a transaction involving mutual fund equities in general or the Compartment's equities in particular, or regarding the ability of any MSCI index to replicate the performance of the overall equity market. MSCI or its subsidiaries are the owners of certain names, registered trademarks and of the MSCI indices that are determined, composed and calculated by MSCI without discussion with Lyxor International Asset Management or the Fund. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the establishment of the MSCI indices is required to take into consideration the needs of Lyxor International Asset Management or of the bearers of the Compartment's equities when determining, composing or calculating the MSCI indices. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the establishment of the MSCI indices makes any decision regarding the launch date, the price, the quantity of the Compartment's equities, or even the determination and calculation of the formula used to establish the Fund's net asset value. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the establishment of the MSCI indices assumes any liability or obligation with regard to the administration, management or marketing of the Fund.

THOUGH MSCI OBTAINS INFORMATION FOR INTEGRATION OR USE IN THE CALCULATION OF THE INDICES FROM SOURCES THAT MSCI CONSIDERS TO BE RELIABLE, NEITHER MSCI NOR ANY OTHER PARTY INVOLVED IN THE CREATION OR CALCULATION OF THE MSCI INDICES GUARANTEES THE ACCURACY AND/OR EXHAUSTIVE NATURE OF THE INDICES OR OF ANY INCLUDED DATA. NEITHER MSCI NOR ANY OTHER PARTY INVOLVED IN THE CREATION OF A CALCULATION FOR THE MSCI INDICES GIVES ANY EXPRESS OR IMPLICIT GUARANTEE REGARDING THE RESULTS THAT MAY BE OBTAINED BY THE HOLDER OF A MSCI LICENCE, THE CUSTOMERS OF THE SAID LICENSEE AS WELL AS THE COUNTERPARTS, BEARERS OF THE FUND OR ANY OTHER PERSON OR ENTITY, BASED ON THE USAGE OF THE INDICES OR OF ANY DATA INCLUDED WITH REGARD TO THE RIGHTS GRANTED BY LICENCE OR FOR ANY OTHER USAGE. NEITHER MSCI NOR ANY OTHER PARTY GIVES EXPRESS OR IMPLICIT GUARANTEES AND MSCI REJECTS ALL GUARANTEES REGARDING THE COMMERCIAL VALUE OR ADEQUACY FOR SPECIFIC USAGE OF THE INDICES OR INCLUDED DATA. NOTWITHSTANDING THE ABOVE, UNDER NO CIRCUMSTANCES MAY MSCI OR ANY OTHER PARTY BE HELD LIABILE WITH REGARD TO ANY DAMAGES, WHETHER DIRECT, INDIRECT OR OTHER (INCLUDING THE LOSS OF EARNINGS), EVEN IN CASE OF KNOWLEDGE OF THE POSSIBILITY OF SUCH DAMAGES.

2. Evolution of the net assets

	30.10.2015	31.10.2014
Currency	EUR	EUR
Net assets at the start of the fiscal year	**232 408 674,30**	**46 620 583,08**
Subscriptions (including subscription commission acquired by the Compartment)	497 504 409,74	250 537 525,35
Redemptions (less the redemption commission acquired by the Compartment)	-600 388 360,25	-83 398 681,59
Capital gains generated on deposits and financial instruments	85 498 049,21	14 186 018,97

Liabilities				
Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging operations	-	-	-	-
Other operations	-	-	-	-

3.3 Breakdown by residual maturity of the asset, liability and off-balance sheet items

	0-3 months	3 months - 1 year	1-3 years	3-5 years	>5 years
Assets					
Deposits	-	-	-	-	-
Bonds and similar securities	-	-	-	-	-
Debt securities	-	-	-	-	-
Temporary financial securities operations	-	-	-	-	-
Financial accounts	0,26	-	-	-	-
Liabilities					
Temporary financial securities operations	-	-	-	-	-
Financial accounts	-	-	-	-	-
Off-balance sheet					
Hedging operations	-	-	-	-	-
Other operations	-	80 433 069,39	-	-	-

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items
This breakdown is given for the main listing or assessment currencies, with the exception of the currency in which the accounting is maintained.

