## 1. Information for Prospective Investors

This prospectus ("Prospectus") is valid only if accompanied by the latest key investor information document ("Key Investor Information Document"), the latest annual report, and also the latest semi-annual report if this was published after the latest annual report. These documents shall be deemed to form part of this Prospectus. Prospective investors shall be provided with the latest version of the Key Investor Information Document in good time before their proposed subscription of shares in the CS Investment Funds 3 (the "Company").

This Prospectus does not constitute an offer or solicitation to subscribe shares ("Shares") in the Company by anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make such offer or solicitation.

Information which is not contained in this Prospectus, or in the documents mentioned herein which are available for inspection by the public, shall be deemed unauthorized and cannot be relied upon.

Potential investors should inform themselves as to the possible tax consequences, the legal requirements and any foreign exchange restrictions or exchange control requirements which they might encounter under the laws of the countries of their citizenship, residence or domicile and which might be relevant to the subscription, holding, conversion, redemption or disposal of Shares. Further tax considerations are set out in Chapter 9, "Expenses and Taxes".

Prospective investors who are in any doubt about the contents of this Prospectus should consult their bank, broker, solicitor, accountant or other independent financial adviser.

This Prospectus may be translated into other languages. To the extent that there is any inconsistency between the English-language Prospectus and a version in another language, the English-language Prospectus shall prevail, unless stipulated otherwise by the laws of any jurisdiction in which the Shares are sold.

Investors should read and consider the risk discussion in Chapter 7, "Risk Factors", before investing in the Company.

Some of the Share classes may be listed on the Luxembourg Stock Exchange.

**The Company's Shares have not been, and will not be, registered under the United States Securities Act of 1933 (the "1933 Act"), any of the securities laws of any of the states of the United States. The Company has not been and will not be registered under the United States Investment Company Act of 1940, as amended, nor under any other US federal laws. Therefore, the Shares in the Subfunds described in this Prospectus may not be offered or sold directly or indirectly in the United States of America, except pursuant to an exemption from the registration requirements of the 1933 Act.**

**Further, the Board of Directors has decided that the Shares shall not be offered or sold, directly or indirectly, to any ultimate beneficial owner that constitutes a U.S. Person. As such, the Shares may not be directly or indirectly offered or sold to or for the benefit of a "U.S. Person", which shall be defined as and include (i) a "United States person" as described in section 7701(a)(30) of the U.S. Internal Revenue Code of 1986, as amended (the "Code"), (ii) a "U.S. person" as such term is defined in Regulation S of the 1933 Act, as amended, (iii) a person that is "in the United States" as defined in Rule 202(a)(30)-1 under the U.S. Investment Advisers Act of 1940, as amended, or (iv) a person that does not qualify as a "Non-United States Person" as such term is defined in U.S. Commodities Futures Trading Commission Rule 4.7.**

Credit Suisse Fund Management S.A. is exempt from the requirement to hold an Australian Financial Services Licence under the Corporations Act 2001 (Cth.) (the "Act") in respect of financial services provided to Australian wholesale clients (within the meaning of section 761G of the Act). Credit Suisse Fund Management S.A. is regulated by the Commission de Surveillance du Secteur Financier in Luxembourg under foreign laws, which differ from Australian laws.

The Management Company (as described below) shall not divulge any confidential information concerning investors unless required to do so by applicable laws or regulations to the Management Company.

Specific provisions may apply with respect to each subfund, as set out in Chapter 23, "Subfunds".

(1) This Summary of Share Classes should not be relied upon as a substitute for reading the Prospectus.

(2) ACC = accumulating / D = distribution.

(3) The management fee actually payable will be disclosed in the respective annual or semi-annual report.

(4) Class DA, DAH, DB, DP and DBH Shares may only be acquired by those investors who have concluded a discretionary asset management agreement, as defined by the Management Company, with a subsidiary of Credit Suisse Group AG. Moreover, subject to the prior consent of the Company, Class DA, DAH, DB, DP and DBH Shares may also be acquired by institutional investors who have concluded an advisory agreement or any similar agreement, as defined by the Management Company, with a subsidiary of Credit Suisse Group AG.

(5) Class DA, DAH, DB and DBH Shares are not subject to a management fee but only to an all-in management service fee, payable to the Management Company covering all fees and expenses excluding the fees payable to the Depositary Bank, of at least 0.03% p.a. but not more than 0.15% p.a.

(6) Class DP Shares are not subject to a management fee but only to an all-in management service fee, payable to the Management Company covering all fees and expenses excluding the fees payable to the Depositary Bank, of at least 0.03% p.a. but not more than 0.15% p.a., and a performance fee, payable to the Management Company.

(7) The Company may decide on the issue of Class AH, BH, CAH, CBH, DAH, DBH, EAH, EBH, IAH, IAH25, IBH, IBH25, MAH, MBH, UAH, UAH500, UBH, UBH500, XAH and XBH Shares in any additional freely convertible currencies as well as on their initial offering price at any time. Shareholders have to check with the agents mentioned in Chapter 14, "Information for Shareholders", if Shares of Class AH, BH, CAH, CBH, DAH, DBH, EAH, EBH, IAH, IAH25, IBH, IBH25, MAH, MBH, UAH, UAH500, UBH, UBH500, XAH and XBH have been issued in additional currencies in the meantime before submitting a subscription application. The initial minimum investment and holding amount of any Class IAH, IAH25, IBH, IBH25, MAH and MBH Shares to be issued in any additional freely convertible currency will be the equivalent in such freely convertible currency of the amount set out in Chapter 2, "Summary of Share Classes" in the Subfund's Reference Currency. The initial minimum investment and holding amount of any Class XAH and XBH Shares will be defined separately between the distributor and/or financial intermediary and the Management Company, at the sole discretion of the Management Company.

With Share Class AH, BH, CAH, CBH, DAH, DBH, EAH, EBH, IAH, IAH25, IBH, IBH25, MAH, MBH, UAH, UAH500, UBH, UBH500, XAH and XBH the risk of an overall depreciation of the Subfund's Reference Currency against the alternate currency of the Share Class is reduced significantly by hedging the Net Asset Value of the respective Share Class AH, BH, CAH, CBH, DAH, DBH, EAH, EBH, IAH, IAH25, IBH, IBH25, MAH, MBH, UAH, UAH500, UBH, UBH500, XAH and XBH – calculated in the Subfund's Reference Currency – against the respective alternate currency by means of forward foreign exchange transactions. The Net Asset Value of the Shares of these Alternate Currency Classes does not develop in the same way as that of the Share Classes issued in the Reference Currency.

(8) Class EA, EAH, EB, EBH, MA, MAH, MB and MBH Shares may only be acquired by institutional investors.

(9) Class CA, CAH, CB and CBH Shares may be offered for distribution in Italy through certain distributors and/or financial intermediaries domiciled in Italy.

(10) Class UA, UA500, UAH, UAH500, UB, UB500, UBH and UBH500 Shares are exclusively reserved for investors who subscribe Shares of this Class via a financial intermediary domiciled in the United Kingdom or the Netherlands, or who have concluded a written agreement with a financial intermediary which explicitly provides for the acquisition of trailer fee-free classes, or who subscribe for Shares of this Class pursuant to a written asset management agreement with an independent

asset manager carrying on business in the European Economic Area, Latin America or the Middle East and whose conduct is regulated by a recognised financial services regulator in their place of business.

- (11) The Performance Fee is set out in Chapter 23, "Subfunds".
- (12) The Management Company does not intend to enter into forward currency contracts to hedge the exchange-rate risks relating to these Alternate Currency Classes. These Classes may be issued in any additional freely convertible currencies as well as on their initial offering price at any time.
- (13) Class XA, XB, XAH and XBH Shares may be offered for distribution in certain countries through certain distributors and or financial intermediaries at the discretion of the Management Company. The initial minimum investment and holding amount will be defined separately between the distributor and/or financial intermediary and the Management Company, at the sole discretion of the Management Company.
- (14) The FX hedging fee actually payable will be disclosed in the respective annual or semi-annual report.

### 3. The Company

The Company is an undertaking for collective investment in transferable securities in the legal form of an investment company with variable capital (*société d'investissement à capital variable, SICAV*) subject to Part I of the Law of December 17, 2010 on undertakings for collective investment ("Law of December 17, 2010") transposing Directive 2009/65/EC of the European Parliament and of the Council of July 13, 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities. The Company was established on October 11, 2002.

The Company has appointed Credit Suisse Fund Management S.A. as the management company ("Management Company"). In this capacity, the Management Company acts as investment manager, administrator and distributor of the Company's Shares. The Management Company has delegated the above-mentioned tasks as follows:

Tasks relating to investment advice are performed by the investment managers ("Investment Managers") named in Chapter 23, "Subfunds", and administrative tasks are performed by Credit Suisse Fund Services (Luxembourg) S.A..

The Company is registered with the Luxembourg Trade and Companies Register (*registre de commerce et des sociétés*) under no. B 89 370. Its articles of incorporation ("Articles of Incorporation") were first published in the *Mémorial C, Recueil des Sociétés et Associations* ("*Mémorial*") on November 4, 2002. The last amendments of the Articles of Incorporation took place on 25 September 2018 and were published in the *Recueil Electronique des Sociétés et Associations* ("*RESA*") on 8 October 2018. The legally binding version is deposited with the Trade and Companies Register. All amendments of the Articles of Incorporation will be announced in accordance with Chapter 14, "Information for Shareholders", and become legally binding for all shareholders of the Company ("Shareholders") subsequent to their approval by the General Meeting of Shareholders. The share capital of the Company corresponds to the total net asset value of the Company and shall at any time exceed EUR 1,250,000.

The Company has an umbrella structure and therefore consists of at least one subfund (a "Subfund"). Each Subfund represents a portfolio containing different assets and liabilities and is considered to be a separate entity in relation to the Shareholders and third parties. The rights of Shareholders and creditors concerning a Subfund or which have arisen in relation to the establishment, operation or liquidation of a Subfund are limited to the assets of that Subfund. No Subfund will be liable with its assets for the liabilities of another Subfund.

The board of directors of the Company ("Board of Directors") may at any time establish new Subfunds with Shares having similar characteristics to the Shares in the existing Subfunds. The Board of Directors may at any time create and issue new classes ("Classes") or types of Shares within any Subfund. If the Board of Directors establishes a new Subfund and/or creates a new Class or type of Share, the corresponding details shall be set out in this Prospectus. A new Class or type of Share may have different characteristics than the currently existing Classes. The terms of any offering of new Shares shall be set out in Chapter 2, "Summary of Share Classes" and Chapter 23, "Subfunds".

The characteristics of each possible Share Class are further described in this Prospectus, in particular in Chapter 5, "Investment in CS Investment Funds 3", and in Chapter 2, "Summary of Share Classes".

The individual Subfunds shall be denominated as indicated in Chapter 2, "Summary of Share Classes" and Chapter 23, "Subfunds".

Information about the performance of the individual Share Classes of the Subfunds is contained in the Key Investor Information Document.

### 4. Investment Policy

The primary objective of the Company is to provide investors with an opportunity to invest in professionally managed portfolios. The assets of the Subfunds are invested, in accordance with the principle of risk diversification, in transferable securities and other assets as specified in Article 41 of the Law of December 17, 2010.

The investment objective and policy of the individual Subfunds are described in Chapter 23, "Subfunds". The assets of the individual Subfunds will be invested in accordance with the investment restrictions as stipulated by the Law of December 17, 2010 and set out in this Prospectus in Chapter 6, "Investment Restrictions".

**The investment objective for each Subfund is to maximize the appreciation of the assets invested. In order to achieve this, the Company shall assume a fair and reasonable degree of risk. However, in consideration of market fluctuations and other risks (see Chapter 7, "Risk Factors") there can be no guarantee that the investment objective of the relevant Subfunds will be achieved. The value of investments may go down as well as up and investors may not recover the value of their initial investment.**

#### Reference Currency

The reference currency is the currency in which the performance and the net asset value of the Subfunds are calculated ("**Reference Currency**"). The Reference

Currencies of the individual Subfunds are specified in Chapter 2, "Summary of Share Classes".

#### Liquid Assets

The Subfunds may hold ancillary liquid assets in the form of sight and time deposits with first-class financial institutions and money market instruments which do not qualify as transferable securities and have a term to maturity not exceeding 12 months, in any convertible currency.

Moreover, each Subfund may, on an ancillary basis, hold units/shares in undertakings for collective investment in transferable securities which are subject to Directive 2009/65/EC and which in turn invest in short-term time deposits and money market instruments and whose returns are comparable with those for direct investments in time deposits and money market instruments.

#### Sustainable Investing

Sustainable Investing refers to the process of considering environmental, social and governance information ("**ESG Factors**") when taking investment decisions. Subfunds following a sustainable investing strategy integrate ESG Factors into the investment decision process to create a more sustainable portfolio and to increase the expected risk-adjusted returns or to target specific sustainable investment objectives typically expressed as one or more of the United Nations Sustainable Development Goals. Depending on the overall investment strategy and investment universe of the Subfund, the importance of and focus on individual ESG Factors varies. The methodology on how ESG Factors are considered in the investment decision-making are explained in the section 'Credit Suisse Asset Management Sustainable Investing Policy'.

For Subfunds following a sustainable investment strategy, Credit Suisse Asset Management considers, quantifies and reports monthly scores of the following ESG Factors on the investment portfolio according to the MSCI ESG Key Issue Hierarchy:

1. Environmental (E):
  - Climate Change factor (including different carbon emission data points)
  - Environmental Opportunities factor (including different data points on renewable energy and technology)
  - Natural Capital factor (including clean water and biodiversity data points)
  - Pollution and Waste factor (including waste management and toxic emission data points)
2. Social (S):
  - Human capital factor (including health and safety data points)
  - Product liability factor (including product safety and responsible investment data points)
  - Stakeholder opposition score, social opportunities factor (including access to health care and communications data points)
3. Governance (G):
  - Corporate governance factor (including ownership and control and remuneration data points)
  - Corporate Behavior factor (including business ethics and tax transparency data points)

For further information on the MSCI ESG Key Issue Hierarchy and the methodology for the calculation of the individual factors, please refer to: <https://www.msci.com/our-solutions/esg-investing/esg-ratings>.

The reported scores of the ESG Factors on portfolio level are calculated by aggregation of the scores of the underlying securities subject to data availability. Aggregated scores for Environmental (E), Social (S), Governance (G) as well as an overall ESG portfolio score are reported for each Subfund.

The overall ESG score as well as the scores of the individual ESG Factors are published in the Subfund's fact sheet available at: <https://amfunds.credit-suisse.com>

Please note, Sustainable Investing is an on-going legislative act. Regulatory requirements are evolving and might change in the future. Additionally, new methods arise and availability of data is constantly improving. This might have an impact on the implementation, monitoring and reporting of ESG Factors as described in this prospectus.

#### Credit Suisse Asset Management Sustainable Investing Policy

Credit Suisse Asset Management ("CSAM") has a comprehensive Sustainable Investing Policy that directs and governs all activities related to sustainable investing. The Management Company and the Investment Manager apply the Sustainable Investing Policy to the Subfunds with an explicit ESG investment strategy, as described for the relevant Subfund in Chapter 23 "Subfunds". The implementation of the Sustainable Investing Policy in the investment process is documented and monitored accordingly by the Management Company and the Investment Manager. A dedicated ESG team within Credit Suisse Asset Management (Schweiz) AG is the owner of the Sustainable Investing Policy and supports the Management Company and the relevant Investment Manager in the implementation of this policy.

The Sustainable Investing Policy defines how to integrate ESG Factors into various steps of the investment process by guiding investment teams to identify

sustainability related opportunities and to reduce Sustainability Risks (see definition in Chapter 7 "Risk Factors").

The Sustainable Investing Policy consists of the following primary approaches:

1. **Exclusions:** CSAM applies the following three categories of exclusions:

- **Norms-based Exclusions:** Categorical exclusion of firms that are not compliant with international treaties on controversial weapons, such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, and the Treaty on the Non-Proliferation of Nuclear Weapons.
- **Business-conduct Exclusions:** Companies found to (1) systematically violate international norms, (2) where the breaches are particularly severe, or (3) where management is not open to implementing the necessary reforms, are put on a watchlist and may be decided to be excluded from the firm-wide investment universe. Exclusions are considered as a last resort. Instead, engaging with investee companies is supposed to have a higher impact to prevent future breaches. Companies that are able and willing to take action may be subject to a period of prolonged engagement in which Credit Suisse, together with company management, agree on targets and timelines for improvement.
- **Values-based Exclusions:** Companies that derive a significant portion of their revenue from controversial business activities. Relevant business activities and applicable revenue thresholds are defined individually and take into account direct and indirect exposures. Exclusion criteria may be adjusted over time by refining the Sustainable Investing Policy.

Norms-based exclusions are applied to all Subfunds. Business-conduct and value based exclusions are considered for direct investments in actively managed Subfunds with an ESG investment strategy.

For all three exclusion categories, the applicable criteria are published online at: <https://www.credit-suisse.com/esg>

Please note that these exclusion criteria may evolve over time.

2. **ESG Integration:** CSAM integrates ESG Factors at various steps of the investment process by combining financial information with ESG related information to generally improve the risk-adjusted returns of the investment portfolio. The ESG Integration technique varies by asset class, investment style, and availability of ESG data and tools. The specific measures on ESG Integration are defined per asset class and explained below.

3. **Investing with a Sustainability Objective:** CSAM implements investment strategies that allocate capital into companies that offer solutions to society's challenges and meet a sustainable investment objective. The sustainable investment objective is achieved through a dedicated investment process focusing on investments in themes and sectors whose economic activities address specific ESG challenges. Typically, this means investing in companies or strategies that address one or more of the United Nations Sustainable Development Goals. Subfunds that follow a Sustainable Objective provide more details in the Subfund section "Investment Principles" of Chapter 23 "Subfunds".

4. **Active Ownership:** CSAM ensures investee companies follow good governance practices by engaging with companies and by exercising voting rights across Subfunds.

- **Engagement:** CSAM may monitor investment exposure in its investee companies through meetings with the Board of Directors, executive management members and/or investor relations teams of the respective investee company. While not an exhaustive list, factors that may be taken into consideration, where appropriate, include
  - business strategy and its execution
  - risk management
  - environmental and social concerns
  - corporate governance issues such as board composition, the election of independent directors, and executive remuneration and its structuring,
  - compliance, culture and ethics
  - performance and capital structure

Other monitoring activities may include reviewing CSAM's positions in investee companies during regular investment meetings.

- **Exercise of voting rights:** CSAM considers the exercise of voting rights a key element in bearing stewardship responsibilities for Subfund's assets. Voting serves CSAM in the escalation of issues and the expression of concerns and opinions. In order to facilitate well-grounded voting decisions, CSAM relies on several sources of information. To cover the extensive scope of investee companies, CSAM may utilize the services of external proxy advisors, where appropriate. Vote recommendations of proxy advisors serve as one source, among others, within CSAM's decision-making process on voting topics and supplements CSAM's internal research. CSAM ensures effective and efficient voting processes and controls by focusing on investments that

are material to it as explained in the document "Proxy voting approach and policy summary" referred to at: <https://www.credit-suisse.com/esg>

For the purpose of the Sustainable Finance Disclosure Regulation (SFDR, Regulation (EU) 2019/2088), Subfunds to which the CSAM Sustainable Investing Policy applies are classified into:

- **Subfunds promoting environmental or social characteristics**  
These Subfunds apply Exclusions, ESG integration and Active Ownership as defined in the CSAM Sustainable Investing Policy to create a more sustainable portfolio and to increase the expected risk-adjusted returns. These Subfunds qualify as financial products under Art. 8(1) of SFDR.
- **Subfunds with a sustainable investment objective**  
These Subfunds have sustainable investments as primary investment objective. They apply Exclusions, ESG Integration, Investing with a Sustainable Objective Investing and Active Ownership approach according to the CSAM Sustainable Investing Policy. These Subfunds qualify as financial products under Art. 9(1), (2) or (3) of SFDR. Sustainable investment means, as per the Art. 2(17) SFDR, an investment in an economic activity that contributes to an environmental objective, as measured, for example, by key resource efficiency indicators on the use of energy, renewable energy, raw materials, water and land, on the production of waste, and greenhouse gas emissions, or on its impact on biodiversity and the circular economy, or an investment in an economic activity that contributes to a social objective, in particular an investment that contributes to tackling inequality or that fosters social cohesion, social integration and labour relations, or an investment in human capital or economically or socially disadvantaged communities, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance.

Additional information on the CSAM Sustainable Investing Policy are available online at: <https://www.credit-suisse.com/esg>

Subfunds which do not adhere to the CSAM Sustainable Investing Policy do not follow a dedicated ESG investment strategy and sustainability is neither the objective, nor a mandatory part of the investment process of the Subfunds. In particular, the underlying investments of the Subfunds do not take into account the EU criteria for environmentally sustainable economic activities.

Subfunds promoting ESG characteristics and subject to Art. 8(1) of SFDR apply consistent Exclusions, ESG Integration and Active Ownership approaches within each of the following asset classes:

**Fixed Income Subfunds**

The Fixed Income Subfunds integrate ESG Factors into the investment decision process to create a more sustainable portfolio and to improve the expected risk/return profile. The current ratings of the ESG Factors are published monthly for these Subfunds' investment portfolio on: <https://amfunds.credit-suisse.com>  
The Fixed Income Subfunds apply Exclusions, ESG Integration and Active Ownership as follows:

- **Exclusions**
  - Norms-based Exclusions
  - Business-conduct Exclusions
  - Values-based Exclusions

The three exclusion types are described above.
- **ESG Integration**  
The integration of ESG Factors into the investment process follows the following steps:
  - Identify material ESG Factors

The investment manager identifies the material ESG Factors of its investment strategy with the support of materiality frameworks. Materiality frameworks are concepts to identify sustainability related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. For this Subfund materiality is assessed for each issuer individually based on sector and geographical exposure. The Investment Manager re-assess the materiality framework regularly to account for changes in the portfolio exposure or market conditions. Subsequently, the material ESG Factors may change over time.

  - ESG Security Analysis

Based on the identified material ESG Factors, the Investment Manager performs security, sector and regional research on ESG Factors across the Subfund's investment universe. The Investment Manager makes use of ESG ratings from state of the art service providers and combines them with the Investment Manager's proprietary analysis and information. This may include ESG related news, ESG ratings and scores, ESG related controversies and ESG trends. To integrate ESG Factors in the security analysis, the Investment Manager calculates an ESG integrated credit view for all issuers of the fixed income Subfund universe. The ESG integrated credit view is based on the traditional issuer-level credit rating combined with an issuer-level ESG rating. The Investment Manager applies a proprietary methodology to systematically

combine the traditional issuer credit rating with the issuer ESG rating in order to derive an ESG integrated credit rating. The ESG integrated credit rating results in a fundamental view on each issuer and allows to compare securities on an ESG adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell those in the "Security Selection and Portfolio Implementation". ESG integrated credit ratings are updated as soon as an update on the underlying traditional credit rating or ESG rating becomes available.

- Security Selection and Portfolio Implementation

The ESG integrated credit ratings are used by the Investment Manager in the bottom-up security selection process. Securities whose financial return compensate for the inherent financial and sustainability related risks may remain eligible for investing. The position weights are derived from over- or underweighting as well as excluding securities based on the ESG integrated credit ratings. In this step, the Investment Manager combines ESG integrated credit ratings with established tools and optimization techniques of traditional investing strategies to optimize the return.

- Portfolio Monitoring

The Investment Manager monitors the ESG Factors daily with its portfolio management system to detect significant changes in the ESG Factors of underlying securities and is re-assessing regularly the portfolio to evaluate increase or decrease positions.

▪ **Active Ownership**

- Engagement

Regular engagement by the ESG team is described above

**Securities Lending**

Subject to the investment restrictions set out below, a Subfund may from time to time enter into securities lending transactions for the purpose of efficient portfolio management. Securities lending transactions consist in transactions whereby a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested to do so by the lender, such transaction being considered as securities lending for the party transferring the securities or instruments and being considered as securities borrowing for the counterparty to which they are transferred. Securities lending transactions entail a transfer of ownership of the relevant securities to the borrower. As a consequence, these securities are no longer subject to safekeeping and oversight by the Depositary Bank. Conversely, any collateral transferred under a title transfer arrangement would become subject to the usual safekeeping and oversight by the Depositary Bank of the Company. The Subfunds may enter into securities lending transactions only in respect of eligible assets under the Law of December 17, 2010 which fall within their investment policies.

In respect to securities lending revenues, the income generated by the transactions is credited for 60% to the participating Subfunds and for 40% to the securities lending principal in these transactions.

The legal entity acting as securities lending principal on behalf of the Subfunds is an affiliate of Credit Suisse Group, i.e. Credit Suisse (Schweiz) AG or Credit Suisse AG.

The Management Company does not receive any of the securities lending revenue. The proportion of the assets held by a Subfund that may be subject to securities lending transactions is generally expected to range between 0% and 30% of that Subfund's Net Asset Value. Unless otherwise specified in Chapter 23, "Subfunds", this proportion may be increased up to a maximum of 100% of that Subfund's Net Asset Value, depending on market circumstances such as, among others, the type and quantity of relevant transferable securities held within a Subfund and the market demand for such securities at any given time.

The Subfunds will ensure that the volume of the securities lending transactions is kept at an appropriate level or that it is entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations. The counterparties to efficient portfolio management techniques should be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law.

The risk exposure to the counterparty arising from securities lending transactions and OTC financial derivative instruments should be combined when calculating the counterparty risk limits foreseen under section 6.4) a) "Investment restrictions".

Collateral received should comply with the requirements as set out in Chapter 19, "Collateral Policy".

The counterparty risk may be disregarded provided that the value of the collateral valued at market price, taking into account appropriate haircuts, exceeds the value of the amount exposed to risk.

The Subfunds will not receive cash collateral.

The Subfunds will ensure that their counterparty delivers collateral in the form of securities compliant with the applicable Luxembourg regulations and in line with the requirements foreseen under "Collateral Policy" foreseen in Chapter 19, "Regulatory Disclosure".

Appropriate haircuts on the collateral value are applied in accordance with the Risk Management Process of the Management Company.

**Total Return Swaps**

A total return swap ("TRS") is an OTC derivative contract in which one counterparty (the total return payer) transfers the total economic performance, including income from interest and fees, gains and losses from price movements, and credit losses, of a reference obligation to another counterparty (the total return receiver). Total return swaps can be either funded or unfunded.

The Subfunds may from time to time enter into total return swap transactions for the purpose of efficient portfolio management and, when applicable, as part of their respective investment policies as described in Chapter 23, "Subfunds". The Subfunds will get 100 % of the net revenues generated from total return swaps after deduction of costs, including in particular transaction fees and costs for collateral paid to the swap counterparty. For unfunded total return swaps, such transaction fees are typically paid under the form of an agreed interest rate, which may be either fixed or floating. For funded total return swaps, the Subfund will make an upfront payment of the notional amount of the total return swap, typically with no further periodic transaction costs. A partially funded total return swap combines the characteristics and cost profile of both funded and unfunded total return swaps, in the relevant proportions. Costs for collateral typically take the form of a periodic fixed payment, depending on the amounts and frequency of collateral being exchanged. Information on costs and fees incurred by each Subfund in this respect, as well as the identity of the entities to which such costs and fees are paid and any affiliation they may have with the Management Company, if applicable, will be available in the semi-annual and annual reports.

The Subfunds will receive cash and non-cash collateral for total return swap transactions, in accordance with the Company's collateral policy as further described in Chapter 19, "Regulatory Disclosure". The collateral received will be valued mark-to-market on a daily basis, as is common industry standard, and in accordance with Chapter 8 "Net Asset Value". The collateral received will be adjusted on a daily basis. The collateral received will be held in a separate collateral account and is therefore segregated from the other assets of the Subfund.

The Subfunds may only enter into TRS in respect of eligible assets under the Law of December 17, 2010 which fall within their investment policies.

The Subfunds may only enter into total return swap transactions through a regulated first class financial institution of any legal form with a minimum credit rating of investment grade quality specialised in this type of transaction which has its registered office in one of the OECD countries.

The Subfunds may use total returns swaps where further specified in Chapter 23, "Subfunds".

**Other Securities Financing Transactions**

Apart from securities lending transactions and TRS, the Subfunds do not intend to make use of the other securities financing transactions ("SFTs") covered by Regulation (EU) 2015/2365 of 25 November 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012.

**Collective Management of Assets**

For the purpose of efficient management of the Company and where the investment policies so permit, the Company's Board of Directors may opt to manage all or part of the assets of certain Subfunds in common. Assets so managed shall be referred to hereinafter as a "Pool". Such Pools are created solely for internal management purposes and do not constitute a separate legal entity. Therefore, they cannot be directly accessed by investors. Each of the jointly managed Subfunds shall remain entitled to its own specific assets. The assets jointly managed in the Pools may be divided and transferred to all the participating Subfunds at any time.

If the assets of several Subfunds are pooled in order to be managed jointly, a written record is kept of that portion of the assets in the Pool which can be allocated to each of the Subfunds concerned, with reference to the Subfund's original share in this Pool. The rights of each participating Subfund to the jointly managed assets shall relate to each individual position in the respective Pool. Additional investments made for the jointly managed Subfunds shall be allocated to these Subfunds in an amount proportionate to their participation while assets, which have been sold, shall be deducted from each participating Subfund's assets accordingly.

**Cross-investments between Subfunds of the Company**

The Subfunds of the Company may, subject to the conditions provided for in the Law of December 17, 2010, in particular Article 41, subscribe, acquire and/or hold securities to be issued or issued by one or more Subfunds of the Company under the following conditions:

- the target Subfund does not, in turn, invest in the Subfund invested in this target Subfund; and

- no more than 10% of the assets of the target Subfund whose acquisition is contemplated may be invested in aggregate in shares of other target Subfunds of the Company; and
- voting rights, if any, attaching to the relevant securities are suspended for as long as they are held by the Subfund concerned and without prejudice to the appropriate processing in the accounts and the periodic reports; and
- in any event, for as long as these securities are held by the Company, their value will not be taken into consideration for the calculation of the net assets of the Company for the purposes of verifying the minimum threshold of the net assets imposed by the Law of December 17, 2010.

## 5. Investment in CS Investment Funds 3

### i. General Information on the Shares

Each Subfund may issue Shares of Classes A, AH, B, BH, CA, CAH, CB, CBH, DA, DAH, DB, DP, DBH, EA, EAH, EB, EBH, IA, IAH, IA25, IAH25, IB, IBH, IB25, IBH25, MA, MAH, MB, MBH, UA, UAH, UA500, UAH500, UB, UBH, UB500, UBH500, XA, XAH, XB or XBH. The Share Classes which are issued within each Subfund, together with the related fees and sales charges as well as the Reference Currency are set out in Chapter 2, "Summary of Share Classes". A redemption fee will not be charged.

In addition, certain other fees, charges and expenses shall be paid out of the assets of the Subfunds. For further information, see Chapter 9, "Expenses and Taxes". All Share Classes are only available in uncertificated form and will exist exclusively as book entries.

The Shares which make up each such Share Class will be either accumulating Shares or distribution Shares.

#### Accumulating Shares

Class B, BH, CB, CBH, DB, DP, DBH, EB, EBH, IB, IBH, IB25, IBH25, MB, MBH, UB, UBH, UB500, UBH500, XB and XBH Shares are accumulating Shares. Details of the characteristics of accumulating Shares are included in Chapter 11, "Appropriation of Net Income and Capital Gains".

#### Distribution Shares

Class A, AH, CA, CAH, DA, DAH, EA, EAH, IA, IAH, IA25, IAH25, MA, MAH, UA, UAH, UA500, UAH500, XA and XAH Shares are distributing Shares. Details of the characteristics of distribution Shares are included in Chapter 11, "Appropriation of Net Income and Capital Gains".

#### Share Classes dedicated to a specific type of investors

Class DA, DAH, DB, DP and DBH Shares may only be acquired by investors who have concluded a discretionary asset management agreement, as defined by the Management Company, with a subsidiary of Credit Suisse Group AG. Furthermore, subject to the prior consent of the Company, Class DA, DAH, DB, DP and DBH Shares may also be acquired by institutional investors (according to Article 174 (2) c) of the Law of December 17, 2010) who have concluded an advisory agreement or any similar agreement, as defined by the Management Company, with a subsidiary of Credit Suisse Group AG.

Where such a discretionary asset management agreement, advisory agreement or any similar agreement, as defined by the Management Company, has been terminated, Class DA, DAH, DB, DP and DBH Shares held by the investor at that time shall be either compulsorily redeemed or, according to the request of the investor, converted into another Share Class. Moreover, Class DA, DAH, DB, DP and DBH Shares are not transferable without the Company's approval. Class DA, DAH, DB, DP and DBH Shares shall not be subject to a management fee or sales charge, however an all-in management service fee payable to the Management Company covering all fees and expenses excluding the fees payable to the Depositary Bank will be charged.

Class DP Shares are subject to a Performance Fee to be paid to the Management Company.

Class MA, MAH, MB and MBH Shares may only be acquired by institutional investors according to Article 174 (2) c) of the Law of December 17, 2010. Class MA, MAH, MB and MBH Shares are subject to initial minimum investment and holding requirements and benefit from the reduced management fee and sales charge as specified in Chapter 2, "Summary of Share Classes".

Class EA, EAH, EB and EBH Shares may only be acquired by institutional investors according to Article 174 (2) c) of the Law of December 17, 2010. Class EA, EAH, EB and EBH Shares benefit from the reduced management fee and sales charge as specified in Chapter 2, "Summary of Share Classes".

Class UA, UAH, UA500, UAH500, UB, UBH, UB500 and UBH500 Shares are exclusively reserved for investors who subscribe Shares of this Class via a financial intermediary domiciled in the United Kingdom or the Netherlands, or who have concluded a written agreement with a financial intermediary which explicitly provides for the acquisition of trailer fee-free classes, or who subscribe for Shares of this Class pursuant to a written asset management agreement with an independent asset manager carrying on business in the European Economic Area,

Latin America or the Middle East and whose conduct is regulated by a recognised financial services regulator in their place of business. Class UA, UAH, UB and UBH Shares are subject to a sales charge and shall benefit from a reduced management fee as specified in Chapter 2, "Summary of Share Classes".

Class UA500, UAH500, UB500 and UBH500 Shares are subject to initial minimum investment and holding requirements, are subject to a sales charge and shall benefit from a reduced management fee as specified in Chapter 2, "Summary of Share Classes".

Class XA, XB, XAH and XBH Shares may be offered for distribution in certain countries through certain distributors and/or financial intermediaries at the discretion of the Management Company. The initial minimum investment and holding amount will be defined separately between the distributor and/or financial intermediary and the Management Company, at the sole discretion of the Management Company. These type of Share Classes benefit from a reduced management fee and sales charge as specified in Chapter 2, "Summary of Share Classes".

Class CA, CAH, CB and CBH Shares may be offered for distribution in Italy through certain distributors and/or financial intermediaries domiciled in Italy. These types of Share Classes are subject to a management fee and additional distribution fee as specified in Chapter 2, "Summary of Share Classes", whereas no sales charge is applicable.

#### Minimum Holding

Class IA, IAH, IA25, IAH25, IB, IBH, IB25, IBH25, MA, MAH, MB, MBH, UA500, UAH500, UB500 and UBH500 Shares are subject to an initial minimum investment and holding amount and benefit from reduced management fees and sales charges (if applicable) as specified in Chapter 2, "Summary of Share Classes".

#### Hedged Share Classes

Depending on the Subfund, Class AH, BH, CAH, CBH, DAH, DBH, EAH, EBH, IAH, IAH25, IBH, IBH25, MAH, MBH, UAH, UAH500, UBH, UBH500, XAH and XBH Shares are issued in one or more alternate currencies, as set out in Chapter 2, "Summary of Share Classes". In order to reduce the risk of an overall depreciation of the Subfund's Reference Currency against the alternate currency of the Share Classes AH, BH, CAH, CBH, DAH, DBH, EAH, EBH, IAH, IAH25, IBH, IBH25, MAH, MBH, UAH, UAH500, UBH, UBH500, XAH and XBH, the net asset value of the respective Share Classes AH, BH, CAH, CBH, DAH, DBH, EAH, EBH, IAH, IAH25, IBH, IBH25, MAH, MBH, UAH, UAH500, UBH, UBH500, XAH and XBH, as calculated in the Subfund's Reference Currency, will be hedged against the respective alternate currency of Share Classes AH, BH, CAH, CBH, DAH, DBH, EAH, EBH, IAH, IAH25, IBH, IBH25, MAH, MBH, UAH, UAH500, UBH, UBH500, XAH and XBH, through the use of forward foreign exchange transactions and/or currency options. The aim of this approach is, as far as possible, to mirror the performance of the Share Class in the Subfund's Reference Currency minus any hedge costs.

Within this approach, the currency risk of the investment currencies (except for the Reference Currency) versus the alternate currency will not be hedged or will only be partially hedged. Investors are made aware that currency hedging is never perfect – it aims to reduce the effects of currency movements on a share class but it cannot eliminate them entirely. The foreign exchange transactions in relation to Share Class Hedging will be executed by Credit Suisse Asset Management (Switzerland) Ltd., an affiliate of Credit Suisse Group, acting in its capacity as FX hedging agent for the purpose of FX hedging activities including determination of the appropriate hedging positions and placement of FX trades (the "FX Hedging Agent").

There is an additional cost to Hedged Share Classes, as set out in Chapter 9, "Expenses and Taxes", section ii, "Expenses".

Share Classes AH, BH, EAH, EBH, IAH, IAH25, IBH, IBH25, MAH, MBH, UAH, UAH500, UBH, UBH500, XAH and XBH are subject to the management fee and sales charge as set out in Chapter 2 "Summary of Share Classes".

Share Classes CAH and CBH are subject to the management fee and distribution fee as set out in Chapter 2, "Summary of Share Classes". No sales charge is applicable.

Subscription of IAH, IAH25, IBH, IBH25, MAH, MBH, UAH500, UBH500, XAH and XBH Shares is subject to the minimum initial investment and holding requirements as set out in Chapter 2 "Summary of Share Classes". The net asset value of the Shares of this Alternate Currency Class (as described below) does not develop in the same way as that of the Share Classes issued in the Reference Currency.

#### Issue Price

Unless otherwise determined by the Company, the initial issue price of Share Classes A, AH, B, BH, CA, CAH, CB, CBH, UA, UA500, UAH, UAH500, UB, UB500, UBH, UBH500, XAH and XBH amounts to EUR 100, CHF 100, USD 100, HKD 1000, SGD 100, JPY 10.000 and/or GBP 100 and of Share Classes DA, DAH, DB, DP, DBH, EA, EAH, EB, EBH, IA, IAH, IA25, IAH25, IB, IBH,

IB25, IBH25, MA, MAH, MB and MBH to EUR 1000, CHF 1000, USD 1000, NOK 1000, HKD 1000, SGD 1000, and/or GBP 1000, depending on the currency denomination of the Share Class in the respective Subfund and its characteristics.

After the initial offering, Shares may be subscribed at the applicable net asset value ("Net Asset Value").

The Company may, at any time, decide on the issue of Share Classes in any additional freely convertible currencies at an initial issue price to be determined by the Company.

Except in case of Alternate Currency Share Classes, Share Classes shall be denominated in the Reference Currency of the Subfund to which they relate (as specified in Chapter 2, "Summary of Share Classes").

Investors may, at the discretion of the central administration ("Central Administration"), pay the subscription monies for Shares in a convertible currency other than the currency in which the relevant Share Class is denominated. As soon as the receipt is determined by Credit Suisse (Luxembourg) S.A. (the "Depository Bank"), such subscription monies shall be automatically converted by the Depository Bank into the currency in which the relevant Shares are denominated. Further details are set out in Chapter 5 ii., "Subscription of Shares".

The Company may at any time issue, within a Subfund, one or more Share Classes denominated in a currency other than the Subfund's Reference Currency ("Alternate Currency Class"). The issue of each further Alternate Currency Class is specified in Chapter 2, "Summary of Share Classes".

The Company may enter into forward currency contracts for, and at the expense of, this Alternate Currency Class in order to minimize the effect of price fluctuations in this alternate currency.

However, no assurance can be given that the hedging objective will be achieved.

The Net Asset Value of the Shares of these Alternate Currency Classes does not develop in the same way as that of the Share Classes issued in the Reference Currency.

In the case of Subfunds with Alternate Currency Classes, the currency hedging transactions for one Share Class may, in exceptional cases, adversely affect the Net Asset Value of the other Share Classes.

Shares may be held through collective depositories. In such cases, Shareholders shall receive a confirmation in relation to their Shares from the depository of their choice (for example, their bank or broker), or Shares may be held by Shareholders directly in a registered account kept for the Company and its Shareholders by the Company's Central Administration. These Shareholders will be registered by the Central Administration. Shares held by a depository may be transferred to an account of the Shareholder with the Central Administration or to an account with other depositories approved by the Company or with an institution participating in the securities and fund clearing systems. Conversely, Shares held in a Shareholder's account kept by the Central Administration may at any time be transferred to an account with a depository.

The Company may divide or merge the Shares in the interest of the Shareholders.

## ii. Subscription of Shares

Shares may be subscribed on any day on which banks are open for business in Luxembourg ("Banking Day"), as further described in Chapter 23, "Subfunds" (except on 24 December and 31 December where the Subfunds are closed for new subscription applications), at the Net Asset Value per Share of the relevant Share Class of the Subfund, which is calculated on the date that is defined as valuation day ("Valuation Day") (as defined in Chapter 8, "Net Asset Value") according to the method described in Chapter 8, "Net Asset Value", plus the applicable initial sales charges and any taxes. The applicable maximum sales charge levied in connection with the Shares of the Company is indicated in Chapter 2, "Summary of Share Classes".

Subscription applications must be submitted in written form to the Central Administration or a distributor authorized by the Company to accept applications for the subscription or redemption of Shares ("Distributor") before the cut-off time as specified for the relevant Subfund in Chapter 23, "Subfunds".

Subscription applications shall be settled as defined in Chapter 23, "Subfunds", for the relevant Subfund.

Subscription applications received after the cut-off time shall be deemed to have been received prior to the cut-off time on the following Banking Day.

Payment must be received within the time period specified for the relevant Subfund in Chapter 23, "Subfunds".

Charges to be paid due to the subscription of Shares shall accrue to the banks and other financial institutions engaged in the distribution of the Shares. Any taxes incurred on the issue of Shares shall also be charged to the investor. Subscription amounts shall be paid in the currency in which the relevant Shares are denominated or, if requested by the investor and at the sole discretion of the Central Administration, in another convertible currency. Payment shall be effected by bank transfer to the Company's bank accounts. Further details are set out in the subscription application form.

The Company may in the interest of the Shareholders accept transferable securities and other assets permitted by Part I of the Law of December 17, 2010

as payment for subscription ("Contribution in kind"), provided the offered transferable securities and assets correspond to the investment policy and restrictions of the relevant Subfund. Each payment of Shares in return for a Contribution in kind is part of a valuation report issued by the auditor of the Company. The Board of Directors may, at its sole discretion, reject all or several offered transferable securities and assets without giving reasons. All costs caused by such Contribution in kind (including the costs for the valuation report, broker fees, expenses, commissions, etc.) shall be borne by the investor.

The Shares shall be issued upon receipt of the issue price with the correct value date by the Depository Bank. Notwithstanding the above, the Company may, at its own discretion, decide that the subscription application will only be accepted once these monies are received by the Depository Bank.

If the payment is made in a currency other than the one in which the relevant Shares are denominated, the proceeds of conversion from the currency of payment to the currency of denomination less fees and exchange commission shall be allocated to the purchase of Shares.

The minimum value or number of Shares which must be held by a Shareholder in a particular Share Class is set out in Chapter 2, "Summary of Share Classes", if applicable. Such minimum initial investment and holding requirement may be waived in any particular case at the sole discretion of the Company.

Subscriptions and redemptions of fractions of Shares shall be permitted up to three decimal places. Fractional Shares shall not be entitled to voting rights. A holding of fractional Shares shall entitle the Shareholder to proportional rights in relation to such Shares. It might occur clearing institutions will be unable to process holdings of fractional Shares. Investors should verify whether this is the case.

The Company is entitled to refuse at its own discretion subscription applications and temporarily or permanently suspend or limit the sale of Shares. The Central Administration is entitled to refuse any subscription, transfer or conversion in whole or in part for any reason, and may in particular prohibit or limit the sale, transfer or conversion of Shares to individuals or corporate bodies in certain countries if such transaction might be detrimental to the Company or result in the Shares being held directly or indirectly by a Prohibited Person (included but not limited to any U.S. Person) or if such subscription, transfer or conversion in the relevant country is in contravention of applicable laws. The subscription, transfer or conversion for Shares and any future transactions shall not be processed until the information required by the Central Administration, included but not limited to know your customer and anti-money laundering checks, is received.

## iii. Redemption of Shares

The Company shall in principle redeem Shares on any Banking Day, as further described in Chapter 23, "Subfunds", (except on 24 December and 31 December where the Subfunds are closed for new redemption applications), at the Net Asset Value per Share of the relevant Share Class of the Subfund, which is calculated on the Valuation Day (as defined in Chapter 8, "Net Asset Value"), according to the method described in Chapter 8, "Net Asset Value", less any redemption fee where applicable.

Redemption applications must be submitted to the Central Administration or a Distributor. Redemption applications for Shares held through a depository must be submitted to the depository concerned. Redemption applications must be received by the Central Administration or the Distributor before the cut-off time as specified for the relevant Subfund in Chapter 23, "Subfunds". Redemption applications received after the cut-off time shall be dealt with on the following Banking Day.

If the execution of a redemption application would result in the investor's holding in a particular Share Class falling below the minimum holding requirement for that Class as set out in Chapter 2, "Summary of Share Classes", the Company may, without further notice to the Shareholder, treat such redemption application as though it were an application for the redemption of all Shares of the Class held by the Shareholder.

Class DB, DP and DBH Shares, which may only be purchased by investors who have signed a discretionary asset management, advisory agreement or any similar agreement, as defined by the Management Company, with a subsidiary of Credit Suisse Group AG, shall be either compulsorily redeemed or, according to the request of investor, converted into another Share Class if the corresponding discretionary asset management or advisory agreement, as defined by the Management Company, has been terminated.

Whether and to what extent the redemption price is lower or higher than the issue price paid depends on the development of the Net Asset Value of the relevant Share Class.

Payment of the redemption price of the Shares shall be made within the time period specified for the relevant Subfund in Chapter 23, "Subfunds". This does not apply where specific statutory provisions such as foreign exchange or other transfer restrictions or other circumstances beyond the Depository Bank's control make it impossible to transfer the redemption price.

In the case of large redemption applications, the Company may decide to settle redemption applications once it has sold corresponding assets without undue delay. Where such a measure is necessary, if not otherwise specified in Chapter

23, "Subfunds", all redemption applications received on the same day shall be settled at the same price.

Payment shall be made by means of remittance to a bank account or, if possible, by cash in the currency that is legal tender in the country where payment is to be made, after conversion of the amount in question. If, at the sole discretion of the Depository Bank, payment is to be made in a currency other than the one in which the relevant Shares are denominated, the amount to be paid shall be the proceeds of conversion from the currency of denomination to the currency of payment less all fees and exchange commission.

Upon payment of the redemption price, the corresponding Share shall cease to be valid.

The Company is entitled to compulsorily redeem all Shares held by a Prohibited Person, as set out below.

#### iv. Conversion of Shares

Unless otherwise specified in Chapter 23, "Subfunds", Shareholders in a particular Share Class of a Subfund may at any time convert all or part of their Shares into Shares of the same Class of another Subfund or into Shares of another Class in the same Subfund, provided that the requirement for the Share Class into which such Shares are converted (see Chapter 2, "Summary of Share Classes") are complied with. The fee charged for such conversions shall not exceed half the initial sales charge of the Class into which the Shares are converted.

Unless otherwise specified in Chapter 23, "Subfunds", conversion applications must be completed and submitted to the Central Administration or the Distributor before the cut-off time as specified for the relevant Subfund in Chapter 23, "Subfunds" on a Banking Day, (except on 24 December and 31 December where the Subfunds are closed for new conversion applications). Conversion applications received after the cut-off time shall be dealt with on the following Banking Day. Conversion shall take place on the basis of the applicable Net Asset Value per Share calculated on the Valuation Day (as defined in Chapter 8, "Net Asset Value") according to the method described in Chapter 8, "Net Asset Value".

Conversions of Shares will only be made on a Valuation Day, if the Net Asset Value in both relevant Share Classes is calculated.

Where processing an application for the conversion of Shares would result in the relevant Shareholder's holding in a particular Share Class falling below the minimum holding requirement for that Class set out in Chapter 2, "Summary of Share Classes", the Company may, without further notice to the Shareholder, treat such conversion application as though it were an application for the conversion of all Shares held by the Shareholder in that Share Class.

Where Shares denominated in one currency are converted into Shares denominated in another currency, the foreign exchange and conversion fees incurred will be taken into consideration and deducted.

#### v. Suspension of the Subscription, Redemption and Conversion of Shares and the Calculation of the Net Asset Value

The Company may suspend the calculation of the Net Asset Value and/or the issue, redemption and conversion of Shares of a Subfund:

- a) where a substantial proportion of the assets of the Subfund cannot be valued, because a stock exchange or market is closed on a day other than usual public holiday, or when trading on such stock exchange or market is restricted or suspended; or
- b) where a substantial proportion of the assets of the Subfund is not freely disposable because a political, economic, military, monetary or any other event beyond the control of the Company does not permit the disposal of the Subfund's assets, or such disposal would be detrimental to the interests of Shareholders; or
- c) where a substantial proportion of the assets of the Subfund cannot be valued because disruption to the communications network or any other factor makes a valuation impossible; or
- d) where a substantial proportion of the assets of the Subfund is not available for transactions because restrictions on foreign exchange or other types of restrictions make asset transfers impracticable or it can be objectively demonstrated that transactions cannot be effected at normal foreign exchange rates; or
- e) in any other circumstance or circumstances beyond the control and responsibility of the Board of Directors, where a failure to do so might result in the Company or its Shareholders incurring any liability to taxation or suffering other pecuniary disadvantages or other detriment which the Company or its Shareholders might not otherwise have suffered.

Investors applying for, or who have already applied for, the subscription, redemption or conversion of Shares in the respective Subfund shall be notified of the suspension without delay. Notice of the suspension shall be published as described in Chapter 14, "Information for Shareholders" if, in the opinion of the Board of Directors of the Company, the suspension is likely to last for longer than one week.

Suspension of the calculation of the Net Asset Value of one Subfund shall not affect the calculation of the Net Asset Value of the other Subfunds if none of the above conditions apply to such other Subfunds.

#### vi. Measures to Combat Money Laundering

Pursuant to the applicable provisions of Luxembourg laws and regulations in relation to the fight against money laundering and terrorist financing ("AML/CFT"), obligations have been imposed on the Company as well as on other professionals of the financial sector to prevent the use of funds for money laundering and financing of terrorism purposes.

The Company and the Management Company will ensure their compliance with the applicable provisions of the relevant Luxembourg laws and regulations, including but not limited to the Luxembourg law of 12 November 2004 on the fight against money laundering and terrorist financing (the "2004 AML/CFT Law"), the Grand-Ducal Regulation of 10 February 2010 providing detail on certain provisions of the 2004 AML/CFT Law (the "2010 AML/CFT Regulation"), CSSF Regulation N°12-02 of 14 December 2012 on the fight against money laundering and terrorist financing ("CSSF Regulation 12-02") and relevant CSSF Circulars in the field of AML/CFT, including but not limited to CSSF Circular 18/698 on the authorization and organization of investment fund managers incorporated under Luxembourg law ("CSSF Circular 18/698", and the above collectively referred to as the "AML/CTF Rules").

In accordance with the AML/CTF Rules, the Company and the Management Company are required to apply due diligence measures on the investors (including on their ultimate beneficial owner(s)), their delegates and the assets of the Company in accordance with their respective policies and procedures put in place from time to time.

Among others, the AML/CTF Rules require a detailed verification of a prospective investor's identity. In this context, the Company and the Management Company, or the Central Administration or any Distributor, nominee or any other type of intermediary (as the case may be), acting under the responsibility and supervision of the Company and the Management Company will require prospective investors to provide them with any information, confirmation and documentation deemed necessary in their reasonable judgment, applying a risk-based approach, to proceed such identification.

The Company and the Management Company reserve the right to request such information as is necessary to verify the identity of a prospective or current investor. In the event of delay or failure by a prospective investor to produce any information required for verification purposes, the Company and the Management Company are entitled to refuse the application and will not be liable for any interest, costs or compensation. Similarly, when Shares are issued, they cannot be redeemed or converted until full details of registration and anti-money laundering documents have been completed.

The Company and the Management Company moreover reserve the right to reject an application, for any reason, in whole or in part in which event the application monies (if any) or any balance thereof will, to the extent permissible, be returned without unnecessary delay to the prospective investor by transfer to the prospective investor's designated account or by post at the prospective investor's risk, provided the identity of the prospective investor can be properly verified pursuant to the AML/CTF Rules. In such event, the Company and the Management Company will not be liable for any interest, costs or compensation.

In addition, the Company and the Management Company, or the Central Administration or any Distributor, nominee or any other type of intermediary (as the case may be), acting under the responsibility and supervision of the Company and the Management Company, may request investors to provide additional or updated identification documents from time to time pursuant to on-going client due diligence requirements under the AML/CTF Rules, and investors shall be required and accept to comply with such requests.

Failure to provide proper information, confirmation or documentation may, among others, result in (i) the rejection of subscriptions, (ii) the withholding of redemption proceeds by the Company or (iii) the withholding of outstanding dividend payments. Moreover, prospective or current investors who fail to comply with the above requirements may be subject to additional administrative or criminal sanctions under applicable laws, including but not limited to the laws of the Grand Duchy of Luxembourg. None of the Company the Management Company, the Central Administration or any Distributor, nominee or any other type of intermediary (as the case may be) has any liability to an investor for delays or failure to process subscriptions, redemptions or dividend payments as a result of the investor providing no or only incomplete documentation. The Company and the Management Company moreover reserve all rights and remedies available under applicable law to ensure their compliance with the AML/CTF Rules.

Pursuant to the Luxembourg law of 13 January 2019 on the register of beneficial owners (the "RBO Law"), the Company is required to collect and make available certain information on its beneficial owner(s) (as defined in the AML/CTF Rules). Such information includes, among others, first and last name, nationality, country of residence, personal or professional address, national identification number and information on the nature and the scope of the beneficial ownership interest held

by each beneficial owner in the Company. The Company is further required, among others, (i) to make such information available upon request to certain Luxembourg national authorities (including the Commission de Surveillance du Secteur Financier, the Commissariat aux Assurances, the Cellule de Renseignement Financier, Luxembourg tax and other national authorities as defined in the RBO Law) and upon motivated request of other professionals of the financial sector subject to the AML/CTF Rules, and (ii) to register such information in a publicly available central register of beneficial owners (the "RBO").

That being said, the Company or a beneficial owner may however, on a case by case basis and in accordance with the provisions of the RBO Law, formulate a motivated request with the administrator of the RBO to limit the access to the information relating to them, e.g. in cases where such access could cause a disproportionate risk to the beneficial owner, a risk of fraud, kidnapping, blackmail, extortion, harassment or intimidation towards the beneficial owner, or where the beneficial owner is a minor or otherwise incapacitated. The decision to restrict access to the RBO does, however, not apply to the Luxembourg national authorities, nor to credit institutions, financial institutions, bailiffs and notaries acting in their capacity as public officers, which can thus always consult the RBO. In light of the above RBO Law requirements, any persons willing to invest in the Company and any beneficial owner(s) of such persons (i) are required to provide, and agree to provide, the Company and the case being the Management Company the Central Administration Agent or their Distributor, nominee or any other type of intermediary (as the case may be), with the necessary information in order to allow the Company to comply with its obligations in terms of beneficial owner identification, registration and publication under the RBO Law (regardless of applicable rules regarding professional secrecy, banking secrecy, confidentiality or other similar rules or arrangements), and (ii) accept that such information will be made available among others to Luxembourg national authorities and other professionals of the financial sector as well as to the public, with certain limitations, through the RBO.

Under the RBO Law, criminal sanctions may be imposed on the Company in case of its failure to comply with the obligations to collect and make available the required information, but also on any beneficial owner(s) that fail to make all relevant necessary information available to the Company.

#### vii. Market Timing

The Company does not permit practices related to "Market Timing", i.e. a method through which an investor systematically subscribes and redeems or converts Shares of Classes within a short time period, by taking advantage of time differences and/or imperfections or deficiencies in the method of determination of the Net Asset Value. It therefore reserves the right to reject subscription and conversion applications from an investor who the Company suspects of using such practices and to take, if appropriate, the necessary measures to protect the other investors of the Company.

#### viii. Prohibited Persons, Compulsory Redemption and Transfer of Shares

For the purpose of this section a "Prohibited Person" means any person, corporation, limited liability company, trust, partnership, estate or other corporate body, if in the sole opinion of the Management Company, the holding of Shares of the relevant Subfund may be detrimental to the interests of the existing Shareholders or of the relevant Subfund, if it may result in a breach of any law or regulation, whether Luxembourg or otherwise, or if as a result thereof the relevant Subfund or any subsidiary or investment structure (if any) may become exposed to tax or other legal, regulatory or administrative disadvantages, fines or penalties that it would not have otherwise incurred or, if as a result thereof the relevant Subfund or any subsidiary or investment structure (if any), the Management Company and/or the Company, may become required to comply with any registration or filing requirements in any jurisdiction with which it would not otherwise be required to comply. The term "Prohibited Person" includes (i) any investor which does not meet the definition of Eligible Investors as defined for the respective Subfund in Chapter 5, "Investment in CS Investment Funds 3" (if any), (ii) any U.S. Person or (iii) any person who has failed to provide any information or declaration required by the Management Company or the Company within one calendar month of being requested to do so. The term "Prohibited Person" moreover includes natural persons or entities acting, directly or indirectly, in contravention of any applicable AML/CTF Rules or who are the subject of sanctions, including those persons or entities that are included on any relevant lists maintained by the United Nations, the North Atlantic Treaty Organisation, the Organisation for Economic Cooperation and Development, the Financial Action Task Force, the U.S. Central Intelligence Agency, and the U.S. Internal Revenue Service, all as may be amended from time to time.

The Company will not accept investments by or on behalf of Prohibited Persons. The subscriber represents and warrants that the proposed subscription for Shares, whether made on the subscriber's own behalf or, if applicable, as an agent, trustee, representative, intermediary, nominee, or in a similar capacity on behalf of any other beneficial owner, is not a Prohibited Person and further represents and

warrants that the investor will promptly notify the Company of any change in its status or the status of any underlying beneficial owner(s) with respect to its representations and warranties regarding Prohibited Persons.

If the Board of Directors discovers at any time that any beneficial owner of the Shares is a Prohibited Person, either alone or in conjunction with any other person, whether directly or indirectly, the Board of Directors may at its discretion and without liability, compulsorily redeem the Shares in accordance with the rules set out in the Articles of Incorporation of the Company and upon redemption, the Prohibited Person will cease to be the owner of those Shares.

The Board of Directors may require any Shareholder of the Company to provide it with any information that it may consider necessary for the purpose of determining whether or not such owner of Shares is or will be a Prohibited Person.

Further, Shareholders shall have the obligation to immediately inform the Company to the extent the ultimate beneficial owner of the Shares held by such Shareholders becomes or will become a Prohibited Person.

The Board of Directors has the right to refuse any transfer, assignment or sale of Shares in its sole discretion if the Board of Directors reasonably determines that it would result in a Prohibited Person holding Shares, either as an immediate consequence or in the future.

Any transfer of Shares may be rejected by the Central Administration and the transfer shall not become effective until the transferee has provided the required information under the applicable know your customer and anti-money laundering rules.

## 6. Investment Restrictions

For the purpose of this Chapter, each Subfund shall be regarded as a separate UCITS within the meaning of Article 40 of the Law of December 17, 2010.

The following provisions shall apply to the investments made by each Subfund.

- 1) Each Subfund's investments may comprise only one or more of the following:
  - a) transferable securities and money market instruments admitted to or dealt in on a regulated market; for these purposes, a regulated market is any market for financial instruments within the meaning of Directive 2004/39/EC of the European Parliament and of the Council of April 21, 2004 on markets in financial instruments as amended;
  - b) transferable securities and money market instruments dealt in on another market in a Member State which is regulated, operates regularly and is recognized and open to the public; for the purpose of this Chapter "Member State" means a Member State of the European Union ("EU") or one of the States of the European Economic Area ("EEA") other than the Member States of the EU;
  - c) transferable securities and money market instruments admitted to official listing on a stock exchange in a non-Member State of the European Union or dealt in on another market in a non-Member State of the European Union which is regulated, operates regularly and is recognized and open to the public, and is established in a country in Europe, America, Asia, Africa or Oceania;
  - d) recently issued transferable securities and money market instruments, provided that the terms of issue include an undertaking that application will be made for admission to official listing on stock exchanges or markets as per paragraphs a), b) or c) above and provided such admission takes place within one year of issue;
  - e) units or shares of undertakings for collective investment in transferable securities authorized according to Directive 2009/65/EC ("UCITS") and/or other undertakings for collective investment within the meaning of Article 1, paragraph 2, points a) and b) of Directive 2009/65/EC ("UCI"), whether or not established in a Member State, provided that:
    - these other UCI are authorized under laws which provide that they are subject to supervision considered by the supervisory authority responsible for the Company, to be equivalent to that required by EU law and that cooperation between the supervisory authorities is sufficiently ensured,
    - the level of protection for share-/unitholders of the other UCIs is equivalent to that provided for share-/unitholders in a UCITS, and in particular that the rules on asset segregation, borrowing, lending and uncovered sales of transferable securities and money market instruments are equivalent to the requirements of Directive 2009/65/EC,
    - the business activities of the other UCIs are reported in semi-annual and annual reports to enable an assessment of the assets and liabilities, income and operations over the reporting period,
    - the UCITS or other UCIs whose units/shares are to be acquired, may not, pursuant to their management regulations or instruments of incorporation, invest more than 10% of their total net assets in units/shares of other UCITS or other UCIs;

- f) deposits with a credit institution which are repayable on demand or have the right to be withdrawn, and maturing in no more than 12 months, provided that the credit institution has its registered office in a Member State or, if the registered office of the credit institution is situated in a third country, provided that it is subject to prudential rules considered by the supervisory authority responsible for the Company, as equivalent to those laid down in EU law;
- g) financial derivative instruments, including equivalent cash-settled instruments which are dealt in on a regulated market referred to under paragraphs a), b) and c) above and/or financial derivative instruments which are dealt in over-the-counter ("OTC derivatives"), provided that:
- the underlying consists of instruments within the meaning of Article 41, paragraph (1) of the Law of December 17, 2010, financial indices, interest rates, foreign exchange rates or currencies, in which the Company may invest according to its investment objectives,
  - the counterparties to OTC derivative transactions are institutions subject to prudential supervision, and belonging to the categories approved by the supervisory authority responsible for the Company, and
  - the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Company's initiative.
- h) money market instruments other than those dealt in on a regulated market and which are normally traded on the money market and are liquid, and whose value can be precisely determined at any time, provided the issuer or issuer of such instruments is itself regulated for the purpose of protecting investors and savings, and provided that these investments are:
- issued or guaranteed by a central, regional or local authority or by a central bank of a Member State, the European Central Bank, the European Union or the European Investment Bank, a non-Member State or, in case of a federal State, by one of the members making up the federation, or by a public international body to which one or more Member States belong, or
  - issued by an undertaking any securities of which are dealt in on regulated markets referred to in paragraphs a), b) or c) above, or
  - issued or guaranteed by an establishment subject to prudential supervision, in accordance with criteria defined by EU law, or issued or guaranteed by an establishment that is subject to and complies with supervisory rules considered by the supervisory authority responsible for the Company, to be at least as stringent as those required by EU law, or
  - issued by other bodies belonging to the categories approved by the supervisory authority responsible for the Company, provided that investments in such instruments are subject to investor protection equivalent to that laid down in the first, the second or the third indent of this paragraph h) and provided that the issuer is a company whose capital and reserves amount to at least ten million euro (EUR 10,000,000) and which presents and publishes its annual financial statements in accordance with the fourth Directive 78/660/EEC or is an entity, which within a group of companies comprising one or several listed companies, is dedicated to the financing of the group, or is an entity which is dedicated to the financing of securitization vehicles which benefit from a banking liquidity line.
- 2) Each Subfund shall not, however, invest more than 10% of its total net assets in transferable securities or money market instruments other than those referred to in section 1).

- The Subfunds may hold ancillary liquid assets in different currencies.
- 3) The Management Company applies a risk management process which enables it to monitor and measure at any time the risk of the investment positions and their contribution to the overall risk profile of the portfolio and a process for accurate and independent assessment of the value of OTC derivatives.

Each Subfund may, for the purpose of (i) hedging, (ii) efficient portfolio management and/or (iii) implementing its investment strategy, use all financial derivative instruments within the limits laid down by Part I of the Law of December 17, 2010.

The global exposure is calculated taking into account the current value of the underlying assets, the counterparty risk, future market movements and the time available to liquidate the positions. This shall also apply to the following subparagraphs.

As part of its investment policy and within the limits laid down in section 4) paragraph e), each Subfund may invest in financial derivative instruments, provided that the exposure to the underlying assets does not exceed in

aggregate the investment limits laid down in section 4). If a Subfund invests in index-based financial derivative instruments, these investments do not have to be combined to the limits laid down in section 4). When a transferable security or a money market instrument embeds a derivative instrument, the derivative instrument shall be taken into account when complying with the requirements of this section.

The global exposure may be calculated through the commitment approach or the value-at-risk ("Value-at-Risk" or "VaR") methodology as specified for each Subfund in Chapter 23, "Subfunds".

The standard commitment approach calculation converts the financial derivative position into the market value of an equivalent position in the underlying asset of that derivative. When calculating global exposure using the commitment approach, the Company may benefit from the effects of netting and hedging arrangements.

VaR provides a measure of the potential loss that could arise over a given time interval under normal market conditions, and at a given confidence level. The Law of December 17, 2010 provides for a confidence level of 99% with a time horizon of one month.

Unless otherwise specified in Chapter 23, "Subfunds", each Subfund shall ensure that its global exposure to financial derivative instruments computed on a commitment basis does not exceed 100% of its total net assets or that the global exposure computed based on a VaR method does not exceed either (i) 200% of the reference portfolio (benchmark) or (ii) 20% of the total net assets.

The risk management of the Management Company supervises the compliance of these provision in accordance with the requirements of applicable circulars or regulations issued by the Luxembourg supervisory authority (*Commission de Surveillance du Secteur Financier, CSSF*) or any other European authority authorized to issue related regulations or technical standards.

- 4) a) No more than 10% of the total net assets of each Subfund may be invested in transferable securities or money market instruments issued by the same issuer. In addition, the total value of transferable securities and money market instruments issued by those issuers in which a Subfund invests more than 5% of its total net assets, shall not exceed 40% of the value of its total net assets. No Subfund may invest more than 20% of its total net assets in deposits made with the same body. The risk exposure to a counterparty of a Subfund in an OTC derivative transaction and/or efficient portfolio management techniques may in aggregate not exceed the following percentages:
- 10% of total net assets if the counterparty is a credit institution referred to in Chapter 6, "Investment Restrictions", section 1) paragraph f), or
  - 5% of total net assets in other cases.
- b) The 40% limit specified in section 4) paragraph a) is not applicable to deposits and OTC derivative transactions made with financial institutions subject to prudential supervision. Irrespective of the limits specified in section 4) paragraph a), each Subfund shall not combine, where this would lead to investing more than 20% of its total net assets in a single body, any of the following:
- investments in transferable securities or money market instruments issued by that body, or
  - deposits made with that body, or
  - exposures arising from OTC derivatives transactions and/or efficient portfolio management techniques undertaken with that body.
- c) The limit of 10% stipulated in section 4) paragraph a) is raised to a maximum of 35% if the transferable securities or money market instruments are issued or guaranteed by a Member State, by its public local authorities, by a non-Member State or by public international bodies to which one or more Member States belong.
- d) The 10% limit stipulated in section 4) paragraph a) is raised to 25% for bonds issued by a credit institution which has its registered office in a Member State and is subject by law to special public supervision designed to protect bondholders. In particular, sums deriving from the issue of those bonds must be invested in accordance with the legal requirements in assets which, during the whole period of validity of the bonds, are capable of covering claims attaching to the bonds and which, in case of bankruptcy of the issuer, would be used on a priority basis for the reimbursement of the principal and payment of the accrued interest. If a Subfund invests more than 5% of its total net assets in bonds referred to in this paragraph which are issued by a single issuer, the total value of these investments may not exceed 80% of that Subfund's total net assets.
- e) The transferable securities and money market instruments referred to in paragraphs c) and d) of this section 4) shall not be taken into account for the purpose of applying the limit of 40% referred to under paragraph

- a) of this section. The limits specified under paragraphs a), b), c) and d) shall not be combined; thus investments in transferable securities or money market instruments issued by the same issuer or in deposits or derivative instruments made with this body carried out in accordance with paragraphs a), b), c) and d) shall not exceed in total 35% of each Subfund's total net assets. Companies which belong to the same group for the purposes of the preparation of consolidated financial statements in accordance with Directive 83/349/EEC as amended or restated or in accordance with internationally recognized accounting rules, shall be regarded as a single issuer for the purpose of calculating the investment limits specified in the present section 4). Each Subfund may cumulatively invest up to a limit of 20% of its total net assets in transferable securities and money market instruments within the same group.
- f) **The limit of 10% stipulated in section 4) paragraph a) is raised to 100% if the transferable securities and money market instruments involved are issued or guaranteed by a Member State, one or more of its local authorities, by any other state which is a member of the Organisation for Economic Cooperation and Development ("OECD") or by Brazil or Singapore, or by a public international body to which one or more Member States of the European Union belong. In such case, the Subfund concerned must hold securities or money market instruments from at least six different issues, and the securities or money market instruments of any single issue shall not exceed 30% of that Subfund's total assets.**
- g) Without prejudice to the limits laid down in section 7), the limits laid down in the present section 4) are raised to a maximum of 20% for investments in shares and/or debt securities issued by the same body, when the aim of the Subfund's investment policy is to replicate the composition of a certain stock or debt securities index which is recognized by the supervisory authority responsible for the Company, on the following basis:
- the composition of the index is sufficiently diversified,
  - the index represents an adequate benchmark for the market to which it relates,
  - it is published in an appropriate manner.
- The aforementioned limit of 20% may be raised to a maximum of 35% where that proves to be justified by exceptional market conditions in particular in regulated markets where certain transferable securities or money market instruments are highly dominant. The investment up to this limit is only permitted for a single issuer.
- 5) The Company will not invest more than 10% of the total net assets of any Subfund in units/shares of other UCITS and/or in other UCIs ("Target Funds") pursuant to section 1) paragraph e), unless otherwise specified in the investment policy applicable to a Subfund as described in Chapter 23, "Subfunds".
- Where a higher limit as 10% is specified in Chapter 23, "Subfunds", the following restrictions shall apply:
- No more than 20% of a Subfund's total net assets may be invested in units/shares of a single UCITS or other UCI. For the purpose of application of this investment limit, each compartment of a UCITS or other UCI with multiple compartments is to be considered as a separate issuer provided that the principle of segregation of the obligations of the various compartments vis-à-vis third parties is ensured;
  - Investments made in units/shares of UCI other than UCITS may not in aggregate exceed 30% of the total net assets of a Subfund.
- Where a Subfund invests in units/shares of other UCITS and/or other UCI that are managed, directly or by delegation, by the same management company or by any other company with which the Company is linked by common management or control, or by a direct or indirect holding of more than 10% of the capital or votes ("Affiliated Funds"), the Company or the other company may not charge subscription or redemption fees on account of the Subfund's investment in the units/shares of such Affiliated Funds.
- Besides the expenses incurred by the Management Company in managing the Subfund, a management fee may also be charged for investments in Target Funds considered to be Affiliated Funds and be indirectly charged from the assets of the Subfund in respect of the Target Funds contained therein. In addition to such management fee, a performance fee may be indirectly charged from the assets of the Subfund in respect of the Target Funds contained therein.
- Investors should note that for investments in units/shares of other UCITS and/or other UCI costs may generally arise both at the Subfund level and at the level of the other UCITS and/or UCI itself.
- The cumulative management fee at Subfund and Target Fund level for Subfunds investing more than 10% of the total net assets in units/shares of other UCITS and/or in other UCIs ("Target Funds") is specified in Chapter 23, "Subfunds", if applicable.
- 6) a) The Company's assets may not be invested in securities carrying voting rights which enable the Company to exercise significant influence over the management of an issuer.
- b) Moreover, the Company may not acquire more than
- 10% of the non-voting shares of the same issuer;
  - 10% of the debt securities of the same issuer;
  - 25% of the units/shares of the same UCITS or other UCI;
  - 10% of the money market instruments of a single issuer.
- In the last three cases, the restriction shall not apply if the gross amount of bonds or money market instruments, or the net amount of the instruments in issue cannot be calculated at the time of acquisition.
- c) The restrictions set out under paragraphs a) and b) shall not apply to:
- transferable securities and money market instruments issued or guaranteed by a Member State or its local authorities,
  - transferable securities and money market instruments issued or guaranteed by a non-Member State of the European Union,
  - transferable securities and money market instruments issued by public international bodies to which one or more Member States of the European Union belong,
  - shares held by the Company in the capital of a company which is incorporated in a non-Member State of the European Union and which invests its assets mainly in securities of issuing bodies having their registered office in that State, where under the legislation of that State, such a holding represents the only way in which the Company can invest in the securities of issuing bodies of that State. This derogation, however, shall apply only if in its investment policy the company from the non-Member State of the European Union complies with the limits stipulated in section 4, paragraphs a) to e), section 5, and section 7 paragraphs a) and b).
- 7) The Company may not borrow any money for any Subfund except for:
- a) the purchase of foreign currency using a back-to-back loan;
  - b) an amount equivalent to not more than 10% of the Subfund's total net assets and borrowed on a temporary basis.
- 8) The Company may not grant loans or act as guarantor for third parties.
- 9) To ensure efficient portfolio management, however, each Subfund may, in compliance with the provisions of the applicable Luxembourg regulations, enter into securities lending transactions.
- 10) The Company may not invest its assets directly in real estate, precious metals or certificates representing precious metals and goods.
- 11) The Company may not carry out uncovered sales of transferable securities, money market instruments or other financial instruments referred to in section 1) paragraph e), g) and h).
- 12) a) In relation to borrowing conducted within the limitations set out in the Prospectus, the Company may pledge or assign the assets of the Subfund concerned as collateral.
- b) Furthermore, the Company may pledge or assign the assets of the Subfund concerned as collateral to counterparties of transactions involving OTC derivatives or financial derivative instruments which are dealt in on a regulated market referred to under paragraphs a), b) and c) of number 1) above in order to secure the payment and performance by such Subfund of its obligations to the relevant counterparty. To the extent counterparties require the provision of collateral exceeding the value of the risk to be covered by collateral or where the overcollateralization is caused by other circumstances (e.g. performance of the assets posted as collateral or provisions of customary framework documentation), such (excess) collateral may – also in respect of non-cash collateral – expose the relevant Subfund to the counterparty risk of such counterparty and the Subfund may only have an unsecured claim in respect of such assets.
- The restrictions set out above shall not apply to the exercise of subscription rights. During the first six months following official authorization of a Subfund in Luxembourg, the restrictions set out in section 4) and 5) above need not be complied with, provided that the principle of risk-spreading is observed. If the limits referred to above are exceeded for reasons beyond the control of the Company or as a result of the exercise of subscription rights, the Company shall as a matter of priority remedy that situation, taking due account of the interests of the Shareholders.
- The Company is entitled to issue, at any time, further investment restrictions, in the interests of the Shareholders, if for example such restrictions are necessary to comply with the legislation and regulations in those countries in which the Company's Shares are or will be offered for sale.