By main currency	JPY	CHF	USD	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	50 090 810,89	8 352 609,76	4 927 759,93	11 467 791,43
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	-	-	-	-
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet	-	-	-	-
Hedging				
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type
Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	
Future currency exchange operations:	**3 233 345,00**
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Deferred settlement sales	3 233 345,00
-	-
-	-
-	-
-	-
Other operations	-
Debts	
Future currency exchange operations	**3 285 557,12**
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Account payable	3 233 345,00
Accrued expenses	52 212,12
-	-
-	-
-	-
Other operations	-

3.6 Shareholders' equity

		Subscriptions		**Redemptions**
Number of equities issued/redeemed during the fiscal year:	Number of equities	Amount	Number of equities	Amount
EQUITY C-EUR / FR0011079466	2 523 596	487 637 951,70	3 116 600	596 687 122,01
EQUITY C-USD / FR0011093418	78 840	9 866 458,04	30 000	3 701 238,24
Subscription / redemption commission by equity category:		Amount		Amount
EQUITY C-EUR / FR0011079466				
EQUITY C-USD / FR0011093418				
Remittances by equity category:		Amount		Amount
EQUITY C-EUR / FR0011079466				
EQUITY C-USD / FR0011093418				
Commissions acquired by the Compartment by equity category:		Amount		Amount
EQUITY C-EUR / FR0011079466				
EQUITY C-USD / FR0011093418				

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	**%**
Equity category:	
EQUITY C-EUR / FR0011079466	**0,45**
EQUITY C-USD / FR0011093418	**0,45**

Performance commissions (variable fees): amount of costs for the fiscal year	**Amount**
Equity category:	
EQUITY C-EUR / FR0011079466	**-**
EQUITY C-USD / FR0011093418	**-**
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-
- CIU 3	-
- CIU 4	-

3.8 Commitments given and received

3.8.1	Description of guarantees received by the Compartment with indication of the capital guarantees	**None**
3.8.2	Description of the other commitments received and/or given	**None**

3.9 Other information

3.9.1	Current value of the financial instruments that are the subject of temporary acquisition:	
	- Financial instruments sold under forward repurchase agreements	-
	- Other temporary operations	-
3.9.2	Current value of the financial instruments comprising security deposits:	
	Financial instruments received as guarantees and not included in the balance sheet:	
	- equities	-
	- bonds	-
	- debt securities	-
	- other financial instruments	-
	Financial estimates given as guarantees and maintained in their original item:	
	- equities	-
	- bonds	-
	- debt securities	-
	- other financial instruments	-
3.9.3	Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (mutual fund) and UCITS managed by these entities:	
	- CIU securities	-
	- Swaps	**-1 722 943,11**

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The LYXOR UCITS ETF EUROMTS HIGHEST RATED MACRO-WEIGHTED GOVT BOND 1-3Y (DR) Compartment (see hereafter the "Compartment") is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment's management objective is to be exposed, downwards and upwards, to the performance of the eurozone government bonds, while reproducing the evolution of the FTSE MTS Highest Rated Macro Weighted Government Bond 1-3Y (Mid Price) Index (see hereafter the "Benchmark Indicator") while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is a "Total Return" type index, listed in EUR (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator).

The Benchmark Indicator measures the performance of eurozone Government bonds segment, weighted by country having at least two rating equal to "AAA" or similar by the three rating agencies S&P, Moody's and Fitch.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.ftse.com.

The Benchmark Indicator is calculated by FTSE MTS.

Methodology

The Benchmark Indicator is composed of bonds issued by the eurozone countries with the highest credit ratings. These bonds are weighted in the index on the basis of macroeconomic indicators. The Benchmark Indicator is provided with a history of index values dating back to 31 December 1998. As explained below, the initial index components were selected using the same criteria as those used for "FTSE MTS Eurozone Government Broad" indices (except for the credit-rating criterion):

The Benchmark Indicator comprises at least 5 issuers. If an issuer is downgraded, it will be replaced with another eligible issuer country, such that at least 5 issuers are maintained in the Benchmark Indicator.

The Benchmark Indicator securities are therefore among the highest rated Eurozone sovereign bonds. The following bonds qualify:

- Nominal value and coupon are denominated in euros with no option or convertibility;

- Listed on the FTSE MTS platform;

- Issued by a sovereign eurozone government having at least two out of three AAA ratings from S&P, Moody's and Fitch, and selected by FTSE MTS from among the following countries as: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;

- Maturity exceeds one year;

- With issuance of at least two billion euros.

The Benchmark Indicator must comprise at least five issuing countries. If an issuer is downgraded it will be replaced in the index, provided that there is another country that is eligible, such that the required minimum number of five issuers is maintained.

The Benchmark Indicator composition is revised monthly. The complete methodology is available at www.ftse.com

The performance tracked is the closing index price at 5:30 pm (CET).

Benchmark Indicator publication

The Benchmark Indicator price is fixed daily and available through Reuters and Bloomberg.

Reuters code: FMMPHRA5= Bloomberg code: FMMPHRA5

The Benchmark Indicator's closing price is available on the Internet: www.mtsindices.com.