## 7. Risk Factors

Prospective investors should consider the following risk factors before investing in the Company. However, the risk factors set out below do not

**purport to be an exhaustive list of risks related to investments in the Company. Prospective investors should read the entire Prospectus, and where appropriate consult with their legal, tax and investment advisers, in particular regarding the tax consequences of subscribing, holding, converting, redeeming or otherwise disposing of Shares under the law of their country of citizenship, residence or domicile (further details are set out in Chapter 9, "Expenses and Taxes"). Investors should be aware that the investments of the Company are subject to market fluctuations and other risks associated with investments in transferable securities and other financial instruments. The value of the investments and the resulting income may go up or down and it is possible that investors will not recoup the amount originally invested in the Company, including the risk of loss of the entire amount invested. There is no assurance that the investment objective of a particular Subfund will be achieved or that any increase in the value of the assets will occur. Past performance is not a reliable indicator of future results.**

The Net Asset Value of a Subfund may vary as a result of fluctuations in the value of the underlying assets and the resulting income. Investors are reminded that in certain circumstances their right to redeem Shares may be suspended.

Depending on the currency of the investor's domicile, exchange-rate fluctuations may adversely affect the value of an investment in one or more of the Subfunds. Moreover, in the case of an Alternate Currency Class in which the currency risk is not hedged, the result of the associated foreign exchange transactions may have a negative influence on the performance of the corresponding Share Class.

### Market Risk

Market risk is a general risk which may affect all investments to the effect that the value of a particular investment could change in a way that is detrimental to the Company's interests. In particular, the value of investments may be affected by uncertainties such as international, political and economic developments or changes in government policies.

### Interest Rate Risk

Subfunds investing in fixed income securities may fall in value due to fluctuations in interest rates. Generally, the value of fixed income securities rises when interest rates fall. Conversely, when interest rates rise, the value of fixed income securities can generally be expected to decrease. Long-term fixed income securities will normally be subject to greater price volatility than short-term fixed income securities.

### Foreign Exchange Risk

The Subfunds' investments may be made in other currencies than the relevant Reference Currency and therefore be subject to currency fluctuations, which may affect the Net Asset Value of the relevant Subfunds favourably or unfavourably. Currencies of certain countries may be volatile and therefore affect the value of securities denominated in such currencies. If the currency in which an investment is denominated appreciates against the Reference Currency of the relevant Subfund, the value of the investment will increase. Conversely, a decline in the exchange rate of the currency would adversely affect the value of the investment. The Subfunds may enter into hedging transactions on currencies to protect against a decline in the value of investments denominated in currencies other than the Reference Currency, and against any increase in the cost of investments denominated in currencies other than the Reference Currency. However, there is no guarantee that the hedging will be successful.

Although it is the policy of the Company to hedge the currency exposure of Subfunds against their respective Reference Currencies, hedging transactions may not always be possible and currency risks cannot therefore be excluded.

### Credit Risk

Subfunds investing in fixed income securities are subject to the risk that issuers may not make payments on such securities. An issuer suffering an adverse change in its financial condition could lower the credit quality of a security, leading to greater price volatility of the security. A lowering of the credit rating of a security may also offset the security's liquidity. Subfunds investing in lower quality debt securities are more susceptible to these problems and their value may be more volatile.

### Counterparty Risk

The Company may enter into over-the-counter transactions which will expose the Subfunds to the risk that the counterparty may default on its obligation to perform under such contracts. In the event of bankruptcy of the counterparty, the Subfunds could experience delays in liquidating the position and significant losses.

### EU Bank Recovery and Resolution Directive

Directive 2014/59/EU establishing a framework for the recovery and resolution of credit institutions and investment firms (the "BRRD") was published in the Official Journal of the European Union on June 12, 2014 and entered into force

on July 2, 2014. The stated aim of the BRRD is to provide resolution authorities, including the relevant Luxembourg resolution authority, with common tools and powers to address banking crises pre-emptively in order to safeguard financial stability and minimize taxpayers' exposure to losses.

In accordance with the BRRD and relevant implementing laws, national prudential supervisory authorities can assert certain powers over credit institutions and certain investment firms which are failing or are likely to fail and where normal insolvency would cause financial instability. These powers comprise write-down, conversion, transfer, modification, or suspension powers existing from time to time under, and exercised in compliance with any laws, regulations, rules or requirements in effect in the relevant EU Member State relating to the implementation of BRRD (the "Bank Resolution Tools").

The use of any such Bank Resolution Tools may affect or restrain the ability of counterparties subject to BRRD to honour their obligations towards the Subfunds, thereby exposing the Subfunds to potential losses.

The exercise of Bank Resolution Tools against investors of a Subfund may also lead to the mandatory sale of part of the assets of these investors, including their shares in that Subfund. Accordingly, there is a risk that a Subfund may experience reduced or even insufficient liquidity because of such an unusually high volume of redemption requests. In such case the Company may not be able to pay redemption proceeds within the time period stated in this Prospectus.

Furthermore, exercising certain Bank Resolution Tools in respect of a particular type of securities may, under certain circumstances, trigger a drying-up of liquidity in specific securities markets, thereby causing potential liquidity problems for the Subfunds.

### Liquidity Risk

There is a risk that the Company will suffer liquidity issues because of unusual market conditions, an unusually high volume of redemption requests or other reasons. In such case the Company may not be able to pay redemption proceeds within the time period stated in this Prospectus.

### Management Risk

The Company is actively managed and the Subfunds may therefore be subject to management risks. The Company will apply its investment strategy (including investment techniques and risk analysis) when making investment decisions for the Subfunds, however, no assurance can be given that the investment decision will achieve the desired results. The Company may in certain cases decide not to use investment techniques, such as derivative instruments, or they may not be available, even under market conditions where their use could be beneficial for the relevant Subfund.

### Sustainability Risks

Pursuant to EU Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27

November 2019 on sustainability-related disclosures in the financial services sector (the "SFDR"), the Subfunds are required to disclose the manner in which Sustainability Risks (as defined hereafter) are integrated into the investment decision and the results of the assessment of the likely impacts of Sustainability Risks on the returns of the Subfunds.

Sustainability risks means an environmental, social or governance event or condition that, if it occurs, could have a material negative impact on the value of the investment. The materiality of sustainability risks is determined by the likelihood, magnitude and time-horizon of the risk materializing.

Sustainability risks can be understood as a sub-category of traditional risk types (e.g. credit-, market-, liquidity-, operational-, and strategy risk) and are identified and managed in the context of risk management processes of the Management Company. Additionally, Investment Managers of Subfunds with an ESG investment strategy are supported by the CSAM ESG team to identify and manage material sustainability risks in the investment decision process.

As sustainability risks differ between asset classes and investment styles, they are defined at Subfund level. The Investment Manager identifies sustainability risks by considering sector, industry and company exposure of the portfolio either in absolute terms or relative to the benchmark. Proprietary analysis may be supported by specific frameworks which define industry-specific ESG factors material to a company.

The impacts following the occurrence of a Sustainability Risk may be numerous and vary depending on the specific risk, region and asset class. For all Subfunds, sustainability risks may result in a negative impact on the returns of the Subfund. Generally, acute and chronic physical risks, new carbon taxes and changing consumer behavior have been identified as being highly relevant. These risks may lead to increased default risks for the investments. Further information is provided in the section "Risk Information" of Chapter 23 "Subfunds".

**Investment Risk****Investments in Equities**

The risks associated with investments in equity (and equity-type) securities include in particular significant fluctuations in market prices, adverse issuer or market information and the subordinate status of equity compared to debt securities issued by the same company.

Investors should also consider the risk attached to fluctuations in exchange rates, possible imposition of exchange controls and other restrictions.

**Investments in Fixed Income Securities**

Investments in securities of issuers from different countries and denominated in different currencies offer potential benefits not available from investments solely in securities of issuers from a single country, but also involve certain significant risks that are not typically associated with investing in the securities of issuers located in a single country. Among the risks involved are fluctuations in interest rates as well as fluctuations in currency exchange rates (as further described above under section "Interest Rate Risk" and "Foreign Exchange Risk") and the possible imposition of exchange control regulations or other laws or restrictions applicable to such investments. A decline in the value of a particular currency in comparison with the Reference Currency of the Subfund would reduce the value of certain portfolio securities that are denominated in such a currency.

An issuer of securities may be domiciled in a country other than the country in whose currency the instrument is denominated. The values and relative yields of investments in the securities markets of different countries, and their associated risks, may fluctuate independently of each other.

As the Net Asset Value of a Subfund is calculated in its Reference Currency, the performance of investments denominated in a currency other than the Reference Currency will depend on the strength of such currency against the Reference Currency and on the interest rate environment in the country issuing the currency. In the absence of other events that could otherwise affect the value of non-Reference Currency investments (such as a change in the political climate or an issuer's credit quality), an increase in the value of the non-Reference Currency can generally be expected to increase the value of a Subfund's non-Reference Currency investments in terms of the Reference Currency.

The Subfunds may invest in investment grade debt securities. Investment grade debt securities are assigned ratings within the top rating categories by rating agencies on the basis of the creditworthiness or risk of default. Rating agencies review, from time to time, such assigned ratings and debt securities may therefore be downgraded in rating if economic circumstances impact the relevant debt securities issue. Moreover, the Subfunds may invest in debt instruments in the non-investment grade sector (high yield debt securities). Compared to investment grade debt securities, high yield debt securities are generally lower-rated and will usually offer higher yields to compensate for their reduced creditworthiness or increased risk of default.

SEC Rule 144A provides a safe harbour exemption from the registration requirements of the Securities Act of 1933 for resale of restricted securities to qualified institutional buyers, as defined in the rule. The advantage for Investors may be higher returns due to lower administration charges. However, dissemination of secondary market transactions in rule 144A securities is restricted and only available to qualified institutional buyers. This might increase the volatility of the security prices and, in extreme conditions, decrease the liquidity of a particular rule 144A security.

**Risk relating to contingent convertible instruments****Unknown risk**

The structure of the contingent convertible instruments is yet untested. In a stressed environment, when the underlying features of these instruments will be put to the test, it is uncertain how they will perform. In the event a single issuer activates a trigger or suspends coupons, it is uncertain if the market will view the issue as an idiosyncratic event or systemic. In the latter case, potential price contagion and volatility to the entire asset class is possible. This risk may in turn be reinforced depending on the level of underlying instrument arbitrage. Furthermore in an illiquid market, price formation may be increasingly stressed.

**Capital structure inversion risk**

Contrary to classic capital hierarchy, contingent convertible instruments investors may suffer a loss of capital when equity holders do not. In certain scenarios, holders of contingent convertible instruments will suffer losses ahead of equity holders, e.g. when a high trigger principal write-down contingent convertible instruments is activated. This cuts against the normal order of capital structure hierarchy where equity holders are expected to suffer the first loss.

**Industry concentration risk**

As the issuers of contingent convertible instruments may be unevenly distributed across sectors of industry, contingent convertible instruments may be prone to industry concentration risks.

**Investments in Warrants**

The leveraged effect of investments in warrants and the volatility of warrant prices make the risks attached to investments in warrants higher than in the case of investment in equities. Because of the volatility of warrants, the volatility of the share price of any Subfund investing in warrants may potentially increase.

**Investments in Target Funds**

Investors should note that investments in Target Funds may incur costs both at the Subfund level and at the level of the Target Funds. Furthermore, the value of the units or shares in the Target Funds may be affected by currency fluctuations, currency exchange transactions, tax regulations (including the levying of withholding tax) and any other economic or political factors or changes in the countries in which the Target Fund is invested, along with the risks associated with exposure to the emerging markets.

The investment of the Subfunds' assets in units or shares of Target Funds entails a risk that the redemption of the units or shares may be subject to restrictions, with the consequence that such investments may be less liquid than other types of investment.

**Use of Derivatives**

While the use of financial derivative instruments can be beneficial, financial derivative instruments also involve risks different from, and, in certain cases, greater than, the risks presented by more traditional investments.

Derivatives are highly specialized financial instruments. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself, without there being any opportunity to observe the performance of the derivative under all possible market conditions.

If a derivative transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous price.

Since many derivatives have a leverage component, adverse changes in the value or level of the underlying asset, rate or index may result in a loss substantially greater than the amount invested in the derivative itself.

The other risks associated with the use of derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Many derivatives are complex and often valued subjectively. Improper valuations can result in increased cash payment requirements to counterparties or a loss of value to the Company. Consequently, the Company's use of derivatives may not always be an effective mean of, and sometimes could be counterproductive to, furthering the Company's investment objectives.

Derivative instruments also carry the risk that a loss may be sustained by the Company as a result of the failure of the counterparty to a derivative to comply with the terms of the contract (as further described under "Counterparty Risk" above). The default risk for exchange-traded derivatives is generally less than for privately negotiated derivatives, since the clearing house, which is the issuer or counterparty to each exchange-traded derivative, provides a guarantee of performance. In addition, the use of credit derivatives (credit default swaps, credit linked notes) carries the risk of a loss arising for the Company if one of the entities underlying the credit derivative defaults.

Moreover, OTC derivatives may bear liquidity risks. The counterparties with which the Company effects transactions might cease making markets or quoting prices in certain of the instruments. In such cases, the Company might not be in a position to enter into a desired transaction in currencies, credit default swaps or total return swaps or to enter into an offsetting transaction with respect to an open position which might adversely affect its performance. Unlike exchange-traded derivatives, forward, spot and option contracts on currencies do not provide the Management Company with the possibility to offset the Company's obligations through an equal and opposite transaction. Therefore, through entering into forward, spot or options contracts, the Company may be required, and must be able, to perform its obligations under these contracts.

The use of derivative instruments may or may not achieve its intended objective.

**Investments in Hedge Fund Indices**

In addition to the risks entailed in traditional investments (such as market, credit and liquidity risks), investments in hedge fund indices entail a number of specific risks that are set out below.

The hedge funds underlying the respective index, as well as their strategies, are distinguished from traditional investments primarily by the fact that their investment strategy may involve the short sale of securities and, on the other hand, by using borrowings and derivatives, a leverage effect may be achieved.

The leverage effect entails that the value of a fund's assets increases faster if capital gains arising from investments financed by borrowing exceed the related costs, notably the interest on borrowed monies and premiums payable on derivative instruments. A fall in prices, however, causes a faster decrease in the value of the Company's assets. The use of derivative instruments, and in particular of short selling, can in extreme cases lead to a total loss in value.

Most of the hedge funds underlying the respective index were established in countries in which the legal framework, and in particular the supervision by the authorities, either does not exist or does not correspond to the standards applied in western Europe or other comparable countries. The success of hedge funds depends in particular on the competence of the fund managers and the suitability of the infrastructure available to them.

#### **Investments in Commodity and Real Estate Indices**

Investments in products and/or techniques providing an exposure to commodity, hedge fund and real estate indices differ from traditional investments and entail additional risk potential (e.g. they are subject to greater price fluctuations). When included in a broadly diversified portfolio, however, investments in products and/or techniques providing an exposure to commodity and real estate indices generally show only a low correlation to traditional investments.

#### **Investments in illiquid Assets**

The Company may invest up to 10% of the total net assets of each Subfund in transferable securities or money market instruments which are not traded on stock exchanges or regulated markets. It may therefore be the case that the Company cannot readily sell such securities. Moreover, there may be contractual restrictions on the resale of such securities. In addition, the Company may under certain circumstances trade futures contracts or options thereon. Such instruments may also be subject to illiquidity in certain situations when, for example, market activity decreases, or when a daily fluctuation limit has been reached. Most futures exchanges restrict the fluctuations in future contract prices during a single day by regulations referred to as "daily limits". During a single trading day no trades may be executed at prices above or below these daily limits. When the price of a futures contract has increased or decreased to the limit, positions can neither be purchased nor compensated. Futures prices have occasionally moved outside the daily limit for several consecutive days with little or no trading. Similar occurrences may prevent the Company from promptly liquidating unfavourable positions and therefore result in losses.

For the purpose of calculating the Net Asset Value, certain instruments, which are not listed on an exchange, for which there is limited liquidity, will be valued based upon the average price taken from at least two major primary dealers. These prices may affect the price at which Shares are redeemed or purchased. There is no guarantee that in the event of a sale of such instruments the price thus calculated can be achieved.

#### **Investments in Asset-Backed Securities and Mortgage-Backed Securities**

The Subfunds may have exposure to asset-backed securities ("ABS") and mortgage-backed securities ("MBS"). ABS and MBS are debt securities issued by a special purpose vehicle (SPV) with the aim to pass through of liabilities of third parties other than the parent company of the issuer. Such securities are secured by an asset pool (mortgages in the case of MBS and various types of assets in the case of ABS). Compared to other traditional fixed income securities such as corporate or government issued bonds, the obligations associated with these securities may be subject to greater counterparty, liquidity and interest rate risks as well as other types of risks, such as reinvestment risk (arising from included termination rights, prepayment options), credit risks on the underlying assets and advance repayments of principal resulting in a lower total return (especially, if repayment of the debt is not concurrent with redemption of the assets underlying the claims).

ABS and MBS assets may be highly illiquid and therefore prone to substantial price volatility.

#### **Small to medium-sized Companies**

A number of Subfunds may invest primarily in small and mid-cap companies. Investing in the securities of smaller, lesser-known companies involves greater risk and the possibility of greater price volatility due to the less certain growth prospects of smaller firms, the lower degree of liquidity of the markets for such stocks and the greater sensitivity of smaller companies to changing market conditions.

#### **Investment in REITs**

REITs (real estate investment trusts) are listed companies – not open-ended undertakings for collective investment in transferable securities under Luxembourg law – which buy and/or develop real estate as long-term investments. They invest the bulk of their assets directly in real estate and derive most of their income from rent. Special risk considerations apply to investments in publicly traded securities of companies active primarily in the real estate sector. These risks include: the cyclical nature of real estate securities, risks connected with the general and local economic situation, supply overhangs and fierce competition, increases in land tax and operating costs, demographic trends and changes in rental income, changes to the provisions of building law, losses from damage and expropriation, environmental risks, rent ceilings imposed by administrative provisions, changes in real estate prices in residential areas, risks of associated parties, changes in the attractiveness of real estate to tenants, interest rate rises and other factors

influencing the real estate capital market. As a rule, interest rate rises result in higher financing costs, which could reduce – either directly or indirectly – the value of the respective Subfund's investment.

#### **Investments in Russia**

##### **Custodial and registration risk in Russia**

- Although exposure to the Russian equity markets is substantially hedged through the use of GDRs and ADRs, individual Subfunds may, in accordance with their investment policy, invest in securities which require the use of local depository and/or custodial services. Currently, evidence of legal title to shares is maintained in "book-entry" form in Russia.
- The Subfund will hold securities through the Depository Bank that will open a foreign nominee holder account with a Russian custodian. Russian law provides that the Depository Bank (as foreign nominee holder) will be under an obligation to "make all reasonable efforts within its control" to provide the Russian custodian or, at their request, the issuer, a Russian court, the Central Bank of the Russian Federation and Russian investigative authorities, with information on owners of securities, other persons exercising rights under securities and persons in whose interests such rights are exercised, and the number of the relevant securities.
- It is plausible that the Depository Bank should be able to comply with the obligation described above by providing information about the Subfund as owner of securities. However, it cannot be ruled out that information about the Subfund's Shareholders including information about beneficial ownership of shares held in the Subfund may also be requested. If such information is not provided by the Subfund and / or the Shareholder to the Depository Bank, operations in the Depository Bank's foreign nominee holder account in Russia may be, as Russian law states, "prohibited or limited" by the Central Bank of the Russian Federation for up to six months. Russian law is silent as to whether such six-month term can be extended, therefore, such extension(s) cannot be excluded for an undetermined period of time so that the final impact of the aforementioned prohibition or limitation of operations cannot reasonably be evaluated at this point in time.
- The significance of the register is crucial to the custodial and registration process. Although independent registrars are subject to licensing and supervision by the Central Bank of Russia and may bear civil, as well as administrative liability for non-performance or undue performance of their obligations, it is, nevertheless, possible for the Subfund to lose its registration through fraud, negligence or mere oversight. Furthermore, although companies are required under Russian law to maintain independent registrars that meet certain statutory criteria, in practice there may be instances where this regulation has not been complied with by the companies. Because of this lack of independence, the management of a company can potentially exert significant influence over the make-up of that company's shareholder base.
- Distortion or destruction of the register could substantially impair, or in certain cases erase, the Subfund's holdings of the relevant company's shares. Neither the Subfund, the Investment Manager, the Depository Bank, the Management Company, the Board of Directors of the Management Company nor any of their agents can make any representation or warranty about, or any guarantee of, the registrars' actions or performance. Such risk will be borne by the Subfund. Although Russian law provides for the mechanism of restoration of the lost information in the register, there is no guidance on how this mechanism should operate in practice, and any potential dispute would be considered by a Russian court on a case-by-case basis.

The abovementioned amendments to the Russian Civil Code provide for unlimited protection of the "good faith purchaser" of equities acquired in the course of exchange trades. The only exception (which seems to be non-applicable) to this rule is the acquisition of such securities without consideration.

Direct investments in the Russian market are made in principle via equities or equity-type securities traded on the Moscow Exchange, in accordance with Chapter 6, "Investment Restrictions" and unless stipulated otherwise in Chapter 23 "Subfunds". Any other direct investments, which are not made via the Moscow Exchange will fall within the 10%-rule of Article 41 (2) a) of the Law of December 17, 2010.

#### **Investments in India**

##### **Direct Investments in India**

In addition to the restrictions set out in this Prospectus, direct investments made in India are subject to the relevant Subfund obtaining a certificate of registration as "Foreign Portfolio Investor" ("FPI") (registration as Category II FPI) from a Designated Depository Participant ("DDP") on behalf of the Securities and Exchange Board of India ("SEBI"). In addition the Subfund shall obtain a Permanent Account Number ("PAN") card from the Income Tax Department of India. The FPI Regulations set various limits for investments by FPIs and impose various obligations on the FPIs. All investments made directly in India will be subject to FPI Regulations prevailing at the time of the investment. Investors should note

that the registration of the relevant Subfund as a FPI is a condition precedent to any direct investments by this Subfund in the Indian market.

The FPI registration of the Subfund can in particular be suspended or withdrawn by the SEBI in case of non-compliance with the SEBI's requirements, or in case of any acts or omissions in relation to compliance with any Indian regulations, including applicable laws and regulations relating to Anti-Money Laundering and Counter Terrorism Financing. No assurance can be given that the FPI registration will be maintained for the whole duration of the relevant Subfund. Consequently, investors should note that a suspension or a withdrawal of the FPI registration of the Subfund may lead to a deterioration of the performance of the relevant Subfund, which as a consequence, could have a negative impact on the value of the investors' participation depending on the prevailing market conditions at that time.

Investors should also note that the Prevention of Money Laundering Act, 2002 ("PMLA") and the rules framed thereunder in relation to the prevention and control of activities concerning money laundering and confiscation of property derived or involved in money laundering in India require inter-alia certain entities such as banks, financial institutions and intermediaries dealing in securities (including FPIs) to conduct client identification procedures and to establish the beneficial owner of the assets ("Client ID") and to maintain a record of Client ID and certain kinds of transactions ("Transactions"), such as cash transactions exceeding certain thresholds, suspicious transactions (whether or not made in cash and including credits or debits into or from non-monetary accounts such as security accounts). Accordingly, the FPI regulations have the ability to seek information from the FPI holder on the identity of beneficial owners of the Subfund, hence information regarding investors of the Subfund may be required for disclosure to local supervisory authorities.

As far as permitted under Luxembourg law, information and personal data regarding the investors of the Subfund investing in the Indian market (including but not limited to any documentation submitted as part of the identification procedure prescribed in relation to their investment in the Subfund) may be disclosed to the DDP, resp. to governmental or regulatory authorities in India upon their request. In particular investors shall note that, in order to enable the Subfund to comply with the Indian laws and regulations, any natural person who, whether acting alone or together, or through one or more juridical person, exercises control through ownership or who ultimately has a controlling ownership interest above 25% of the Subfund's assets is required to disclose its identity to the DDP.

#### **Indirect Investments in India**

In addition, certain Subfunds seek to get exposure to the Indian market by investing indirectly in Indian assets through derivative instruments or structured products. Accordingly, investors shall note that, in line with Indian laws and regulations on anti-money laundering, indirect investments made in India may require the disclosure of information pertaining to the Subfund, to the investors and beneficial owners of the Subfund to the relevant Indian supervisory authorities through the counterparty to the derivative instrument or structured product.

Therefore, as far as permitted under Luxembourg law, information and personal data regarding the investors of the Subfund investing indirectly in the Indian market (including but not limited to any documentation submitted as part of the identification procedure prescribed in relation to their investment in the Subfund) may be disclosed to the counterparty to the derivative instrument or structured product and to governmental or regulatory authorities in India upon their request. In particular, investors shall note that, in order to enable the Subfund to comply with the Indian laws and regulations, any natural person who, whether acting alone or together, or through one or more juridical persons, exercises control through ownership or who ultimately has a controlling ownership interest above 25% of the Subfund's assets is required to disclose its identity to the relevant counterparty to the derivative instrument or structured product and to the local supervisory authorities.

#### **Investments in the People's Republic of China ("PRC" or "China")**

For the purposes of this Prospectus, "PRC" refers to the People's Republic of China (excluding the Hong Kong and Macau Special Administrative Regions and Taiwan) and the term "Chinese" shall be construed accordingly.

The following risk factors apply to Subfunds that may invest in PRC securities. Investing in the PRC is subject to risks that are similar to investing in emerging markets. This can lead to a greater risk of loss to these Subfunds.

#### **Considerations Relating to PRC Regulations**

At present, the securities market and the regulatory framework for the securities industry in the PRC is at an early stage of development. The China Securities Regulatory Commission ("CSRC") is responsible for supervising the national securities markets and producing relevant regulations. The PRC regulations, under which the Subfunds may invest in the PRC and which regulate investments by foreign investors in the PRC and repatriation, are relatively new. The application and interpretation of such PRC regulations is therefore largely untested and there is a lack of certainty as to how they will be applied. In addition, such relevant PRC

regulations give CSRC, the PRC State Administration of Foreign Exchange ("SAFE"), the People's Bank of China ("PBOC") and other relevant PRC authorities wide discretions and there are few precedents and little certainty as to how these discretions might be exercised, either now or in the future. PRC regulations may be varied in the future and no assurance can be given that any such changes will not adversely affect the Subfunds. CSRC, SAFE and/or PBOC may have power in the future to impose new restrictions or conditions on or terminate the access to PRC securities which may adversely affect the Subfunds and its investors. It is not possible to predict how such changes, if any, would affect the Subfunds.

#### **Corporate Disclosure, Accounting and Regulatory Standards**

The PRC's disclosure and regulatory standards may not be as well developed as those in certain OECD countries. There may be less publicly available information about PRC companies than is regularly published by or about companies based in OECD countries and such available information may be less reliable than that published by or about companies in OECD countries. PRC companies are subject to accounting standards and requirements that may differ in significant respects from those applicable to companies established or listed in OECD countries. Further, PRC companies may be subject to lower standards relating to corporate governance and protection of minority shareholder rights. These factors may have an adverse impact on the value of investments made by the Subfunds and may impact the Investment Manager's ability to accurately assess and value potential companies to invest in.

#### **Currency Risks**

The PRC government's control of currency exposure and future movements in exchange rates may adversely affect the operations and financial results of companies invested in by the Subfunds. Renminbi is not a freely convertible currency and it is subject to foreign exchange control policies of and repatriation restrictions imposed by the PRC government. If such policies or restrictions change in the future, the Subfunds may be adversely affected.

SAFE imposes restrictions on the ability of companies in the PRC to retain and deal in foreign currency. There are significant restrictions on the ability of companies located in the PRC to purchase and make outward remittance of foreign currency. SAFE approval may be required in order to purchase or remit foreign currency (including transfers and remittances by a qualified foreign institution), subject to compliance with all applicable requirements. Accordingly, there is a risk that the Subfunds may not be able to repatriate funds for the purposes of distributions or redemptions in relation to the Shares.

The Subfunds will be subject to bid/offer spread on currency conversion and transaction costs. Such foreign exchange risk and costs of conversion may result in losses to the Subfunds. To the extent that the Subfunds do not invest, or delays its investment into Renminbi denominated securities in the PRC, they will be exposed to fluctuations in the Renminbi exchange rate. The Subfunds may but are not obliged to seek to hedge currency risks but as the foreign exchange of Renminbi is regulated, such hedging is likely to be an imperfect hedge in that it could involve hedging a currency that has historically been correlated to Renminbi and may be expensive. There can be no assurance that any hedging, particularly such imperfect hedging, will be successful and it could reduce or eliminate some or all of the benefit the Subfunds may experience from favourable currency fluctuations.

There can be no assurance that Renminbi will not be subject to devaluation or revaluation or that shortages in the availability of foreign currency will not develop.

#### **Developing Legal System**

The PRC's legal system is based on written statutes under which prior court decisions may be cited for reference, but do not form a set of binding precedents. Since 1979, the PRC government has been developing a comprehensive system of commercial laws and, in particular, as mentioned above, the PRC regulations with respect to foreign investments are relatively new and have a short operating history. Because these laws, regulations and legal requirements are relatively recent, their interpretation and enforcement involve significant uncertainty. In addition, the PRC laws governing business organisations, bankruptcy and insolvency may provide substantially less protection to security holders than that provided by the laws of more developed countries. These factors (individually or combined) could have an adverse effect on the Subfunds.

There can be no guarantee that new tax laws, regulations and practices in the PRC specifically relating to foreign investments and transactions in Chinese securities will not be promulgated in the future. The promulgation of such new laws, regulations and practices may operate to the advantage or disadvantage of investors. Various tax reform policies have been implemented by the PRC government in recent years, and existing tax laws and regulations may be revised or amended in the future. As a consequence, it is possible that the current tax laws, regulations and practices in the PRC will be changed with retroactive effect. Moreover, there is no assurance that tax incentives currently offered to Chinese companies, if any, will not be abolished and the existing tax laws and regulations

will not be revised or amended in the future. Any changes in tax policies may reduce the after-tax profits of the companies in the PRC in which the Subfunds invest, thereby adversely affecting the Subfunds.

#### **Investment Restrictions**

There are foreign ownership limits applicable to PRC securities from time to time. Such limits may apply to all underlying foreign investors in aggregate or to a single foreign investor. The capacity of the Subfunds to make investments in the relevant securities will be restricted by such limits and may be affected by the activities of all underlying foreign investors.

It will be difficult in practice for the Subfunds to monitor the investment of the underlying foreign investors since investors may make investment through different permitted channels.

#### **Liquid Assets**

The Subfunds may maintain a liquid portfolio of cash, deposits and money market instruments in such amount as the Board of Directors considers appropriate. Investors should be aware that due to potential repatriation restrictions, the Subfunds may need to maintain higher cash balances, including potentially balances held outside the PRC resulting in less of the proceeds of the Subfunds being invested in the PRC than would otherwise be the case if such local restrictions did not apply. Such retained funds may not form part of the Subfunds' investments in the PRC and, as such, in times of rising PRC security values, the portion of the Subfunds' assets retained in cash may represent a drag on the performance of the Subfunds and, conversely, in times of falling PRC security values may cause the Subfunds to perform better than might otherwise have been the case had a greater investment been made in the PRC.

#### **PRC Governmental, Political, Economic and Related Considerations**

For over a decade, the PRC government has been reforming the economic and political systems of the PRC. Whilst these reforms may continue, many of the reforms are unprecedented or experimental and may be refined or changed. Political, economic and social factors could also lead to further adjustments to the reform measures. The Subfunds could be adversely affected by adjustments in the PRC's state plans, political, economic and social conditions, changes in the policies of the PRC government such as changes in laws and regulations (or the interpretation thereof), measures which may be introduced to control inflation, changes in investor sentiment (both in the PRC and globally), changes in the rate or method of taxation, imposition of additional restrictions on currency conversion, the availability and cost of credit, market liquidity and the imposition of additional import restrictions.

The PRC economy has experienced significant growth in the past ten years, but such growth has been uneven both geographically and among the various sectors of the economy, and no assurance may be given that such growth will continue. The PRC government has implemented various measures from time to time to control inflation and to regulate economic expansion with a view to preventing overheating of the economy, and these measures could have a negative impact on the performance of the Subfunds. Furthermore, a portion of the economic activity in the PRC is export-driven and, therefore, is affected by developments in the economies of the PRC principal trading partners.

The transformation from a centrally planned, socialist economy to a more market-oriented economy has also resulted in many economic and social disruptions and distortions. Moreover, there can be no assurance that the economic and political initiatives necessary to achieve and sustain such a transformation will continue or, if such initiatives continue and are sustained, that they will be successful. These changes could adversely affect the interests of the relevant Subfunds.

In the past the PRC government has applied nationalisation, expropriation, confiscatory levels of taxation and currency blockage. There can be no assurance that this will not re-occur and any re-occurrence could adversely affect the interests of the relevant Subfunds.

#### **Risk Relating to the PRC Securities Markets and Exchanges**

The PRC securities markets, including the PRC stock exchanges, currently are undergoing a period of growth and change which may lead to difficulties in the settlement and recording of transactions and in interpreting and applying the relevant regulations. In addition, the regulation of, and enforcement activity in, the PRC securities markets may not be equivalent to that in markets in OECD countries. There may not be equivalent regulation and monitoring of the PRC securities markets and activities of investors, brokers and other participants to that in certain OECD markets.

The PRC stock exchanges may have lower trading volumes than some OECD exchanges and the market capitalisations of listed companies may be smaller compared to those on more developed exchanges in developed markets. The listed securities of many companies in the PRC may accordingly be materially less liquid, subject to greater dealing spreads and experience materially greater volatility than those of OECD countries. Government supervision and regulation of the PRC securities markets and of quoted companies may also be less developed than in

some OECD countries. In addition, there is a high measure of legal uncertainty concerning the rights and duties of market participants when compared to investments made through securities systems of established markets.

The PRC stock market has in the past experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the Subfunds, the ability of investors to redeem Shares and the price at which Shares may be redeemed.

#### **Risks Relating to Settlement Cycles**

Due to the different settlement cycles of the stock exchanges and the PRC interbank bond market comprised in its investment universe, the Subfunds may be prevented from perfectly matching the subscriptions and redemptions with the trading of the securities and therefore from being fully invested at all times.

#### **Investments in PRC debt instruments**

The following risk factors apply to Subfunds that may invest in PRC debt instruments. Investment in the Chinese debt instruments market may have higher volatility and price fluctuation than investment in debt instrument products in more developed markets.

#### **Credit risk of counterparties to Renminbi denominated debt instruments**

Investors should note that as the PRC financial market is nascent, most of the Renminbi denominated debt instruments may be unrated. The financial market of the PRC, including the PRC interbank bond market, is at an early stage of development. In the event of a default of a counterparty of the Renminbi-denominated debt instruments, the relevant Sub-Fund's value will be adversely affected. The relevant Sub-Fund may also encounter difficulties or delays in enforcing its rights against the counterparties of Renminbi-denominated debt instruments.

Renminbi denominated debt instruments can be issued by a variety of issuers inside or outside the PRC including commercial banks, state policy banks, corporations, etc. These issuers may have different risk profiles and their credit quality may vary.

Furthermore, Renminbi denominated debt instruments are generally unsecured debt obligations not supported by any collateral. The Subfunds may be fully exposed to the credit/insolvency risk of their counterparties as unsecured creditors.

#### **Liquidity risk**

Other than on the China interbank bond market, Renminbi denominated debt instruments are not regularly traded and may have lower trading volumes than other more developed markets. An active secondary market for these instruments is yet to be developed. The bid and offer spread of the price of Renminbi denominated debt instruments may be large and the Subfunds may incur significant trading and realisation costs.

#### **Interest rate risk**

Changes in macroeconomic policies of the PRC (i.e. monetary policy and fiscal policy) will have an influence over capital markets affecting the pricing of debt instruments and thus, the return of the Subfunds. The value of Renminbi denominated debt instruments held by the Subfunds generally will vary inversely with changes in interest rates and such variation may affect the value of the Subfunds' assets accordingly. Typically, when interest rates increase, the value of fixed income assets tend to depreciate. On the contrary, when interest rates decrease, the value of fixed income assets tends to appreciate.

#### **Valuation risk**

Renminbi denominated debt instruments are subject to the risk of mispricing or improper valuation, i.e. operational risk that the debt instruments are not priced properly. Valuations are primarily based on valuations from independent third party sources where prices are available, accordingly valuations may sometimes involve uncertainty and judgemental determinations and independent pricing information may not be available at all times.

#### **Credit rating risk**

Many of the debt instruments in the PRC do not have a rating assigned by international credit agencies. The credit appraisal system in the PRC is at an early stage of development; there is no standard credit rating methodology used in investment appraisal and the same rating scale may have a different meaning in different agencies. The assigned ratings may not reflect the actual financial strength of the appraised asset.

Rating agencies are private services that provide ratings of the credit quality of debt instruments. Ratings assigned by a rating agency are not absolute standards of credit quality and do not evaluate market risks. Rating agencies may fail to make timely changes to credit ratings and an issuer's current financial condition may be better or worse than a rating indicates.

**Credit rating downgrading risk**

An issuer of Renminbi denominated debt instruments may experience an adverse change in its financial condition which may in turn result in a decrease in its credit rating. The adverse change in financial condition or decrease in credit rating of an issuer may result in increased volatility in, and adverse impact on, the price of the relevant Renminbi denominated debt instruments and negatively affect liquidity, making any such debt instruments more difficult to sell.

**Unrated or high yield debt instruments**

Subject to the PRC regulations and the investment objective of the relevant Subfund, the assets of the Subfunds may be invested in unrated or low grade debt instruments which are subject to greater risk of loss of principal and interest than higher rated debt instruments.

The lower ratings of certain debt instruments or unrated debt instruments held for the account of the relevant Subfunds reflect a greater possibility that adverse changes in the financial condition of the issuer, or in general economic conditions, or both, or an unanticipated rise in interest rates, may impair the ability of the issuer to make payments of interest and principal. Such debt instruments generally carry a higher degree of default risk which may affect the capital value of an investment. Unrated debt instruments may be less liquid than comparable rated debt instruments and involve the risk that the relevant Subfunds may not accurately evaluate the debt instrument's comparative credit rating.

**Risk of investing in urban investment bonds**

Urban investment bonds are debt securities issued by local government agencies' financing vehicles ("LGFVs") in PRC and are listed or traded in the interbank bond market. LGFVs are separate legal vehicles established by the local government or their affiliates to raise funds for public welfare investment or infrastructure projects. Although urban investment bonds are issued by LGFVs and appear to be connected with local government bodies, the debt is backed by tax revenues or cash flow of investment projects and such debts are typically not guaranteed by local governments or the central government of the PRC. Such local governmental bodies or the central government are not obligated to provide financial support in case of default. In such case the relevant Subfunds could suffer significant loss and the Subfunds' net asset value could be adversely affected. The credit risk and price volatility of these bonds may be higher when compared with other bonds such as central bank bonds and policy bank bonds. Besides, liquidity may be low during adverse market situations.

**"Dim Sum" bond (i.e. bonds issued outside of PRC but denominated in Renminbi) market risks (if applicable)**

The "Dim Sum" bond market is still a relatively small market which is more susceptible to volatility and illiquidity. The operation of the "Dim Sum" bond market as well as new issuances could be disrupted causing a fall in the net asset value of the Subfunds should there be any promulgation of new rules which limit or restrict the ability of issuers to raise Renminbi by way of bond issuances and/or reversal or suspension of the liberalisation of the Offshore Renminbi market by the relevant regulator(s).

**PRC interbank bond market**

The PRC interbank bond market is a quote-driven over-the-counter (OTC) market, where deals are negotiated between two counterparties through a trading system. It will be subject to risks associated with OTC markets, including counterparty default risks on parties with whom the Subfunds trade and when placing cash on deposit. The Subfunds will also be exposed to the risk of settlement default by a counterparty. The risk of default of a counterparty is linked to the credit worthiness of the counterparty.

**Investment through CIBM Program**

Under PRC regulations, certain qualified overseas financial institutions are eligible to participate in the China interbank bond direct access program (the "CIBM Program") to make investments in the PRC interbank bond market. The following risk factors apply to Subfunds that may invest through the CIBM Program and references to Investment Manager are references to the Investment Manager appointed with respect to the relevant Subfund.

**Effect of PRC Regulations on Subscriptions, Redemptions and Conversions**

Applications for subscription, redemption and/or conversion of Shares may be subject to certain restrictions under the CIBM Program and other relevant PRC regulations.

The repatriation of invested capital and of income and capital gains of a Subfund from the PRC is subject to the relevant PRC regulations.

Currently under the CIBM Program regulations, remittance and repatriation for the account of a Subfund may be effected subject to the following qualifications:

(a) a Subfund may remit investment principal in RMB or foreign currency into the PRC for investing through the CIBM Program. If that Subfund fails to remit

investment principal matching at least 50% of its anticipated investment size within nine (9) months after filing with the PBOC, an updated filing will need to be made through the onshore interbank bond trade and settlement agent.

(b) where a Subfund repatriates funds out of the PRC, the ratio of RMB to foreign currency ("Currency Ratio") should generally match the original Currency Ratio when the investment principal was remitted into PRC, with a maximum permissible deviation of 10%. Such ratio requirement can be waived for the first repatriation, provided that the foreign currency or RMB capital to be repatriated may not exceed 110% of the foreign currency or RMB amount remitted into the PRC in aggregate. To the extent repatriation is in the same currency as the inward remittance the Currency Ratio restriction will not apply.

At present, there is no regulatory prior approval requirement for repatriation of funds from the CIBM Program under the above circumstances, however, there is no certainty in the future that no regulatory restrictions will apply to the repatriation of funds by the Subfunds in the PRC. The investment regulations and/or the approach adopted by SAFE in relation to the repatriation may change from time to time.

The Subfunds' investments in the PRC may be limited by any applicable investment limit (pursuant to regulatory requirement or otherwise) with respect to the Subfunds' investments through the CIBM Program. Accordingly applications for subscription and/or conversion of Shares may be subject to sufficient available capacity for a Subfund under the CIBM Program as combined with the relevant Subfund's investment policy and restrictions. Applications received during a period when there is insufficient available capacity for a Subfund under the CIBM Program may be suspended and processed for subscription and/or conversion of Shares at the next following Subscription Date at which sufficient capacity is again available for the Subfund. In addition, the Company, the Management Company and the Central Administration are entitled to refuse applications and to temporarily or permanently suspend or limit any applications received during a period when there is insufficient available capacity for a Subfund under the CIBM Program.

Notwithstanding the above, the Company, the Management Company and the Central Administration are entitled to temporarily suspend the issue, subscription, redemption, conversion, payment of redemption proceeds and/or valuation of Shares of a Subfund during any period when that Subfund is unable to transmit subscription proceeds to or from the accounts of that Subfund, or dispose of holdings or to repatriate the proceeds of such disposals, subject to certain quota or limits imposed by any regulatory or supervisory, governmental or quasi-governmental authority, any fiscal body or self-regulatory organisation (whether of a governmental nature or otherwise), for example when that Subfund is unable to dispose of holdings in the CIBM Program, or to repatriate the proceeds of such disposals.

Investors applying for or who have already applied for subscription, redemption and/or conversion of Shares in a Subfund shall be notified by the Central Administration of any measures adopted as per the above so that they are given the opportunity to withdraw their application.

No application has been submitted or will be submitted, nor any registration has been or will be sought, by the Management Company to or from any of the PRC governmental or regulatory authorities in connection with the advertising, offer, distribution or sale of the Shares of the Subfunds in or from the PRC and the Management Company does not intend to or will not, directly or indirectly, advertise, offer, distribute or sell the Shares of the Subfunds to persons resident in the PRC.

The Shares of the Subfunds are not intended to be offered or sold within the PRC or to PRC investors. Any PRC investor shall not subscribe for Shares unless it is permitted to do so under all relevant PRC laws, rules, regulations, notices, directives, orders or other regulatory requirements in the PRC issued by any PRC governmental or regulatory authority that are applicable to the investor, the Company or the Investment Manager (whether or not having the force of law) as may be issued and amended from time to time. Where applicable PRC investors are responsible for obtaining all necessary governmental approvals, verifications, licences or registrations (if any) from all relevant PRC governmental authorities, including, but not limited to, SAFE, CSRC and/or other relevant regulatory bodies as applicable, and complying with all relevant PRC regulations, including, but not limited to, any relevant foreign exchange regulations and/or overseas investment regulations. If an investor fails to comply with the above, the Company may take any action in good faith and acting on reasonable grounds in relation to such investor's Shares to comply with relevant regulatory requirements, including effecting compulsory redemption of Shares owned by the relevant investor, subject to the Articles of Incorporation, and applicable laws and regulations.

Persons into whose possession this Prospectus or any Shares may come must inform themselves about, and observe, any such restrictions.

**Limits on Redemptions**

Where a Subfund is investing in the securities market in the PRC through the CIBM Program, repatriation of funds from the PRC may be subject to the relevant PRC regulations in effect from time to time.

Redemption of Shares is subject to the restrictions and limitations referred to under this Prospectus. The ability of an investor to redeem Shares of a Subfund depends, inter alia, on the PRC laws and practices affecting that Subfund's ability to liquidate investments and to repatriate the proceeds thereof out of the PRC. Any repatriation restrictions as may be applicable under PRC regulations in the future, where applicable, could restrict a Subfund's ability to satisfy all or any redemption requests in respect of any particular redemption day and accordingly, that Subfund may have to manage the liquidity challenges through the maintenance of high cash balances and the imposition of the redemption restrictions referred to above. Investors should not invest in a Subfund if they have need of greater liquidity than that offered by that Subfund.

#### **PRC Custody Risk**

The evidence of title of exchange-traded securities in the PRC consists only of electronic book-entries in the depository and/or registry associated with the applicable exchange.

In order to prevent any trades failing, the PRC depository, registration and clearing institutions may automatically settle any trades executed by the PRC securities trading house relating to the securities trading account maintained in the joint names of the Investment Manager (as applicant under the CIBM Program) and the relevant Subfund. Accordingly all instructions issued by the PRC securities trading house relating to the securities trading account may be executed without the need for any consent or direction of the custodian(s) of the relevant Subfund, which could potentially increase the risk of erroneous trading. However, the sub-custodian of the relevant Subfund will review the execution report in relation to all such transactions and notify the Investment Manager of any discrepancies between such execution report and trading data received from the PRC depository, registration and clearing institutions or the settlement instructions received from the Investment Manager.

PRC interbank bond investment of a Subfund will be registered in the joint names of the Investment Manager (as applicant under the CIBM Program) and that Subfund, or in another name for the sole use and benefit of the Subfund as permitted or required pursuant to the relevant Luxembourg and PRC regulations. There will be segregation of assets by the sub-custodian of the relevant Subfunds such that the assets of these Subfunds are separately recorded as belonging to these Subfunds. However, subject to the relevant PRC regulations, the Investment Manager could be the party entitled to the securities (albeit that this entitlement does not constitute an ownership interest), such PRC securities investment of the relevant Subfund may be vulnerable to a claim by a liquidator of the Investment Manager and may not be as well protected as if they were registered solely in the name of that Subfund. In particular, there is a risk that creditors of the Investment Manager may incorrectly assume that a Subfund's assets belong to the Investment Manager and such creditors may attempt or seek to gain control of that Subfund's assets to meet the Investment Manager's liabilities owed to such creditors. In such circumstances a Subfund may experience delays and/or incur additional expense to enforce that Subfund's rights and ownership over such assets.

Investors should note that cash deposited in the cash account of a Subfund with the PRC sub-custodian would not be segregated and could be regarded as a debt owing from the PRC sub-custodian to that Subfund as a depositor. Such cash will be co-mingled with cash belonging to other clients of the PRC sub-custodian. In the event of bankruptcy or liquidation of the PRC sub-custodian, a Subfund may not have any proprietary rights to the cash deposited in such cash account, and that Subfund could become an unsecured creditor, ranking *pari passu* with all other unsecured creditors of the PRC sub-custodian. A Subfund may face difficulty and/or encounter delays in recovering such debt, or may not be able to recover it in full or at all, in which case such Subfund and investors will suffer losses.

#### **Interbank Bond Trade and Settlement Agent Risk**

A Subfund may be adversely affected, whether directly or indirectly, by (i) the acts or omissions by the interbank bond trade and settlement agent in the settlement of any transaction or in the transfer of funds or securities; (ii) the default or bankruptcy of the interbank bond trade and settlement agent; and (iii) the disqualification of the interbank bond trade and settlement agent from acting in such capacity either on a temporary or permanent basis. Such acts, omissions, default or disqualification may also adversely affect the relevant Subfund in implementing its investment strategy or disrupt its operations, including causing delays in the settlement of any transaction or the transfer of any funds or securities in the PRC or in recovering assets, which may in turn adversely impact its net asset value.

Furthermore, regulatory sanctions can be imposed upon the interbank bond trade and settlement agent if it violates any provision under the CIBM Program regulations. Such sanctions may adversely affect the relevant Subfund's investments through the CIBM Program.

#### **PRC Settlement Agent and Best Execution Risk**

Pursuant to the relevant PRC regulations, securities trades under the CIBM Program may be executed through a limited number of PRC settlement agent that

may be appointed for trading in the PRC interbank bond market for the Subfunds. If a PRC settlement agent offers the Subfunds standards of execution which the Investment Manager reasonably believes to be amongst best practice in the PRC marketplace, the Investment Manager may determine that it should consistently execute transactions with that PRC settlement agent (including where it is an affiliate) notwithstanding that they may not be executed at the best price and shall have no liability to account to the Subfunds in respect of the difference between the price at which the Subfunds execute transactions and any other price that may have been available in the market at that relevant time.

#### **Risks Relating to the CIBM Program**

The Investment Manager, on behalf of the relevant Subfunds, has registered as a qualified institution under the CIBM Program via the interbank bond trade and settlement agent. The Investment Manager, however, may be the applicant acting on behalf of other clients (including other Subfunds) in registering under the CIBM Program.

The relevant PRC regulations may apply to each applicant to the CIBM Program as a whole, and not simply to investments made by one of the Subfunds. Thus investors should be aware that violations of the relevant PRC regulations arising out of activities related to the applicant to the CIBM Program other than with respect to the investments of a Subfund could potentially result in the revocation, suspension, restriction or other regulatory action in respect of the access to the CIBM Program as a whole. Likewise, foreign investment limits, and the regulations relating to the repatriation of capital and profits may potentially be applied in relation to the applicant under the CIBM Program as a whole. Hence the ability of a Subfund to make investments and/or repatriate monies from the CIBM Program may be affected adversely by the investments, performance and/or repatriation of monies invested by other investors through the Investment Manager under the CIBM Program.

Investors should note that there is no guarantee that a Subfund will continue to benefit from the access to the CIBM Program. Should the Investment Manager be restricted from accessing the CIBM Program or retire or be removed, the Subfund may not be able to invest in PRC securities through the CIBM Program, and that Subfund may be required to dispose of its holdings, which would likely have a material adverse effect on that Subfund. A Subfund's investments in the PRC will be limited by its access to the CIBM Program and it is possible that that Subfund may not be able to accept additional subscriptions due to this limitation and would not be able to achieve further economies of scale or otherwise take advantage of the increased capital base.

There can be no assurance that a Subfund will be able to gain access to the CIBM Program to meet all applications for subscription to that Subfund or all proposed investments to be made by the Subfund, or that redemption requests will be processed or investments of that Subfund can be realised in a timely manner, for example due to adverse changes in relevant laws or regulations, including changes in PRC repatriation restrictions. Such restrictions may result in suspension of dealings of a Subfund and could adversely affect an investor's ability to withdraw its investment in that Subfund.

Although at the current stage the Subfunds' investments through the CIBM Program are not subject to any mandatory investment allocation requirement under the relevant PRC regulations (e.g. a minimum percentage of the PRC assets should be invested in a particular type of assets), there can be no guarantee that the PRC regulatory authorities would not provide such requirement on qualified institutions in the future whereby affecting the Subfunds' ability to achieve their investment allocation accordingly.

#### **Tax Risks in the PRC**

The information below is a general summary of the potential Chinese tax consequences of PRC securities transactions under the CIBM Program that may be imposed on the Subfunds and their investors either directly or indirectly and should not be taken as a definitive, authoritative or comprehensive statement of the relevant matter. The Chinese tax authorities may issue guidance on the tax consequences of PRC securities transactions at any time, possibly with retroactive effect; therefore, the Chinese tax consequences of PRC securities transactions may differ materially from those discussed below. Investors should seek their own tax advice on their tax position with regard to their investment in the relevant Subfund.

The Subfunds will be responsible for all PRC taxes and duties of any kind arising in respect of any income or gains derived from investments held on the Subfunds' behalf through the CIBM Program.

PRC tax laws and regulations are under constant development and often subject to change as a result of shifts in government policy. Over recent years, the PRC government has promulgated tax laws and regulations in response to varying economic matters such as foreign investment, commerce, and international trade development. As PRC tax laws and regulations are continually evolving in response to changing economic and other conditions, any particular interpretation of PRC tax laws and regulations (including related enforcement measures) applicable to the Subfunds may not be definitive. With regard to corporate income tax changes

in particular, the PRC has undergone a reform of the Corporate Income Tax Law ("CIT Law") which has unified the CIT Law applicable to domestic enterprises and foreign investment enterprises. The specific manner in which the CIT Law will apply is clarified by the Detailed Implementation Rules of the CIT Law ("DIR") and supplementary tax circulars which may be issued in the future.

Currently there is no specific guidance imposed by the PRC tax authorities on the treatment of income tax and other tax categories payable in respect of trading in PRC interbank bond market by foreign investors. Before further guidance is issued and is well established in the administrative practice of the PRC tax authorities, the practices of the PRC tax authorities that collect PRC taxes with respect to PRC interbank bond transactions may differ from, or be applied in a manner inconsistent with, the practices with respect to the analogous investments described herein or any further guidance that may be issued. The value of the Subfunds' investments in the PRC and the amount of their income and gains could be adversely affected by an increase in tax rates or change in the taxation basis.

#### *CIT*

If a Subfund is considered a tax resident enterprise of the PRC, it will be subject to PRC CIT at 25% on its worldwide taxable income. If a Subfund is considered a non-PRC tax resident enterprise with a permanent establishment or place or establishment ("PE") in the PRC, the profits attributable to that PE will be subject to CIT at 25%.

Under the CIT Law effective from 1 January 2008, a non-PRC tax resident enterprise without a PE in the PRC will generally be subject to withholding income tax of 10% on its PRC sourced income, including but not limited to passive income (e.g. dividends, interest, gains arising from transfer of assets etc).

The Investment Manager intends to manage and operate the relevant Subfund in such a manner that that Subfund should not be treated as tax resident enterprise of the PRC or non-PRC tax resident enterprise with a PE in the PRC for CIT purposes, although due to uncertainty in tax laws and practices in the PRC, this result cannot be guaranteed.

#### *Capital Gains Tax*

##### *Trading of PRC debt securities*

In the absence of specific taxation rule, the tax treatment for investment in these securities is governed by the general taxing provisions of the CIT Law. Under such general taxing provision, it may be possible that a Subfund could be subject to 10% PRC withholding income tax on capital gains derived from trading of PRC debt securities, unless exempt or reduced under relevant double tax treaties.

#### *PRC tax provisions*

The Investment Manager may decide to make provisions for PRC withholding income tax on capital gains derived from the trading of securities through the CIBM Program for the Subfunds from time to time and in such methodology that the Investment Manager may decide in its discretion.

In the event that the Investment Manager considers the tax provisions of a Subfund are not sufficient, it will consider making additional tax provision. In the event that the Investment Manager is satisfied that part of the tax provisions are not required, such provisions will be released back into the relevant Subfund. Any tax provision, if made, will be reflected in the net asset value of the relevant Subfund at the time of debit or release of such provision and thus will impact on Shares which remain in that Subfund at the time of debit or release of such provision. In addition, the Investment Manager may in its discretion make further modification to the tax provision practice of a Subfund with additional clarity on the relevant regulations, and further announcement will be made as appropriate.

If the actual applicable tax levied by PRC tax authorities is greater than that provided for by a Subfund so that there is a shortfall in the tax provision amount, investors should note that the net asset value of that Subfund may suffer more than the tax provision amount as that Subfund will ultimately have to bear the additional tax liabilities. In this case, the then existing and new investors will be disadvantaged.

On the other hand, if the actual applicable tax levied by PRC tax authorities is less than that provided for by a Subfund so that there is an excess in the tax provision amount, investors who have redeemed Shares before PRC tax authorities' ruling, decision or guidance in this respect will be disadvantaged as they would have borne the loss from that Subfund's overprovision. In this case, the then existing and new investors may benefit if the difference between the tax provision and the actual taxation liability can be returned to the account of the Subfund as assets thereof. In addition investors should be aware that under-accrual or over-accrual for PRC tax liabilities may impact on the performance of the Subfunds during the period of such under-accrual or over-accrual and following any subsequent adjustments to the net asset value.

In case of having excess in the tax provision amount (for example, the actual applicable tax levied by PRC tax authorities is less than the tax provision amount or due to a change in provisioning by a Subfund), such excess shall be treated as property of the relevant Subfund and investors who have already transferred or

redeemed their Shares in that Subfund will not be entitled or have any right to claim any part of the amount representing the excess.

#### *Dividends and interest from PRC investments*

The CIT Law provides for a 20% withholding tax on dividends and interest payable to non-PRC tax resident enterprises by a PRC tax resident company. However, in accordance with the DIR for the CIT Law, the withholding tax on dividends and interest has been set at 10%. By virtue of the above, income from dividends and interest from PRC tax resident company (e.g. through equity or bond investments) received on behalf of a Subfund is generally subject to Chinese withholding income tax at a rate of 10% unless being otherwise reduced or exempted by an applicable tax treaty. The withholding is in general made by the relevant PRC tax resident company and the Subfunds currently do not make provisions in respect of PRC withholding income tax on dividends and interest received from PRC tax resident company. In the event the relevant PRC tax resident company failed to withhold the relevant PRC withholding income tax or otherwise failed to pay the relevant withholding income tax to the PRC tax authorities, the relevant PRC tax authorities may impose tax obligations on the relevant Subfund.

Interest derived from government bonds issued by the in-charge Finance Bureau of the State Council and/or local government bonds approved by the State Council is exempt from PRC CIT under the CIT Law.

#### *Value Added Tax ("VAT") and other surtaxes*

On 23 March 2016, the Ministry of Finance ("MOF") and the State Administration of Taxation ("SAT") issued the Circular of Full Implementation of Business Tax to VAT Reform (Caishui [2016] No. 36, "Circular 36") which provides that business tax will be completely replaced by VAT from 1 May 2016. Since then, the income derived from the provision of financial services which previously attracted business tax will be subject to VAT. On 29 April 2016, the MOF and the SAT issued the Circular on Further Specifying the Policies relating to Financial Sector under the Full Implementation of Business Tax to VAT Reform (Caishui [2016] No. 46, "Circular 46"). According to Circular 36 and Circular 46, interests on policy-oriented financial bonds (which are bonds issued by a development or policy-oriented financial institution) received by financial institutions are exempt from VAT. However, it is unclear whether interest derived from the securities traded on CIBM platform will all be exempt from VAT. This is subject to the further clarity by the relevant authority.

The Investment Manager may decide to make provisions for PRC VAT and other surtaxes on interest derived from the securities traded on CIBM platform for the Subfunds from time to time and in such methodology that the Investment Manager may decide in its discretion.

#### *Stamp duty*

No PRC Stamp Duty is expected to be imposed on non-tax resident holders of government and corporate bonds, either upon issuance or upon a subsequent transfer of such bonds.

#### **Investments in Private Equity**

A number of Subfunds may invest a small proportion of their net assets in private equity. Investments with private equity characteristics typically involve uncertainties that cannot be compared to those arising in the case of other types of investments. In many cases, private equity investments involve companies that have been in existence for only a short time and which intend to establish themselves in an existing market or occupy new business areas. The business concepts behind these companies are usually based on new, innovative products or processes.

Consequently, the process of forecasting the performance of such companies, their business concepts and potential sales, is often fraught with uncertainty.

The market risks for private equity are partly dependent on the IPO market. The IPO market constitutes a key instrument for exiting from/selling a private equity investment. A reduced level of activity on the IPO market may have an adverse, overall influence on the implementation of exit strategies.

In view of the different timing of the information provided to individual Subfunds on the part of individual private equity vehicles/companies, it may be the case that from time to time the Net Asset Value per Share of these Subfunds does not correspond with the actual overall value of the investments. Consequently, there may be a degree of delay in terms of incorporating information that affects the valuation of a private equity investment within the daily valuation of the Company's assets. The same applies to the information contained in the annual and semi-annual report.

#### **Hedged Share Class Risk**

The hedging strategy applied to hedged Share Classes may vary from one Subfund to another. Each Subfund will apply a hedging strategy which aims to reduce currency risk between the Reference Currency of the respective Subfund and the nominal currency of the hedged Share Class while taking various practical considerations into account. The hedging strategy aims to reduce, but may not totally eliminate, currency exposure.

Investors should note that there is no segregation of liabilities between the individual Share Classes within a Subfund. Hence, there is a risk that under certain circumstances, hedging transactions in relation to a hedged Share Class could result in liabilities affecting the Net Asset Value of the other Share Classes of the same Subfund. In such case assets of other Share Classes of such Subfund may be used to cover the liabilities incurred by the hedged Share Class.

#### Clearing and Settlement Procedures

Different markets also have different clearing and settlement procedures. Delays in settlement may result in a portion of the assets of a Subfund remaining temporarily uninvested and no return is earned thereon. The inability of the Company to make intended security purchases due to settlement problems could cause a Subfund to miss attractive investment opportunities. The inability to dispose of portfolio securities due to settlement problems could result either in losses to a Subfund due to subsequent declines in value of the portfolio security or, if a Subfund has entered into a contract to sell the security, could result in possible liability to the purchaser.

#### Investment Countries

The issuers of fixed income securities and the companies, the shares of which are purchased, are generally subject to different accounting, auditing and financial reporting standards in the different countries of the world. The volume of trading, volatility of prices and liquidity of issuers may vary from one market or country to another. In addition, the level of government supervision and regulation of securities exchanges, securities dealers and listed and unlisted companies is different throughout the world. The laws and regulations of some countries may restrict the Company's ability to invest in securities of certain issuers located in those countries.

#### Concentration on certain Countries/Regions

Where a Subfund restricts itself to investing in securities of issuers located in a particular country or countries, such concentration will expose the Subfund to the risk of adverse social, political or economic events which may occur in that country or countries.

The risk increases if the country in question is an emerging market. Investments in these Subfunds are exposed to the risks which have been described; these may be exacerbated by the special factors pertaining to this emerging market.

#### Investments in Emerging Countries

Investors should note that certain Subfunds may invest in less developed or emerging markets. Investing in emerging markets may carry a higher risk than investing in developed markets.

The securities markets of less developed or emerging markets are generally smaller, less developed, less liquid and more volatile than the securities markets of developed markets. In addition, there may be a higher than usual risk of political, economic, social and religious instability and adverse changes in government regulations and laws in less developed or emerging markets, which could affect the investments in those countries. The assets of Subfunds investing in such markets, as well as the income derived from the Subfund, may also be effected unfavourably by fluctuations in currency rates and exchange control and tax regulations and consequently the Net Asset Value of Shares of these Subfunds may be subject to significant volatility. Also, there might be restrictions on the repatriation of the capital invested.

Some of these markets may not be subject to accounting, auditing and financial reporting standards and practices comparable to those of more developed countries and the securities markets of such markets may be subject to unexpected closure. In addition, there may be less government supervision, legal regulation and less well-defined tax laws and procedures than in countries with more developed securities markets.

Moreover, settlement systems in emerging markets may be less well-organized than in developed markets. Thus, there may be a risk that settlement may be delayed and that cash or securities of the concerned Subfunds may be in jeopardy because of failures or of defects in the systems. In particular, market practice may require that payment shall be made prior to receipt of the security which is being purchased or that delivery of a security must be made before payment is received. In such cases, default by a broker or bank through whom the relevant transaction is effected might result in a loss being suffered by the Subfunds investing in emerging market securities.

It must also be borne in mind that companies are selected regardless of their market capitalization (micro, small, mid, large caps), sector or geographical location. This may lead to a concentration in geographical or sector terms.

Subscriptions in the relevant Subfunds are thus only suitable for investors who are fully aware of, and able to bear, the risks related to this type of investment.

#### Industry/Sector Risk

The Subfunds may invest in specific industries or sectors or a group of related industries. These industries or sectors may, however, be affected by market or

economic factors, which could have a major effect on the value of the Subfunds' investments.

#### Securities Lending

Securities lending transactions involve counterparty risk, including the risk that the lent securities may not be returned or returned in a timely manner, thereby restricting the ability of the Subfund to meet delivery obligations under security sales. Should the borrower of securities fail to return the securities lent by a Subfund, there is a risk that the collateral received may be realized at a lower value than the securities lent, whether due to inaccurate pricing of the collateral, adverse market movements, decrease in the credit rating of the issuer of the collateral or the illiquidity of the market in which the collateral is traded which could adversely impact the performance of the Subfund.

The affiliate of Credit Suisse Group which acts as securities lending principal on behalf of the Subfunds, acts as the exclusive principal borrower and counterparty for securities lending transactions.

It may engage in activities that might result in conflicts of interests with adverse effect on the performance of the Subfund. In such circumstances, Credit Suisse AG and Credit Suisse (Schweiz) AG have undertaken to use their reasonable endeavours to resolve any such conflicts of interest fairly (having regard to its or his respective obligations and duties) and to ensure that the interests of the Company and the Shareholders are not unfairly prejudiced.

#### Total Return Swaps

A TRS is an OTC derivative contract in which the total return payer transfers the total economic performance, including income from interest and fees, gains and losses from price movements, and credit losses, of a reference obligation to the total return receiver. In exchange, the total return receiver either makes an upfront payment to the total return payer, or makes periodic payments based on set rate which can be either fixed or variable. A TRS thus typically involves a combination of market risk and interest rate risk, as well as counterparty risk.

In addition, due to the periodic settlement of outstanding amounts and/or periodic margin calls under the relevant contractual agreements, a counterparty may, under unusual market circumstances, have insufficient funds available to pay the amounts due. Moreover, each TRS is a bespoke transaction among others with respect to its reference obligation, duration, and contractual terms, including frequency and conditions for settlement. Such lack of standardisation may adversely affect the price or conditions under which a TRS can be sold, liquidated or closed out. Any TRS therefore involves certain degree of liquidity risk.

Finally, as any OTC derivative, a TRS is a bilateral agreement which involves a counterparty which may, for any reason, not be in a position to fulfil its obligations under the TRS. Each party to the TRS is therefore exposed to counterparty risk and, if the agreement includes the use of collaterals, to the risks related to collateral management.

Investors are invited to consider the relevant risk warnings on Market Risk, Interest Rate Risk, Liquidity Risk, Counterparty Risk and Collateral Management set out in this Chapter.

#### Collateral Management

Where the Management Company on behalf of the Company enters into OTC financial derivative and/or efficient portfolio management techniques, collateral may be used to reduce counterparty risk exposure. Collateral will be treated in accordance with the Company's collateral policy as set out in Chapter 19, "Regulatory Disclosures".

The exchange of collateral involves certain risks, including operational risk related to the actual exchange, transfer and booking of collateral. Collateral received under a title transfer arrangement will be held by the Depositary Bank in accordance with the usual terms and provisions of the Depositary Agreement. For other types of collateral arrangement, the collateral can be held by a third party custodian which is subject to prudential supervision, and which is unrelated to the provider of the collateral. The use of such third party custodians may involve additional operational and clearing and settlement risk, as well as counterparty risk.

Collateral received will consist of either cash or transferable securities that meet the criteria set out in the Company's collateral policy. Transferable securities received as collateral are subject to market risk. The Management Company aims to manage this risk by applying appropriate haircuts, valuing collateral on a daily basis, and accepting only high quality collateral. However, some residual market risk must be expected to remain.

Non-cash collateral must be highly liquid and traded on a regulated market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to pre-sale valuation. However, in adverse market circumstances, the market for certain types of transferable securities may be illiquid and, in extreme cases, may cease to exist. Any non-cash collateral therefore involves a certain degree of liquidity risk.

Any collateral received will not be sold, re-invested or pledged. Accordingly, no risk is expected to arise from the reuse of collateral.

Risks linked to the management of collateral will be identified, managed and mitigated in accordance with the Management Company's risk management process concerning the Company. Investors are invited to consider the relevant risk warnings on Market Risk, Counterparty Risk, Liquidity Risk and Clearing and Settlement Procedures set out in this Chapter.

### Legal, Regulatory, Political and Tax Risk

The Management Company and the Company must at all times comply with applicable laws and regulations in each of the various jurisdictions where it is active, or where the Company makes its investments or holds its assets. Legal or regulatory constraints or changes to applicable laws and regulations may affect the Management Company or the Company, as well as the assets and liabilities of any of its Subfunds and may require a change in the investment objectives and policy of a Subfund. Substantive changes in applicable laws and regulations may make the investment objectives and policy of a Subfund more difficult or even impossible to achieve or implement, which may prompt the Management Company to take appropriate action, which may include the discontinuation of a Subfund.

The assets and liabilities of a Subfund, including but not limited to the financial derivative instruments used by the Management Company to implement that Subfund's investment objectives and policy may also be subject to change in laws or regulations and/or regulatory action which may affect their value or enforceability. In the implementation of a Subfund's investment objectives and policy, the Management Company may have to rely on complex legal agreements, including but not limited to master agreements for financial derivatives agreements, confirmations and collateral arrangements and securities lending agreements. Such agreements may be drawn up by industry bodies established outside of the Grand Duchy of Luxembourg and subject to foreign laws, which may imply an additional element of legal risk. Whilst the Management Company will ensure that it receives appropriate advice from reputable legal counsel, it cannot be excluded that such complex legal agreements, whether governed by domestic or foreign laws, may be held unenforceable by a competent court due to legal or regulatory developments or for any other reason.