Benchmark Indicator revision

The Benchmark Indicator's composition is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a pure replication method, which means that the Compartment will invest mainly in bonds making up the Benchmark Indicator.

Information relative to the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The abovementioned securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the compartment is managed:	Between 1 and 4
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the financial manager by delegation intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, international debt securities.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will not have recourse to futures financial instruments, except, on an ancillary basis, and within limits set by regulations, to future contracts on indices or bonds that are listed on regulated markets.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and sale operations involving securities.

8. Financial guarantees

None. No financial guarantee will be granted / received by the Compartment within the framework of the implementation of its management objective.

Risk profile:

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Liquidity risk (primary market)

Should the Compartment adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's bonds on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment, the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the Benchmark Indicator is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment, the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure, downwards and upwards, to the performance of the eurozone government bonds segment, weighted by country having at least two rating equal to "AAA" or similar by the three rating agencies S&P, Moody's and Fitch.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 8 November 2011.*
- *Compartment creation date: 25 November 2011.*

Activity report

The net asset value of the LYXOR UCITS ETF EUROMTS HIGHEST RATED MACRO-WEIGHTED GOVT BOND 1-3Y (DR) Compartment shows an evolution of 0.24%* between the 31/10/2014 and 30/10/2015 and stands at EUR 103.3694 on 30/10/2015, meaning a fund performance of 3.37% since inception.

The fund replicates the performance of the MTS Mid Price Highest Rated Ma 1-3Y index, listed in euros (EUR), representative of the most noted bonds issued by eurozone governments whose maturity date is between 1 and 3 years and whose calculated weighting by country is based on macroeconomic indicators.

This index has shown an evolution of 0.37% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MTS Mid Price Highest Rated Ma 1-3Y index, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the MTS Mid Price Highest Rated Ma 1-3Y index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 2 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.0150% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

appendix

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial management delegatee when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.165% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency
The Compartment's accounting is carried out in euro.

Indication of accountancy changes declared to each of the bearers individually
- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*
- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions
None.

Indication of the nature of the errors corrected during the fiscal year
None.

Indication of the rights and conditions attached to each category of equities
Capitalisation of all the amounts available for distribution.

appendix

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by FTSE TMX Global Debt Capital Markets (collectively referred to as the "Holders").
FTSE TMX Global Debt Capital Markets cannot be held liable for the promotion or marketing of the Compartment.
FTSE MTS and the names of the FTSE MTS index (FTSE MTS Index™) and of the FTSE MTS indices (FTSE MTS Indices™) are registered trademarks of FTSE TMX Global Debt Capital Markets. The FTSE MTS indices are calculated by FTSE TMX Global Debt Capital Markets, and marketed and distributed by MTSNext, a company owned by FTSE TMX Global Debt Capital Markets.
Neither FTSE TMX Global Debt Capital Markets nor MTSNext can be held liable for any losses or damages of any nature whatsoever (including, notably, investment losses) linked to all or part of the Compartment or to the supply of the FTSE MTS Highest Rated Macro-Weighted Government Bond 1-3Y (Mid Price) Index or of sub-indices or of registered trademarks.

Currency EUR	**30.10.2015**	31.10.2014	31.10.2013	31.10.2012	-
Net assets	**14 988 565,12**	37 125 436,53	109 843 526,93	103 483 606,08	-
Number of outstanding equities	**145 000**	360 000	1 071 000	1 010 000	-
Net asset value	**103,3694**	103,1262	102,5616	102,459	-
Distribution per unit on capital gains and losses (including advances)	**-**	-	-	-	-
Distribution per unit (including advances)	**-**	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) [(1)]	**-**	-	-	-	-
Unit capitalisation [(2)]	**0,41**	0,66	0,41	-0,14	-

[(1)] In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

[(2)] The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 25 November 2011.

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment
France.

Representative of the Swiss Compartment
Société Générale, Paris, Zürich Branch, has been authorised by the FINMA as the Compartment's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Compartment, the KIIDs as well as the list of purchases and sales made by the Compartment during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zürich Branch, Talacker 50, P.O. Box 1928, 8021 Zürich.

Calculation of the Total Expense Ratio

Annual closing of the compartment: 31 Oct.

Average fortune of the compartment for the period from 01/11/14 to 30/10/15 : 23 204 730.62

Compartment management commission: 0.165 % tax included

Extract from the profit and loss account

Expenses in euros	Annual report	Half-yearly report	Annual report

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The LYXOR UCITS ETF EUROMTS HIGHEST RATED MACRO-WEIGHTED GOVT BOND 3-5Y (DR) Compartment (see hereafter the "Compartment") is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment's management objective is to be exposed, downwards and upwards, to the performance of the eurozone government bonds, while reproducing the evolution of the FTSE MTS Highest Rated Macro Weighted Government Bond 3-5Y (Mid Price) Index (see hereafter the "Benchmark Indicator") while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is a "Total Return" type index (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the index).