Recently, the global economic environment has been characterised by an increase in political risk in both developed and developing countries. The performance of the Subfunds or an investor's possibility to purchase, sell or redeem Shares may be adversely affected by changes in general economic conditions and uncertainties caused by political developments such as the results of popular votes or referenda, changes in economic policy, the rescinding of free trade agreements, adverse developments in diplomatic relations, increased military tension, changes in government agencies or policies, the imposition of restrictions on the transfer of capital and changes in the industrial and financial outlook in general.

Changes in tax laws or fiscal policy in any country where the Management Company or the Company is active, or where a Subfund is invested or holds assets, may adversely affect the performance of a Subfund or any of its Share Classes. Investors are invited to consider the relevant risk warning on Taxation, and to consult with their professional advisers to assess their individual tax position.

### Taxation

The proceeds from the sale of securities in some markets or the receipt of any dividends and other income may be or may become subject to tax, levies, duties or other fees or charges imposed by the authorities in that market, including taxation levied by withholding at source.

It is possible that the tax law (and/or the current interpretation of the law) as well as the practice in countries, into which the Subfunds invest or may invest in the future, might change. As a result, the Company could become subject to additional taxation in such countries that is not anticipated either at the date of this Prospectus or when investments are made, valued or disposed of.

### FATCA

The Company may be subject to regulations imposed by foreign regulators, in particular the Foreign Account Tax Compliance provisions of the Hiring Incentives to Restore Employment Act (commonly known as "FATCA"). FATCA provisions generally impose a reporting to the U.S. Internal Revenue Service of non-U.S. financial institutions that do not comply with FATCA and U.S. persons' (within the meaning of FATCA) direct and indirect ownership of non-U.S. accounts and non-U.S. entities. Failure to provide the requested information will lead to a 30% withholding tax applying to certain U.S. source income (including dividends and interest) and gross proceeds from the sale or other disposal of property that can produce U.S. source interest or dividends.

Under the terms of FATCA, the Company will be treated as a Foreign Financial Institution (within the meaning of FATCA). As such, the Company may require all investors to provide documentary evidence of their tax residence and all other information deemed necessary to comply with the above mentioned regulations.

Should the Company become subject to a withholding tax as a result of FATCA, the value of the Shares held by all Shareholders may be materially affected.

The Company and/or its Shareholders may also be indirectly affected by the fact that a non U.S. financial entity does not comply with FATCA regulations even if the Company satisfies with its own FATCA obligations.

Despite anything else herein contained, the Company shall have the right to:

- withhold any taxes or similar charges that it is legally required to withhold by applicable laws and regulations in respect of any shareholding in the Company;
- require any Shareholder or beneficial owner of the Shares to promptly furnish such personal data as may be required by the Company in its discretion in order to comply with applicable laws and regulations and/or to promptly determine the amount of withholding to be retained;
- divulge any such personal information to any tax authority, as may be required by applicable laws or regulations or requested by such authority; and
- delay payments of any dividend or redemption proceeds to a Shareholder until the Company holds sufficient information to comply with applicable laws and regulations or determine the correct amount to be withheld.

### Common Reporting Standard

The Company may be subject to the Standard for Automatic Exchange of Financial Account Information in Tax matters (the "Standard") and its Common Reporting Standard (the "CRS") as set out in the Luxembourg law dated 18 December 2015 implementing Council Directive 2014/107/EU of 9 December 2014 as regards mandatory automatic exchange of information in the field of taxation (the "CRS Law").

Under the terms of the CRS Law, the Company is to be treated as a Luxembourg Reporting Financial Institution. As such, as of 30 June 2017 and without prejudice to other applicable data protection provisions, the Company will be required to annually report to the Luxembourg tax authority personal and financial information related, inter alia, to the identification of, holdings by and payments made to (i) certain shareholders as per the CRS Law (the "Reportable Persons") and (ii) Controlling Persons of certain non-financial entities ("NFEs") which are themselves Reportable Persons. This information, as exhaustively set out in Annex I of the CRS Law (the "Information"), will include personal data related to the Reportable Persons.

The Company's ability to satisfy its reporting obligations under the CRS Law will depend on each Shareholder providing the Company with the Information, along with the required supporting documentary evidence. In this context, the Shareholders are hereby informed that, as data controller, the Company will process the Information for the purposes as set out in the CRS Law. The Shareholders undertake to inform their Controlling Persons, if applicable, of the processing of their Information by the Company.

The term "Controlling Person" means in the present context any natural persons who exercise control over an entity. In the case of a trust it means the settlor(s), the trustee(s), the protector(s) (if any), the beneficiary(ies) or class(es) of beneficiaries, and any other natural person(s) exercising ultimate effective control over the trust, and in the case of a legal arrangement other than a trust, persons in equivalent or similar positions. The term "Controlling Persons" must be interpreted in a manner consistent with the Financial Action Task Force Recommendations.

The Shareholders are further informed that the Information related to Reportable Persons within the meaning of the CRS Law will be disclosed to the Luxembourg tax authority annually for the purposes set out in the CRS Law. In particular, Reportable Persons are informed that certain operations performed by them will be reported to them through the issuance of statements, and that part of this information will serve as a basis for the annual disclosure to the Luxembourg tax authority.

Similarly, the Shareholders undertake to inform the Company within thirty (30) days of receipt of these statements should any included personal data be not accurate. The Shareholders further undertake to immediately inform the Company of, and provide the Company with all supporting documentary evidence of any changes related to the Information after occurrence of such changes.

Any Shareholder that fails to comply with the Company's Information or documentation requests may be held liable for penalties imposed on the Company and attributable to such shareholder's failure to provide the Information.

### Sanctions

Certain countries or designated persons or entities may, from time to time, be subject to sanctions and other restrictive measures imposed by states or supranational authorities (for example, but not limited to, the European Union or the United Nations), or their agencies (collectively, "Sanctions").

Sanctions may be imposed among others on foreign governments, state-owned enterprises, sovereign wealth funds, specified companies or economic sectors, as well as non-state actors or designated persons associated with any of the foregoing. Sanctions may take different forms, including but not limited to trade embargoes, prohibitions or restrictions to conduct trade or provide services to targeted countries or entities, as well as seizures, asset freezes and/or the

prohibition to provide or receive funds, goods or services to or from designated persons.

Sanctions may adversely affect companies or economic sectors in which the Company, or any of its Subfunds, may from time to time invest. The Company could experience, among others, a decrease in value of securities of any issuer due to the imposition of Sanctions, whether directed towards such issuer, an economic sector in which such issuer is active, other companies or entities with which such issuer conducts business, or towards the financial system of a certain country. Because of Sanctions, the Company may be forced to sell certain securities at unattractive prices, at inopportune moments and/or in unfavourable circumstances where it may not have done so in the absence of Sanctions. Even though the Company will make reasonable efforts, acting in the best interest of the investors, to sell such securities under optimal conditions, such forced sales could potentially result in losses for the Subfunds concerned. Depending on the circumstances, such losses could be considerable. The Company may also experience adverse consequences due to an asset freeze or other restrictive measures directed at other companies, including but not limited to any entity that serves as a counterparty to derivatives, or as a sub-custodian, paying agent or other service provider to the Company or any of its Subfunds. The imposition of Sanctions may require the Company to sell securities, terminate ongoing agreements, lose access to certain markets or essential market infrastructure, cause some or all of a Subfund's assets to become unavailable, freeze cash or other assets belonging to the Company and/or adversely affect the cash flows associated with any investment or transaction.

The Company, the Management Company, the Depository Bank, the Investment Manager and any other members from the Credit Suisse Group (collectively, the "Fund Parties") are required to comply with all applicable sanctions laws and regulations in the countries in which the Fund Parties conduct business (recognizing that certain of the sanctions regimes have implications for cross-border or foreign activities) and will implement the necessary policies and procedures to this effect (collectively, "Sanctions Policies"). The Shareholders should note that these Sanctions Policies will be developed by the Fund Parties in their discretion and best judgment and may involve protective or preventive measures that go beyond the strict requirements of applicable laws and regulations imposing any Sanctions which may further negatively impact the investments of the Company.

## 8. Net Asset Value

Unless otherwise specified in Chapter 23, "Subfunds", the Net Asset Value of the Shares of each Subfund shall be calculated in the Reference Currency of the respective Subfund and shall be determined under the responsibility of the Company's Board of Directors in Luxembourg on each Banking Day on which banks are open all day for business in Luxembourg (each such day being referred to as a "Valuation Day").

In case the Valuation Day is not a full Banking Day in Luxembourg, the Net Asset Value of that Valuation Day will be calculated on the next following Banking Day. If a Valuation Day falls on a day which is a holiday in countries whose stock exchanges or other markets are decisive for valuing the majority of a Subfund's assets, the Company may decide, by way of exception, that the Net Asset Value of the Shares in this Subfund will not be determined on such days. For determining the Net Asset Value, the assets and liabilities of the Company shall be allocated to the Subfunds (and to the individual Share Classes within each Subfund), the calculation is carried out by dividing the Net Asset Value of the Subfund by the total number of Shares outstanding for the relevant Subfund or the relevant Share Class. If the Subfund in question has more than one Share Class, that portion of the Net Asset Value of the Subfund attributable to the particular Class will be divided by the number of issued Shares of that Class. The Net Asset Value of an Alternate Currency Class shall be calculated first in the Reference Currency of the relevant Subfund. The Net Asset Value of the Alternate Currency Class shall be calculated through conversion at the mid-market rate between the Reference Currency and the Alternate Currency of the relevant Share Class.

The Net Asset Value of the Alternate Currency Class will in particular reflect the costs and expenses incurred for the currency conversion in connection with the subscription, redemption and conversion of Shares in this Class and for hedging the currency risk.

Unless otherwise specified in Chapter 23, "Subfunds", the assets of each Subfund shall be valued as follows:

- a) Securities which are listed or regularly traded on a stock exchange shall be valued at the last available traded price. If such a price is not available for a particular trading day, the closing mid-price (the mean of the closing bid and ask prices) or alternatively the closing bid price may be taken as a basis for the valuation.
- b) If a security is traded on several stock exchanges, the valuation shall be made by reference to the exchange which is the main market for this security.

- c) If a security is traded on a secondary market with regulated trading among securities dealers (with the effect that the price reflects market conditions), the valuation may be based on this secondary market.
- d) Securities traded on a regulated market shall be valued in the same way as those listed on a stock exchange.
- e) Securities that are not listed on a stock exchange and are not traded on a regulated market shall be valued at their last available market price. If no such price is available, the Company shall value these securities in accordance with other criteria to be established by the Board of Directors and on the basis of the probable sales price, the value of which shall be estimated with due care and in good faith.
- f) Derivatives shall be treated in accordance with the above. OTC swap transactions will be valued on a consistent basis based on bid, offer or mid prices as determined in good faith pursuant to procedures established by the Board of Directors. When deciding whether to use the bid, offer or mid-prices, the Board of Directors will take into consideration the anticipated subscription or redemption flows, among other parameters. If, in the opinion of the Board of Directors, such values do not reflect the fair market value of the relevant OTC swap transactions, the value of such OTC swap transactions will be determined in good faith by the Board of Directors or by such other method as it deems in its discretion appropriate.
- g) The valuation price of a money market instrument which has a maturity or remaining term to maturity of less than 12 months and does not have any specific sensitivity to market parameters, including credit risk, shall, based on the net acquisition price or on the price at the time when the investment's remaining term to maturity falls below 12 months, be progressively adjusted to the repayment price while keeping the resulting investment return constant. In the event of a significant change in market conditions, the basis for the valuation of different investments shall be brought into line with the new market yields.
- h) Units or shares of UCITS or other UCIs shall be valued on the basis of their most recently calculated Net Asset Value, where necessary by taking due account of the redemption fee. Where no Net Asset Value and only buy and sell prices are available for units or shares of UCITS or other UCI, the units or shares of such UCITS or other UCIs may be valued at the mean of such buy and sell prices.
- i) Fiduciary and fixed-term deposits shall be valued at their respective nominal value plus accrued interest.

The amounts resulting from such valuations shall be converted into the Reference Currency of each Subfund at the prevailing mid-market rate. Foreign exchange transactions conducted for the purpose of hedging currency risks shall be taken into consideration when carrying out this conversion.

Furthermore, if specific techniques are employed for specific Share Classes for the purpose of hedging or other risk management purposes the profit and loss amounts resulting from such transactions and the related costs shall be allocated solely to such Share Classes.

If a valuation in accordance with the above rules is rendered impossible or incorrect due to particular or changed circumstances, the Company's Board of Directors shall be entitled to use other generally recognized and auditable valuation principles in order to reach a proper valuation of the Subfund's assets and as a measure to prevent the practices relating to market timing.

Investments which are difficult to value (in particular those which are not listed on a secondary market with a regulated price-setting mechanism) are valued on a regular basis using comprehensible, transparent criteria. For the valuation of private equity investments, the Company may use the services of third parties which have appropriate experience and systems in this area. The Company's Board of Directors and the Auditor shall monitor the comprehensibility and transparency of the valuation methods and their application.

The Net Asset Value of a Share shall be rounded up or down, as the case may be, to the next smallest unit of the Reference Currency which is currently used, unless otherwise specified in Chapter 23, "Subfunds".

The Net Asset Value of one or more Subfunds may also be converted into other currencies at the mid-market rate should the Company's Board of Directors decide to effect the issue and redemption of Shares in one or more other currencies. Should the Board of Directors determine such currencies, the Net Asset Value of the respective Shares in these currencies shall be rounded up or down to the next smallest unit of currency.

In exceptional circumstances, further valuations may be carried out on the same day; such valuations will be valid for any applications for subscription and/or redemption subsequently received.

The total Net Asset Value of the Company shall be calculated in CHF.

### Adjustment of the Net Asset Value (Single Swing Pricing)

In order to protect existing Shareholders and subject to the conditions set out in Chapter 23, "Subfunds", the Net Asset Value per Share Class of a Subfund may be adjusted upwards or downwards by a maximum percentage ("swing factor")

indicated in Chapter 23, "Subfunds", in the event of a net surplus of subscription or redemption applications on a particular Valuation Day. In such case the same Net Asset Value applies to all incoming and outgoing investors on that particular Valuation Day.

The adjustment of the Net Asset Value aims to cover in particular but not exclusively transaction costs, tax charges and bid/offer spreads incurred by the respective Subfund due to subscriptions, redemptions and/or conversions in and out of the Subfund. Existing Shareholders would no longer have to indirectly bear these costs, since they are directly integrated into the calculation of the Net Asset Value and hence, are borne by incoming and outgoing investors.

The Net Asset Value may be adjusted on every Valuation Day on a net deal basis. The Board of Directors can set a threshold (net capital flows that needs to be exceeded) to apply the adjustment to the Net Asset Value. Shareholders should note that the performance calculated on the basis of the adjusted Net Asset Value might not reflect the true portfolio performance as a consequence of the adjustment of the Net Asset Value.

## 9. Expenses and Taxes

### i. Taxes

The following summary is based on the laws and practices that are currently applicable in the Grand Duchy of Luxembourg, as may be amended from time to time.

Unless otherwise specified in Chapter 23, "Subfunds", the Company's assets are subject to a subscription tax ("*taxe d'abonnement*") in the Grand Duchy of Luxembourg of 0.05% p.a., payable quarterly. In the case of Share Classes that may only be acquired by institutional investors (pursuant to Article 174 [2] c) of the Law of December 17, 2010), this tax rate is 0.01% p.a. The Net Asset Value of each Subfund at the end of each quarter is taken as the basis for calculation.

The Company is not subject to corporate income tax, municipal business tax and net wealth tax in Luxembourg.

Dividends, interest, income and gains received by the Company on its investments may be subject to non-recoverable withholding tax or other taxes in the countries of origin.

According to the legislation currently in force in Luxembourg, Shareholders are not required to pay any income, gift, inheritance or other taxes in Luxembourg unless they are resident or domiciled in Luxembourg or maintain a permanent establishment there.

The tax consequences will vary for each investor in accordance with the laws and practices currently in force in a Shareholder's country of citizenship, residence or temporary domicile, and in accordance with his or her personal circumstances.

Investors should therefore ensure they are fully informed in this respect and should, if necessary, consult their own financial advisers.

### ii. Expenses

Apart from the above-mentioned "*taxe d'abonnement*", the Company shall bear the costs specified below, unless otherwise specified in Chapter 23, "Subfunds":

- a) All taxes which may be payable on the assets, income and expenses chargeable to the Company;
- b) All costs of buying and selling securities and other assets including inter alia standard brokerage, clearing account maintenance fees, fees charged by clearing platforms and bank charges;
- c) A monthly management fee for the Management Company, payable at the end of each month, based on the average daily Net Asset Values of the relevant Share Classes during that month. The management fee may be charged at different rates for individual Subfunds and Share Classes within a Subfund or may be waived in full. Charges incurred by the Management Company in relation to the provision of investment management shall be paid out of the management fee. Further details of the management fees are included in Chapter 2, "Summary of Share Classes";
- d) Fees payable to the Depository Bank, which are charged at rates agreed from time to time with the Company on the basis of usual market rates prevailing in Luxembourg, and which are based on the net assets of the respective Subfund or the value of transferable securities and other assets held or determined as a fixed sum; the fees payable to the Depository Bank may not exceed 0.10% p.a. although in certain cases the transaction fees and the fees of the Depository Bank's correspondents may be charged additionally;
- e) An annual FX hedging fee of up to 0.10% p.a. payable to the FX Hedging Agent is charged to the Alternate Currency Classes of the Subfunds, as set out in Chapter 2, "Summary of Share Classes" and Chapter 5, "Investment in CS Investment Funds 3". The FX hedging fee is calculated on a pro rata temporis basis on the basis of the average net assets of the relevant Alternate Currency Class upon calculation of its net asset value. Margins / spreads charged by the FX counterparties are not covered by the FX hedging fee.

- f) Fees payable to the Paying Agents (in particular, a coupon payment commission), transfer agents and the authorized representatives in the countries of registration;
- g) All other charges incurred for sales activities and other services rendered to the Company but not mentioned in the present section; for certain Share Classes these fees may be borne in full or in part by the Management Company;
- h) Fees incurred for collateral management in relation to derivative transactions;
- i) Expenses, including those for legal advice, which may be incurred by the Company or the Depository Bank as a result of measures taken on behalf of the Shareholders;
- j) The cost of preparing, depositing and publishing the Articles of Incorporation and other documents in respect of the Company, including notifications for registration, Key Investor Information Documents, prospectuses or memoranda for all government authorities and stock exchanges (including local securities dealers' associations) which are required in connection with the Company or with offering the Shares; the cost of printing and distributing annual and semi-annual reports for the Shareholders in all required languages, together with the cost of printing and distributing all other reports and documents which are required by the relevant legislation or regulations of the above-mentioned authorities; any licence fees payable to index providers; any fees payable to providers of risk management systems or providers of data for those risk management systems being used by the Management Company for the purpose of fulfilling regulatory requirements; the cost of book-keeping and calculating the daily Net Asset Value which may not exceed 0.10% p.a., the cost of notifications to Shareholders including the publication of prices for the Shareholders, the fees and costs of the Company's auditors and legal advisers and all other similar administrative expenses, and other expenses directly incurred in connection with the offer and sale of Shares, including the cost of printing copies of the aforementioned documents or reports as are used in marketing the Company's Shares. The cost of advertising may also be charged.

### iii. Performance Fee

In addition to the aforementioned costs, the Company bears any performance-related fees ("**Performance Fee**") if specified for the respective Subfund in Chapter 2, "Summary of Share Classes" and Chapter 23, "Subfunds".

### General Information

All recurring fees shall first be deducted from investment income, then from the gains from securities transactions and then from the Company's assets. Other non-recurring fees, such as the costs for establishing the Company and (new) Subfunds or Share Classes, may be written off over a period of up to five years.

The costs attributable to the individual Subfunds shall be allocated directly to them. Otherwise the costs shall be allocated among the individual Subfunds in proportion to the Net Asset Value of each Subfund.

## 10. Accounting Year

The accounting year ends on 30 September of each year.

## 11. Appropriation of Net Income and Capital Gains Accumulating Shares

At present, no distribution is envisaged for accumulating Share Classes of the Subfunds (see Chapter 5, "Investment in CS Investment Funds 3") and the income generated shall be used to increase the Net Asset Value of the Shares after deduction of general costs. However, within the scope of statutory provisions the Company may distribute from time to time, in whole or in part, ordinary net income and/or realized capital gains as well as all non-recurring income, after deduction of realized capital losses.

### Distribution Shares

The Board of Directors is entitled to determine the payment of dividends and decides to what extent distributions are to be made from the net investment income attributable to each distributing Share Class of the Subfund in question (see Chapter 5, "Investment in CS Investment Funds 3"). In addition, gains made on the sale of assets belonging to the Subfund may be distributed to investors. Further distributions may be made from the Subfund's assets in order to achieve an appropriate distribution ratio.

Distributions may be declared on an annual basis or at any intervals to be specified by the Board of Directors, unless otherwise specified in Chapter 23, "Subfunds". Appropriation of the annual result as well as other distributions are proposed by the Board of Directors to the Annual General Meeting (as described below) and are determined by the latter.

Distributions may on no account cause the Company's capital to fall below the minimum amount prescribed by law.

**General Information**

Payment of income distributions shall be made in the manner described in Chapter 5 iii, "Redemption of Shares".

Claims for distributions which are not made within five years shall lapse and the assets involved shall revert to the respective Subfund.

**12. Lifetime, Liquidation and Merger**

The Company and the Subfunds have been established for an unlimited period, unless otherwise specified in Chapter 23, "Subfunds".

However, an extraordinary General Meeting of Shareholders may dissolve the Company. To be valid, such a resolution shall require the minimum quorum prescribed by law.

If the Company is liquidated, the liquidation shall be effected in accordance with Luxembourg law, the liquidator(s) named by the General Meeting of Shareholders shall dispose of the Company's assets in the best interests of the Shareholders and the net liquidation proceeds of the Subfunds shall be distributed pro rata to the Shareholders of these Subfunds. A Subfund may be liquidated and Shares in the Subfund concerned may be subject to compulsory redemption based on:

- a resolution passed by the Company's Board of Directors, as the Subfund may no longer be appropriately managed within the interests of the Shareholders; or
- a resolution passed by the General Meeting of Shareholders of the Subfund in question.

Any resolution passed by the Company's Board of Directors to dissolve a Subfund shall be published in accordance with Chapter 14, "Information for Shareholders". The Net Asset Value of the Shares of the relevant Subfund will be paid out on the date of the mandatory redemption of the Shares.

Any liquidation and redemption proceeds that cannot be distributed to the Shareholders at the closure of the liquidation shall be deposited with the "Caisse de Consignation" in Luxembourg until the statutory period of limitation has elapsed. In accordance with the definitions and conditions set out in the Law of December 17, 2010, any Subfund may, either as a merging Subfund or as a receiving Subfund, be subject to mergers with another Subfund of the Company or another UCITS, on a domestic or cross-border basis. The Company itself may also, either as a merging UCITS or as a receiving UCITS be subject to cross-border and domestic mergers.

Furthermore, a Subfund may as a receiving Subfund be subject to mergers with another UCI or subfund thereof, on a domestic or cross border basis.

In all cases, the Board of Directors of the Company will be competent to decide on the merger. Insofar as a merger requires the approval of the Shareholders pursuant to the provisions of the Law of December 17, 2010, the meeting of Shareholders deciding by simple majority of the votes cast by Shareholders present or represented at the meeting is competent to approve the effective date of such a merger. No quorum requirement will be applicable. Only the approval of the Shareholders of the Subfunds concerned by the merger will be required.

Mergers shall be announced at least thirty days in advance in order to enable Shareholders to request the redemption or conversion of their shares.

**13. General Meetings**

The Annual General Meeting ("AGM") of Shareholders is held in Luxembourg on the third Thursday of February of each year at 10 a.m. (Central European Time). If this date is not a Banking Day in Luxembourg, the AGM will take place on the next Banking Day.

Generally, notices of all general meetings will be sent to the holders of registered Shares by registered mail at least eight calendar days prior to the meeting at their addresses shown in the register of Shareholders. Meetings of the Shareholders of a particular Subfund may only pass resolutions relating to that Subfund.

**14. Information for Shareholders**

Information about the launch of new Subfunds may be obtained from the Company and the Distributors. The audited annual reports shall be made available to Shareholders free of charge at the registered office of the Company, at the Paying Agents, Information Agents and Distributors, within four months after the close of each accounting year. Unaudited semi-annual reports shall be made available in the same way within two months of the end of the accounting period to which they refer.

Other information regarding the Company, as well as the issue and redemption prices of the Shares may be obtained on any Banking Day at the Company's registered office.

All notices to Shareholders, including any information relating to a suspension of the calculation of the Net Asset Value, shall be announced online at [www.credit-suisse.com](http://www.credit-suisse.com) and, if required, be published in the *RESA* and/or in various newspapers.

The Net Asset Value shall be published daily on the Internet at [www.credit-suisse.com](http://www.credit-suisse.com) and may be published in various newspapers.

Investors may obtain the Prospectus, the Key Investor Information Document, the latest annual and semi-annual reports and copies of the Articles of Incorporation free of charge from the registered office of the Company and at [www.credit-suisse.com](http://www.credit-suisse.com).

The relevant contractual agreements as well as the Management Company's articles of incorporation are available for inspection at the Company's registered offices during normal business hours.

**15. Management Company**

The Company has designated Credit Suisse Fund Management S.A. to act as its Management Company. Credit Suisse Fund Management S.A. was incorporated in Luxembourg as CSAM Invest Management Company on 9 December 1999 as a joint-stock company for an indefinite period and is registered at the Luxembourg Trade and Companies Register under no. B 72 925. The Management Company has its registered office in Luxembourg, at 5, rue Jean Monnet. Its capital, on the date of this prospectus, is CHF 250.000. The share capital of the Management Company is held by Credit Suisse Asset Management & Investor Services (Schweiz) Holding AG which is an affiliate of Credit Suisse Group.

The Management Company is subject to the provisions of Chapter 15 of the Law of December 17, 2010 and also manages other undertakings for collective investment.

**16. Investment Manager and Sub-Investment Manager**

The Company's Board of Directors is responsible for investing the Subfunds' assets. The Board of Directors has appointed the Management Company to implement the Subfunds' investment policy on a day-to-day basis.

In order to implement the policy of each Subfund, the Management Company may delegate, under its permanent supervision and responsibility, the management of the assets of the Subfunds to one or more Investment Managers.

Pursuant to the Investment Management Agreement, the Investment Manager has discretion, on a day-to-day basis and subject to the overall control and ultimate responsibility of the Management Company, to purchase and sell securities and otherwise to manage the relevant Subfund's portfolios.

The Investment Manager may appoint in accordance with the investment management agreement entered into between the Investment Manager and the Management Company one or more Sub-Investment Managers for each Subfund to assist it in the management of the individual portfolios. The Investment Manager and Sub-Investment Manager/s for the respective Subfunds are indicated in Chapter 23, "Subfunds". The Management Company may at any time appoint an Investment Manager other than the one/s named in Chapter 23, "Subfunds", or may terminate the relation with any of the Investment Manager/s. The investors of such Subfund will be informed and the Prospectus will be modified accordingly.

**17. Depositary Bank**

Pursuant to a depositary and paying agent services agreement (the "Depositary Agreement"), Credit Suisse (Luxembourg) S.A. has been appointed as depositary bank of the Company (the "Depositary Bank"). The Depositary Bank will also provide paying agent services to the Company.

Credit Suisse (Luxembourg) S.A. is a public limited company (société anonyme) under the laws of Luxembourg incorporated for an unlimited duration. Its registered and administrative offices are at 5, rue Jean Monnet, L-2180 Luxembourg, Grand Duchy of Luxembourg. It is licensed to engage in all banking operations under Luxembourg law.

The Depositary Bank has been appointed for the safe-keeping of the assets of the Company in the form of custody of financial instruments, the record keeping and verification of ownership of other assets of the Company as well as for the effective and proper monitoring of the Company's cash flows in accordance with the provisions of the Law of 17 December 2010 and the Depositary Agreement.

In addition, the Depositary Bank shall also ensure that (i) the sale, issue, repurchase, redemption and cancellation of Shares are carried out in accordance with Luxembourg law and the Articles of Incorporation; (ii) the value of the Shares is calculated in accordance with Luxembourg law and the Articles of Incorporation; (iii) the instructions of the Management Company or the Company are carried out, unless they conflict with applicable Luxembourg law and/or the Articles of Incorporation; (iv) in transactions involving the Company's assets any consideration is remitted to the Company within the usual time limits; and (v) the Company's incomes are applied in accordance with Luxembourg law and the Articles of Incorporation.

In compliance with the provisions of the Depositary Agreement and the Law of 17 December 2010, the Depositary Bank may, subject to certain conditions and in order to effectively conduct its duties, delegate part or all of its safe-keeping duties in relation to financial instruments that can be held in custody and that are duly entrusted to the Depositary Bank for custody purposes to one or more sub-custodian(s), and/or in relation to other assets of the Company all or part of its duties regarding the record keeping and verification of ownership to other delegates, as they are appointed by the Depositary Bank from time to time. The

Depository Bank shall exercise all due skill, care and diligence as required by the Law of 17 December 2010 in the selection and the appointment of any sub-custodian and/or other delegate to whom it intends to delegate parts of its tasks and has to continue to exercise all due skill, care and diligence in the periodic review and ongoing monitoring of any sub-custodian and/or other delegate to which it has delegated parts of its tasks as well as of the arrangements of the sub-custodian and/or other delegate in respect of the matters delegated to it. In particular, any delegation of custody tasks may only occur when the sub-custodian, at all times during the performance of the tasks delegated to it, segregates the assets of the Company from the Depository Bank's own assets and from assets belonging to the sub-custodian in accordance with the Law of 17 December 2010. As a matter of principle the Depository Bank does not allow its sub-custodians to make use of delegates for the custody of financial instruments unless further delegation by the sub-custodian has been agreed by the Depository Bank. To the extent, sub-custodians are accordingly entitled to use further delegates for the purpose of holding financial instruments of the Company or Subfunds that can be held in custody, the Depository Bank will require the sub-custodians to comply for the purpose of such sub-delegation with the requirements set forth by applicable laws and regulations, e.g. namely in respect of asset segregation.

Prior to the appointment and/ or the use of any sub-custodian for the purposes of holding financial instruments of the Company or Subfunds, the Depository Bank analyses - based on applicable laws and regulations as well as its conflict of interests policy - potential conflicts of interests that may arise from such delegation of safekeeping functions. As part of the due diligence process applied prior to the appointment of a sub-custodian, this analysis includes the identification of corporate links between the Depository Bank, the sub-custodian, the Management Company and/or the Investment Manager. If a conflict of interest was identified between the sub-custodians and any of the parties mentioned before, the Depository Bank would - depending on the potential risk resulting on such conflict of interest - either decide not to appoint or not to use such sub-custodian for the purpose of holding financial instruments of the Company or require changes which mitigated potential risks in an appropriate manner and disclose the managed conflict of interest to the Company's investors. Such analysis is subsequently performed on all relevant sub-custodians on a regular basis as part of its ongoing due diligence procedure. Furthermore, the Depository Bank reviews, via a specific committee, each new business case for which potential conflicts of interest may arise between the Depository Bank, the Company, the Management Company and the Investment Manager(s) from the delegation of the safekeeping functions. As of the date of this Prospectus, the Depository Bank has not identified any potential conflict of interest that could arise from the exercise of its duties and from the delegation of its safekeeping functions to sub-custodians.

As per the date of this Prospectus, the Depository Bank does not use any sub-custodian which is part of the Credit Suisse Group and thereby avoids conflicts of interests which might potentially result thereof.

An up-to-date list of these sub-custodians along with their delegate(s) for the purpose of holding in custody financial instruments of the Company or Subfunds can be found on the webpage <https://www.credit-suisse.com/media/pb/docs/lu/privatebanking/services/list-of-credit-suisse-lux-sub-custodians.pdf> and will be made available to Shareholders and investors upon request.

The Depository Bank's liability shall not be affected by any such delegation to a sub-custodian unless otherwise stipulated in the Law of 17 December 2010 and/or the Depository Agreement.

The Depository Bank is liable to the Company or its Shareholders for the loss of a financial instrument held in custody by the Depository Bank and/or a sub-custodian. In case of loss of such financial instrument, the Depository Bank has to return a financial instrument of an identical type or the corresponding amount to the Company without undue delay. In accordance with the provisions of the Law of 17 December 2010, the Depository Bank will not be liable for the loss of a financial instrument, if such loss has arisen as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary.

The Depository Bank shall be liable to the Company and to the Shareholders for all other losses suffered by them as a result of the Depository Bank's negligence or intentional failure to properly fulfil its duties in accordance with applicable law, in particular the Law of 17 December 2010 and/or the Depository Agreement.

The Company and the Depository Bank may terminate the Depository Agreement at any time by giving ninety (90) days' notice in writing. In case of a voluntary withdrawal of the Depository Bank or of its removal by the Company, the Depository Bank must be replaced at the latest within two (2) months after the expiry of the aforementioned termination notice by a successor depository bank to whom the Company's assets are to be delivered and who will take over the functions and responsibilities of the Depository Bank. If the Company does not name such successor depository bank in time, the Depository Bank may notify the CSSF of the situation. The Company will take the necessary steps, if any, to initiate the liquidation of the Company, if no successor depository bank has been

appointed within two (2) months after the expiry of the aforementioned termination notice of ninety (90) days.

## 18. Central Administration

The Management Company has transferred the administration of the Company to Credit Suisse Fund Services (Luxembourg) S.A., a service company registered in Luxembourg, which belongs to Credit Suisse Group AG, and has authorized the latter in turn to delegate tasks wholly or partly to one or more third parties under the supervision and responsibility of the Management Company.

As the Central Administration, Credit Suisse Fund Services (Luxembourg) S.A., will assume all administrative duties that arise in connection with the administration of the Company, including the issue and redemption of Shares, valuation of the assets, calculation of the Net Asset Value, accounting and maintenance of the register of Shareholders.

## 19. Regulatory Disclosure

### Conflicts of Interest

The Management Company, the Investment Managers, the Central Administration, the Depository Bank, certain Distributors and other service providers or some of the counterparties of the Company are part of Credit Suisse Group AG (each an "Affiliated Person").

Credit Suisse Group AG is a worldwide, full-service private banking, investment banking, asset management and financial services organization and a major participant in the global financial markets. As such, the Affiliated Persons are active in various business activities and may have other direct or indirect interests in the financial markets in which the Company invests. The Company will not be entitled to compensation related to such business activities.

The Management Company is not prohibited to enter into any transactions with Affiliated Persons, provided that such transactions are carried out as if effected on normal commercial terms negotiated at arm's length. In such case, in addition to the management fees the Management Company or the Investment Managers earn for managing the Company, they may also have an arrangement with the issuer, dealer and/or distributor of any products entitling them to a share in the revenue from such products that they purchase on behalf of the Company.

Moreover, the Management Company or the Investment Managers are not prohibited to purchase or to provide advice to purchase any products on behalf of the Company where the issuer, dealer and/or distributor of such products is an Affiliated Person provided that such transactions are carried out in the best interest of the Company as if effected on normal commercial terms negotiated at arm's length.

Affiliated Persons may act as counterparty and as calculation agent in respect of financial derivative contracts entered into by the Company. Investors should be aware that to the extent the Company trades with an Affiliated Person as dedicated counterparty, the Affiliated Person will make a profit from the price of the financial derivative contract which may not be the best price available in the market, irrespective of the Best Execution principles, as stated further below.

Potential conflicts of interest or duties may arise because Affiliated Persons may have invested directly or indirectly in the Company. Affiliated Persons could hold a relatively large proportion of Shares in the Company.

Employees and Directors of Affiliated Persons may hold Shares in the Company. Employees of Affiliated Persons are bound by the terms of the respective policy on personal transactions and conflicts of interest applicable to them.

In the conduct of its business the Management Company and Affiliated Persons' policy is to identify, manage and where necessary prohibit any action or transaction that may pose a conflict between the interests of Affiliated Persons' various business activities and the Company or its investors. The Affiliated Person, as well as the Management Company strive to manage any conflicts in a manner consistent with the highest standards of integrity and fair dealing. For this purpose, both have implemented procedures that shall ensure that any business activities involving a conflict which may harm the interests of the Company or its investors, are carried out with an appropriate level of independence and that any conflicts are resolved fairly.

Such procedures include, but are not limited to the following:

- Procedure to prevent or control the exchange of information towards and between Affiliated Persons;
- Procedure to ensure that any voting rights attached to the Company's assets are exercised in the sole interests of the Company and its investors;
- Procedures to ensure that any investment activities on behalf of the Company are executed in accordance with the highest ethical standards and in the interests of the Company and its investors;
- Procedure on management of conflicts of interest.

Notwithstanding its due care and best effort, there is a risk that the organizational or administrative arrangements made by the Management Company for the management of conflicts of interest are not sufficient to ensure with reasonable confidence, that risks of damage to the interests of the Company or its Shareholders will be prevented. In such case these non-neutralized conflicts of

interest as well as the decisions taken will be reported to investors in an appropriate manner (e.g. in the notes to the financial statements of the Company or on the internet at "[www.credit-suisse.com](http://www.credit-suisse.com)").

### Complaints Handling

Investors are entitled to file complaints free of charge with the Distributor or the Management Company in an official language of their home country.

The complaints handling procedure is available free of charge on the internet at "[www.credit-suisse.com](http://www.credit-suisse.com)".

### Exercise of Voting Rights

The Management Company will in principle not exercise voting rights attached to the instruments held in the Subfunds, except if it is specifically mandated by the Company to do so, and in that case, it will only exercise voting rights in certain circumstances where it believes that the exercise of voting rights is particularly important to protect the interests of Shareholders. If mandated by the Company, the decision to exercise voting rights, in particular the determination of the circumstances referred to above, is in the sole discretion of the Management Company.

Details of the actions taken will be made available to Shareholders free of charge on their request.

### Best Execution

The Management Company acts in the best interests of the Company when executing investment decisions. For that purpose it takes all reasonable steps to obtain the best possible result for the Company, taking into account price, costs, speed, likelihood of execution and settlement, order size and nature, or any other consideration relevant to the execution of the order (best execution). The Management Company ensures a high level of diligence in the selection and ongoing monitoring of investments in the best interests of the Company and the integrity of the market. The Management Company has implemented written policies and procedures on due diligence as well effective arrangements for ensuring that investment decisions are carried out in compliance with the investment objective and investment policy of the Company, taking into consideration and adhering to applicable risk limits. Where the Investment Managers are permitted to execute transactions, they will be committed contractually to apply equivalent best execution principles, if they are not already subject to equivalent best execution laws and regulations.

The best execution policy is available for investors on the internet at "[www.credit-suisse.com](http://www.credit-suisse.com)".

### Investor Rights

The Company draws the investors' attention to the fact that any investor will only be able to fully exercise its investor rights directly against the Company, notably the right to participate in General Meetings of Shareholders if the investor is registered itself and in its own name in the registered account kept for the Company and its Shareholders by the Company's Central Administration. In cases where an investor invests in the Company through an intermediary investing into the Company in its own name but on behalf of the investor, it may not always be possible for the investor to exercise certain shareholder rights directly against the Company. Investors are advised to take advice on their rights.

### Remuneration Policy

The Management Company has in place a remuneration policy which is consistent with, and promotes, sound and effective risk management and that neither encourages risk taking which is inconsistent with the risk profiles of the Subfunds and the Articles of Incorporation nor impairs compliance with the Management Company's duty to act in the best interest of the Company and its Shareholders. The remuneration policy of the Management Company has been adopted by its board of directors and is reviewed at least annually. The remuneration policy is based on the approach that remuneration should be in line with the business strategy, objectives, values and interests of the Management Company, the Subfunds it manages and their Shareholders, and include measures to avoid conflicts of interest, such as taking into account the holding period recommended to the Shareholders when assessing the performance.

All employees of the Credit Suisse group are subject to the Group Compensation Policy, the objectives of which include:

- supporting a performance culture that is based on merit and differentiates and rewards excellent performance, both in the short and long term, and recognizes Credit Suisse's company values;
- balancing the mix of fixed and variable compensation to appropriately reflect the value and responsibility of the role performed day to day, and to influence appropriate behaviours and actions; and
- consistency with, and promotion of, effective risk management practices and Credit Suisse's compliance and control culture.

Details of the up-to-date remuneration policy of the Management Company, including, but not limited to, a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, including a description of the global Credit Suisse group compensation committee are available on <https://www.credit-suisse.com/media/assets/about-us/docs/our-company/our-governance/compensation-policy.pdf>, and a paper copy will be made available free of charge upon request.

### Collateral Policy

Where the Company enters into OTC financial derivative and/or efficient portfolio management techniques, collateral may be used to reduce counterparty risk exposure in accordance with CSSF Circulars 08/356 and 13/559 and subject to the following principles:

- The Company currently accepts the following assets as eligible collateral:
  - Cash in US Dollars, Euros and Swiss Francs, and a Subfund's reference currency;
  - Government bonds, issued by OECD member countries, subject to a minimum long term rating requirement of A+/A1;
  - Bonds issued by federal states, government agencies, supranational institutions, government special banks or governmental export-import banks, municipalities or cantons of OECD member countries, subject to a minimum long term rating requirement of A+/A1;
  - Covered bonds issued by an issuer from an OECD member country, subject to a minimum long term rating of AA-/Aa3;
  - Corporate bonds issued by an issuer from an OECD member country, subject to a minimum long term rating of AA-/Aa3;
  - Shares representing common stock admitted to or dealt in on a regulated market of a Member State of the EU or on a stock exchange of a Member State of the OECD and included in a main index.

The issuer of negotiable debt obligations must have a relevant credit rating by S&P and/or Moody's.

Where the relevant ratings of S&P and Moody's differ with respect to the same issuer, the lower of the ratings shall apply.

The Management Company has the right to restrict or exclude certain OECD countries from the list of eligible countries, or more generally, to further restrict the eligible collateral.

- Any collateral received other than cash must be highly liquid and traded on a regulated market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to pre-sale valuation. Collateral received must also comply with the provisions of Article 48 of the Law of 17 December 2010.
- Bonds of any type and/or maturity are accepted, except perpetual bonds.
- The collateral received will be valued mark-to-market on a daily basis, as is common industry standard, and in accordance with Chapter 8, "Net Asset Value". The collateral received will be adjusted on a daily basis. Assets that exhibit high price volatility will not be accepted as collateral unless suitably conservative haircuts are in place.
- The collateral received by the Company must be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty.
- Collateral must be sufficiently diversified in terms of country, markets and issuers. The criterion of sufficient diversification with respect to issuer concentration is considered to be respected if a Subfund receives from a counterparty of OTC derivative and/or efficient portfolio management transactions a basket of collateral with a maximum exposure to a given issuer of 20% of its Net Asset Value. When a Subfund is exposed to different counterparties, the different baskets of collateral must be aggregated to calculate the 20% limit of exposure to a single issuer. By way of derogation from this sub-paragraph, a Subfund may be fully collateralised in different transferable securities and money market instruments issued or guaranteed by a Member State, one or more of its local authorities, a third country, or a public international body to which one or more Member States belong. Such a Subfund must receive securities from at least six different issues, but securities from any single issue should not account for more than 30% of the Subfund's Net Asset Value.
- Risks linked to the management of collateral, such as operational and legal risks, will be identified, managed and mitigated in accordance with the Management Company's risk management process concerning the Company.
- Where there is a title transfer, the collateral received must be held by the Depositary Bank. For other types of collateral arrangement, the collateral can be held by a third party custodian which is subject to prudential supervision, and which is unrelated to the provider of the collateral.
- Collateral received must be capable of being fully enforced by the Company at any time without reference to or approval from the counterparty.
- Any collateral received must not be sold, re-invested or pledged.

### Haircut Policy

The Company has implemented a haircut policy in respect of each class of assets received as collateral. A haircut is a discount applied to the value of a collateral asset to account for the fact that its valuation, or liquidity profile, may deteriorate over time. The haircut policy takes account of the characteristics of the relevant asset class, the type and credit quality of the issuer of the collateral, the price volatility of the collateral and the results of any stress tests which may be performed in accordance with the collateral management policy. Subject to the framework of agreements in place with the relevant counterparty, which may or may not include minimum transfer amounts, it is the intention of the Company that any collateral received shall have a value, adjusted in light of the haircut policy.

According to the Company's haircut policy, the following discounts will be made:

Type of Collateral	Discount
Cash, restricted to USD, EUR, CHF and a Subfund's reference currency	0%
Government bonds, issued by OECD member countries, subject to a minimum long term rating requirement of A+ by S&P and/or A1 by Moody's	0.5% - 5%
Bonds issued by federal states, government agencies, supranational institutions, government special banks or governmental export-import banks, municipalities or cantons of OECD member countries, subject to a minimum long term rating requirement of A+ by S&P and/or A1 by Moody's	0.5% - 5%
Covered bonds issued by an issuer from an OECD member country, subject to a minimum long term rating of AA- by S&P and/or Aa3 by Moody's	1% - 8%
Corporate bonds issued by an issuer from an OECD member country, subject to a minimum long term rating of AA- by S&P and/or Aa3 by Moody's	1% - 8%
Shares representing common stock admitted to or dealt in on a regulated market of a Member State of the EU or on a stock exchange of a Member State of the OECD and included in a main index	5% - 15%

In addition to the above haircuts, there will be an additional haircut of 1% - 8% on any collateral (cash, bonds or equity) in a different currency to that of its underlying transaction.

Moreover, in case of unusual market volatility, the Management Company reserves the right to increase the haircut it applies to collateral. As a consequence, the Company will receive more collateral to secure its counterparty exposure.

### Benchmark Regulation

Pursuant to Regulation (EU) No 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2004/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "Benchmark Regulation"), the Company can only use a benchmark or a combination of benchmarks if the benchmark is provided by an administrator located in the European Union, or in a third country subject to certain equivalence, recognition or endorsement conditions, and which is included in a register maintained by the European Securities and Markets Authority ("ESMA"). Certain transitional provisions apply until 1 January 2020 pursuant to which benchmark administrators are currently not required to obtain authorisation or registration by the national competent authorities of their home member state in accordance with article 34 of the Benchmark Regulation or qualify for use in the European Union under the Benchmark Regulation's equivalence, recognition or endorsement regimes in accordance with articles 30, respectively 32 or 33 of the Benchmark Regulation. The Company has, to the extent possible, complied with its disclosure obligations under article 29 of the Benchmark Regulation based on the most up-to-date information available as at the date of this Prospectus in the register established and maintained by the ESMA. Where possible, further information will be made available at each Prospectus update. Investors should, however, note that there may be a certain time lapse between the moment the register maintained by ESMA is updated with additional information, and the moment when such information is added to the Prospectus in the context of the next following update.

In accordance with the Benchmark Regulation, the Company has established and maintains benchmark written contingency plans setting out the actions which the Company would take in the event that a benchmark index used by a Subfund materially changes or ceases to be provided (the "**Benchmark Contingency Plans**"). Details of the up-to-date Benchmark Contingency Plans are available free of charge to Shareholders and investors upon request at the registered office of the Company.

Investors should note that the actions that may be taken by the Company on the basis of the Benchmark Contingency Plans in case a benchmark index used by a

Subfund materially changes or ceases to be provided may lead to a change of, among others, the name, the investment objectives and/or the investment policies of the relevant Subfund, or the benchmark used for the calculation of a performance fee (if any), particularly if the benchmark index is changed. Alternatively, the Board of Directors may decide to terminate the relevant Subfund or to merge or otherwise amalgamate the assets of the relevant Subfund with another Subfund of the Company or another UCITS. Any such actions and the related amendments to this Prospectus will be notified to the Shareholders and will be implemented in accordance with Luxembourg law, the requirements of the CSSF (as applicable) and the terms of this Prospectus.

### 20. Data Protection Policy

The Company and the Management Company are committed to protecting the personal data of the investors (including prospective investors) and of the other individuals whose personal information comes into their possession in the context of the investor's investments in the Company.

The Company and the Management Company have taken all necessary steps, to ensure compliance with the EU Regulation 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data and repealing Directive 95/46/EC and with any implementing legislation applicable to them (together, the "Data Protection Law") in respect of personal data processed by them in connection with investments made into the Company. This includes (non-exclusively) actions required in relation to: information about processing of the investor's personal data and, as the case may be, consent mechanisms, procedures for responding to requests to exercise individual rights, contractual arrangements with suppliers and other third parties, arrangements for overseas data transfers and record keeping and reporting policies and procedures. Personal data shall have the meaning given in the Data Protection Law and includes any information relating to an identifiable individual, such as the investor's name, address, invested amount, the investor's individual representatives' names as well as the name of the ultimate beneficial owner, where applicable, and such investor's bank account details.

When subscribing to the Shares, each investor is informed of the processing of his/her personal data (or, when the investor is a legal person, of the processing of such investor's individual representatives and/or ultimate beneficial owners' personal data) via a data protection notice which will be made available in the application form issued by the Company to the investors. This notice will inform the investors about the processing activities undertaken by the Company, the Management Company and their delegates in more details.

### 21. Certain Regulatory and Tax Matters

#### Foreign Account Tax Compliance

Capitalized terms used in this section should have the meaning as set forth in the Luxembourg amended law dated 24 July 2015 (the "**FATCA Law**"), unless provided otherwise herein.

The Foreign Account Tax Compliance provisions of the Hiring Incentives to Restore Employment Act (commonly known as "FATCA") generally impose a new reporting regime and potentially a 30% withholding tax with respect to (i) certain US source income (including dividends and interest) and gross proceeds from the sale or other disposal of property that can produce US source interest or dividends ("Withholdable Payments") and (ii) a portion of certain non-US source payments from non-US entities that have entered into FFI Agreements (as defined below) to the extent attributable to Withholdable Payments ("Passtru Payments"). As a general matter, the new rules are designed to require US persons' direct and indirect ownership of non-US accounts and non-US entities to be reported to the US Internal Revenue Service (the "IRS"). The 30% withholding tax regime applies if there is a failure to provide required information regarding US ownership.

Generally, the FATCA rules subject all Withholdable Payments and Passtru Payments received by the Company to 30% withholding tax (including the share that is allocable to Non-US Investors) unless the Company enters into an agreement (a "FFI Agreement") with the IRS to provide information, representations and waivers of non-US law (including any information notice relating to data protection) as may be required to comply with the provisions of the new rules, including, information regarding its direct and indirect US accountholders, or otherwise qualifies for an exemption, including an exemption under an intergovernmental agreement (or "IGA") between the United States and a country in which the non-US entity is resident or otherwise has a relevant presence.

The governments of Luxembourg and the United States have entered into an IGA regarding FATCA, implemented by the Luxembourg law transposing the Intergovernmental Agreement concluded on 28 March 2014 between the Grand Duchy of Luxembourg and the United States of America (the "**FATCA Law**"). Provided the Company adheres to any applicable terms of the FATCA Law, the Company will not be subject to withholding or generally required to withhold amounts on payments it makes under FATCA. Additionally, the Company will not

have to enter into an FFI agreement with the IRS and instead will be required to obtain information regarding its Shareholders and to report such information to the Luxembourg tax authority, which, in turn, would report such information to the IRS. Any tax caused by an Investor's failure to comply with FATCA will be borne by such Investor.

Each prospective Investor and each Shareholder should consult its own tax advisors regarding the requirements under FATCA with respect to its own situation. Each Shareholder and each transferee of a Shareholder's interest in any Subfund shall furnish (including by way of updates) to the Management Company, or any third party designated by the Management Company (a "**Designated Third Party**"), in such form and at such time as is reasonably requested by the Management Company (including by way of electronic certification) any information, representations, waivers and forms relating to the Shareholder (or the Shareholder's direct or indirect owners or account holders) as shall reasonably be requested by the Management Company or the Designated Third Party to assist it in obtaining any exemption, reduction or refund of any withholding or other taxes imposed by any taxing authority or other governmental agency (including withholding taxes imposed pursuant to the Hiring Incentives to Restore Employment Act of 2010, or any similar or successor legislation or intergovernmental agreement, or any agreement entered into pursuant to any such legislation or intergovernmental agreement) upon the Company, amounts paid to the Company, or amounts allocable or distributable by the Company to such Shareholder or transferee. In the event that any Shareholder or transferee of a Shareholder's interest fails to furnish such information, representations, waivers or forms to the Management Company or the Designated Third Party, the Management Company or the Designated Third Party shall have full authority to take any and all of the following actions: (i) withhold any taxes required to be withheld pursuant to any applicable legislation, regulations, rules or agreements; (ii) redeem the Shareholder's or transferee's interest in any Subfund, and (iii) form and operate an investment vehicle organized in the United States that is treated as a "domestic partnership" for purposes of section 7701 of the Internal Revenue Code of 1986, as amended and transfer such Shareholder's or transferee's interest in any Subfund or interest in such Subfund assets and liabilities to such investment vehicle. If requested by the Management Company or the Designated Third Party, the Shareholder or transferee shall execute any and all documents, opinions, instruments and certificates as the Management Company or the Designated Third Party shall have reasonably requested or that are otherwise required to effectuate the foregoing. Each Shareholder hereby grants to the Management Company or the Designated Third Party a power of attorney, coupled with an interest, to execute any such documents, opinions, instruments or certificates on behalf of the Shareholder, if the Shareholder fails to do so.

#### **Data Protection Information in the Context of FATCA Processing**

In accordance with the FATCA Law, Luxembourg Financial Institutions ("**FI**") are required to report to the Luxembourg tax authority (i.e. Administration des Contributions Directes, the "**Luxembourg Tax Authority**") information regarding reportable persons such as defined in the FATCA Law.

The Company is considered a sponsored entity and as such as a non-reporting Luxembourg financial institution and shall be treated as deemed compliant foreign FI as foreseen by FATCA. The Company is the data controller and processes personal data of Shareholders and Controlling Persons as reportable persons for FATCA purposes.

The Company processes personal data concerning Shareholders or their Controlling Persons for the purpose of complying with the Company's legal obligations under the FATCA Law. These personal data include the name, date and place of birth, address, U.S. tax identification number, the country of tax residence and residence address, the phone number, the account number (or functional equivalent), the account balance or value, the total gross amount of interest, the total gross amount of dividends, the total gross amount of other income generated with respect to the assets held in the account, the total gross proceeds from the sale or redemption of property paid or credited to the account, the total gross amount of interest paid or credited to the account, the total gross amount paid or credited to the Shareholder with respect to the account, standing instructions to transfer funds to an account maintained in the United States, and any other relevant information in relation to the Shareholders or their Controlling Persons for the purposes of the FATCA Law (the "**FATCA Personal Data**").

The FATCA Personal Data will be reported by the Management Company or the Central Administration, as applicable, to the Luxembourg Tax Authority. The Luxembourg Tax Authority, under its own responsibility, will in turn pass on the FATCA Personal Data to the IRS in application of the FATCA Law.

In particular, Shareholders and Controlling Persons are informed that certain operations performed by them will be reported to them through the issuance of statements, and that part of this information will serve as a basis for the annual disclosure to the Luxembourg Tax Authority.

FATCA Personal Data may also be processed by the Company's data processors ("**Processors**") which, in the context of FATCA processing, may include the

Management Company of the Company and the Central Administration of the Company.

The Company's ability to satisfy its reporting obligations under the FATCA Law will depend on each Shareholder or Controlling Person providing the Company with the FATCA Personal Data, including information regarding direct or indirect owners of each Shareholder, along with the required supporting documentary evidence. Upon request of the Company, each Shareholder or Controlling Person must provide the Company with such information. Failure to do so within the prescribed timeframe may trigger a notification of the account to the Luxembourg Tax Authority.

Although the Company will attempt to satisfy any obligation imposed on it to avoid any taxes or penalties imposed by the FATCA Law, no assurance can be given that the Company will be able to satisfy these obligations. If the Company becomes subject to a tax or penalty as result of the FATCA Law, the value of the Shares may suffer material losses.

Any Shareholder or Controlling Person that fails to comply with the Company's documentation requests may be charged with any taxes and penalties of the FATCA law imposed on the Company (inter alia: withholding under section 1471 of the U.S. Internal Revenue Code, a fine of up to 250.000 Euros or a fine of up to 0,5 per cent of the amounts that should have been reported and which may not be less than 1.500 Euros) attributable to such Shareholder's or Controlling Person's failure to provide the information and the Company may, in its sole discretion, redeem the Shares of such Shareholders.

Shareholders and Controlling Persons should consult their own tax advisor or otherwise seek professional advice regarding the impact of the FATCA Law on their investment.

FATCA Personal Data will be processed in accordance with the provisions of the data protection notice which will be made available in the application form issued by the Company to the investors.

#### **Automatic Exchange of Information – Common Reporting Standard**

Capitalized terms used in this section should have the meaning as set forth in the Luxembourg law dated 18 December 2015 (the "**CRS Law**"), unless provided otherwise herein.

On 9 December 2014, the Council of the European Union adopted the Directive 2014/107/EU amending the Directive 2011/16/EU of 15 February 2011 on administrative cooperation in the field of taxation which now provides for an automatic exchange of financial account information between EU Member States ("**DAC Directive**"). The adoption of the aforementioned directive implements the OECD's CRS and generalizes the automatic exchange of information within the European Union as of 1 January 2016.

In addition, Luxembourg signed the OECD's multilateral competent authority agreement ("**Multilateral Agreement**") to automatically exchange information between financial authorities. Under this Multilateral Agreement, Luxembourg will automatically exchange financial account information with other participating jurisdictions as of 1 January 2016. The CRS Law implements this Multilateral Agreement, jointly with the DAC Directive introducing the CRS in Luxembourg law. Under the terms of the CRS Law, the Company may be required to annually report to the Luxembourg tax authority the name, address, state(s) of residence, TIN(s), as well as the date and place of birth of i) each Reportable Person that is an account holder, ii) and, in the case of a Passive NFE within the meaning of the CRS Law, of each Controlling Person(s) that is a Reportable Person. Such information may be disclosed by the Luxembourg tax authority to foreign tax authorities.

The Company's ability to satisfy its reporting obligations under the CRS Law will depend on each Shareholder providing the Company with the Information, including information regarding direct or indirect owners of each Shareholder, along with the required supporting documentary evidence. Upon request of the Company, each Shareholder shall agree to provide the Company such information. Although the Company will attempt to satisfy any obligation imposed on it to avoid any taxes or penalties imposed by the CRS Law, no assurance can be given that the Company will be able to satisfy these obligations. If the Company becomes subject to a tax or penalty as result of the CRS Law, the value of the Shares may suffer material losses.

Any Shareholder that fails to comply with the Company's documentation requests may be charged with any taxes and penalties imposed on the Company attributable to such Shareholder's failure to provide the information and the Company may, in its sole discretion, redeem the Shares of such Shareholder.

Shareholders should consult their own tax advisor or otherwise seek professional advice regarding the impact of the CRS Law on their investment.

#### **Data Protection Information in the Context of CRS Processing**

In accordance with the CRS Law, Luxembourg Financial Institutions ("**FI**") are required to report to the Luxembourg Tax Authority information regarding Reportable Persons such as defined in the CRS Law.

As Luxembourg Reporting FI, the Company is the data controller and processes personal data of Shareholders and Controlling Persons as Reportable Persons for the purposes set out in the CRS Law.

In this context, the Company may be required to report to the Luxembourg Tax Authority the name, residence address, TIN(s), the date and place of birth, the country of tax residence(s), the phone number, the account number (or functional equivalent), standing instructions to transfer funds to an account maintained in a foreign jurisdiction, the account balance or value, the total gross amount of interest, the total gross amount of dividends, the total gross amount of other income generated with respect to the assets held in the account, the total gross proceeds from the sale or redemption of property paid or credited to the account, the total gross amount of interest paid or credited to the account, the total gross amount paid or credited to the Shareholder with respect to the account, as well as any other information required by applicable laws of i) each Reportable Person that is an account holder, ii) and, in the case of a Passive NFE within the meaning of the CRS Law, of each Controlling Person that is a Reportable Person (the "**CRS Personal Data**").

CRS Personal Data regarding the Shareholders or the Controlling Persons will be reported by the Reporting FI to the Luxembourg Tax Authority. The Luxembourg Tax Authority, under its own responsibility, will in turn pass on the CRS Personal Data to the competent tax authorities of one or more Reportable Jurisdiction(s). The Company processes the CRS Personal Data regarding the Shareholders or the Controlling Persons only for the purpose of complying with the Company's legal obligations under the CRS Law.

In particular, Shareholders and Controlling Persons are informed that certain operations performed by them will be reported to them through the issuance of statements, and that part of this information will serve as a basis for the annual disclosure to the Luxembourg Tax Authority.

CRS Personal Data may also be processed by the Company's data processors ("**Processors**") which, in the context of CRS processing, may include the Management Company of the Company and the Central Administration of the Company.

The Company's ability to satisfy its reporting obligations under the CRS Law will depend on each Shareholder or Controlling Person providing the Company with the CRS Personal Data, including information regarding direct or indirect owners of each Shareholder, along with the required supporting documentary evidence. Upon request of the Company, each Shareholder or Controlling Person must provide the Company with such information. Failure to do so within the prescribed timeframe may trigger a notification of the account to the Luxembourg Tax Authority.

Although the Company will attempt to satisfy any obligation imposed on it to avoid any taxes or penalties imposed by the CRS Law, no assurance can be given that the Company will be able to satisfy these obligations. If the Company becomes subject to a tax or penalty as result of the CRS Law, the value of the Shares may suffer material losses.

Any Shareholder or Controlling Person that fails to comply with the Company's documentation requests may be charged with any taxes and penalties of the CRS Law imposed on the Company (inter alia: a fine of up to 250.000 Euros or a fine of up to 0,5 per cent of the amounts that should have been reported and which may not be less than 1.500 Euros) attributable to such Shareholder's or Controlling Person's failure to provide the information and the Company may, in its sole discretion, redeem the Shares of such Shareholder.

Shareholders should consult their own tax advisor or otherwise seek professional advice regarding the impact of the CRS Law on their investment.

CRS Personal Data will be processed in accordance with the provisions of the data protection notice which will be made available in the application form issued by the Company to the investors.

## 23. Subfunds

### Credit Suisse (Lux) Emerging Market Corporate Bond Fund Investment Objective

The main objective of the Subfund is to achieve return in excess of the Emerging Market bond market by investing in US Dollar-denominated or US Dollar hedged investment grade and below investment grade of debt securities and similar debt instruments issued by borrowers by institutions and corporations having their head office in, or conducting a significant part of their business in, Emerging Market countries.

This Subfund aims to outperform the return of the JP Morgan Corporate Emerging Markets Bond Index Broad Diversified Composite benchmark. The Subfund is actively managed. The Benchmark is used as a reference point for portfolio construction. The majority of the Subfund's exposure to bonds will refer to, and have weightings derived from, the Benchmark. The Investment Manager may use its discretion to invest in bonds not included in the Benchmark in order to take advantage of specific investment opportunities. It is thus expected that the performance of the Subfund will materially deviate from the Benchmark.

### Investment Principles

At least two-thirds of the Subfund's assets shall be invested in debt instruments, bonds, notes and similar fixed interest or floating-rate securities (including zero bonds), short-term debt instruments and rights, and similar debt instruments that are issued or guaranteed by corporations (including government-owned corporations) which are domiciled in or carry out the bulk of their business activities in an emerging market country and that are listed on an exchange or dealt in on another market which is regulated, operates regularly, and is open to the public. Furthermore, the Subfund's net assets may also be invested up to 30% in debt securities and rights (including zero bonds), short-term debt securities and rights, and similar debt instruments that are issued or guaranteed by sovereign issuers of an emerging market country and that are listed on an exchange or dealt in on another market which is regulated, operates regularly, and is open to the public.

The Subfund may invest in Onshore Renminbi denominated debt securities which are traded on the China interbank bond market (the "Onshore Debt Securities"). For the purposes of this Prospectus, "PRC" refers to the People's Republic of China (excluding the Hong Kong and Macau Special Administrative Regions and Taiwan) and the term "Chinese" shall be construed accordingly.

Under PRC regulations, certain qualified overseas financial institutions are eligible to participate in the China interbank bond direct access program (the "CIBM Program") to make investments in the PRC interbank bond market. The Investment Manager, on behalf of the Subfund has registered as a qualified institution under the CIBM Program via an onshore interbank bond trade and settlement agent, which has the responsibility for making the relevant filings and account opening with the relevant PRC authorities.

The Subfund may make investments through the CIBM Program. With the appropriate disclosures to the investors, the Subfund may also seek exposure to PRC fixed income securities through other cross border programmes approved by competent regulators including the CSSF.

In addition, the Subfund may invest up to 20% of the Subfund's total assets in contingent capital instruments.

A significant part of the Subfunds' net assets will be denominated in or hedged into US Dollar. For the remaining part, the Subfund may actively manage its currency exposure and credit exposure through the use of foreign exchange forwards and credit default swaps.

In addition, the Subfund may make use of total return swaps for the purpose of efficient portfolio management.

The principal amount of the Subfund's assets that can be subject to total return swaps may represent up to a maximum of 10% of the net asset value of the Subfund calculated by way of the sum of the notionals of the total return swaps. It is generally expected that the amount of such total return swap will remain within the range of 0% to 10% of the net asset value of the Subfund calculated by way of the sum of the notionals of the total return swaps. In certain circumstances this proportion may be higher.

The sum of notionals takes into account the absolute value of the notional exposure of the total return swaps used by the Subfund. The expected amount of such total return swaps is an indicator of the intensity of the use of total return swaps within the Subfund. However, it is not necessarily an indicator of the investment risks in relation to those instruments because it does not take into account any netting or hedging effects. Investments may be denominated in any convertible currency, including without restriction the USD, EUR, and the currencies of emerging market countries (the latter provided they are freely convertible). No more than 30% of the Subfund's net assets may be invested in debt instruments and rights that are denominated in the currency of a single country that is not a member of the OECD. However, there is no restriction on the overall weighting of investments denominated in currencies of non-OECD countries. The investments of the Subfund may be denominated in a limited number of currencies, or in a single

currency. For the purpose of the present para. (2), OECD member states that are emerging market countries are treated as non-OECD member states.

In this context, emerging countries and developing markets are defined as countries which are not classified by the World Bank as high income countries. In addition, high income countries which are included in an emerging market financial index of a leading service provider may also be considered as emerging countries and developing markets if deemed appropriate by the Management Company in the context of the Subfund's investment universe.

The Subfund may also invest up to 20% of its net assets in asset-backed securities (ABS) and mortgage-backed securities (MBS).

Furthermore, the Subfund may invest:

- up to 20% of its net assets in convertible bonds or debt securities with warrants issued by companies that have their registered office in an emerging market country and that are listed or traded on an exchange or a regulated market;
- up to 30% of its net assets in debt securities and rights denominated in a freely convertible currency that are issued or guaranteed by government or corporate issuers from developed countries and that are listed or traded on an exchange or a regulated market.

The investments pursuant to the paragraph above may not in total exceed one third of the Subfund's total assets (without taking into account ancillary cash and cash equivalents).

### Global Exposure

The global exposure of the Subfund will be calculated on the basis of the commitment approach.

### Risk Information

Investors should read, be aware of and consider Chapter 7, "Risk Factors" of the Prospectus and all the risk information described below:

The probable returns on securities of issuers from emerging countries (emerging markets) are generally higher than the returns on similar securities of equivalent issuers from countries not classed as emerging (i.e. developed countries).

Emerging countries and developing markets are defined as countries which are not classified by the World Bank as high income countries. In addition, high income countries which are included in an emerging market financial index of a leading service provider may also be considered as emerging countries and developing markets if deemed appropriate by the Management Company in the context of the Subfund's investment universe.

The markets in emerging countries are much less liquid than the developed equity markets. Moreover, in the past, these markets have experienced higher volatility than the developed markets.

Potential investors should be aware that, due to the political and economic situation in emerging countries, investments in this Subfund entail a greater degree of risk, which could in turn reduce the return on the Subfund's assets. Investments in these Subfunds should only be made on a long-term basis. The investments of this Subfund are exposed to the following risks (among others): less effective public supervision, accounting and auditing methods and standards which do not match the requirements of Western legislation, possible restrictions on repatriation of the capital invested, counterparty risk in respect of individual transactions, market volatility, and insufficient liquidity affecting the Subfund's investments. It must also be borne in mind that companies are selected regardless of their market capitalization (micro, small, mid, large caps) or sector. This may lead to a concentration in terms of market segments or sectors.

Since this Subfund may invest in debt instruments in the non-investment grade sector, the underlying debt instruments may present a greater risk in terms of downgrading or may exhibit a greater default risk than debt instruments of first-class issuers. The higher return should be viewed as compensation for the greater degree of risk attached to the related debt instruments and the Subfund's higher volatility. Potential investors must be aware that the loss of their entire investment cannot be completely ruled out. To reduce such risks, however, the individual issuers are subject to close monitoring. Also, the investments are broadly diversified by issuer.

Contingent capital instruments can convert from bonds to equities or could be written-down should specific events occur, (a so-called "mechanical trigger"). The conversion into equity or a write-down may lead to a substantial loss in value. In the event of a conversion, the equities received may be at a discount to the share price of that equity when the bond was purchased, resulting in an increased risk of capital loss. Contingent capital instruments may, in addition to or next to, mechanical triggers, be subject to "point of non-viability triggers" which bear the same consequences, i.e. conversion into equity or write-down. These point of non-viability triggers are activated based on the relevant regulator's assessment of the issuer's solvency prospects. Certain subordinated corporate debt securities may be callable, meaning they may be redeemed by the issuer on a specific date at a predefined price. In the event such debt securities are not redeemed on the specified call date, the issuer may extend the maturity indefinitely and defer or reduce the coupon payment. The credit worthiness of unrated debt securities is

not measured by reference to an independent credit rating agency. Subordinated corporate debt securities carry a higher risk of loss than senior corporate debt securities, including those issued by the same issuer. Investors are advised to consider the risks corresponding to investments in contingent capital instruments set out in Chapter 7, "Risk Factors".

Investments through the China Interbank Bond Market or other similar scheme(s) established under applicable laws and regulations from time to time (the "CIBM") involve specific risks. Accordingly, potential investors are referred in particular to the risks set out in Chapter 7, "Risk Factors" under section "Investment through CIBM Program".

Sustainability risks may result in a negative impact on the returns of the Subfund. The main sustainability risks are identified and managed in the context of the overall risk management process and may change over time.

Potential investors are also referred to the risks set out in Chapter 7, "Risk Factors" under section "Sustainability Risks".

#### Investor Profile

The Subfund is suitable for investors with high risk tolerance and a long-term view who wish to invest in a broadly diversified portfolio of debt securities within Emerging Markets.

#### Performance Fee

The Management Company is entitled to a fee linked to the performance of the Share Class DP of Credit Suisse (Lux) Emerging Market Corporate Bond Fund in the Reference Currency, which is calculated on the basis of the unswung Net Asset Value of the Share Class DP.

The Performance Fee shall be payable for each reference period ("Reference Period"). Unless otherwise agreed between the parties, the initial Reference Period shall be the first period which begins on the date on which the Share Class DP is launched, and ends on the last day of that Accounting Year. Thereafter each subsequent Reference Period shall correspond to an Accounting Year. The Performance Fee will be payable within one month after the end of the respective Reference Period.

The Performance Fee shall be calculated and accrue daily as follows:

$(0.20 \times (RM - RI) \times TNAV) / P$ ; whereby

- (i) RM shall be equal to the percentage return on the unswung Net Asset Value per Share DP (before Performance Fee) on the relevant day;
- (ii) RI shall be equal to the percentage return on the Benchmark on the relevant day;
- (iii) TNAV shall be equal to the total Net Asset Value of the Share Class DP;
- (iv) P shall be the number of days in the year.

The benchmark of the subfund is JP Morgan Corporate Emerging Markets Bond Index Broad Diversified Composite is provided by JP Morgan Securities LLC, (the "Benchmark Administrator"), which does not appear as at the date of this Prospectus, neither the Benchmark Administrator nor the index appears on the register of administrators and benchmarks established and maintained by ESMA pursuant to article 36 of the Benchmark Regulation.

On any particular day, the amount of Performance Fee accrued may be positive or negative. The amount of Performance Fee payable at the end of the relevant Reference Period shall be the sum of each daily Performance Fee calculation made during that Reference Period. In the event that this amount is negative, the negative amount shall be carried to the next Reference Period.

The amount of Performance Fee payable for the relevant Reference Period shall not exceed 0.50% of the average TNAV of the Share Class during that Reference Period.

#### Investment Manager

Credit Suisse Asset Management (Schweiz) AG has been appointed as Investment Manager for the Subfund.