The Benchmark Indicator measures the performance of eurozone Government bonds segment, weighted by country having at least two rating equal to "AAA" or similar by the three rating agencies Standard & Poor's, Moody's and Fitch. It is listed in EUR.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.ftse.com.

The Benchmark Indicator is calculated by FTSE MTS.

FTSE MTS is a private company based in London and regulated by the FCA. It manages the FTSE MTS European electronic trading platform for benchmark bonds from the Euro zone. FTSE MTS is also responsible for calculating and publishing the value of the FTSE MTS indices.

Methodology

The Benchmark Indicator is composed of bonds issued by the eurozone countries with the highest credit ratings. These bonds are weighted in the index on the basis of macroeconomic indicators. The Benchmark Indicator is provided with a history of index values dating back to 31 December 1998.

As explained below, the initial index components were selected using the same criteria as those used for "FTSE MTS Eurozone Government Broad" indices (except for the credit-rating criterion):

The Benchmark Indicator comprises at least 5 issuers. If an issuer is downgraded, it will be replaced with another eligible issuer country, such that 5 issuers are maintained in the Benchmark Indicator.

The Benchmark Indicator securities are therefore among the highest rated Eurozone sovereign bonds. The following bonds qualify:

- Nominal value and coupon are denominated in euros with no option or convertibility;

- Listed on the FTSE MTS platform;

- Issued by a sovereign eurozone government having at least two out of three AAA ratings from S&P, Moody's and Fitch, and selected by FTSE MTS from among the following countries as: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;

- Maturity exceeds one year;

- With issuance of at least two billion euros.

The Benchmark Indicator must comprise at least five issuing countries. If an issuer is downgraded it will be replaced in the index, provided that there is another country that is eligible, such that the required minimum number of five issuers is maintained.

These indices composition is revised monthly.

The complete methodology is available at www.ftse.com

The performance tracked is the closing index price at 5:30 pm (CET).

Benchmark Indicator publication

The Benchmark Indicator price is fixed daily and available through Reuters and Bloomberg.

Reuters code: FMMPHRB5= Bloomberg code: FMMPHRB5

The Benchmark Indicator's closing price is available on the Internet: www.mtsindices.com.

Benchmark Indicator revision and composition

The Benchmark Indicator's composition is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a pure replication method, which means that the Compartment will invest mainly in bonds making up the Benchmark Indicator.

Information relative to the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The abovementioned securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the compartment is managed:	Between 2 and 6
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets

Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the financial manager by delegation intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, international debt securities.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will not have recourse to futures financial instruments, except, on an ancillary basis, and within limits set by regulations, to future contracts on indices or bonds that are listed on regulated markets.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and sale operations involving securities.

8. Financial guarantees

None. No financial guarantee will be granted / received by the Compartment within the framework of the implementation of its management objective.

Risk profile:

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Liquidity risk (primary market)

Should the Compartment adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment, the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment bonds. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the Benchmark Indicator is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the Benchmark Indicator makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment, the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure, downwards and upwards, to the performance of the eurozone government bonds segment, weighted by country having at least two rating equal to "AAA" or similar by the three rating agencies S&P, Moody's and Fitch.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 8 November 2011.*
- *Compartment creation date: 25 November 2011.*

Activity report

The net asset value of the LYXOR UCITS ETF EUROMTS HIGHEST RATED MACRO-WEIGHTED GOVT BOND 3-5Y (DR) Compartment shows an evolution of 1.12%* between the 31/10/2014 and 30/10/2015 and stands at EUR 111.7117 on 30/10/2015, meaning a fund performance of 11.71% since inception.

The fund replicates the performance of the MTS Mid Price Highest Rated Ma 3-5Y index, listed in euros (EUR), representative of the most noted bonds issued by eurozone governments whose maturity date is between 3 and 5 years and whose calculated weighting by country is based on macroeconomic indicators.

This index has shown an evolution of 1.12% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MTS Mid Price Highest Rated Ma 3-5Y index, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the MTS Mid Price Highest Rated Ma 3-5Y index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 3 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.0060% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

appendix

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial management delegatee when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.165% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency
The Compartment's accounting is carried out in euro.

Indication of accountancy changes declared to each of the bearers individually
- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*
- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions
None.

Indication of the nature of the errors corrected during the fiscal year
None.

Indication of the rights and conditions attached to each category of equities
Capitalisation of all the amounts available for distribution.

appendix

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by FTSE TMX Global Debt Capital Markets (collectively referred to as the "Holders").
FTSE TMX Global Debt Capital Markets cannot be held liable for the promotion or marketing of the Compartment.
FTSE MTS and the names of the FTSE MTS index (FTSE MTS Index™) and of the FTSE MTS indices (FTSE MTS Indices™) are registered trademarks of FTSE TMX Global Debt Capital Markets. The FTSE MTS indices are calculated by FTSE TMX Global Debt Capital Markets, and marketed and distributed by MTSNext, a company owned by FTSE TMX Global Debt Capital Markets.
Neither FTSE TMX Global Debt Capital Markets nor MTSNext can be held liable for any losses or damages of any nature whatsoever (including, notably, investment losses) linked to all or part of the Compartment or to the supply of the FTSE MTS Highest Rated Macro-Weighted Government Bond 3-5Y (Mid Price) Index or of sub-indices or of registered trademarks.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The LYXOR UCITS ETF EUROMTS HIGHEST RATED MACRO-WEIGHTED GOVT BOND 5-7Y (DR) Compartment (see hereafter the "Compartment") is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment's management objective is to be exposed, downwards and upwards, to the performance of the eurozone government bonds, while reproducing the evolution of the FTSE MTS Highest Rated Macro Weighted Government Bond 5-7Y (Mid Price) Index (see hereafter the "Benchmark Indicator") while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is a "Total Return" type index, listed in EUR (i.e. all coupons detached by the components of the index are reinvested in the Benchmark Indicator).

The Benchmark Indicator measures the performance of eurozone Government bonds segment, weighted by country having at least two rating equal to "AAA" or similar by the three rating agencies S&P, Moody's and Fitch. It is listed in EUR.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.ftse.com.

The Benchmark Indicator is calculated by FTSE MTS.

FTSE MTS is a private company based in London and regulated by the FCA. It manages the FTSE MTS European electronic trading platform for benchmark bonds from the Euro zone. FTSE MTS is also responsible for calculating and publishing the value of the FTSE MTS indices.

Methodology

The Benchmark Indicator is composed of bonds issued by the eurozone countries with the highest credit ratings. These bonds are weighted in the index on the basis of macroeconomic indicators. The Benchmark Indicator is provided with a history of index values dating back to 31 December 1998. As explained below, the initial index components were selected using the same criteria as those used for "FTSE MTS Eurozone Government Broad" indices (except for the credit-rating criterion):

The Benchmark Indicator securities are therefore among the highest rated Eurozone sovereign bonds. The following bonds qualify:

- Nominal value and coupon are denominated in euros with no option or convertibility;

- Listed on the FTSE MTS platform;

- Issued by a sovereign eurozone government having at least two out of three AAA ratings from S&P, Moody's and Fitch, and selected by FTSE MTS from among the following countries as: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;

- Maturity exceeds one year;

- With issuance of at least two billion euros.

The Benchmark Indicator must comprise at least five issuing countries. If an issuer is downgraded it will be replaced in the index, provided that there is another country that is eligible, such that the required minimum number of five issuers is maintained.

These indices composition is revised monthly.

The complete methodology is available at www.ftse.com

The performance tracked is the Benchmark Indicator's closing price at 5:30 pm (CET).

Benchmark Indicator publication

The Benchmark Indicator price is fixed daily and available through Reuters and Bloomberg.

Reuters code: FMMPHRC5= Bloomberg code: FMMPHRC5

Benchmark Indicator revision

The Benchmark Indicator's composition is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a pure replication method, which means that the Compartment will invest mainly in bonds making up the Benchmark Indicator.

Information relative to the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The abovementioned securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the compartment is managed:	Between 4 and 8
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets

Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, international debt securities.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will not have recourse to futures financial instruments, except, on an ancillary basis, and within limits set by regulations, to future contracts on indices or bonds that are listed on regulated markets.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and sale operations involving securities.

8. Financial guarantees

None. No financial guarantee will be granted / received by the Compartment within the framework of the implementation of its management objective.

Risk profile:

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Liquidity risk (primary market)

Should the Compartment adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment, the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the Benchmark Indicator is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the Benchmark Indicator makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment, the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure, downwards and upwards, to the performance of the eurozone government bonds segment, weighted by country having at least two rating equal to "AAA" or similar by the three rating agencies S&P, Moody's and Fitch.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 8 November 2011.*
- *Compartment creation date: 25 November 2011.*

Activity report

The net asset value of the LYXOR UCITS ETF EUROMTS HIGHEST RATED MACRO-WEIGHTED GOVT BOND 5-7Y (DR) Compartment shows an evolution of 2.35%* between the 31/10/2014 and 30/10/2015 and stands at EUR 120.5785 on 30/10/2015, meaning a fund performance of 20.58% since inception.