#### Adjustment of the Net Asset Value (Single Swing Pricing)

The Net Asset Value calculated in accordance with Chapter 8, "Net Asset Value" will be increased by up to a maximum of 2% per Share in the event of a net surplus of subscription applications or reduced by up to a maximum of 2% per Share in the event of a net surplus of redemption applications in respect of the applications received on the respective Valuation Day.

Under exceptional circumstances the Company may, in the interest of Shareholders, decide to increase the maximum swing factor indicated above. In such case the Company would inform the investors in accordance with Chapter 14, "Information for Shareholders".

#### Subscription, Redemption and Conversion of Shares

Subject to the restrictions set out in Chapter 7, "Risk Factors" under section "Effect of PRC Regulations on Subscription, Redemption and Conversion", subscription, redemption and conversion applications must be submitted in written form to the Central Administration or a Distributor authorized by the Company to accept such applications, by 3 p.m. (Central European Time) one Banking Day prior to the Valuation Day.

Subscription, redemption and conversion applications received after this cutoff point shall be deemed to have been received prior to 3 p.m. on the next following Banking Day.

Payment of the issue price must be effected within two Banking Days after the Valuation Day on which the issue price of the Shares was determined. Payment of the redemption price of the Shares shall be made within two Banking Days following calculation of this price.

#### Assets entrusted with financial service providers

Part of the assets of the Subfund in the PRC will be safekept by the Sub-custodian. The securities account(s) and cash account(s) with the PRC Sub-custodian and applicable PRC depository, registration and clearing institutions for the Subfund are opened in the joint names of the Investment Manager (as applicant under the CIBM Program) and the Subfund pursuant to applicable PRC regulations. There will be segregation of assets by the Sub-custodian such that the assets of the Subfund are separately recorded as belonging to the Subfund and not the Investment Manager.

#### Sub-custodian

Industrial and Commercial Bank of China Limited has been appointed as sub-custodian and the interbank bond trade and settlement agent for the Subfund for the purposes of the investments made through the CIBM Program (the "Sub-custodian").

## Credit Suisse (Lux) Emerging Market Corporate Investment Grade Bond Fund

### Investment Objective

The main objective of the Subfund is to achieve return in excess of the Emerging Market bond market by investing in US Dollar-denominated or US Dollar hedged primarily investment grade of debt securities and similar debt instruments issued by borrowers by institutions and corporations having their head office in, or conducting a significant part of their business in, Emerging Market countries.

This Subfund aims to outperform the return of the JP Morgan Corporate Emerging Markets Bond Index Broad Diversified High Grade benchmark. The Subfund is actively managed. The Benchmark is used as a reference point for portfolio construction and as a basis for setting risk constraints. The majority of the Subfund's exposure to bonds will refer and have similar weightings to the Benchmark. The Investment Manager may use its discretion to invest in bonds not included in the Benchmark in order to take advantage of specific investment opportunities. It is thus expected that the performance of the Subfund will to a limited extent deviate from the Benchmark.

### Investment Principles

At least two-thirds of the Subfund's assets shall be invested in fixed or variable-interest debt securities and rights which have a rating of at least BBB- (Standard & Poor's, Fitch), Baa3 (Moody's) or an equivalent rating from another rating agency or which, in the absence of a rating, are deemed to be of the same quality, which are denominated in USD or another freely convertible currency and issued by corporations (including government-owned corporations) which are domiciled in or carry out the bulk of their business activities in an emerging market country.

Furthermore, the Subfund's net assets may to a limited extent also be invested in fixed or variable-interest debt securities and rights which have a rating of at least BBB- (Standard & Poor's, Fitch), Baa3 (Moody's) or an equivalent rating from another ratings agency or which, in the absence of a rating, are deemed to be of the same quality, which are denominated in USD or another freely convertible currency and issued or guaranteed by sovereign issuers of an emerging market country.

In this context, emerging countries and developing markets are defined as countries which are not classified by the World Bank as high income countries. In addition, high income countries which are included in an emerging market financial index of a leading service provider may also be considered as emerging countries and developing markets if deemed appropriate by the Management Company in the context of the Subfund's investment universe.

The Subfund may invest in Onshore Renminbi denominated debt securities which are traded on the China interbank bond market (the "Onshore Debt Securities"). For the purposes of this Prospectus, "PRC" refers to the People's Republic of China (excluding the Hong Kong and Macau Special Administrative Regions and Taiwan) and the term "Chinese" shall be construed accordingly.

Under PRC regulations, certain qualified overseas financial institutions are eligible to participate in the China interbank bond direct access program (the "CIBM Program") to make investments in the PRC interbank bond market. The Investment Manager, on behalf of the Subfund has registered as a qualified institution under the CIBM Program via an onshore interbank bond trade and settlement agent, which has the responsibility for making the relevant filings and account opening with the relevant PRC authorities.

The Subfund may make investments through the CIBM Program. With the appropriate disclosures to the investors, the Subfund may also seek exposure to PRC fixed income securities through other cross border programmes approved by competent regulators including the CSSF. The Subfund will not invest in asset-backed securities (ABS) and mortgage-backed securities (MBS). In addition, the Subfund will not invest in contingent capital instruments.

Furthermore, the Subfund's assets may to a limited extent be invested in the following:

- a) fixed or variable-interest debt securities and rights with a rating lower than specified under the second paragraph of this section that are denominated in USD or another freely convertible currency and issued by government issuers, including government issuers from any country, or corporate issuers with their registered office in any country;
- b) convertible bonds or debt securities with warrants issued by corporate issuers with their registered office in any country and denominated in USD or another freely convertible currency.

The sum of the investments in Convertible Bonds and High Yield rated below BBB- will be maximum 10%.

In addition to direct investments, the Subfund may contract futures and options as well as swap transactions (interest-rate swaps, inflation swaps and total return swaps) for the purpose of hedging and efficient portfolio management, provided due account is taken of the investment restrictions set out in Chapter 6, "Investment Restrictions".

The principal amount of the Subfund's assets that can be subject to total return swaps may represent up to a maximum of 10% of the net asset value of the

Subfund calculated by way of the sum of the notionals of the total return swaps. It is generally expected that the amount of such total return swap will remain within the range of 0% to 10% of the net asset value of the Subfund calculated by way of the sum of the notionals of the total return swaps. In certain circumstances this proportion may be higher.

The sum of notionals takes into account the absolute value of the notional exposure of the total return swaps used by the Subfund. The expected amount of such total return swaps is an indicator of the intensity of the use of total return swaps within the Subfund. However, it is not necessarily an indicator of the investment risks in relation to those instruments because it does not take into account any netting or hedging effects.

Furthermore, the Subfund may actively manage its currency and credit exposure through the use of foreign exchange forwards and credit default swaps.

### Global Exposure

The global exposure of the Subfund will be calculated on the basis of the commitment approach.

### Risk Information

Investors should read, be aware of and consider Chapter 7, "Risk Factors" of the Prospectus and all the risk information described below:

The probable returns on securities of issuers from emerging countries (emerging markets) are generally higher than the returns on similar securities of equivalent issuers from countries not classed as emerging (i.e. developed countries). Emerging countries and developing markets are defined as countries which are not classified by the World Bank as high income countries. In addition, high income countries which are included in an emerging market financial index of a leading service provider may also be considered as emerging countries and developing markets if deemed appropriate by the Management Company in the context of the Subfund's investment universe.

The markets in emerging countries are much less liquid than the developed equity markets. Moreover, in the past, these markets have experienced higher volatility than the developed markets.

Potential investors should be aware that, due to the political and economic situation in emerging countries, investments in this Subfund entail a greater degree of risk, which could in turn reduce the return on the Subfund's assets. Investments in these Subfunds should only be made on a long-term basis. The investments of this Subfund are exposed to the following risks (among others): less effective public supervision, accounting and auditing methods and standards which do not match the requirements of Western legislation, possible restrictions on repatriation of the capital invested, counterparty risk in respect of individual transactions, market volatility, and insufficient liquidity affecting the Subfund's investments. It must also be borne in mind that companies are selected regardless of their market capitalization (micro, small, mid, large caps) or sector. This may lead to a concentration in terms of market segments or sectors.

Contingent capital instruments can convert from bonds to equities or could be written-down should specific events occur, (a so-called "mechanical trigger"). The conversion into equity or a write-down may lead to a substantial loss in value. In the event of a conversion, the equities received may be at a discount to the share price of that equity when the bond was purchased, resulting in an increased risk of capital loss. Contingent capital instruments may, in addition to or next to, mechanical triggers, be subject to "point of non-viability triggers" which bear the same consequences, i.e. conversion into equity or write-down. These point of non-viability triggers are activated based on the relevant regulator's assessment of the issuer's solvency prospects. Certain subordinated corporate debt securities may be callable, meaning they may be redeemed by the issuer on a specific date at a predefined price. In the event such debt securities are not redeemed on the specified call date, the issuer may extend the maturity indefinitely and defer or reduce the coupon payment. The credit worthiness of unrated debt securities is not measured by reference to an independent credit rating agency. Subordinated corporate debt securities carry a higher risk of loss than senior corporate debt securities, including those issued by the same issuer. Investors are advised to consider the risks corresponding to investments in contingent capital instruments set out in Chapter 7, "Risk Factors".

Investments through the China Interbank Bond Market or other similar scheme(s) established under applicable laws and regulations from time to time (the "CIBM") involve specific risks. Accordingly, potential investors are referred in particular to the risks set out in Chapter 7, "Risk Factors" under section "Investment through CIBM Program".

Sustainability risks may result in a negative impact on the returns of the Subfund. The main sustainability risks are identified and managed in the context of the overall risk management process and may change over time.

Potential investors are also referred to the risks set out in Chapter 7, "Risk Factors" under section "Sustainability Risks".

**Investor Profile**

The Subfund is suitable for investors with high risk tolerance and a long-term view who wish to invest in a broadly diversified portfolio of debt securities within Emerging Markets.

**Investment Manager**

Credit Suisse Asset Management (Schweiz) AG has been appointed as Investment Manager for the Subfund.

**Adjustment of the Net Asset Value (Single Swing Pricing)**

The Net Asset Value calculated in accordance with Chapter 8, "Net Asset Value" will be increased by up to a maximum of 2% per Share in the event of a net surplus of subscription applications or reduced by up to a maximum of 2% per Share in the event of a net surplus of redemption applications in respect of the applications received on the respective Valuation Day.

Under exceptional circumstances the Company may, in the interest of Shareholders, decide to increase the maximum swing factor indicated above. In such case the Company would inform the investors in accordance with Chapter 14, "Information for Shareholders".

**Subscription, Redemption and Conversion of Shares**

Subject to the restrictions set out in Chapter 7, "Risk Factors" under section "Effect of PRC Regulations on Subscription, Redemption and Conversion", subscription, redemption and conversion applications must be submitted in written form to the Central Administration or a Distributor authorized by the Company to accept such applications, by 3 p.m. (Central European Time) one Banking Day prior to the Valuation Day on any day on which banks are open for business in Luxembourg. Subscription, redemption and conversion applications received after this cutoff point shall be deemed to have been received prior to 3 p.m. on the next following Banking Day.

Payment of the issue price must be effected within two Banking Days after the Valuation Day on which the issue price of the Shares was determined. Payment of the redemption price of the Shares shall be made within two Banking Days following calculation of this price.

**Assets entrusted with financial service providers**

Part of the assets of the Subfund in the PRC will be safekept by the Sub-custodian. The securities account(s) and cash account(s) with the PRC Sub-custodian and applicable PRC depository, registration and clearing institutions for the Subfund are opened in the joint names of the Investment Manager (as applicant under the CIBM Program) and the Subfund pursuant to applicable PRC regulations. There will be segregation of assets by the Sub-custodian such that the assets of the Subfund are separately recorded as belonging to the Subfund and not the Investment Manager.

**Sub-custodian**

Industrial and Commercial Bank of China Limited has been appointed as sub-custodian and the interbank bond trade and settlement agent for the Subfund for the purposes of the investments made through the CIBM Program (the "Sub-custodian").

**Credit Suisse (Lux) Fixed Maturity Bond Fund 2021 S-II****Investment Objective**

The Subfund seeks to achieve an attractive yield by investing in debt instruments with a final maturity up to the Maturity Date of the Subfund.

The Subfund has a limited duration, as it will run until 15 December 2021 (the "Maturity Date") or any other date as defined by the Management Company prior to the launch date of the Subfund. In case the decision is taken to deviate from the aforementioned Maturity Date, the Prospectus will be updated accordingly. The lifetime of the Subfund is limited to the Maturity Date, as defined above.

The Subfund is actively managed without reference to a benchmark.

**Investment Principles**

The Subfund seeks to achieve its investment objective by primarily investing directly in debt instruments, bonds, notes, and similar fixed interest or floating-rate securities (including securities issued on a discounted basis) of private, semi-private and public issuers worldwide (including emerging countries) denominated in any currency, which may not necessarily be hedged against the Subfund's Reference Currency.

Accordingly, any fluctuation in the exchange rate for such currencies in relation to the Reference Currency of the Subfund, will affect the Net Asset Value of the Subfund. The securities will not have a maturity longer than the Maturity Date of the Subfund.

There are no restrictions on the investment universe of the Subfund in terms of regions. The Subfund may invest a significant part of its total net assets in regions within either developed countries or emerging markets. Depending on the market assessment, this may at any time result in a concentration of investments in specific regions during certain period of time. As a consequence the Subfund's assets could entirely be invested either in emerging or developed markets.

The Subfund may invest into non-investment grade securities which will be rated at least "B-" by Standard & Poor's or "B3" by Moody's, or debt instruments deemed by the Management Company to be of similar credit quality.

Although the Subfund invests primarily in direct investments, as defined above, it may enter into derivative strategies to enhance returns. These derivatives include, but are not limited to, futures on bonds and money market instruments, interest rate swaps, options on interest rates (including caps & floors and swaptions), options on bonds and money market futures, currency forwards, currency options, options on currency futures, cross currency swaps, equity linked derivatives and credit default swaps (on single issuer and indexes). The use of credit default swaps not serving for the purpose of hedging will not exceed more than 30% of the Subfund's net assets. If the underlying of the derivatives are financial indices, such indices shall be chosen in accordance with Article 9 of the Grand-Ducal Regulation of February 8, 2008.

In addition, the Subfund may make use of total return swaps for the purpose of efficient portfolio management.

The principal amount of the Subfund's assets that can be subject to total return swaps may represent up to a maximum of 10% of the net asset value of the Subfund calculated by way of the sum of the notionals of the total return swaps. It is generally expected that the amount of such total return swap will remain within the range of 0% to 10% of the net asset value of the Subfund calculated by way of the sum of the notionals of the total return swaps. In certain circumstances this proportion may be higher.

The sum of notionals takes into account the absolute value of the notional exposure of the total return swaps used by the Subfund. The expected amount of such total return swaps is an indicator of the intensity of the use of total return swaps within the Subfund. However, it is not necessarily an indicator of the investment risks in relation to those instruments because it does not take into account any netting or hedging effects. For hedging purposes, the Subfund may invest up to 100% of its net assets in derivatives mentioned above.

Furthermore, the Subfund may invest, directly or indirectly, up to 10% of its net assets in convertible bonds, debt securities with warrants that are listed or traded on an exchange or a regulated market or equity and equity-type securities, whereby the Subfund may be leveraged up to 10% using derivatives linked to equity.

The Subfund may invest up to 100% of its total net assets in short dated debt instruments having a maturity less than 12 months and money market instruments, such as commercial papers, towards the end of the life cycle of the Subfund, as the Investment Manager will start replacing maturing fixed income instruments.

As set out in chapter 4, "Investment Policy", the Subfund may hold ancillary liquid assets during the lifetime of the Subfund. However, as the Subfund has a pre-defined Maturity Date, the cash proportion will be increasing towards the end of the lifetime. Consequently, the Subfund may hold up to 100% of its total net assets in cash (including sight and time deposits) with first-class financial institutions, as of 3 months before the Maturity Date.

**Global Exposure**

The global exposure of the Subfund will be calculated on the basis of the commitment approach.

**Risk Information**

Investors should read, be aware of and consider Chapter 7, "Risk Factors" of the Prospectus and all the risk information described below: Income from securities in the non-investment grade sector is higher than that earned from first-class issuers. However, the risk of losses is also greater. The higher income should be regarded as compensation for the fact that investments in this segment involve a greater risk of losses. The Subfund is more dynamic than other bond funds and has greater opportunities for growth. However, a drop in price is possible at any time. The probable returns on securities of issuers from emerging countries (emerging markets) are generally higher than the returns on similar securities of equivalent issuers from countries not classed as emerging (i.e. developed countries). Emerging countries and developing markets are defined as countries which are not classified by the World Bank as high income countries. In addition, high income countries which are included in an emerging market financial index of a leading service provider may also be considered as emerging countries and developing markets if deemed appropriate by the Management Company in the context of the Subfund's investment universe.

The markets in emerging countries are much less liquid than the developed equity markets. Moreover, in the past, these markets have experienced higher volatility than the developed markets. Potential investors should be aware that, due to the political and economic situation in emerging countries, investments in this Subfund entail a greater degree of risk, which could in turn reduce the return on the Subfund's assets. Investments in these Subfunds should only be made on a long-term basis. The investments of this Subfund are exposed to the following risks (among others): less effective public supervision, accounting and auditing methods and standards which do not match the requirements of Western legislation, possible restrictions on repatriation of the capital invested, counterparty risk in respect of individual transactions, market volatility, and insufficient liquidity affecting the Subfund's investments.

Investors should also note that the Subfund's investments may be selected without regard to geographical location. This may lead at least to a concentration in geographical terms.

Although the Subfund will implement an investment strategy aiming to preserve capital, investors must be aware that an investment in the Shares of the Subfund may involve credit risk. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. In the event that any issuer of bonds or other debt securities experiences financial or economic difficulties, this may affect the value of the relevant securities (which may be zero) and any amounts paid on such securities (which may be zero). In addition, hedging and distributions may affect the net asset value of the Subfund or a Share Class.

If foreign currencies are hedged against the reference currency, it may be done based on the notional of the respective bonds rather than on their market value. This can lead to an over- or underhedge based on market values until the maturity of the hedge and therefore result in leverage.

The Subfund has a limited duration (the "Maturity Date") and invest in financial instruments with a final maturity up to the Maturity Date. The Subfund aims at providing investors with an attractive yield. However, no guarantee is given to investors that a certain yield can be achieved. The ability to provide investors with such attractive yield is dependent upon a number of parameters, including certain market movements that might occur between the start of the subscription period and the launch date of the Subfund.

In order to avoid any adverse effect of such market movements and to be able to deliver the attractive yield to investors, thus in the best possible interest of the investors, the Investment Manager of the Subfund is allowed, but not obliged, at his discretion to undertake investments in bonds matching the Subfunds' investment principles in order to protect the attractive yield, during the subscription period, i.e. prior to the launch date of the Subfund ("pre-investments"). The scope of such investments during the subscription period is limited to investments that have already been identified by the Investment Manager as being required to preserve an attractive yield to investors and which may no longer be available after the subscription period with the same conditions.

In the case of such pre-investments, investors who subscribe at a certain point in time during the subscription period may bear the market risk generated by pre-investments executed prior to the investor's subscription.

During the initial offering period of the Subfund, investors will subscribe at the initial issue price, the latter being settled on the launch date of the Subfund. The initial offering period and launch date of the Subfund will be set at dates to be determined by the Management Company.

Sustainability risks may result in a negative impact on the returns of the Subfund. The main sustainability risks are identified and managed in the context of the overall risk management process and may change over time.

Potential investors are also referred to the risks set out in Chapter 7, "Risk Factors" under section "Sustainability Risks".

**Hedged Share Classes**

As set out in Chapter 2, "Summary of Share Classes", the Subfund may issue shares in one or more alternate currencies. Share Class hedging is done through the use of forward foreign exchange transactions and/or up to 20% of its net assets, the Subfund may acquire currency options with a maturity not exceeding the Maturity Date of the Subfund. The value of these instruments depends largely upon the likelihood of favourable price movements in the underlying currency in relation to the exercise (or strike) price during the life of the option, the change in the level of volatility and interest rates. Investors must be aware that the use of currency options may impact the volatility of their investments and could reduce the yield generated on the Subfund's assets.

**Investor Profile**

The Subfund is suitable for investors with medium risk tolerance and a medium-term view who wish to invest in a broadly diversified portfolio of debt securities.

**Investment Manager**

Credit Suisse Asset Management (Schweiz) AG has been appointed as Investment Manager for the Subfund.

**Subscription, Redemption and Conversion of Shares**

Subscription, redemption and conversion applications must be submitted in written form to the Central Administration or a Distributor authorized by the Company to accept such applications, by 3 p.m. (Central European Time) one Banking Day prior to the Valuation Day on any day on which banks are open for business in Luxembourg.

Subscription, redemption and conversion applications received after this cut-off point shall be deemed to have been received prior to 3 p.m. on the next following Banking Day.

Payment of the issue price must be effected within one Banking Day after the Valuation Day on which the issue price of the Shares was determined. Payment of the redemption price of the Shares shall be made within two Banking Days following calculation of this price.

**Adjustment of the Net Asset Value (Single Swing Pricing)**

The Net Asset Value calculated in accordance with Chapter 8, "Net Asset Value" will be increased by up to a maximum of 2% per Share in the event of a net surplus of subscription applications or reduced by up to a maximum of 2% per Share in the event of a net surplus of redemption applications in respect of the applications received on the respective Valuation Day.

Under exceptional circumstances the Company may, in the interest of Shareholders, decide to increase the maximum swing factor indicated above. In such case the Company would inform the investors in accordance with Chapter 14, "Information for Shareholders".

## Credit Suisse (Lux) Fixed Maturity Bond Fund 2022 S-III

### Investment Objective

The Subfund seeks to achieve an attractive yield by investing in debt instruments with a final maturity up to the Maturity Date of the Subfund.

The Subfund has a limited duration, as it will run until 31 March 2022 (the "Maturity Date") or any other date as defined by the Management Company prior to the launch date of the Subfund. In case the decision is taken to deviate from the aforementioned Maturity Date, the Prospectus will be updated accordingly. The lifetime of the Subfund is limited to the Maturity Date, as defined above.

The Subfund is actively managed without reference to a benchmark.

### Investment Principles

The Subfund seeks to achieve its investment objective by primarily investing directly in debt instruments, bonds, notes, and similar fixed interest or floating-rate securities (including securities issued on a discounted basis) of private, semi-private and public issuers worldwide (including emerging countries) denominated in any currency, which may not necessarily be hedged against the Subfund's Reference Currency.

Accordingly, any fluctuation in the exchange rate for such currencies in relation to the Reference Currency of the Subfund, will affect the Net Asset Value of the Subfund. The securities will not have a maturity longer than the Maturity Date of the Subfund.

Up to a maximum of 100% of the net assets of the Subfund may be allocated towards public, semi-private and private issuers which are domiciled in or carry out the bulk of their business activities in the Asian region (including without limitation China, South Korea, India, Malaysia, Singapore, Japan, Indonesia, Thailand, Hong Kong, Philippines and Taiwan).

There are no restrictions on the investment universe of the Subfund in terms of regions. The Subfund may invest a significant part of its total net assets in regions within either developed countries or emerging markets. Depending on the market assessment, this may at any time result in a concentration of investments in specific regions during certain period of time. As a consequence the Subfund's assets could entirely be invested either in emerging or developed markets.

The Subfund may invest into non-investment grade securities which will be rated at least "B-" by Standard & Poor's or "B3" by Moody's, or debt instruments deemed by the Management Company to be of similar credit quality.

The Subfund may invest in Onshore Renminbi denominated debt securities which are traded on the China interbank bond market (the "Onshore Debt Securities"). For the purposes of this Prospectus, "PRC" refers to the People's Republic of China (excluding the Hong Kong and Macau Special Administrative Regions and Taiwan) and the term "Chinese" shall be construed accordingly.

Under PRC regulations, certain qualified overseas financial institutions are eligible to participate in the China interbank bond direct access program (the "CIBM Program") to make investments in the PRC interbank bond market. The Investment Manager, on behalf of the Subfund has registered as a qualified institution under the CIBM Program via an onshore interbank bond trade and settlement agent, which has the responsibility for making the relevant filings and account opening with the relevant PRC authorities.

The Subfund may make investments through the CIBM Program. With the appropriate disclosures to the investors, the Subfund may also seek exposure to PRC fixed income securities through other cross border programmes approved by competent regulators including the CSSF.

Although the Subfund invests primarily in direct investments, as defined above, it may enter into derivative strategies to enhance returns. These derivatives include, but are not limited to, futures on bonds and money market instruments, interest rate swaps, options on interest rates (including caps & floors and swaptions), options on bonds and money market futures, currency forwards, currency options, options on currency futures, cross currency swaps, equity linked derivatives and credit default swaps (on single issuer and indexes). The use of credit default swaps not serving for the purpose of hedging will not exceed more than 30% of the Subfund's net assets. If the underlying of the derivatives are financial indices, such indices shall be chosen in accordance with Article 9 of the Grand-Ducal Regulation of February 8, 2008.

In addition, the Subfund may make use of total return swaps for the purpose of efficient portfolio management.

The principal amount of the Subfund's assets that can be subject to total return swaps may represent up to a maximum of 10% of the net asset value of the Subfund calculated by way of the sum of the notional of the total return swaps. It is generally expected that the amount of such total return swap will remain within the range of 0% to 10% of the net asset value of the Subfund calculated by way of the sum of the notional of the total return swaps. In certain circumstances this proportion may be higher.

The sum of notional takes into account the absolute value of the notional exposure of the total return swaps used by the Subfund. The expected amount of such total return swaps is an indicator of the intensity of the use of total return swaps within the Subfund. However, it is not necessarily an indicator of the investment risks in

relation to those instruments because it does not take into account any netting or hedging effects. For hedging purposes, the Subfund may invest up to 100% of its net assets in derivatives mentioned above.

Furthermore, the Subfund may invest, directly or indirectly, up to 10% of its net assets in convertible bonds, debt securities with warrants that are listed or traded on an exchange or a regulated market or equity and equity-type securities, whereby the Subfund may be leveraged up to 10% using derivatives linked to equity.

The Subfund may invest up to 100% of its total net assets in short dated debt instruments having a maturity less than 12 months and money market instruments, such as commercial papers, towards the end of the life cycle of the Subfund, as the Investment Manager will start replacing maturing fixed income instruments.

As set out in chapter 4, "Investment Policy", the Subfund may hold ancillary liquid assets during the lifetime of the Subfund. However, as the Subfund has a pre-defined Maturity Date, the cash proportion will be increasing towards the end of the lifetime. Consequently, the Subfund may hold up to 100% of its total net assets in cash (including sight and time deposits) with first-class financial institutions, as of 3 months before the Maturity Date.

### Global Exposure

The global exposure of the Subfund will be calculated on the basis of the commitment approach.

### Risk Information

Investors should read, be aware of and consider Chapter 7, "Risk Factors" of the Prospectus and all the risk information described below: Income from securities in the non-investment grade sector is higher than that earned from first-class issuers. However, the risk of losses is also greater. The higher income should be regarded as compensation for the fact that investments in this segment involve a greater risk of losses. The Subfund is more dynamic than other bond funds and has greater opportunities for growth. However, a drop in price is possible at any time. The probable returns on securities of issuers from emerging countries (emerging markets) are generally higher than the returns on similar securities of equivalent issuers from countries not classed as emerging (i.e. developed countries). Emerging countries and developing markets are defined as countries which are not classified by the World Bank as high income countries. In addition, high income countries which are included in an emerging market financial index of a leading service provider may also be considered as emerging countries and developing markets if deemed appropriate by the Management Company in the context of the Subfund's investment universe.

The markets in emerging countries are much less liquid than the developed equity markets. Moreover, in the past, these markets have experienced higher volatility than the developed markets. Potential investors should be aware that, due to the political and economic situation in emerging countries, investments in this Subfund entail a greater degree of risk, which could in turn reduce the return on the Subfund's assets. Investments in these Subfunds should only be made on a long-term basis. The investments of this Subfund are exposed to the following risks (among others): less effective public supervision, accounting and auditing methods and standards which do not match the requirements of Western legislation, possible restrictions on repatriation of the capital invested, counterparty risk in respect of individual transactions, market volatility, and insufficient liquidity affecting the Subfund's investments.

Investors should also note that the Subfund's investments may be selected without regard to geographical location. This may lead at least to a concentration in geographical terms.

Although the Subfund will implement an investment strategy aiming to preserve capital, investors must be aware that an investment in the Shares of the Subfund may involve credit risk. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. In the event that any issuer of bonds or other debt securities experiences financial or economic difficulties, this may affect the value of the relevant securities (which may be zero) and any amounts paid on such securities (which may be zero). In addition, hedging and distributions may affect the net asset value of the Subfund or a Share Class.

If foreign currencies are hedged against the reference currency, it may be done based on the notional of the respective bonds rather than on their market value. This can lead to an over- or underhedge based on market values until the maturity of the hedge and therefore result in leverage.

The Subfund has a limited duration (the "Maturity Date") and invest in financial instruments with a final maturity up to the Maturity Date. The Subfund aims at providing investors with an attractive yield. However, no guarantee is given to investors that a certain yield can be achieved. The ability to provide investors with such attractive yield is dependent upon a number of parameters, including certain market movements that might occur between the start of the subscription period and the launch date of the Subfund.

In order to avoid any adverse effect of such market movements and to be able to deliver the attractive yield to investors, thus in the best possible interest of the investors, the Investment Manager of the Subfund is allowed, but not obliged, at his discretion to undertake investments in bonds matching the Subfunds' investment principles in order to protect the attractive yield, during the subscription period, i.e. prior to the launch date of the Subfund ("pre-investments"). The scope of such investments during the subscription period is limited to investments that have already been identified by the Investment Manager as being required to preserve an attractive yield to investors and which may no longer be available after the subscription period with the same conditions.

In the case of such pre-investments, investors who subscribe at a certain point in time during the subscription period may bear the market risk generated by pre-investments executed prior to the investor's subscription.

During the initial offering period of the Subfund, investors will subscribe at the initial issue price, the latter being settled on the launch date of the Subfund. The initial offering period and launch date of the Subfund will be set at dates to be determined by the Management Company.

Direct investments in India also involve specific risks. Accordingly, potential investors are referred in particular to the risks set out in Chapter 7, "Risk Factors" in relation to the FPI registration of the Subfund and the potential disclosure of information and personal data regarding the investors in the Subfund to the Indian local supervisory authorities and to the DDP.

Investments through the China Interbank Bond Market or other similar scheme(s) established under applicable laws and regulations from time to time (the "CIBM") involve specific risks. Accordingly, potential investors are referred in particular to the risks set out in Chapter 7, "Risk Factors" under section "Investment through CIBM Program".

Sustainability risks may result in a negative impact on the returns of the Subfund. The main sustainability risks are identified and managed in the context of the overall risk management process and may change over time.

Potential investors are also referred to the risks set out in Chapter 7, "Risk Factors" under section "Sustainability Risks".

#### **Hedged Share Classes**

As set out in Chapter 2, "Summary of Share Classes", the Subfund may issue shares in one or more alternate currencies. Share Class hedging is done through the use of forward foreign exchange transactions and/or up to 20% of its net assets, the Subfund may acquire currency options with a maturity not exceeding the Maturity Date of the Subfund. The value of these instruments depends largely upon the likelihood of favourable price movements in the underlying currency in relation to the exercise (or strike) price during the life of the option, the change in the level of volatility and interest rates. Investors must be aware that the use of currency options may impact the volatility of their investments and could reduce the yield generated on the Subfund's assets.

#### **Investor Profile**

The Subfund is suitable for investors with medium risk tolerance and a medium-term view who wish to invest in a broadly diversified portfolio of debt securities.

#### **Investment Manager**

Credit Suisse (Singapore) Ltd. and Credit Suisse (Hong Kong) Ltd. have been appointed as Co-Investment Managers for the Subfund. The Co-Investment Managers shall be jointly responsible for taking investment decisions pertaining to the Subfund's investment portfolio.

#### **Adjustment of the Net Asset Value (Single Swing Pricing)**

The Net Asset Value calculated in accordance with Chapter 8, "Net Asset Value" will be increased by up to a maximum of 2% per Share in the event of a net surplus of subscription applications or reduced by up to a maximum of 2% per Share in the event of a net surplus of redemption applications in respect of the applications received on the respective Valuation Day.

Under exceptional circumstances the Company may, in the interest of Shareholders, decide to increase the maximum swing factor indicated above. In such case the Company would inform the investors in accordance with Chapter 14, "Information for Shareholders".

#### **Subscription, Redemption and Conversion of Shares**

Subject to the restrictions set out in Chapter 7, "Risk Factors" under section "Effect of PRC Regulations on Subscription, Redemption and Conversion", subscription, redemption and conversion applications must be submitted in written form to the Central Administration or a Distributor authorized by the Company to accept such applications, by 3 p.m. (Central European Time) two Banking Days prior to the Valuation Day.

Subscription, redemption and conversion applications received after this cutoff point shall be deemed to have been received prior to 3 p.m. on the next following Banking Day.

Payment of the issue price must be effected within two Banking Days after the Valuation Day on which the issue price of the Shares was determined. Payment of the redemption price of the Shares shall be made within two Banking Days following calculation of this price.

No Shares of the Subfund will be, directly or indirectly, advertised, offered, distributed or sold to persons resident in India and no subscription application for Shares in the Subfund will be accepted if the acquisition of these Shares is financed by funds derived from sources within India.

As described under Chapter 5, "Investment in CS Investment Funds 3" of the Prospectus, the Company is entitled to compulsorily redeem all Shares held by a Shareholder in any circumstances in which the Company determines that such compulsory redemption would avoid material legal, regulatory, pecuniary, tax, economic, proprietary, administrative or other disadvantages to the Company, including but not limited to the cases where such Shares are held by Shareholders who are not entitled to acquire or possess these Shares or who fail to comply with any obligations associated with the holding of these Shares under the applicable regulations. As a consequence the Shareholders shall note that the legal, regulatory or tax requirements applicable to their shareholding in the Subfund may include specific local requirements applicable as per the Indian laws and regulations and that non-compliance with the Indian regulations might lead to the termination of their investment in the Subfund, the compulsory redemption (in whole or in part) of the Shares held by the investors in the Subfund, the retention of any redemption proceeds to the investors or to any other measures taken by the local authorities and impacting the investment of the investor in the Subfund.

#### **Assets entrusted with financial service providers**

Part of the assets of the Subfund in the PRC will be safekept by the Sub-custodian. The securities account(s) and cash account(s) with the PRC Sub-custodian and applicable PRC depository, registration and clearing institutions for the Subfund are opened in the joint names of the Investment Manager (as applicant under the CIBM Program) and the Subfund pursuant to applicable PRC regulations. There will be segregation of assets by the Sub-custodian such that the assets of the Subfund are separately recorded as belonging to the Subfund and not the Investment Manager.

#### **Sub-custodian**

Industrial and Commercial Bank of China Limited has been appointed as sub-custodian and the interbank bond trade and settlement agent for the Subfund for the purposes of the investments made through the CIBM Program (the "Sub-custodian").

**Credit Suisse (Lux) Fixed Maturity FR Bond Fund 2023 S-IV****Investment Objective**

The Subfund seeks to achieve an attractive yield by investing in debt instruments with a final maturity up to the Maturity Date of the Subfund.

The Subfund has a limited duration, as it will run until 29 September 2023 (the "Maturity Date") or any other date as defined by the Management Company prior to the launch date of the Subfund. In case the decision is taken to deviate from the aforementioned Maturity Date, the Prospectus will be updated accordingly. The lifetime of the Subfund is limited to the Maturity Date, as defined above.

The Subfund is actively managed without reference to a benchmark.

**Investment Principles**

The Subfund seeks to achieve its investment objective by primarily investing directly in debt instruments, bonds, notes, and similar fixed interest or floating-rate securities (including securities issued on a discounted basis) of private, semi-private and public issuers worldwide (including emerging countries) denominated in any currency, which may not necessarily be hedged against the Subfund's Reference Currency. The Subfund may seek enhanced exposure to floating rates through the use of derivative strategies.

Accordingly, any fluctuation in the exchange rate for such currencies in relation to the Reference Currency of the Subfund, will affect the Net Asset Value of the Subfund. The securities will not have a maturity longer than the Maturity Date of the Subfund.

Up to a maximum of 100% of the net assets of the Subfund may be allocated towards public, semi-private and private issuers which are domiciled in or carry out the bulk of their business activities in the Asian region (including without limitation China, South Korea, India, Malaysia, Singapore, Japan, Indonesia, Thailand, Hong Kong, Philippines and Taiwan).