The fund replicates the performance of the MTS Mid Price Highest Rated Ma 5-7Y index, listed in euros (EUR), representative of the most noted bonds issued by eurozone governments whose maturity date is between 5 and 7 years and whose calculated weighting by country is based on macroeconomic indicators.

This index has shown an evolution of 2.30% over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MTS Mid Price Highest Rated Ma 5-7Y index, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the MTS Mid Price Highest Rated Ma 5-7Y index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 3 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.0070% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the Compartment does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of UCITS (1st part).

Transferable securities traded on a French or foreign regulated market are valued at the market price. The valuation at the reference market price is carried out according to the provisions decided upon by the board of the directors. The application provisions are stipulated in the notes to the annual financial statements.

However:

- Transferable securities for which the price is not determined on the valuation date or for which the price was corrected are valued at their probable trading value under the responsibility of the board of directors. These valuations and their justification are provided to the statutory auditor at the time of the latter's verifications.
- Marketable debt securities and similar securities that are not the subject of significant transactions are valued by application of an actuarial method, with the adopted rate being that of the issues of equivalent securities affected, as relevant, by a difference that is representative of the intrinsic characteristics of the security's issuer. However, marketable debt securities having a residual life span less than or equal to 3 months, and that are not particularly sensitive, can be valued using the straight line method. The application provisions for these rules are set by the board of directors. They are mentioned in the notes to the annual financial statements.
- Units or equities of UCITS will be valued at the last known net asset value.
- Securities that are not traded on a regulated market are valued at their probable trading value, under the responsibility of the board of directors.
- Securities that are the subject of temporary disposal or acquisition contracts are valued in compliance with the applicable regulations, with the application provisions being determined by the board of directors and stipulated in the notes to the annual financial statements.

- Operations relating to firm or conditional future financial instruments traded on French or foreign organised markets are valued at the market value according to the provisions determined by the board of directors. They are stipulated in the notes to the annual financial statements.
- Firm or conditional futures transactions or forex operations completed on over-the-counter markets authorised by the regulations applicable to UCITS are valued at their market value or a value estimated according to the provisions determined by the board of directors and stipulated in the notes to the annual financial statements.

Moreover, an instantaneous net asset value for information purposes will be calculated by NYSE Euronext if the compartments are accepted for listing.

Posting method for the compartment trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial management delegatee when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

appendix

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	maximum 0.165% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euro.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Capitalisation of all the amounts available for distribution.

appendix

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by FTSE TMX Global Debt Capital Markets (collectively referred to as the "Holders").
FTSE TMX Global Debt Capital Markets cannot be held liable for the promotion or marketing of the Compartment.

Hedging				
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type
Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	
Future currency exchange operations:	-
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
-	-
-	-
-	-
-	-
-	-
Other operations	-
Debts	
Future currency exchange operations:	**1 708,24**
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Accrued expenses	1 708,24
-	-
-	-
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	96 000	11 534 835,40	126 000	15 115 140,60
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	**0,16**
Performance commissions (variable fees): amount of costs for the fiscal year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees ..... **None**
3.8.2 Description of the other commitments received and/or given ..... **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (mutual fund) and CIU managed by these entities:	
- CIU securities	-
- Swaps	-

3.10 Allocation of the earnings table *(in the Compartment's currency of account)*

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt instruments listed in euros.

The Compartment is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index Compartment (the "Compartment").

Terms of determination and allocation of amounts available for distribution:

C-EUR equities classes: Capitalisation of all the amounts available for distribution.

D-EUR equities classes: The Board of directors reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is to replicate, downwards and upwards, the evolution of the "FTSE MTS Italy Government 1-3Y (Mid Price) Index" (the "Benchmark Indicator"), listed in EUR and representative or Italian sovereign bonds with maturities of 1 to 3 years.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator FTSE MTS Italy Government 1-3Y (Mid Price) Index is a "Total Return" type index (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator).

The Benchmark Indicator measures the performance of Italian Government bonds with maturity dates between 1 and 3 years. It is listed in EUR.

The Benchmark Indicator is calculated by FTSE MTS Limited.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following web site: www.ftse.com.

Methodology

The Benchmark Indicator comprises bonds issued by the Italian government with maturities of 1 to 3 years. The index components were initially selected using the same criteria as for the "FTSE MTS Government Indices", which are shown below.

The following bonds qualify:

- Nominal bonds, with fixed coupons, redeemable at maturity in local currency, without embedded options and non-convertible,

- Traded on the MTS platform,

- Issued by the Italian government,

- Have a minimum outstanding issuance of one billion euros.

The composition of these indices is revised monthly.

The complete methodology are available on Internet site: www.ftse.com

The performance tracked is that of the index closing price at 5:30 pm (CET).

Benchmark Indicator publication

The Benchmark Indicator price is fixed daily and available through Reuters and Bloomberg.

Reuters code: FMMPITA5= Bloomberg code: FMMPITA5

The Benchmark Indicator's closing price is available on the Internet site: www.ftse.com.

Benchmark Indicator revision

The Benchmark Indicator is revised monthly using the methodology described in the Benchmark Indicator Rulebook, available on FTSE internet site: www.ftse.com.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's website at www.lyxoretf.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the Compartment is managed:	Between 1 and 4
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 10% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, financial instruments of any kind. The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of CIU managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may engage in transactions involving derivatives traded on a regulated market or over the counter.

With respect to derivatives traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

For this purpose the management company may appoint an intermediary (hereinafter the "Agent) to provide the following services in connection with the Compartment's temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment's behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment's annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment's overall operating expenses they have been excluded from ongoing expenses.

If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;

- the identity of the counterparty(ies) involved in these transactions;

- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;

- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs or expenses.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

- Liquidity risk (primary market)

Should the Compartment (or, if relevant, one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the equities of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment may use Future Financial Instrument (FFI) on an ancillary basis.

In such a case, the Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter. In compliance with the UCITS regulations, the counterparty risk cannot exceed 10% of the total value of the Compartment's assets by counterparty.

When Société Générale is involved as a counterparty of the FFIs and/or a temporary securities transaction, conflicts of interest can arise between the Compartment's management company and the counterparty. The management company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk arising from temporary securities transactions

If a borrower of securities defaults on its obligation there could be a risk that the value of the guarantee received by the Compartment is less than the value of the securities lent. This risk could arise, for example, in the event of (i) an inaccurate valuation of the securities lent and/or (ii) unfavourable market movements and/or (iii) the lowering of the credit rating(s) of the issuer(s) of securities taken as guarantee and/or (iv) the illiquidity of the market in which the guarantees received are listed. If cash guarantees are reinvested this could (i) result in leverage that entails a risk of loss and volatility and/or (ii) expose the Compartment to a market that is inappropriate for its investment objective, and/or (iii) generate less income than the amount of guarantees the Compartment must repay. The Compartment could also fail to receive the securities lent by the date specified, which would diminish its capacity to accommodate investor redemptions.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or its FFI's counterparty), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment bonds. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by its supplier,

iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment can enter into transactions involving over-the-counter Future Financial Instrument (FFI), such as swaps, in order to secure the performance of the Benchmark Indicator. These FFI involve various risks, such as These FFI involve various risks, such as counterparty risk, hedging disruption, Benchmark Indicator disruption, taxation risk, regulatory risk, operational risk and liquidity risk. These risks can materially affect an FFI and may require an adjustment of the FFI transaction or even its premature termination, which could adversely affect the Compartment's net asset value.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure, downwards and upwards, to the performance of the Italian government bonds segment.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is greater than 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 5 September 2012*
- *Compartment creation date: 21 September 2012*

Activity report

The net asset value of the C-EUR unit of the LYXOR UCITS ETF MTS BTP 1-3Y ITALY GOVERNMENT BOND (DR) Compartment shows an evolution of 1.60%* between 31/10/2014 and 30/10/2015 and stands at EUR 109.6222 on 30/10/2015, meaning a fund performance of 9.62% since inception.

The fund replicates the performance of the MTS Mid Price Italy Govt 1-3 y index, listed in euros (EUR), the fund seeks to track the MTS Italy Government Index (1-3yr).

This index has shown an evolution of 1.75 % over the fiscal year.

This gap between the annual performance of the CIU and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MTS Mid Price Italy Govt 1-3 y index, the MF will use a direct replication method, which means that the MF will invest mainly in a basket of balance sheet assets made of securities making up the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the MTS Mid Price Italy Govt 1-3 y index, the MF may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the MF's tracking error.

The fund's risk and yield profile has been classed as category 3 given its exposure to the Benchmark Index.

The basket of securities held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will aim to make the market value of the aforementioned future swap less than or equal to zero, which will ensure that the counterparty risk arising from the swap will be fully neutralized.

On 30/10/2015, the tracking error reached the level of 0.0150% for the Compartment. The level of the tracking error for the period was of 0.02%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

1. Accounting rules and methods

appendix

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors – FCPR – FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Comité de la Réglementation Comptable dated 2 October 2003 relative to the chart of accounts of CIU (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

appendix

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of CIU operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of CIU operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the Board of Directors when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax (1)	Net assets	Maximum 0.165% per year

Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None
Cost of temporary purchases and disposals of securities	The amount of the transaction	Maximum 35% of the income obtained from these transactions

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in CIU.