There are no restrictions on the investment universe of the Subfund in terms of regions. The Subfund may invest a significant part of its total net assets in regions within either developed countries or emerging markets. Depending on the market assessment, this may at any time result in a concentration of investments in specific regions during certain period of time. As a consequence the Subfund's assets could entirely be invested either in emerging or developed markets.

The Subfund may invest into non-investment grade securities which will be rated at least "B-" by Standard & Poor's or "B3" by Moody's, or debt instruments deemed by the Management Company to be of similar credit quality.

The Subfund may invest in Onshore Renminbi denominated debt securities which are traded on the China interbank bond market (the "Onshore Debt Securities"). For the purposes of this Prospectus, "PRC" refers to the People's Republic of China (excluding the Hong Kong and Macau Special Administrative Regions and Taiwan) and the term "Chinese" shall be construed accordingly.

Under PRC regulations, certain qualified overseas financial institutions are eligible to participate in the China interbank bond direct access program (the "CIBM Program") to make investments in the PRC interbank bond market. The Investment Manager, on behalf of the Subfund has registered as a qualified institution under the CIBM Program via an onshore interbank bond trade and settlement agent, which has the responsibility for making the relevant filings and account opening with the relevant PRC authorities.

The Subfund may make investments through the CIBM Program. With the appropriate disclosures to the investors, the Subfund may also seek exposure to PRC fixed income securities through other cross border programmes approved by competent regulators including the CSSF.

Although the Subfund invests primarily in direct investments, as defined above, it may enter into derivative strategies for investment or for hedging purposes or the efficient portfolio management provided due account is taken of the investment restrictions set out in Chapter 6, "Investment Restrictions". These derivatives include, but are not limited to, futures on bonds and money market instruments, interest rate swaps, options on interest rates (including caps & floors and swaptions), options on bonds and money market futures, currency forwards, currency options, options on currency futures, cross currency swaps, equity linked derivatives and credit default swaps (on single issuer and indexes). The use of credit default swaps not serving for the purpose of hedging will not exceed more than 30% of the Subfund's net assets. If the underlying of the derivatives are financial indices, such indices shall be chosen in accordance with Article 9 of the Grand-Ducal Regulation of February 8, 2008.

The principal amount of the Subfund's assets that can be subject to total return swaps may represent up to a maximum of 20% of the net asset value of the Subfund calculated by way of the sum of the notional of the total return swaps. It is generally expected that the amount of such total return swap will remain within the range of 0% to 20% of the net asset value of the Subfund calculated by way of the sum of the notional of the total return swaps. In certain circumstances this proportion may be higher.

The sum of notional takes into account the absolute value of the notional exposure of the total return swaps used by the Subfund. The expected amount of such total return swaps is an indicator of the intensity of the use of total return swaps within

the Subfund. However, it is not necessarily an indicator of the investment risks in relation to those instruments because it does not take into account any netting or hedging effects.

Furthermore, the Subfund may invest, directly or indirectly, up to 10% of its net assets in convertible bonds, debt securities with warrants that are listed or traded on an exchange or a regulated market or equity and equity-type securities, whereby the Subfund may be leveraged up to 10% using derivatives linked to equity.

The Subfund may invest up to 100% of its total net assets in short dated debt instruments having a maturity less than 12 months and money market instruments, such as commercial papers, towards the end of the life cycle of the Subfund, as the Investment Manager will start replacing maturing fixed income instruments.

As set out in chapter 4, "Investment Policy", the Subfund may hold ancillary liquid assets during the lifetime of the Subfund. However, as the Subfund has a pre-defined Maturity Date, the cash proportion will be increasing towards the end of the lifetime. Consequently, the Subfund may hold up to 100% of its total net assets in cash (including sight and time deposits) with first-class financial institutions, as of 3 months before the Maturity Date.

**Global Exposure**

The global exposure of the Subfund will be calculated on the basis of the commitment approach.

**Risk Information**

Investors should read, be aware of and consider Chapter 7, "Risk Factors" of the Prospectus and all the risk information described below: Income from securities in the non-investment grade sector is higher than that earned from first-class issuers. However, the risk of losses is also greater. The higher income should be regarded as compensation for the fact that investments in this segment involve a greater risk of losses. The Subfund is more dynamic than other bond funds and has greater opportunities for growth. However, a drop in price is possible at any time. The probable returns on securities of issuers from emerging countries (emerging markets) are generally higher than the returns on similar securities of equivalent issuers from countries not classed as emerging (i.e. developed countries). Emerging countries and developing markets are defined as countries which are not classified by the World Bank as high income countries. In addition, high income countries which are included in an emerging market financial index of a leading service provider may also be considered as emerging countries and developing markets if deemed appropriate by the Management Company in the context of the Subfund's investment universe.

The markets in emerging countries are much less liquid than the developed equity markets. Moreover, in the past, these markets have experienced higher volatility than the developed markets. Potential investors should be aware that, due to the political and economic situation in emerging countries, investments in this Subfund entail a greater degree of risk, which could in turn reduce the return on the Subfund's assets. Investments in these Subfunds should only be made on a long-term basis. The investments of this Subfund are exposed to the following risks (among others): less effective public supervision, accounting and auditing methods and standards which do not match the requirements of Western legislation, possible restrictions on repatriation of the capital invested, counterparty risk in respect of individual transactions, market volatility, and insufficient liquidity affecting the Subfund's investments.

Investors should also note that the Subfund's investments may be selected without regard to geographical location. This may lead at least to a concentration in geographical terms.

Although the Subfund will implement an investment strategy aiming to preserve capital, investors must be aware that an investment in the Shares of the Subfund may involve credit risk. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. In the event that any issuer of bonds or other debt securities experiences financial or economic difficulties, this may affect the value of the relevant securities (which may be zero) and any amounts paid on such securities (which may be zero). In addition, hedging and distributions may affect the net asset value of the Subfund or a Share Class.

If foreign currencies are hedged against the reference currency, it may be done based on the notional of the respective bonds rather than on their market value. This can lead to an over- or underhedge based on market values until the maturity of the hedge and therefore result in leverage.

The Subfund has a limited duration (the "Maturity Date") and invest in financial instruments with a final maturity up to the Maturity Date. The Subfund aims at providing investors with an attractive yield. However, no guarantee is given to investors that a certain yield can be achieved. The ability to provide investors with such attractive yield is dependent upon a number of parameters, including certain market movements that might occur between the start of the subscription period and the launch date of the Subfund.

In order to avoid any adverse effect of such market movements and to be able to deliver the attractive yield to investors, thus in the best possible interest of the investors, the Investment Manager of the Subfund is allowed, but not obliged, at his discretion to undertake investments in bonds matching the Subfund's investment principles in order to protect the attractive yield, during the subscription period, i.e. prior to the launch date of the Subfund ("pre-investments"). The scope of such investments during the subscription period is limited to investments that have already been identified by the Investment Manager as being required to preserve an attractive yield to investors and which may no longer be available after the subscription period with the same conditions.

In the case of such pre-investments, investors who subscribe at a certain point in time during the subscription period may bear the market risk generated by pre-investments executed prior to the investor's subscription.

During the initial offering period of the Subfund, investors will subscribe at the initial issue price, the latter being settled on the launch date of the Subfund. The initial offering period and launch date of the Subfund will be set at dates to be determined by the Management Company.

Direct investments in India also involve specific risks. Accordingly, potential investors are referred in particular to the risks set out in Chapter 7, "Risk Factors" in relation to the FPI registration of the Subfund and the potential disclosure of information and personal data regarding the investors in the Subfund to the Indian local supervisory authorities and to the DDP.

Investments through the China Interbank Bond Market or other similar scheme(s) established under applicable laws and regulations from time to time (the "CIBM") involve specific risks. Accordingly, potential investors are referred in particular to the risks set out in Chapter 7, "Risk Factors" under section "Investment through CIBM Program".

Sustainability risks may result in a negative impact on the returns of the Subfund. The main sustainability risks are identified and managed in the context of the overall risk management process and may change over time.

Potential investors are also referred to the risks set out in Chapter 7, "Risk Factors" under section "Sustainability Risks".

#### **Hedged Share Classes**

As set out in Chapter 2, "Summary of Share Classes", the Subfund may issue shares in one or more alternate currencies. Share Class hedging is done through the use of forward foreign exchange transactions and/or up to 20% of its net assets, the Subfund may acquire currency options with a maturity not exceeding the Maturity Date of the Subfund. The value of these instruments depends largely upon the likelihood of favourable price movements in the underlying currency in relation to the exercise (or strike) price during the life of the option, the change in the level of volatility and interest rates. Investors must be aware that the use of currency options may impact the volatility of their investments and could reduce the yield generated on the Subfund's assets.

#### **Investor Profile**

The Subfund is suitable for investors with medium risk tolerance and a medium-term view who wish to invest in a broadly diversified portfolio of debt securities.

#### **Investment Manager**

Credit Suisse (Singapore) Ltd. and Credit Suisse (Hong Kong) Ltd. have been appointed as Co-Investment Managers for the Subfund.

The Co-Investment Managers shall be jointly responsible for taking investment decisions pertaining to the Subfund's investment portfolio.

#### **Adjustment of the Net Asset Value (Single Swing Pricing)**

The Net Asset Value calculated in accordance with Chapter 8, "Net Asset Value" will be increased by up to a maximum of 2% per Share in the event of a net surplus of subscription applications or reduced by up to a maximum of 2% per Share in the event of a net surplus of redemption applications in respect of the applications received on the respective Valuation Day.

Under exceptional circumstances the Company may, in the interest of Shareholders, decide to increase the maximum swing factor indicated above. In such case the Company would inform the investors in accordance with Chapter 14, "Information for Shareholders".

#### **Subscription, Redemption and Conversion of Shares**

Subject to the restrictions set out in Chapter 7, "Risk Factors" under section "Effect of PRC Regulations on Subscription, Redemption and Conversion", subscription, redemption and conversion applications must be submitted in written form to the Central Administration or a Distributor authorized by the Company to accept such applications, by 3 p.m. (Central European Time) two Banking Days prior to the Valuation Day.

Subscription, redemption and conversion applications received after this cutoff point shall be deemed to have been received prior to 3 p.m. on the next following Banking Day.

Payment of the issue price must be effected within two Banking Days after the Valuation Day on which the issue price of the Shares was determined. Payment of the redemption price of the Shares shall be made within two Banking Days following calculation of this price.

No Shares of the Subfund will be, directly or indirectly, advertised, offered, distributed or sold to persons resident in India and no subscription application for Shares in the Subfund will be accepted if the acquisition of these Shares is financed by funds derived from sources within India.

As described under Chapter 5, "Investment in CS Investment Funds 3" of the Prospectus, the Company is entitled to compulsorily redeem all Shares held by a Shareholder in any circumstances in which the Company determines that such compulsory redemption would avoid material legal, regulatory, pecuniary, tax, economic, proprietary, administrative or other disadvantages to the Company, including but not limited to the cases where such Shares are held by Shareholders who are not entitled to acquire or possess these Shares or who fail to comply with any obligations associated with the holding of these Shares under the applicable regulations. As a consequence the Shareholders shall note that the legal, regulatory or tax requirements applicable to their shareholding in the Subfund may include specific local requirements applicable as per the Indian laws and regulations and that non-compliance with the Indian regulations might lead to the termination of their investment in the Subfund, the compulsory redemption (in whole or in part) of the Shares held by the investors in the Subfund, the retention of any redemption proceeds to the investors or to any other measures taken by the local authorities and impacting the investment of the investor in the Subfund.

#### **Assets entrusted with financial service providers**

Part of the assets of the Subfund in the PRC will be safekept by the Sub-custodian. The securities account(s) and cash account(s) with the PRC Sub-custodian and applicable PRC depository, registration and clearing institutions for the Subfund are opened in the joint names of the Investment Manager (as applicant under the CIBM Program) and the Subfund pursuant to applicable PRC regulations. There will be segregation of assets by the Sub-custodian such that the assets of the Subfund are separately recorded as belonging to the Subfund and not the Investment Manager.

#### **Sub-custodian**

Industrial and Commercial Bank of China Limited has been appointed as sub-custodian and the interbank bond trade and settlement agent for the Subfund for the purposes of the investments made through the CIBM Program (the "Sub-custodian").

## Credit Suisse (Lux) Fixed Maturity Bond Fund 2024 S-V

### Investment Objective

The Subfund seeks to achieve an attractive yield by investing in debt instruments with a final maturity up to the Maturity Date of the Subfund.

The Subfund has a limited duration, as it will run until 30 September 2024 (the "Maturity Date") or any other date as defined by the Management Company prior to the launch date of the Subfund. In case the decision is taken to deviate from the aforementioned Maturity Date, the Prospectus will be updated accordingly. The lifetime of the Subfund is limited to the Maturity Date, as defined above.

The Subfund is actively managed without reference to a benchmark.

### Investment Principles

The Subfund seeks to achieve its investment objective by primarily investing directly in debt instruments, bonds, notes, and similar fixed interest or floating-rate securities (including securities issued on a discounted basis) of private, semi-private and public issuers worldwide (including emerging countries) denominated in any currency, which may not necessarily be hedged against the Subfund's Reference Currency.

Accordingly, any fluctuation in the exchange rate for such currencies in relation to the Reference Currency of the Subfund, will affect the Net Asset Value of the Subfund. The securities will not have a maturity longer than the Maturity Date of the Subfund.

Up to a maximum of 100% of the net assets of the Subfund may be allocated towards public, semi-private and private issuers which are domiciled in or carry out the bulk of their business activities in the Asian region (including without limitation China, South Korea, India, Malaysia, Singapore, Japan, Indonesia, Thailand, Hong Kong, Philippines and Taiwan).

There are no restrictions on the investment universe of the Subfund in terms of regions. The Subfund may invest a significant part of its total net assets in regions within either developed countries or emerging markets. Depending on the market assessment, this may at any time result in a concentration of investments in specific regions during certain period of time. As a consequence the Subfund's assets could entirely be invested either in emerging or developed markets.

The Subfund may invest into non-investment grade securities which will be rated at least "B-" by Standard & Poor's or "B3" by Moody's, or debt instruments deemed by the Management Company to be of similar credit quality.

The Subfund may invest in Onshore Renminbi denominated debt securities which are traded on the China interbank bond market (the "Onshore Debt Securities"). For the purposes of this Prospectus, "PRC" refers to the People's Republic of China (excluding the Hong Kong and Macau Special Administrative Regions and Taiwan) and the term "Chinese" shall be construed accordingly.

Under PRC regulations, certain qualified overseas financial institutions are eligible to participate in the China interbank bond direct access program (the "CIBM Program") to make investments in the PRC interbank bond market. The Investment Manager, on behalf of the Subfund has registered as a qualified institution under the CIBM Program via an onshore interbank bond trade and settlement agent, which has the responsibility for making the relevant filings and account opening with the relevant PRC authorities.

The Subfund may make investments through the CIBM Program. With the appropriate disclosures to the investors, the Subfund may also seek exposure to PRC fixed income securities through other cross border programmes approved by competent regulators including the CSSF.

Although the Subfund invests primarily in direct investments, as defined above, it may enter into derivative strategies to enhance returns. These derivatives include, but are not limited to, futures on bonds and money market instruments, interest rate swaps, options on interest rates (including caps & floors and swaptions), options on bonds and money market futures, currency forwards, currency options, options on currency futures, cross currency swaps, equity linked derivatives and credit default swaps (on single issuer and indexes). The use of credit default swaps not serving for the purpose of hedging will not exceed more than 30% of the Subfund's net assets. If the underlying of the derivatives are financial indices, such indices shall be chosen in accordance with Article 9 of the Grand-Ducal Regulation of February 8, 2008.

In addition, the Subfund may make use of total return swaps for the purpose of efficient portfolio management.

The principal amount of the Subfund's assets that can be subject to total return swaps may represent up to a maximum of 10% of the net asset value of the Subfund calculated by way of the sum of the notional of the total return swaps. It is generally expected that the amount of such total return swap will remain within the range of 0% to 10% of the net asset value of the Subfund calculated by way of the sum of the notional of the total return swaps. In certain circumstances this proportion may be higher.

The sum of notional takes into account the absolute value of the notional exposure of the total return swaps used by the Subfund. The expected amount of such total return swaps is an indicator of the intensity of the use of total return swaps within the Subfund. However, it is not necessarily an indicator of the investment risks in

relation to those instruments because it does not take into account any netting or hedging effects. For hedging purposes, the Subfund may invest up to 100% of its net assets in derivatives mentioned above.

Furthermore, the Subfund may invest, directly or indirectly, up to 10% of its net assets in convertible bonds, debt securities with warrants that are listed or traded on an exchange or a regulated market or equity and equity-type securities, whereby the Subfund may be leveraged up to 10% using derivatives linked to equity.

The Subfund may invest up to 100% of its total net assets in short dated debt instruments having a maturity less than 12 months and money market instruments, such as commercial papers, towards the end of the life cycle of the Subfund, as the Investment Manager will start replacing maturing fixed income instruments.

As set out in chapter 4, "Investment Policy", the Subfund may hold ancillary liquid assets during the lifetime of the Subfund. However, as the Subfund has a pre-defined Maturity Date, the cash proportion will be increasing towards the end of the lifetime. Consequently, the Subfund may hold up to 100% of its total net assets in cash (including sight and time deposits) with first-class financial institutions, as of 3 months before the Maturity Date.

Referring to Chapter 4 "Investment Policy" – "Credit Suisse Asset Management Sustainable Investing Policy", this Subfund promotes environmental or social characteristics and qualifies as a Fixed Income Subfund applying Exclusions, ESG Integration and Active Ownership while ensuring that the portfolio companies follow good governance practices. For this Subfund, the identification of the material ESG Factors is based on sector and geographical exposure.

### Global Exposure

The global exposure of the Subfund will be calculated on the basis of the commitment approach.

### Risk Information

Investors should read, be aware of and consider Chapter 7, "Risk Factors" of the Prospectus and all the risk information described below: Income from securities in the non-investment grade sector is higher than that earned from first-class issuers. However, the risk of losses is also greater. The higher income should be regarded as compensation for the fact that investments in this segment involve a greater risk of losses. The Subfund is more dynamic than other bond funds and has greater opportunities for growth. However, a drop in price is possible at any time. The probable returns on securities of issuers from emerging countries (emerging markets) are generally higher than the returns on similar securities of equivalent issuers from countries not classed as emerging (i.e. developed countries). Emerging countries and developing markets are defined as countries which are not classified by the World Bank as high income countries. In addition, high income countries which are included in an emerging market financial index of a leading service provider may also be considered as emerging countries and developing markets if deemed appropriate by the Management Company in the context of the Subfund's investment universe.

The markets in emerging countries are much less liquid than the developed equity markets. Moreover, in the past, these markets have experienced higher volatility than the developed markets. Potential investors should be aware that, due to the political and economic situation in emerging countries, investments in this Subfund entail a greater degree of risk, which could in turn reduce the return on the Subfund's assets. Investments in these Subfunds should only be made on a long-term basis. The investments of this Subfund are exposed to the following risks (among others): less effective public supervision, accounting and auditing methods and standards which do not match the requirements of Western legislation, possible restrictions on repatriation of the capital invested, counterparty risk in respect of individual transactions, market volatility, and insufficient liquidity affecting the Subfund's investments.

Investors should also note that the Subfund's investments may be selected without regard to geographical location. This may lead at least to a concentration in geographical terms.

Although the Subfund will implement an investment strategy aiming to preserve capital, investors must be aware that an investment in the Shares of the Subfund may involve credit risk. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. In the event that any issuer of bonds or other debt securities experiences financial or economic difficulties, this may affect the value of the relevant securities (which may be zero) and any amounts paid on such securities (which may be zero). In addition, hedging and distributions may affect the net asset value of the Subfund or a Share Class.

If foreign currencies are hedged against the reference currency, it may be done based on the notional of the respective bonds rather than on their market value. This can lead to an over- or underhedge based on market values until the maturity of the hedge and therefore result in leverage.

The Subfund has a limited duration (the "Maturity Date") and invest in financial instruments with a final maturity up to the Maturity Date. The Subfund aims at providing investors with an attractive yield. However, no guarantee is given to investors that a certain yield can be achieved. The ability to provide investors with such attractive yield is dependent upon a number of parameters, including certain market movements that might occur between the start of the subscription period and the launch date of the Subfund.

In order to avoid any adverse effect of such market movements and to be able to deliver the attractive yield to investors, thus in the best possible interest of the investors, the Investment Manager of the Subfund is allowed, but not obliged, at his discretion to undertake investments in bonds matching the Subfunds' investment principles in order to protect the attractive yield, during the subscription period, i.e. prior to the launch date of the Subfund ("pre-investments"). The scope of such investments during the subscription period is limited to investments that have already been identified by the Investment Manager as being required to preserve an attractive yield to investors and which may no longer be available after the subscription period with the same conditions.

In the case of such pre-investments, investors who subscribe at a certain point in time during the subscription period may bear the market risk generated by pre-investments executed prior to the investor's subscription.

During the initial offering period of the Subfund, investors will subscribe at the initial issue price, the latter being settled on the launch date of the Subfund. The initial offering period and launch date of the Subfund will be set at dates to be determined by the Management Company.

Sustainability risks may result in a negative impact on the returns of the Subfund. In particular, acute and chronic physical risks, new carbon taxes, exposures to litigation and changing consumer behavior have been identified as being highly relevant. Generally, these risks may lead to increased default risks for the investments. The main sustainability risks may change in the future.

Potential investors are also referred to the risks set out in Chapter 7, "Risk Factors" under section "Sustainability Risks".

#### Hedged Share Classes

As set out in Chapter 2, "Summary of Share Classes", the Subfund may issue shares in one or more alternate currencies. Share Class hedging is done through the use of forward foreign exchange transactions and/or up to 20% of its net assets, the Subfund may acquire currency options with a maturity not exceeding the Maturity Date of the Subfund. The value of these instruments depends largely upon the likelihood of favourable price movements in the underlying currency in relation to the exercise (or strike) price during the life of the option, the change in the level of volatility and interest rates. Investors must be aware that the use of currency options may impact the volatility of their investments and could reduce the yield generated on the Subfund's assets.

#### Investor Profile

The Subfund is suitable for investors with medium risk tolerance and a medium-term view who wish to invest in a broadly diversified portfolio of debt securities.

#### Investment Manager

Credit Suisse (Singapore) Ltd. and Credit Suisse (Hong Kong) Ltd. have been appointed as Co-Investment Managers for the Subfund. The Co-Investment Managers shall be jointly responsible for taking investment decisions pertaining to the Subfund's investment portfolio.

#### Subscription, Redemption and Conversion of Shares

Subscription, redemption and conversion applications must be submitted in written form to the Central Administration or a Distributor authorized by the Company to accept such applications, by 3 p.m. (Central European Time) two Banking Days prior to the Valuation Day.

Subscription, redemption and conversion applications received after this cutoff point shall be deemed to have been received prior to 3 p.m. on the next following Banking Day.

Payment of the issue price must be effected within two Banking Days after the Valuation Day on which the issue price of the Shares was determined. Payment of the redemption price of the Shares shall be made within two Banking Days following calculation of this price.

#### Adjustment of the Net Asset Value (Single Swing Pricing)

The Net Asset Value calculated in accordance with Chapter 8, "Net Asset Value" will be increased by up to a maximum of 2% per Share in the event of a net surplus of subscription applications or reduced by up to a maximum of 2% per Share in the event of a net surplus of redemption applications in respect of the applications received on the respective Valuation Day.

Under exceptional circumstances the Company may, in the interest of Shareholders, decide to increase the maximum swing factor indicated above. In such case the Company would inform the investors in accordance with Chapter 14, "Information for Shareholders".

## Credit Suisse (Lux) Fixed Maturity Bond Fund 2021 S-VI

### Investment Objective

The Subfund seeks to achieve an attractive yield by investing in debt instruments with a final maturity up to the Maturity Date of the Subfund.

The Subfund has a limited duration, as it will run until 18 December 2021 (the "Maturity Date") or any other date as defined by the Management Company prior to the launch date of the Subfund. In case the decision is taken to deviate from the aforementioned Maturity Date, the Prospectus will be updated accordingly. The lifetime of the Subfund is limited to the Maturity Date, as defined above.

The Subfund is actively managed without reference to a benchmark.

### Investment Principles

The Subfund seeks to achieve its investment objective by primarily investing directly in debt instruments, bonds, notes, and similar fixed interest or floating-rate securities (including securities issued on a discounted basis) of private, semi-private and public issuers worldwide (including emerging countries) denominated in any currency, which may not necessarily be hedged against the Subfund's Reference Currency.

Accordingly, any fluctuation in the exchange rate for such currencies in relation to the Reference Currency of the Subfund, will affect the Net Asset Value of the Subfund. The securities will not have a maturity longer than the Maturity Date of the Subfund.

Up to a maximum of 100% of the net assets of the Subfund may be allocated towards public, semi-private and private issuers which are domiciled in or carry out the bulk of their business activities in the Asian region (including without limitation China, South Korea, India, Malaysia, Singapore, Japan, Indonesia, Thailand, Hong Kong, Philippines and Taiwan).

There are no restrictions on the investment universe of the Subfund in terms of regions. The Subfund may invest a significant part of its total net assets in regions within either developed countries or emerging markets. Depending on the market assessment, this may at any time result in a concentration of investments in specific regions during certain period of time. As a consequence the Subfund's assets could entirely be invested either in emerging or developed markets.

The Subfund may invest into non-investment grade securities which will be rated at least "B-" by Standard & Poor's or "B3" by Moody's, or debt instruments deemed by the Management Company to be of similar credit quality.

The Subfund may invest in Onshore Renminbi denominated debt securities which are traded on the China interbank bond market (the "Onshore Debt Securities"). For the purposes of this Prospectus, "PRC" refers to the People's Republic of China (excluding the Hong Kong and Macau Special Administrative Regions and Taiwan) and the term "Chinese" shall be construed accordingly.

Under PRC regulations, certain qualified overseas financial institutions are eligible to participate in the China interbank bond direct access program (the "CIBM Program") to make investments in the PRC interbank bond market. The Investment Manager, on behalf of the Subfund has registered as a qualified institution under the CIBM Program via an onshore interbank bond trade and settlement agent, which has the responsibility for making the relevant filings and account opening with the relevant PRC authorities.

The Subfund may make investments through the CIBM Program. With the appropriate disclosures to the investors, the Subfund may also seek exposure to PRC fixed income securities through other cross border programmes approved by competent regulators including the CSSF.

Although the Subfund invests primarily in direct investments, as defined above, it may enter into derivative strategies to enhance returns. These derivatives include, but are not limited to, futures on bonds and money market instruments, interest rate swaps, options on interest rates (including caps & floors and swaptions), options on bonds and money market futures, currency forwards, currency options, options on currency futures, cross currency swaps, equity linked derivatives and credit default swaps (on single issuer and indexes). The use of credit default swaps not serving for the purpose of hedging will not exceed more than 30% of the Subfund's net assets. If the underlying of the derivatives are financial indices, such indices shall be chosen in accordance with Article 9 of the Grand-Ducal Regulation of February 8, 2008.

In addition, the Subfund may make use of total return swaps for the purpose of efficient portfolio management.

The principal amount of the Subfund's assets that can be subject to total return swaps may represent up to a maximum of 10% of the net asset value of the Subfund calculated by way of the sum of the notional of the total return swaps. It is generally expected that the amount of such total return swap will remain within the range of 0% to 10% of the net asset value of the Subfund calculated by way of the sum of the notional of the total return swaps. In certain circumstances this proportion may be higher.

The sum of notional takes into account the absolute value of the notional exposure of the total return swaps used by the Subfund. The expected amount of such total return swaps is an indicator of the intensity of the use of total return swaps within the Subfund. However, it is not necessarily an indicator of the investment risks in

relation to those instruments because it does not take into account any netting or hedging effects. For hedging purposes, the Subfund may invest up to 100% of its net assets in derivatives mentioned above.

Furthermore, the Subfund may invest, directly or indirectly, up to 10% of its net assets in convertible bonds, debt securities with warrants that are listed or traded on an exchange or a regulated market or equity and equity-type securities, whereby the Subfund may be leveraged up to 10% using derivatives linked to equity.

The Subfund may invest up to 100% of its total net assets in short dated debt instruments having a maturity less than 12 months and money market instruments, such as commercial papers, towards the end of the life cycle of the Subfund, as the Investment Manager will start replacing maturing fixed income instruments.

As set out in chapter 4, "Investment Policy", the Subfund may hold ancillary liquid assets during the lifetime of the Subfund. However, as the Subfund has a pre-defined Maturity Date, the cash proportion will be increasing towards the end of the lifetime. Consequently, the Subfund may hold up to 100% of its total net assets in cash (including sight and time deposits) with first-class financial institutions, as of 3 months before the Maturity Date.

### Global Exposure

The global exposure of the Subfund will be calculated on the basis of the commitment approach.

### Risk Information

Investors should read, be aware of and consider Chapter 7, "Risk Factors" of the Prospectus and all the risk information described below: Income from securities in the non-investment grade sector is higher than that earned from first-class issuers. However, the risk of losses is also greater. The higher income should be regarded as compensation for the fact that investments in this segment involve a greater risk of losses. The Subfund is more dynamic than other bond funds and has greater opportunities for growth. However, a drop in price is possible at any time. The probable returns on securities of issuers from emerging countries (emerging markets) are generally higher than the returns on similar securities of equivalent issuers from countries not classed as emerging (i.e. developed countries). Emerging countries and developing markets are defined as countries which are not classified by the World Bank as high income countries. In addition, high income countries which are included in an emerging market financial index of a leading service provider may also be considered as emerging countries and developing markets if deemed appropriate by the Management Company in the context of the Subfund's investment universe.

The markets in emerging countries are much less liquid than the developed equity markets. Moreover, in the past, these markets have experienced higher volatility than the developed markets. Potential investors should be aware that, due to the political and economic situation in emerging countries, investments in this Subfund entail a greater degree of risk, which could in turn reduce the return on the Subfund's assets. Investments in these Subfunds should only be made on a long-term basis. The investments of this Subfund are exposed to the following risks (among others): less effective public supervision, accounting and auditing methods and standards which do not match the requirements of Western legislation, possible restrictions on repatriation of the capital invested, counterparty risk in respect of individual transactions, market volatility, and insufficient liquidity affecting the Subfund's investments.

Investors should also note that the Subfund's investments may be selected without regard to geographical location. This may lead at least to a concentration in geographical terms.

Although the Subfund will implement an investment strategy aiming to preserve capital, investors must be aware that an investment in the Shares of the Subfund may involve credit risk. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. In the event that any issuer of bonds or other debt securities experiences financial or economic difficulties, this may affect the value of the relevant securities (which may be zero) and any amounts paid on such securities (which may be zero). In addition, hedging and distributions may affect the net asset value of the Subfund or a Share Class.

If foreign currencies are hedged against the reference currency, it may be done based on the notional of the respective bonds rather than on their market value. This can lead to an over- or underhedge based on market values until the maturity of the hedge and therefore result in leverage.

The Subfund has a limited duration (the "Maturity Date") and invest in financial instruments with a final maturity up to the Maturity Date. The Subfund aims at providing investors with an attractive yield. However, no guarantee is given to investors that a certain yield can be achieved. The ability to provide investors with such attractive yield is dependent upon a number of parameters, including certain market movements that might occur between the start of the subscription period and the launch date of the Subfund.

In order to avoid any adverse effect of such market movements and to be able to deliver the attractive yield to investors, thus in the best possible interest of the investors, the Investment Manager of the Subfund is allowed, but not obliged, at his discretion to undertake investments in bonds matching the Subfunds' investment principles in order to protect the attractive yield, during the subscription period, i.e. prior to the launch date of the Subfund ("pre-investments"). The scope of such investments during the subscription period is limited to investments that have already been identified by the Investment Manager as being required to preserve an attractive yield to investors and which may no longer be available after the subscription period with the same conditions.

In the case of such pre-investments, investors who subscribe at a certain point in time during the subscription period may bear the market risk generated by pre-investments executed prior to the investor's subscription.

During the initial offering period of the Subfund, investors will subscribe at the initial issue price, the latter being settled on the launch date of the Subfund. The initial offering period and launch date of the Subfund will be set at dates to be determined by the Management Company.

Sustainability risks may result in a negative impact on the returns of the Subfund. The main sustainability risks are identified and managed in the context of the overall risk management process and may change over time.

Potential investors are also referred to the risks set out in Chapter 7, "Risk Factors" under section "Sustainability Risks".

### Hedged Share Classes

As set out in Chapter 2, "Summary of Share Classes", the Subfund may issue shares in one or more alternate currencies. Share Class hedging is done through the use of forward foreign exchange transactions and/or up to 20% of its net assets, the Subfund may acquire currency options with a maturity not exceeding the Maturity Date of the Subfund. The value of these instruments depends largely upon the likelihood of favourable price movements in the underlying currency in relation to the exercise (or strike) price during the life of the option, the change in the level of volatility and interest rates. Investors must be aware that the use of currency options may impact the volatility of their investments and could reduce the yield generated on the Subfund's assets.

### Investor Profile

The Subfund is suitable for investors with medium risk tolerance and a medium-term view who wish to invest in a broadly diversified portfolio of debt securities.

### Investment Manager

Credit Suisse (Singapore) Ltd. and Credit Suisse (Hong Kong) Ltd. have been appointed as Co-Investment Managers for the Subfund. The Co-Investment Managers shall be jointly responsible for taking investment decisions pertaining to the Subfund's investment portfolio.

### Subscription, Redemption and Conversion of Shares

Subscription, redemption and conversion applications must be submitted in written form to the Central Administration or a Distributor authorized by the Company to accept such applications, by 3 p.m. (Central European Time) two Banking Days prior to the Valuation Day.

Subscription, redemption and conversion applications received after this cutoff point shall be deemed to have been received prior to 3 p.m. on the next following Banking Day.

Payment of the issue price must be effected within two Banking Days after the Valuation Day on which the issue price of the Shares was determined. Payment of the redemption price of the Shares shall be made within two Banking Days following calculation of this price.

### Adjustment of the Net Asset Value (Single Swing Pricing)

The Net Asset Value calculated in accordance with Chapter 8, "Net Asset Value" will be increased by up to a maximum of 2% per Share in the event of a net surplus of subscription applications or reduced by up to a maximum of 2% per Share in the event of a net surplus of redemption applications in respect of the applications received on the respective Valuation Day.

Under exceptional circumstances the Company may, in the interest of Shareholders, decide to increase the maximum swing factor indicated above. In such case the Company would inform the investors in accordance with Chapter 14, "Information for Shareholders".

## 24. Additional information for investors in Germany

**No notification pursuant to Sec. 310 of the German Capital Investment Code (Kapitalanlagegesetzbuch) has been filed for the following Subfund and the Shares in this Subfund may not be marketed to investors in the Federal Republic of Germany:**

### **-Credit Suisse (Lux) Fixed Maturity Bond Fund 2021 S-VI**

All Share Classes are only available in uncertificated registered form and will exist exclusively as book entries. No printed individual certificates were issued in respect of the Shares.

Applications for redemption and conversion of Shares which may be distributed in Germany may be submitted to the Central Administration (Credit Suisse Fund Services (Luxembourg) S.A., 5, rue Jean Monnet, L-2180 Luxembourg). All payments which are intended for Shareholders (including the ones of redemption and dividend proceeds) may be channeled, at their request, via the Central Administration. The Central Administration will disburse its payments to the registered Shareholders domiciled in Germany. The registered Shareholders will be responsible for the further distribution of the payments to the end investors (if any).

Credit Suisse (Deutschland) AG, Taunustor 1, D-60310 Frankfurt am Main acts as information agent for the Company in Germany (the "**Information Agent in Germany**").

The prospectus, the Key Investor Information Document, the Articles of Incorporation, the audited annual report and the unaudited semi-annual report, the issue, redemption and conversion prices, as well as any additional information specified in the chapter "Information for Shareholders", may be obtained free of charge at the Information Agent in Germany.

Any announcements to Shareholders and the issue and redemption prices, shall be published on the internet at [www.credit-suisse.com](http://www.credit-suisse.com). The Company's Board of Directors may also place announcements in other newspapers and periodicals of its choice.

Furthermore, registered investors will be notified by way of durable medium in the following instances:

- Suspension of the redemption of Shares;
- Liquidation of the Company or a Subfund;
- Amendments to the Articles of Incorporation which are not compatible with the existing investment principles, affect significant investor rights, or relate to remuneration or compensation of expenses (stating the background and the investors' rights);
- Merger of a Subfund;
- Conversion of a Subfund into a Feeder Fund.