Accounting currency

The Compartment's accounting is carried out in euros.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

C-EUR equities classes: Capitalisation of all the amounts available for distribution.

D-EUR equities classes: The Board of directors reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

appendix

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by FTSE TMX Global Debt Capital Markets (collectively referred to as the "Holders").
FTSE TMX Global Debt Capital Markets cannot be held liable for the promotion or marketing of the Compartment.
FTSE MTS and the names of the FTSE MTS (FTSE MTS Index™) indices and of the FTSE MTS (FTSE MTS Indices™) indices are registered trademarks of FTSE TMX Global Debt Capital Markets. The FTSE MTS indices are calculated by FTSE TMX Global Debt Capital Markets, and marketed and distributed by MTSNext, a company owned by FTSE TMX Global Debt Capital Markets.
Neither FTSE TMX Global Debt Capital Markets nor MTSNext can be held liable for any losses or damages of any nature whatsoever (including, notably, investment losses) linked to all or part of the Compartment or to the supply of the FTSE MTS Italy Government 1-3Y (Mid Price) Index, or of sub-indices or of registered trademarks.

Compartments / feeder	LYXOR UCITS ETF MTS 1-3Y FRANCE GOVERNMENT BOND (DR) is a compartment of the MULTI UNITS FRANCE mutual fund
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt instruments listed in euros.

The LYXOR UCITS ETF MTS 1-3Y France GOVERNMENT BOND Compartment (the "Compartment") is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index Compartment.

Terms of determination and allocation of amounts available for distribution:

The management company reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year.

C-EUR equities classes: Capitalisation of all the amounts available for distribution.

D-EUR equities classes: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year.

The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is to replicate, downwards and upwards, the evolution of the "FTSE MTS France Government 1-3Y (Mid Price) Index" (the "Benchmark Indicator"), listed in EUR and representative of the French sovereign bonds performance with maturities of 1 to 3 years.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is a "Total Return" type index (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator).

The Benchmark Indicator measures the performance of French Government bonds with maturity dates between 1 and 3 years. It is listed in EUR.

The Benchmark Indicator is calculated by FTSE MTS.

Methodology

The Benchmark Indicator comprises bonds issued by the French government with maturities of 1 to 3 years. The index components were initially selected using the same criteria as for the "FTSE MTS Government Indices", which are shown below.

The following bonds qualify:

- Nominal bonds, with fixed coupons, redeemable at maturity in local currency, without embedded options and non-convertible,

- Traded on the FTSE MTS platform,

- Issued by the French government,

- Have a minimum outstanding issuance of one billion euros.

The composition of these indices is revised monthly.

The complete methodology is available on Internet site: www.ftseindices.com

The performance tracked is that of the Benchmark Indicator's closing price at 5:30 pm (CET).

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following internet site: www.ftseindices.com.

Benchmark Indicator publication

The Benchmark Indicator price is fixed daily and available through Reuters and Bloomberg.

Reuters code: FMMPFRA5= Bloomberg code: FMMPFRA5

The Benchmark Indicator's closing price is available on the Internet site: www.ftseindices.com.

Benchmark Indicator revision

The Benchmark Indicator is revised monthly using the methodology described in the Benchmark Indicator Rulebook, available on the internet site: www.ftseindices.com.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's website at www.lyxoretf.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned website.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the Compartment is managed:	Between 1 and 4
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 10% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, financial instruments of any kind. The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of Collective Investment Undertakings ("CIU") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may engage in transactions involving derivatives traded on a regulated market or over the counter.

With respect to derivatives traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

For this purpose the management company may appoint an intermediary (hereinafter the "Agent) to provide the following services in connection with the Compartment's temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment's behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment's annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment's overall operating expenses they have been excluded from ongoing expenses.

If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;

- the identity of the counterparty(ies) involved in these transactions;

- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;

- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs or expenses.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by CIU investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

- Liquidity risk (primary market)

Should the Compartment (or, if relevant, one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the equities of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment may use Future Financial Instrument (FFI) on an ancillary basis.

In such a case, the Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter. In compliance with the UCITS regulations, the counterparty risk cannot exceed 10% of the total value of the Compartment's assets by counterparty.

When Société Générale is involved as a counterparty of the FFIs and/or a temporary securities transaction, conflicts of interest can arise between the Compartment's management company and the counterparty. The management company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk arising from temporary securities transactions
